Hello Francesca,

Good afternoon.

As your questions relate to items members of the public wrote about in their appeals, I will need to let the City Manager's Report that goes to Council (likely released around May 10) be the next communication on the topic of undergrounding of utilities.

However, in the meantime, it is my understanding that there are some sections in Master License Agreements with wireless carriers that speak to interactions with underground utility district implementation. The City Manager's Report with background information on the Verizon MLA can be found at the following weblink: http://cityofpaloalto.org/civicax/filebank/documents/52893. You might find information of interest there, likely also in the CMR attachments. The long title is: Master License Agreement for Use of City-Controlled Space on Utility Poles and Streetlight Poles and in Conduits ("MLA") between the City of Palo Alto and GTE Mobilnet of California Limited Partnership, DBA Verizon Wireless…..

FYI - Jim Fleming is your contact in the Utilities Department, which is the lead on any Master License Agreement.

Regards,

Rebecca

Thanks, Rebecca. Can you tell me anything about the under grounding of our utilities? Will Verizon's cell node plans interfere with the city's plan to underground our utilities?

Thank you,

Francesca

Dear Francesca Kautz,
Good afternoon.

Confirming receipt of your email and questions. I will get back to you as I can about future submittals/resubmittals after we focus on the near-term appeals process to Council.
Thinking ahead though regarding your requested information, I sometimes don't know the timing of submittals and/or resubmittals or pole locations (same or different locations) until they come in. However, the applicant team would be the ones to know this information first and they welcome members of the public to contact them with questions, including in regard to anticipated timing of submittals and resubmittals. Here is the Vinculums/Verizon applicant team primary contact person - Mary Diesch | Vinculums Services | Site Acquisition Manager, Small Cells | office +1-415-730-3700 | mdiesch@vinculums.com.
Regards,
Rebecca

Hi Rebecca,

Can you please tell me if and/or when Verizon resubmits for pole 3971 or for any of the other 3 poles that were taken off the list?

Can you please confirm that any plans for these installations would have to go through an ARB hearing just as the other 11 installations in Cluster 1 did?

Thank you,

Francesca
