Subject: Verizon Equipment must be underground

Dear City Council and City Clerk,

Please accept my email as a request to oveturn the decision about the Verizon equipment on ground.

1. Verizon's claims that it cannot underground its equipment are not credible. For one thing, Verizon has vaulted its equipment in other cities. And for another, Palo Alto has successfully undergrounded electrical utilities under exactly the same conditions Verizon says represent an insurmountable hurdle to undergrounding its equipment.
2. Approval should be granted to Verizon to install its cell towers *only* on the conditions that: a) the company locate all of its equipment, except the antenna, underground, in flush-to-the-ground vaults with no protuberances; and b) none of its equipment may exceed the noise levels permitted by Palo Alto's ordinances. Again, this is eminently possible. It will simply cost Verizon a little more money than littering our poles with the equipment.

Sincerely,

Irina Parievsky
Resident of Palo Alto
