Good afternoon, Rebecca.

Thank you for this helpful update and for the 433 and 450 project descriptions and directions for accessing the project plans.

Regards to you,

Jeanne

Subject: RE: Question

Dear Jeanne,
I determined this past weekend that the applications 17PLN-00433 and 17PLN-00450 remain incomplete.
We are awaiting further design clarification, updated RF reports, and other information.
A meeting with the Architectural Review Board is not yet scheduled.
I am attaching the project descriptions for both for your easy reference.
The project plans are online in Accela (aca.accela.com/paloalto/ - search using the application numbers and the PDFs are listed as Attachments under Record Info) and I'm working to get them uploaded to the project websites.
Regards,
Rebecca

Thanks for your prompt response, Rebecca.

I don't need to see the resubmittals before they go on line, but thank you for offering.

May I assume you will update the Wireless page to reflect the shot clocks when you know whether Crown Castle/Verizon 2 and 3 are complete?

Regards to you,

Jeanne

Subject: RE: Question

Hello Jeanne,
Thank you for your email.
Yes, I saw that that wording went out on the webpage update.
I'm actually still in the process of 1) unpacking the two resubmittals, 2) determining the project status for both, and 3) getting all of the electronic documents uploaded to all of the various databases and websites.
My main priority right now though is 1) and 2) - to review what was submitted within the only 10 days allowed for the two resubmittals per the shot clock in order to determine their project status.
Please feel free to contact me again next week.
If you'd like to see the hardcopy of the two resubmittals before I get them all uploaded, please feel free to make an appointment to see them at City Hall.
Regards,
Rebecca

Status:
Crown Castle/Verizon Cluster 1 – incomplete.
Crown Castle/Verizon Cluster 2 – shot clock ticking, complete/incomplete status pending review of resubmittal. If incomplete, 50 days will have expired on shot clock. If complete, then shot clock ticking on remaining days from June 27.
Crown Castle/Verizon Cluster 3 – shot clock ticking, complete/incomplete status pending review of resubmittal. If incomplete, 50 days will have expired on shot clock. If complete, then shot clock ticking on remaining days from June 27.
Vinculums/Verizon Cluster 2 – subject to tolling agreement upon resubmittal.
Vinculums/Verizon Cluster 3 – incomplete.

Subject: Question

Hello there, Rebecca,

And thanks for updating the City's Wireless page.

Two questions: First, although the Update says that Crown Castle/Verizon resubmitted applications on June 27th for Clusters 2 and 3 and that these resubmittals are available on line, I can't find them. (The most recent submittal is from March.) So, would you please send me a link to both revised application?

Second, please tell me where the shot clocks stand for all of the Crown Castle/Verizon applications and for the Vinculums/Verizon Cluster 2 and Cluster 3 applications.

Thanks very much,

Jeanne
