Date: Tuesday, July 10, 2018 12:42:00 PM

Dear Ardan Michael Blum,
Thank you for your emails.
I'll include them in the record.
You are correct that the Crown Castle/Verizon applicant is proposing a node in the vicinity of Forest/Gilman.
Crown Castle/Verizon had the node near 345 Forest in their Prelim application, submitted for across the street in their initial formal application, and then switched it back to 345 Forest in this recent resubmittal on 06/27/18.
We deemed the formal application incomplete again this past weekend and this node is not scheduled for a meeting with the Architectural Review Board at this time.
Feel free to contact me if you have questions.
Regards,
Rebecca

Subject: Typos corrected / text changed slightly - Cell relay on light at 345 Forest Av with a large box next to a prime historic location

Warm hello,

I do wish to come back to you today with a plea - that you will not allow the placement of cell relay on the light at 345 Forest Av as it includes a large box to be added next to this street light. Note that people daily are taking pictures at this 1930s building from the street and such a box will block the view - sure it is not a "huge" box in the eyes of the people trying to set it up, yet the reality is that it WOULD change the view of the fountain as seen

from the road.

Have a walk over to my courtyard and see for yourselves!

With respect and warm regards,

Ardan Michael Blum
