Dear Larry Alton,
For your reference, I've attached the project description, dated 06/27/18, for the Crown Castle/Verizon (Cluster 3 – 17PLN-00450) application for small cell wireless facilities in the Downtown North neighborhood.
Regards,
Rebecca

Dear Larry Alton,

Thank you for your voice message this weekend.

I've included a snapshot below of the vicinity map showing the proposed locations for small cell wireless facilities by Crown Castle/Verizon (Cluster 3 – 17PLN-00450) in the Downtown North neighborhood.

The project plans are online and downloadable at aca.accela.com/paloalto/ (search under 17PLN-00450). I've included a snapshot of the files below.

I will send you the updated project description for 17PLN-00450 under a separate email in case there are any spam blockers on your email account.

Over the weekend, we determined that both Crown Castle/Verizon (Cluster 3 - 17PLN-00450) in the Downtown North neighborhood and Crown Castle/Verizon (Cluster 2 – 17PLN-00433) in the University South neighborhood were still **incomplete** regarding application status. The applicant needs to provide more information on project design, fix inaccuracies in their project description, and address other items. We have not scheduled either project for an Architectural Review Board meeting yet.

Please feel free to contact me with any questions you might have.

Regards,

Rebecca

Subject: Wireless Projects in the Right of Way Websites

Dear Larry Alton,
Thank you for your phone call.
Per your request, here are a few websites by which you can track wireless projects proposed for location in the public right of way:

- The application file number for small cell nodes in your neighborhood near Johnson Park is (17PLN-00450) Crown Castle/Verizon Cluster 3. My colleague, Alicia Spotwood, will be updating the project website (https://www.cityofpaloalto.org/news/displaynews.asp?NewsID=4192) this week for 17PLN-00450 by uploading the March 2018 project plans that the applicant resubmitted. The March 2018 project plans are deemed incomplete, so we anticipate that Crown Castle/Verizon will resubmit again sometime in May with an evolved design.
- aca.accela.com/paloalto/ (search under 17PLN-00450) is another website that can be used to see more records and older v later versions of project plans, project descriptions and so forth.
- I anticipate that Vinculums/Verizon will also file an application for small cell nodes in the Downtown North neighborhood, but I don't know locations or the design for that yet and won't until we receive their application.
- The City Manager's Office maintains a webpage that provides periodic updates on wireless projects proposed for the right of way - https://www.cityofpaloalto.org/gov/topics/wireless_communication_facilities/default.asp.

Feel free to send me any comments you might have on 17PLN-00450 and I'll include them in my compilation of public correspondence. Feel free to send me any further questions that you might have.
Regards,
Rebecca
