| **Subject:** | Record Request for Mailing Lists for residents near Close Proximity Microwave Radiation Antennas (CPMRA) in Palo Alto, Round 3 |
| **Date:** | Thursday, April 19, 2018 4:06:58 PM |

Hi, Rebecca.

Voluminous? Nice try. Voluminous is not an accurate characterization of my data request for the following reasons:

1. The City of Palo Alto **already mailed cards** to the affected households, though to not enough of them. The Close Proximity Microwave Radiation Antennas (CPMRA) affect residents in a 1.5 to 3 mile radius from each CPMRA, yet Palo Alto Planning only mailed cards to people within several hundred feet of each proposed CPMRA installation. Will you please confirm within how many feet? **150? 300? 600?**

2. Every mass mailing I have managed starts with several database queries and exports, some light data cleaning in a spreadsheet and then a mail merge

3. This is -- for certain -- data that the **City of Palo Alto Planning already has on premises in its database**.

4. We are merely asking Palo Alto planning to repeat the very same data queries and exports that the City already executed to make the original mailings. We are requesting a digital spreadsheet or pdf of the addresses emailed to us. We are requesting no printed copies. **We made the data request back on Wed 4/11/18**.

5. As a computer database and automation expert, it is my opinion that this is probably **less than 30 minutes of work**.

Today is Thu Apr 19. Your proposal to deliver the data by Mon May 3 is a **full three weeks from the original request**. This is, quite simply, an **unreasonably slow response** and will **adversely affect** the ability of Palo Alto residents to defend their **economic, safety and privacy rights** that are being threatened by ill-advised decisions by Palo Alto planning.

Is Palo Alto planning colluding with Viniculums/Verizon on this project? I would hope not. I would hope that Palo Alto Planning, instead, would see that it is in their best interests to respond to the public's requests in a timely manner.

I will look forward to you reconsidering your unreasonably slow response to our request and provide the requested data in the next 48 hours which would be a **reasonable ten days from our original request**.

Otherwise, we will will file formal complaints with the City Manager and City Council members about the Palo Alto Planning Staff's long record of non-responsiveness.

Dear Amrutha Kattamuri and Paul McGavin.

Via email, you requested access to a mailing list to whom the City of Palo Alto mailed notices for all Clusters that are facing installation of Close Proximity Microwave Radiation Antennas (CPMRA) in Palo Alto's residential zones.

Due to the voluminous nature of your request, the City is continuing to collect and review relevant records. The City plans to begin producing the records by May 3, 2018.

Your contact regarding this topic is Yolanda Cervantes, cc'd here. Ms. Cervantes is Administrative Assistant to Director Gitelman.

Regards,

Rebecca

I still did not hear back from Rebecca. I also called her thrice yesterday to know until what day we can submit public comments. I am really looking forward to seeing answers to all these questions below.

Thanks,
Amrutha

Hi, Rebecca.

I have a few follow up questions -- how do we get access to the mailing list to whom the City of Palo Alto mailed notices for all Clusters that are facing installation of Close Proximity Microwave Radiation Antennas (CPMRA) in Palo Alto's residential zones? Will you please confirm that the mailing list is part of the public record?

Also, will the City of Palo Alto planning staff **now, finally. have the time to** answer the many reasonable questions that you and others in the City of Palo Alto Planning Department have **refused to answer** since 12/6/17? You have a list of these unanswered questions in the public record.

If you are having any problem locating these questions, then please email to let me know that and I I will send them again.

> 1 & 2 - Please feel free to submit public comments in the same manner(s) as everyone has already been doing – comments have come in via email and hardcopy according to people's preferences.
>
> 3 – the list that I showed you was the address list result from our mailing radius following our Municipal Code noticing procedure. We also put notice in the newspaper. We keep a copy of notices, etc. that we have sent out as part of the administrative record. It's not something we have a link for. This is all very standard for processing, not something that we prepare special to wireless projects.
