Hello Francesca,

Thank you for your email.

I will check in with the applicant team about the status of notice boards on poles on this and in general.

To answer your questions:

It has happened in the past that some notice boards were damaged or taken down by some unknown circumstance or entity and the applicant has had to repost – the idea is to keep up the notice boards on all poles initially proposed for a node, regardless of status, as we all move through the review process. This seems like the most conservative and most transparent approach, as the notice boards have the application numbers and contact information - this allows for members of the public to more easily look up the status or contact the Planning Department.

It is my understanding that Node 140 was pulled from consideration/decision with the Feb 26 project plans primarily because of the applicant's ongoing further study of vaulting feasibility on that node - it is anticipated that the applicant would apply again at some point in the future.

Regards,

Rebecca

Subject: New cell node?

Hi Rebecca,

I noticed recently that pole 3971 near 450 Loma Verde has a new notice of proposed project on this site. I know that this pole did not have a sign before, but since it was taken off of Verizon's approved list of March 15th, I wasn't concerned. Now I am worried. Does this mean that those 4 poles that were taken off the list are still in consideration? Can you please explain to me why the city is putting signs up on poles that are not part of the approved project? Is Verizon planning to include the 4 poles that were taken off as soon as it can?

Thank you,

Francesca

File Number: 17PLN-00169

Project Type: **Tier 3 Wireless Communication Facility, Architectural Review, Conditional Use Permit**

Address: 250 HAMILTON AV – Multiple Addresses Proposed – See Project Description

Project Description: Request by Mary Diesch of Vinculums, on behalf of GTE Mobilnet dba Verizon Wireless, for a Tier 3 Wireless Communication Facility Permit Application for the deployment of small cell wireless communication equipment on utility poles in the public right of way. The project plans provide information on equipment configurations. This application proposes 18 small cell node locations within the Mid-Town, Palo Verde, St. Claire Gardens, and South of Mid-Town neighborhoods. These node locations are identified as Cluster 1 within the overall proposed deployment of 93 small cell node locations throughout the City. For further background information, please refer to the Vinculums/Verizon project website (improveyourwireless.com/paloalto/), the City's website (aca.accela.com/paloalto/ search under the project file number 17PLN-00169) and the 2016 Master License Agreement process (cityofpaloalto.org/civicax/filebank/documents/52893).

Applicant / Phone: Mary Diesch / 925-482-8563 / mdiesch@vinculums.com

City Contact: Rebecca Atkinson / 650-329-2596
