---

Thank you, Rebecca. I never saw the sign on that pole. It must have come off very early.

Yes, the under-grounding of utilities is very important to me. I see it going on all over Palo Alto and look forward to having it in our neighborhood someday, even though I know it's not going to be soon. I do not want the Verizon project making our under grounding of utilities impossible. That would not be fair. Verizon should stay out of residential neighborhoods for that reason. They can put their cells on utility substations, city, industrial or commercial buildings

Thanks,

Francesca

Hello Francesca,

Thank you for your email.

I will check in with the applicant team about the status of notice boards on poles on this and in general.

To answer your questions:

It has happened in the past that some notice boards were damaged or taken down by some unknown circumstance or entity and the applicant has had to repost – the idea is to keep up the notice boards on all poles initially proposed for a node, regardless of status, as we all move through the review process. This seems like the most conservative and most transparent approach, as the notice boards have the application numbers and contact information - this allows for members of the public to more easily look up the status or contact the Planning Department.

It is my understanding that Node 140 was pulled from consideration/decision with the Feb 26 project plans primarily because of the applicant's ongoing further study of vaulting feasibility on that node - it is anticipated that the applicant would apply again at some point in the future.

Regards,

Rebecca

Hi Rebecca,

I noticed recently that pole 3971 near 450 Loma Verde has a new notice of proposed project on this site. I know that this pole did not have a sign before, but since it was taken off of Verizon's approved list of March 15th, I wasn't concerned. Now I am worried. Does this mean that those 4 poles that were taken off the list are still in consideration? Can you please explain to me why the city is putting signs up on poles that are not part of the approved project? Is Verizon planning to include the 4 poles that were taken off as soon as it can?

Thank you,

Francesca
