RE: PHASE I PRELIMINARY ENVIRONMENTAL SITE ASSESSMENT
1700 EMBACADERO RD (APN 008-03-084)
PALO ALTO, CALIFORNIA

Dear Mr. Hsiang:

In accordance with your request we have performed a Phase I Preliminary Environmental Site Assessment for the above-referenced property in Palo Alto, California. The accompanying report summarizes the results of our field reconnaissance, regulatory and historical review, and presents our conclusions regarding the assessment.

This work was performed using guidance of the standard practice for phase one environmental assessments with the limitations noted in this report. We refer you to the report for detailed discussion of our study.

Thank you for the opportunity to work with you on this property. If you have any questions concerning our study, please call.

Very truly yours,

ROMIG ENGINEERS, INC.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
1700 EMBARCADERO ROAD
(APN 008-03-084)
PALO ALTO, CALIFORNIA

1.0 INTRODUCTION

We are pleased to present this Phase I Environmental Site Assessment (ESA) for the referenced property in Palo Alto, California. The site is located at 1700 Embarcadero Road in Palo Alto, California (APN 008-03-084), as shown on the Vicinity Map, Figure 1 and Site Sketch Map, Figure 2.

1.1 Purpose

The purpose of this ESA was to research the environmental setting of the property, site history, and contamination incidents reported at or near the site. The ESA may be used as a part of site inquiry to ascertain potential environmental problems that may be used to satisfy one of the requirements of CERCLA landowner liability (although it is our understanding that this site is not part of a specifically designated USEPA Brownfields Assessment). This work is performed using guidance of the standard practice for "all appropriate inquiry (AAI)" with the limitations noted in this report. Analysis of soil, soil vapor, ground water, lead paint, and mold or asbestos samples was not included in our scope of work. The purpose of the ESA was to ascertain whether a "recognized environmental concern" is present on the site property as outlined in the following definition;

Excerpt from ASTM E-1527-05: Definition of Recognized Environmental Concern

Excerpted from:

ASTM E-1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Published Nov. 2005, American Society of Testing and Materials.

3. Terminology
3.3 Definition of terms specific to this standard:

3.3.31 recognized environmental conditions - the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water or the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

1.2 Involved Parties

We have been retained by Mr. Wu-Chung Hsiang (Client) to perform an ESA for the referenced property. According to the EDR research, H. C. investment Associates LP currently owns the property.

1.3 Scope of Work

The scope of work of this study was presented in detail in our agreement with you, dated April 24, 2013. This work was performed using guidance of ASTM E1527-05 standard that includes practice for "all appropriate inquiry" (AAI), per the final rule issued November 1, 2005 and effective November 1, 2006 (modified as noted below). In order to accomplish this work, we have performed the following services:

- Observation of current conditions at the site, on the adjoining properties and in the immediate site vicinity.

- Review of available physical and historical setting records to help establish the site history and environmental setting. This included review of aerial photographs, topographic maps, and geologic and hydrogeologic literature. We were not provided a 50-year title search or review for this work.

- Review of selected government lists and databases to help establish whether contamination incidents have been reported at the site, or in the immediate vicinity. We also contacted and reviewed information as available from the City of Palo Alto Building Department, the Santa Clara County Department of Environmental Health, Building and Assessors offices, the State Regional Water Quality Control Board (RWQCB) and the State Department of Toxic Substances for relevant information relating to property.

- Review of environmental lien and activity use limitation (if any) information provided by EDR and other information as available from the Client.

- Preparation of this report as a summary of our findings.

The following limitations/deviations to the phase one scope were as follows:

- We spoke briefly to the property owner Mr. Hsiang and received an ESA questionnaire from the property owner, but we did not speak to the neighbors or the former tenants.

2.0 GENERAL SITE CHARACTERISTICS

2.1 Site Location

The property is a rectangular-shaped parcel of about 2.5 acres at 1700 Embarcadero Road in Palo Alto California. The Site Topographic Map, Figure 1, shows the general location of the site and adjoining properties.

2.2 Adjacent Properties

The site is located in a mixed residential and commercial urban area in Palo Alto. The adjoining properties to the site include the Carlsen Audi automobile dealership and office buildings as shown on Figure 2.

2.3 Site Description and Current Site Uses

At the time of our site visit, the subject property was a relatively flat rectangular-shaped parcel of about 2.5 acres. The property is developed with a two-story building, asphalt parking lot and perimeter landscaped areas. Ming's Restaurant occupies the building.

The approximate site layout is shown on the Site Sketch Map, Figure 2.

3.0 ENVIRONMENTAL SETTING

3.1 Regional Physiographic Conditions

EDR provided a historic topographic map review for the property. Topographic maps were reviewed to gather physiographic information and included the 15-minute Palo Alto Quadrangle maps (1899, 1943, 1947, 1948, 1961); and the Santa Cruz 15-minute Quadrangle (1902). The 7.5-minute Palo Alto Quadrangle maps are either revised or photorevised in 1953, 1961, 1968 1973, 1991 and 1997. These topographic maps show that the site area is located at an elevation of about 8 feet above mean sea level and that the area gently slopes to the north-northeast toward the San Francisco Bay. The San Francisco Bay fringe is about 3,000 feet to the east-northeast. The subject property appears within a developed area beginning with the 1943 map. No other pertinent information was noted.

3.2 Soil Conditions

Geologic information for the area and our on-site experience (Romig, 2009) indicates the site is underlain by a layer of artificial fill about 6 feet thick that was placed prior to site development. Underlying the surface fill, approximately 6 feet of soft, compressible, younger Bay Mud is present. Below the fill and Bay Mud, Quaternary-age flood plain and bay deposits underlie the site region. The flood plain deposits are generally found to consist of silty clay, sandy clay and clayey sand. The site vicinity is almost completely covered by urban development.

3.3 Regional Geologic Conditions

The site is located near the fringe of San Francisco Bay in the eastern portion of San Francisco Peninsula, in the Coast Ranges. The region is underlain by thick sequences of Mesozoic and Cenozoic rocks, unconsolidated sand, gravel, silt and clay deposits that are cut by northwest-trending large, regional active fault systems that generate damaging earthquakes. Alluvium generated from the Coast Range hills has been deposited below the site. The San Andreas fault is about 7.5 miles southwest; the Hayward fault about 12 miles northeast; the Calaveras fault about 18 miles northeast and the San Gregorio fault is about 18 miles southwest of the property.

3.4 Ground Water Conditions

The site lies in the eastern portion of the Santa Clara Valley Ground Water Sub-basin along the San Francisco Bay fringe. Regional ground water flow direction in the area is estimated as northeasterly, toward the San Francisco Bay. The depth to shallow ground

water in the property was measured in boreholes at about 7 feet below the surface (Romig, 2009). Deeper large aquifers below about 150 to 300 feet supply quantities of groundwater for municipal, drinking water and industrial use.

The property occurs on relatively flat ground and is not listed within a 100-year flood plain and is not listed in a 500-flood zone (EDR-cited FEMA Flood Panel 060 7080001A; see EDR Radius Report).

We did not observe any water bodies or vegetation indicative of wetlands on the subject property. "Wetlands" is a general term used to describe a variety of ecosystems, which may include prairie potholes, marshes, fens, bogs, wet meadows, and swamps.

4.0 RESULTS OF INVESTIGATON

4.1 Site Observations

Our representative, Christopher Palmer visited the site on May 23, 2013 (see Figures 1 and 2). Mr. Wu-Chung Hsiang accompanied our representative on the ESA visit. Photographs taken during our site reconnaissance are presented in Figures 3 through 7. The subject property is developed with a two-story building. The building is divided into bar, restaurant and banquet spaces for patrons. A large kitchen and food preparation area is located at the rear of the building. Freezers and storage areas are located in the kitchen area. The building second floor is used for restaurant business office space.

A trash enclosure for dumpsters and a kitchen grease collector is located at the rear of the property. The building interior and exterior appeared well maintained. One concrete-pad mounted transformer is located in the rear parking lot. Suspect leakage was not observed.

We did not observe any pits, ponds, stains, odors or materials suggestive of hazardous storage or spills, and we did not observe any surface indications of underground storage tanks on the subject property.

4.2 Adjacent Site and Vicinity Observations

Our drive-by of the immediate site vicinity revealed that the general site vicinity is developed with office building development to the northwest, southwest and southeast. The Carlsen Audi dealership is located to the northeast. Please note that our site vicinity reconnaissance was limited to a visual observation of the exterior of the facilities in the immediate area around the site. Other facilities, which use hazardous materials, may exist in the general site vicinity.

4.3 Results of Regulatory Agency Review

City of Palo Alto

The Palo Alto Building and Planning Department was visited on May 23, 2013 to review the permit information. The Building Department had permits for outdoor dining and interior improvements, roofing and HVAC on file. The earliest permit was permit number 94-1292 dated 5/25/94 for a new addition to the building (see permits copies and EDR Building Permit Report and Appendix B).

Santa Clara County Environmental Health Department and Assessors Office

We contacted the Santa Clara County Environmental Health Department by email request for file review regarding any underground tank or hazardous materials files for the property addresses. There were no underground tanks or hazardous materials information at the property address according to Santa Clara County.

We contacted the Assessors Office website to check the property APN and general information.

Regional Water Quality Control Board (RWQCB)

We contacted the San Francisco Bay Area Regional Water Quality Control Board GEOTRACKER website and there was no information on file for the property address.

Department of Toxic Substances (DTSC)

We contacted the Department of Toxic Substances (DTSC) ENVIROSTOR and website to check the property addresses for listing as a contaminant site. According to the DTSC information there were no files listed for the site address.

Reported Spills

Several United States Environmental Protection Agency (EPA) and State of California environmental record lists or databases were reviewed for information on reported contamination incidents, and hazardous materials generators, in the general site vicinity. EDR prepared a database review of a number of the lists reviewed, the search radius, and an explanation of the abbreviations used in the following text are presented in Table 1 below. A more complete explanation of the lists reviewed, and a map showing the location of identified sites, are presented in Appendix E. EDR maintains contact with those agencies and periodically updates the lists. In some cases agencies no longer use or update certain lists.

No spill incidents were reported by EDR for the subject site. The EDR search of available ("reasonably ascertainable") government records did not reveal any mapped site for the following federal databases: National Priority List (NPL), Proposed National Priority List (Proposed NPL), nor the Emergency Response Notification System (ERNS). Selected regulatory database lists are shown below; please refer to the EDR database search in Appendix E for more information.

TP = Target Property **X** - Target Property address listed on database

* - Date listed is date of activation of regulatory database by EDR for search or if list not updated, last date of EDR contact with agency. See EDR Radius report for more information.

The target property address is not listed on the databases by EDR (see Appendix E).

The area around the subject property has numerous listings for active and closed groundwater contaminant sites (see EDR report). The following sites were listed on databases prepared by EDR within about 1,700 feet of the subject property that may indicate a site use or site history that can be associated with ground water or soil vapor contamination:

Listed Site	Distance from Subject Property as Plotted by EDR	Brief Summary
Carlsen Porsche Audi Inc. 1730 Embarcadero Road	558 feet NE apparent side to down gradient	CA FID UST, HIST UST, SWEEPS UST, HIST CORTESE, HIST LUST, CUPA Listings: LUST Cleanup Site, completed case closed.
Stanford Honda 1766 Embarcadero Road	558 feet ESE apparent side to up gradient	HIST CORTESE, HIST LUST, SLIC, CUPA Listings: LUST Cleanup Site, completed case closed.
Collagen Inc., Angiotech Biomaterials Corp. 2500 Faber Place	820 feet ENE apparent side to up gradient	CA FID UST, RCRA Nongen/NLR, HIST UST, SWEEPS UST, HIST CORTESE, HIST LUST, CUPA Listings: LUST Cleanup Site, completed case closed.
Old Post Office Palo Alto 2197 E Bayshore Rd	1489 feet WNW apparent side to upgradient	HIST UST, SWEEPS UST, HIST CORTESE, HIST LUST, CUPA Listings, LUST: LUST Cleanup Site, completed case closed.

In our opinion, the remaining listed sites in the table above are either closed or in locations that should not affect the subject property by either soil vapor or groundwater contaminants. Several sites that are open are under regulatory review. No other spill incidents listed by EDR were noted which appear to have the potential to impact the subject property in our opinion. Several facilities that reportedly use, generate, store or treat hazardous materials in the area were also identified in the property area on databases searched. No active landfills or transfer stations were identified within the radius searched.

Environmental Lien Report

Environmental Data Resources (EDR) researched whether environmental liens had been filed on the property APN number. No liens or activity use limitations were found. The environmental lien report is presented in Appendix A.

Preliminary Title Report

A Preliminary Title report was not forwarded to us for review.

4.4 Results of the Site History Review

Personnel Interviews

Our representative briefly interviewed Mr. Wu-Chung Hsiang, the property owner, on May 23, 2013. Mr. Hsiang owns the property and his wife Ms. Vicky Ching runs the Ming's Restaurant. The restaurant has been in the building for over 40 years. Mr. Hsiang stated there were no hazardous materials or contaminant problems on the property.

Aerial Photographs

We reviewed historical aerial photographs supplied by the EDR-Aerial Photography Print Service to help establish prior land use. The photographs reviewed are listed in Table 2 below. No aerial photographs were reviewed prior to 1939 or after 2012 for the property.

The property appears undeveloped in 1939, 1948, and 1956 photographs and appears to be occasionally used for row crop agriculture. The 1968 photograph shows what appears to be the existing building under construction. The building appears completed in the 1974 photograph, and no changes are noted for the property on the 1982 through 2012 photographs.

Table 2. Aerial Photographs Reviewed
1700 Embarcadero Road
Palo Alto, California

Date	Scale	Flyer
1939	1"=500'	Fairchild
1948	1"=500'	USGS
1956	1"=500'	Aero
1968	1"=500'	USGS
1974	1"=500'	USGS
1982	1"=500'	WSA
1991	1"=500'	EDR
1998	1"=500'	WAC
2005	1"=500'	EDR
2009	1"=500'	EDR
2010	1"=500'	EDR
2012	1"=500'	EDR

Historical Maps

The 15-minute Palo Alto Quadrangle map (1899, 1943, 1947, 1948, 1961) Santa Cruz map (1902) and the Palo Alto 7.5-minute Quadrangle maps prepared in 1953 and either revised or photorevised in 1953, 1961, 1968, 1973, 1991 and 1997 were reviewed. These topographic maps show that the site area is located at an elevation of about 8 feet above mean sea level. The maps show increasing urban development in the property area from about 1953.

Sanborn Maps

Sanborn Mapping was researched through EDR, to establish whether historical Sanborn maps were available for the site. These maps were originally produced to show buildings in sufficient detail to allow insurance underwriters to estimate risks and premiums. EDR research showed that the property was not mapped.

City Directories

EDR prepared a City Directory search from available editions of the Haines and Company, Pacific Bell White Pages, Pacific Telephone, and Polk City Directories from 1922 to 2010 with address listings by year as follows (see EDR report, Appendix F, for complete listings). EDR provides images of the directory in their report. The following listings for subject property address by directory source, listed by year and property address were found:

1970 - Polk: Mings Restr.
1978 - Polk: Mings Restr.
1986 - Pacific Bell, Pacific Telephone: Mings of Palo Alto.
1991 - Pacific Bell White pages: Mings Villa of Palo Alto.
2001 - Haines: OCHING Vicky Mings of Palo Alto.
2007 - Cole Information Services: Mings Chinese Cuisine & Bar.
2012 - Cole Information Services: Mings Chinese Cuisine & Bar.

Asbestos-Containing Materials (ACM) and Lead Paint (LBP)

A material is defined to be ACBM, under California State regulations, if it contains greater than 0.1% asbestos by weight. When referring to asbestos, friable means the material, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure. Friable ACBM are more likely than non-friable ACBM to release fibers when disturbed or damaged. The level of the preliminary screening performed was designed solely to identify the presence of the most obvious and common ACBM, not to comply with the survey requirements of the Asbestos Hazard Emergency Response Act (AHERA) of 1986. The Occupational Safety and Health Administration (OSHA) found the installation

of friable surfacing material and thermal system insulation after December 31, 1980 unlikely. The definition of suspect ACM and presumed asbestos containing material is taken from 29 CRF Parts 1910, et al. Occupational Exposure to Asbestos; Final Rule.

LBP, as defined in the department of Housing and Urban Development (HUD) regulations, are paints that contain greater than 0.5% or (5,000) ppm of lead, based on dry weight. Section 302 of the Lead-Based Paint Poison Prevention act requires public housing projects to be inspected for LBP. The sale of paints containing more than (600) ppm of lead to consumers was banned by the Consumer Product Safety Commission (CPSC) in 1978. The CPSC ban does not apply to structural steel building components, such as columns, beams, and decking, that are painted as part of the fabrication process.

The property building was constructed prior to 1970 so ACBM and LBP may be considered a potential concern for the property.

ESA User Questionnaire

Mr. Wu-Chung Hsiang the owner returned the ESA questionnaire and was not aware of any contaminant problems or hazardous materials issues with the property (Appendix B).

Data Gaps

In our opinion there are no data gaps in this study. The property was undeveloped according to topographic maps dating to 1899 and in aerial photographs dating from 1939 until about 1968. Ming's Restaurant has occupied the building since 1970. The property use appears verified by the historic research.

4.5 Radon

The California Department of Health Services has conducted radon testing of 2,858 sites in California. Of these sites, 3.8 percent had radon levels above 4 pCi/l (Pico curies per liter) with the highest level being 29 pCi/l. EPA recommends that action be taken to reduce levels with between 4 and 26 pCi/l over a period of a few years. The USEPA Radon Zone for Santa Clara County is 2. No radon was detected above 4 pCi/l for the sites tested for the County as reported in the EDR Radius report. Radon is not believed to be a concern at the subject property.

5.0 CONCLUSIONS AND RECOMMENDATIONS

The purpose of our study was to briefly review the history and environmental setting of the property. Our history review revealed that the subject property was undeveloped until the late 1960s. The existing building was constructed by about 1970 and has been used by Ming's Restaurant since that time.

The State and local file review materials did not reveal any underground storage tanks, hazardous materials use or any contaminant problems reported for the property addresses. The City, County and State agency file reviews did not reveal the presence of an AST, motor oil or fuel UST, pits, lagoons or use or suspect disposal on the property or nearby sites with groundwater or soil vapor incidents that would likely impact the property.

Our review of federal and state environmental generator and spill lists revealed that several LUST and groundwater contaminant cases have been reported in the general site area and as discussed above. However, in our opinion the identified spills are being investigated or closed by the State or Federal agencies, or are located far enough from the site as to have little likelihood of impacting the site.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 for the property at 1700 Embarcadero Road in Palo Alto California (APN 008-03-084). Any exceptions to, or deletions from, this practice are described in Section 1.3 and in text of this report.

This ESA did not reveal evidence of a recognized environmental condition in connection with the property. Romig recommends the following:

- The building was constructed prior to 1970 so ACBM and LBP may be a potential concern. If future building renovation or demolition is planned, a qualified consultant and/or contractor should be retained to evaluate and manage these materials so that they are properly disposed at the appropriate facility.

6.0 LIMITATIONS AND PROFESSIONAL DECLARATION

As with all preliminary site assessments, the amount of information obtained is a function of both time and budgetary constraints. Our conclusions regarding the site are based on observation of existing conditions, review of selected agency files and data collected by third parties, and our interpretation of readily available site history and usage data. Any study such as this must be qualified in that no soil, soil vapor, or ground water analysis was performed. Soil, soil vapor, ground water, lead paint or asbestos analysis lead to a more reliable assessment of environmental conditions; conditions which often are not apparent during typical Phase I activities. If you desire a greater degree of confidence, soil, soil vapor, ground water or additional analysis could be performed to more definitively establish current environmental conditions.

This report has been prepared for the exclusive use of Mr. Wu-Chung Hsiang our Client. We make no warranty, expressed or implied, except that our services were performed in accordance with environmental engineering principles generally accepted at this time and location. The professional staff of Romig Engineers, Inc., in accordance with the generally accepted professional practices and from guidance with the standard practice of ASTM E 1527-05, has prepared the findings and analysis contained in this Phase I Environmental Site Assessment Report with the exceptions or limitations noted in the report. Please note that this report is valid for 180 days from the date of report issuance.

Some of the information provided in this Phase I Environmental Site Assessment report is based upon personal interviews and research of available documents, records and maps held by appropriate government and private agencies. This is subject to the limitations of the historical documentation, availability and accuracy of pertinent records, and the recollection of those persons contacted and interviewed. The information contained in this report has received appropriate technical and peer review. The findings and analysis represent professional judgments and are based upon the investigations conducted and the review and interpretation of such data based on our experience and expertise according to the existing standard. No warranty or guarantee is expressed or implied. The scope of services within this Phase I Environmental Site Assessment did not include sample collection and/or analysis for hazardous materials. In addition, it did not include a property title search or evaluation of mold/fungi, asbestos, lead paint, radon or seismic risk.

The findings and analysis set forth in this report are strictly limited in time and scope to the date of the evaluation(s), and for the use of our client.

The Qualified Environmental Professional preparing this report declares, to the best of his professional knowledge and belief, that he meets the definition of the Environmental Professional as defined in sec. 312.10 of 40 CFR 312 and has the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR part 312.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

License Number

I hereby furnish a certificate of consent to self-insure, or a Certificate of Worker's Compensation Insurance, or a certified copy thereof:

Company

Certified copy is hereby furnished.

Certified copy is filed with the Division of Inspections Services, City of Palo Alto.

I hereby affirm that I am exempt from the provisions of Chapter 9, Division 3, B and P Contractor's License Law) because: (Check applicable statement)

A. I am the owner of the above property and I will contract to have all of the above work performed by licensed contractors.

B. I am the owner of the property and the work will be partially accomplished in accordance with Statement "A" and the other work will be accomplished in accordance with Statement "C".

C. I am the owner of the above property and I will perform the above work personally or through my employees whose sole compensation will be wages, and the above-described structure is not intended or offered for sale.

Signature — Date

I certify that in the performance of the work for which this permit is issued I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

Signature — Date

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

I certify that I have read this application and state that the information given is true and correct. I agree to comply to all City ordinances and State laws relating to the building construction, and I make this statement under penalty of perjury.

X Wellmark — 9-21-94
Applicant's Signature, or Authorized Agent — Date

NOTICE!

This is a building permit when properly filled out, signed and validated and it is not transferable. This permit shall be posted conspicuously on the job site. Do not conceal, or cover any construction until the work is inspected and the inspection is recorded on the back of this card. All inspections shall be requested at least 24 hours in advance.

This permit will expire if work is not started within 180 days of issuance or if more than 180 days have lapsed since the last inspection. Additional fee will be required to reinstate an expired permit.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class B | License Number 238400

Date 9-12-03 | Contractor J.F. Warren Const.

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

___ I own the property, and my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds improvements thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

___ I am owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

___ I am exempt under Sec. _____ B.&P.C. for this reason

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

___ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

___ I have and will maintain a workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier STATE FUND

Policy Number 37-02

X (This section need not be completed if the permit is for one hundred dollars ($100) or less).

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that, if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date 9-12-03 | Applicant

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.)

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. X3. USER QUESTIONNAIRE

INTRODUCTION

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[35] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"),[36] the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). No
Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? No

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
As the *user* of this ESA do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? No

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).
Does the purchase price being paid for this property reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? No

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40CFR 312.30).
Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as *user*,
a.) Do you know the past uses of the property?
b.) Do you know of specific chemicals that are present or once were present at the *property*? } No
c.) Do you know of spills or other chemical releases that have taken place at the *property*?
d.) Do you know of any environmental cleanups that have taken place at the *property*?

(6.) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the *user* of this ESA, based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*? No

The EDR Property Tax Map Report

EDR® Environmental Data Resources Inc

440 Wheelers Farms Road
Milford, CT 06461
800.352.0050
www.edrnet.com

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

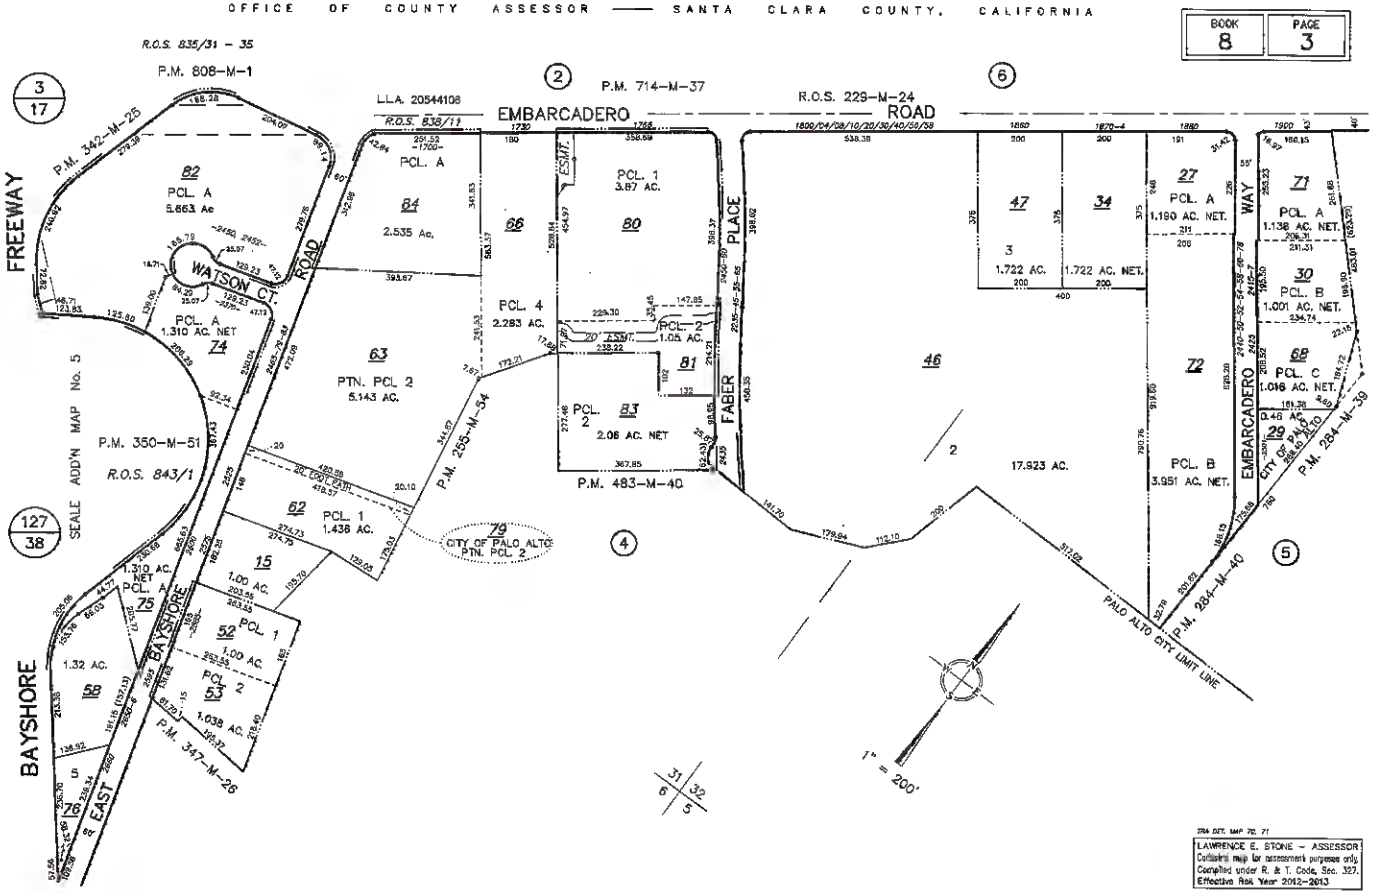

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The EDR Aerial Photo Decade Package

EDR® Environmental Data Resources Inc

440 Wheelers Farms Road
Milford, CT 06461
800.352.0050
www.edrnet.com

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

APPENDIX D

QUALIFICATION OF ENVIRONMENTAL PROFESSIONAL

RESUME OF QUALIFICATIONS

REPRESENTATIVE EXPERIENCE

Christopher M. Palmer has diversified experience in hydrogeologic and engineering geologic studies in California and other States. He has performed and supervised hundreds of investigations for contaminant soil and groundwater assessment, sampling, and groundwater monitoring well design and installation, and aquifer data analysis and report preparation. Additional work includes onsite sewage wastewater absorption system testing and Phase One Environmental Site Assessments and other geologic studies. Mr. Palmer is also experienced in regulatory negotiation and compliance for petroleum, solvent, and metals contamination, shallow soil pesticide contaminants, and development and implementation of work plans for soil and groundwater site cleanup and site "closure" (no further work required).

Project experience includes contaminant assessments at military and industrial sites, RCRA RI/FS studies, underground storage tanks, onsite wastewater disposal for residential and light commercial development, municipal landfill site investigations and expansion of municipal and hazardous waste disposal sites. Mr. Palmer has provided contaminant hydrogeology instruction through university extension classes and to professional societies and government agencies, and has authored professional journal publications and the book "Principles of Contaminant Hydrogeology (1991; 1996)."

EDUCATION

California State University, Fresno, B. A. Geology, Jan. 1975.
California State University, Fresno, M. A. Geology, Dec. 1978.
Continuing Education Classes in hydrogeology, chemistry, regulations, 1981-present.

CERTIFICATIONS

OSHA 29 CFR 1910.120 Hazardous Waste Training (40 hr., with 8 hr. updates).

PROFESSIONAL REGISTRATIONS

State of California Professional Geologist No. 3989; Certified Engineering Geologist No. 1262; Certified Hydrogeologist No. 246.
State of Arkansas Registered Geologist No. 320.
State of Pennsylvania Registered Geologist No. 892.

PROFESSIONAL SOCIETIES

National Groundwater Association.
Groundwater Resources Association of California

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

PALO ALTO MUNI REFUSE DSPL ARE	2380 EMBARCADERO RD	NE 1/4 - 1/2 (0.388 mi.)	G24	65

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 03/13/2013 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that

there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 2 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Longitude:	-122.120300531387
Case Type:	Cleanup Program Site
Case Worker:	LL
Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	Stored electronically as an E-file
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Arsenic, Lead, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	The site is bounded by Geng Road to the east, a parking lot to the north, a baseball field to the west and a commercial building complex to the south. Site was previously used as a maintenance area for refuse and recyclable collection vehicles and collection bins. Lease terminated in 2009 and facility closure was performed. During closure process, diesel AST, waste oil UST and oil/water separator were removed. Soil samples reported elevated concentrations of arsenic, lead, molybdenum, zinc and petroleum hydrocarbons (C10-C36).

Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Latitude: 37.4551528501631
Longitude: -122.11531162262
Case Type: LUST Cleanup Site
Status: Completed - Case Closed
Status Date: 03/12/2013
Lead Agency: SANTA CLARA COUNTY LOP
Case Worker: MJ
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: 08-099
LOC Case Number: 05S2W32E01f
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Aviation, Waste Oil / Motor / Hydraulic / Lubricating
Site History: 1988 In August, 3 underground storage tanks (USTs) were removed from the site. The USTs had been used to store gasoline and then waste oil. 2 soil samples (MA1 and MA2) were collected from the sidewall of the excavations at 4 feet below the ground surface (ft bgs). These samples were reported to have maximum concentrations of 990 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg), 4,300 ppm TPH as Oil (TPHo), 5,700 ppm Total Oil and Grease (TOG), 400 ppm Stoddard Solvent (does not match chromatographic pattern), 0.9 ppm Benzene, 3.4 ppm Toluene, 1.7 ppm Ethylbenzene, 11 ppm Xylenes, and 0.035 ppm Acetone. The third tank (2,000-gallon) was not removed right away due to elevated flammable vapors. The tank was not

PALO ALTO AIRPORT (Continued) **S101303784**

removed until February 1989. Floating product was noted to be present on the groundwater in the excavation. The excavation was pumped out and stored in a tank onsite. Groundwater was encountered during tank removal at 5 ft bgs. A grab groundwater sample was collected and reported to contain 380,000 parts per billion (ppb) TPHg, 260,000 ppb TPHd, 410,000 ppb TPHo, 520,000 ppb TOG, 350 ppb Benzene, 240 ppb Toluene, 230 ppb Ethylbenzene, and 440 ppb Xylenes. 10 soil borings (B1 through B10) were advanced to 3.5 ft bgs. Soil samples were screened using a Photo-ionization detector (PID). It was not reported that soil samples collected during this investigation were submitted for laboratory analysis. 8 soil borings (B11 through B18) were advanced to 5-7 ft bgs. Grab groundwater samples were collected from borings B11 through B14; groundwater was not encountered in the other borings. The samples were noted to have a petroleum hydrocarbon odor and sheen. It was not reported that soil or groundwater samples collected during this investigation were submitted for laboratory analysis. 3 monitoring wells (MW1 through MW3) were installed to 13.5-13.75 ft bgs. Grab groundwater samples were collected from these new wells and reported to contain maximum concentrations of 630 ppb TPHg, 270 ppb TPHd, 4,200 ppb TOG, 13 ppb Benzene, 18 ppb Toluene, 2 ppb Ethylbenzene, and 7 ppb Xylenes. 1989 In February, the third tank was removed. 1990 In January, 3 soil borings (SB1 through SB3) were advanced to 3 ft bgs. 3 soil samples were collected and reported to contain maximum concentrations of 590 ppm TPHg, 61 ppm TPH as Mineral Spirits (TPHms), 9.6 ppm Benzene, 0.9 ppm Ethylbenzene, 3.5 ppm Xylenes, and 6.8 ppm Lead. 15 CPT borings were advanced to 12 ft bgs for the collection of groundwater samples. The site is underlain by Bay Mud, which has very low permeability. Sufficient groundwater for sampling was only present in borings CPT1, CPT4, CPT5, CPT11, CPT14 and CPT15. Grab groundwater samples were reported to contain maximum concentrations of 1,700 ppb TPHg, 1,400 ppb TOG, 270 ppb TPHms, 110 ppb TPHd, 8 ppb Ethylbenzene, and 0.039 ppb Lead. Benzene was not reported to be present in any of the samples analyzed. Also around this time, depth to water readings were taken in the monitoring wells at different times relative to the preceding low tides and it was concluded that the effect of tidal fluctuations on groundwater elevations and flow direction at the site is negligible. In July, 4 monitoring wells (MW4 through MW7) were installed on and offsite to 14.5 ft bgs. It was not reported that soil samples were submitted for laboratory analysis. The new wells were incorporated into the groundwater monitoring program. In November, 3 monitoring wells (MW8 through MW10) were installed offsite to 14.5 ft bgs. It was not reported that soil samples were submitted for laboratory analysis. The new wells were incorporated into the groundwater monitoring program. 1991 In October, 2 monitoring wells (MW11 and MW12) were installed adjacent to the former UST excavation. MW12 was installed as a deeper well to approximately 35 ft bgs. The initial sampling of well MW12 reported I

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/01/2013

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that cen recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of soma locations where law enforcemant agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or durnpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/04/2013

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such es electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not rapresent e higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue batween EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolvad.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, end water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/18/2013
Date Data Arrived at EDR: 02/18/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes e listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Most Recent Revision:	1999

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

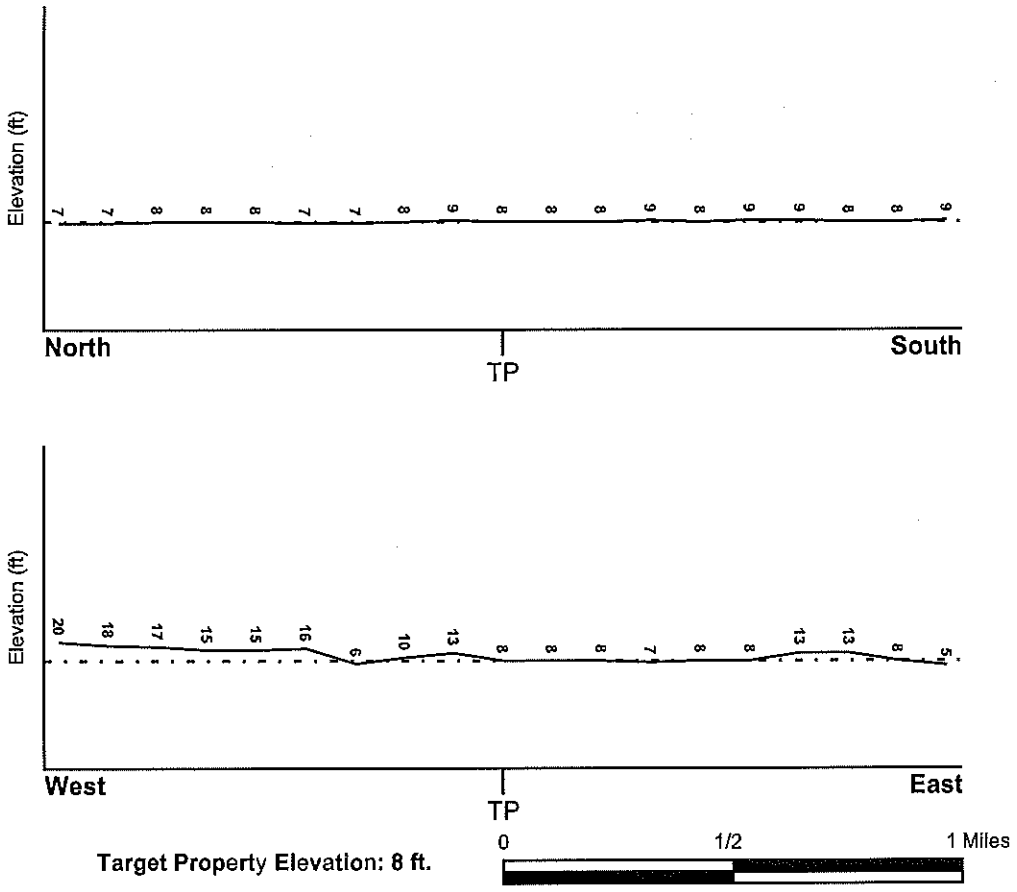

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
SANTA CLARA, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06085C - FEMA DFIRM Flood data

Additional Panels in search area: 0607080001A - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MOUNTAIN VIEW	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
2	1/2 - 1 Mile NW	NE

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	REYES
Soil Surface Texture:	clay
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	14 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.20 Min: 0.06	Max: 6.50 Min: 3.60
2	14 inches	63 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.20 Min: 0.06	Max: 6.00 Min: 3.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: mucky - clay
silty clay loam
loam
clay loam
silt loam

Surficial Soil Types: mucky - clay
silty clay loam
loam
clay loam
silt loam

Shallow Soil Types: clay

Deeper Soil Types: mucky - clay
cobbly - clay loam
clay loam
stratified
silty clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Belkman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Datebase
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the nationel Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Databasa for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected et private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for alevated indoor radon levels.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANYSUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES.ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

*Each category may include several separate databases, each having a different search distance. For each category, the table reports the maximum search distance applied. See the section 'Record Sources and Currency' for information on individual databases.

EXECUTIVE SUMMARY

TARGET PROPERTY INFORMATION

ADDRESS

PROPERTY AT
1700 EMBARCADERO ROAD
PALO ALTO, CA 94303

COORDINATES

Latitude (North):	37.4495 - 37° 26' 58.203735"
Longitude (West):	122.1191 - 122° 7' 8.768921"
Elevation:	8 ft. above sea level

EXECUTIVE SUMMARY

PHYSICAL SETTING INFORMATION

Flood Zone:	YES
NWI Wetlands:	YES

AQUIFLOW®

Search Radius: 0.333 Mile.

No Aquiflow sites reported.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	REYES
Soil Surface Texture:	clay
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.
Hydric Status:	Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel:	HIGH
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

Soil Layer Information

	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	14 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.20 Min: 0.06	Max: 6.50 Min: 3.60

EXECUTIVE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
2	14 inches	63 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.20 Min: 0.06	Max: 6.00 Min: 3.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: mucky - clay
silty clay loam
loam
clay loam
silt loam

Surficial Soil Types: mucky - clay
silty clay loam
loam
clay loam
silt loam

Shallow Soil Types: clay

Deeper Soil Types: mucky - clay
cobbly - clay loam
clay loam
stratified
silty clay loam

EXECUTIVE SUMMARY

SEARCH RESULTS

Unmappable (orphan) sites are not considered in the foregoing analysis.

Classification:	Small Quantity Generator

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D002

ANGIOTECH BIOMATERIALS CORP, 2500 FABER PL, PALO ALTO, CA 94303 (Continued)

Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Waste code:	D009
Waste name:	MERCURY
Waste code:	D035
Waste name:	METHYL ETHYL KETONE
Waste code:	D038
Waste name:	PYRIDINE

Telephone: 202-564-6023

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS

Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Last EDR Contact :04/05/2013

Source: EPA
Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

HISTORICAL USE RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-05 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records – The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

Subject: **Phase I Environmental Site Assessment Update**
Audi Palo Alto
1730 Embarcadero Road
Palo Alto, California 94303
EI Project ENLO180214.00

Dear Mr. Rusak and Ms. Jose:

The EI Group, Inc. (EI) is pleased to submit this Phase I Environmental Site Assessment Update conducted on the above-referenced property.

This assessment has been performed in accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard Practice E 1527-13 specifications for "*All Appropriate Inquiries*" Phase I Environmental Site Assessments.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

If you have any questions concerning this report, please contact us at (502) 499-6490.

Sincerely,
The EI Group, Inc.

John Royal
Senior Environmental Scientist

Kerri Boddy
Senior Environmental Scientist

KTB/cd

Executive Summary

A Phase I Environmental Site Assessment (ESA) Update was conducted on the property located at 1730 Embarcadero Road in Palo Alto, Santa Clara County, California. The Update was performed to update EI's Phase I ESA completed by EI on April 25, 2016 as EI Project ENLO160125.00. The site inspection was conducted on April 3, 2018. The subject property consists of approximately two acres of commercial property developed as an automotive dealership in 1970 and currently occupied by Audi Palo Alto (A Kuni Automotive Dealership). Site usage prior to 1970 and back to at least 1939 was limited to vacant, undeveloped land. This ESA has indicated the following:

	Identified	**Comments**
Recognized Environmental Conditions	Yes	See Below
Controlled Recognized Environmental Conditions	No	----
Historical Recognized Environmental Conditions	Yes	See Below
De Minimis Conditions	Yes	See Below
Significant Environmental Concerns	Yes	See Below

We have performed a Phase I ESA Update in conformance with the scope and limitations of ASTM Standard Practice E 1527-13 and United States Environmental Protection Agency's [US EPA's] All Appropriate Inquire [AII] requirements at 40 CFR Part 312) of the subject property addressed as 1730 Embarcadero Road in Palo Alto, Santa Clara County, California. Any exceptions to, or deletions from, this practice are described in Section 1.0 or Appendix H of this report. This assessment has revealed evidence of one *historical environmental recognized environmental condition,* one *recognized environmental condition,* and one *de minimis* condition in connection with the subject property as follows:

Historical Recognized Environmental Condition: The subject property has operated as an automotive dealership with repair services since approximately 1970. Past and current occupants were noted on several regulatory database lists, including those that track hazardous waste generation and the underground storage of petroleum products. A former occupant of the property, Carlsen Porsche Audi, Inc., registered four USTs (containing diesel, gasoline, and waste oil) that were removed from the site in 1996. A review of the associated regulatory files indicates the removal resulted in the discovery of a release and an Unauthorized Release Form was submitted on October 24, 1996 to the State Water Resources Control Board. A Tank Removal report dated December 1996 indicated the removal of a 550-gallon kerosene UST, a 1,000-gallon waste oil UST, a 1,000-gallon diesel UST, and a 10,000-gallon gasoline UST. Approximately 40 tons of contaminated soil was excavated, removed, and transported offsite to a recycling facility. Further investigation as to the impact on shallow groundwater was required. A Site Characterization Report prepared by HK2, Inc. in 1998 indicated groundwater depth was approximately 5 feet below ground surface (bgs) and the shallow groundwater flow direction was calculated to be in the southeasterly direction. The report indicated detectable levels of benzene, toluene, ethylbenzene, and xylene (BTEX) in both soil and groundwater in the area of the former USTs, located in the south central portion of the subject property. A No Further Action (NFA) letter was issued to the site by the Leaking Underground Storage Tank Oversight Program on January 30, 1998 with residual levels of BTEX in groundwater. The NFA status granted with residual groundwater contaminants in place at the site is considered an *historical recognized environmental condition* in connection with the subject property.

Recognized Environmental Condition: As part of normal operations at the site until approximately 2008 (as reported in a previous Phase I report provided for our review), the service areas of the subject building were equipped with in-ground automotive hydraulic lifts and are reasonably assumed to have been installed at the time of construction of the subject building (circa 1970). No information was made available as to the methods of the closing of the lifts, or confirmation that the lift pits were emptied of all fluid-containing equipment. A material threat of a release from the lifts exists, and is thereby considered a *recognized environmental condition* in connection with the subject property.

De Minimis Condition: During the site walk through in March 2016, areas of staining on floors and pavement were noted in the automobile service area and the covered material storage area west of the subject building. During the site walk on April 3, 2018, it was noted that the services area floors were coated with a floor sealing product in December of 2017 and were free of staining. During this site walk, the minor staining near the air compressors under the covered material storage area was noted. The previously noted floor staining and covered area staining are minor and localized and as such, indicate a *de minimis* condition.

Additionally, items of significant environmental concern are as follows:

A Phase I and subsequent Phase II investigation was conducted at the subject property in 2014 and 2015, respectively, and addressed several issues highlighted in this report, including but not limited to, a covered hazardous material storage area with signs of pavement staining, areas dedicated to used oil and waste anti-freeze storage south of the subject building, and the in-ground oil/water separator in the detail shop area. The results of the Phase II soil investigation noted no impact to shallow soils in these areas of the subject property. These areas of concern identified in the previous Phase I and II investigation exists as of April 3, 2018 and as site operations do not appear to have changed since these prior investigations, a significant impact from these storage areas and the in-ground oil/water separator is not expected.

The adjoining facility to the east, known as Stanford Honda (a.k.a. Anderson Honda), has two reported LUST incidents, each with a NFA status. As such, the incidents do not pose a significant concern to the subject property. However, investigation is ongoing as to the extent of soil and groundwater impact from the historical use of in-ground automotive lifts that were removed in 1994. A February 2010 Fact Sheet for the Proposed Cleanup Plan indicates groundwater contamination from the in-ground lifts extended offsite to the east (i.e., away from the subject property). Given the easterly/southeasterly groundwater flow direction seen in reports corresponding to environmental investigations at the subject property, as well at this adjoining property, as well as the State of California's oversight of this release, the off-site contamination at this adjoining facility is of minimal environmental concern at this time. However, it is noteworthy that this adjoining automotive repair facility utilized automotive lifts similar to those described to have been formerly in use at the subject facility, and during relatively the same era. A groundwater impact from the use of automotive lifts at the adjoining property reinforces the material threat of a release from similar operations at the subject property.

During our site walk in April 2018, it was mentioned by the site contact that planning was underway to redevelop the property as a car dealership. It should be noted that depending on grading and utility installation plans, excavations in the area of the former UST system and the former lifts could

encounter hydrocarbon impacted soil that could require off-site disposal and or special handling to manage during the construction project.

Based on the findings of this assessment, additional environmental studies are recommended and should include a comprehensive soil and groundwater assessment at the areas of former in-ground automotive lifts at the subject property.

1.0 Introduction

1.1 Purpose

EI was retained by Holman Embarcadero Real Estate, LLC (hereinafter Client or User) to conduct a Phase I Environmental Site Assessment (ESA) Update of the Audi Palo Alto automobile dealership located at 1730 Embarcadero Road in Palo Alto, Santa Clara County, California.

The purpose of this practice is to "define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and *petroleum products*. As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on CERCLA liability; that is, the practice that constitutes *all appropriate inquiries* into the previous ownership and uses of the *property* consistent with good commercial or customary practice as defined at 42 U.S.C. § 9601(35)(B)."

This report will be used to identify *recognized environmental conditions* (*RECs*), *controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs)* of the subject property in conjunction with the ASTM E 1527-13 Standard Practice for Environmental Site Assessments and United States Environmental Protection Agency's [US EPA's] All Appropriate Inquire [AII] requirements at 40 CFR Part 312).

There is a possibility that even with the proper application of these methodologies property conditions may exist that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. EI believes that the information obtained from the historical document review and interviews concerning the site are reliable. However, EI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results, but rather to provide the client with information relating to the property. Site conditions reported in this report reflect conditions observed at the time of the site reconnaissance.

1.2 Definitions

A ***recognized environmental condition (REC)*** is defined as "the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property:* (1) due to any *release* to the *environment;* (2) under conditions indicative of a *release* to the *environment;* or (3) under conditions that pose a *material threat* of a *release* to the *environment*."

A ***controlled recognized environmental condition (CREC)*** is defined as "a *recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls." Note that a condition identified as a *CREC* does not imply that the *environmental*

professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the require control that has been, or is intended to be, implemented.

An ***historical recognized environmental condition (HREC)*** is defined as "a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and had been addressed to the satisfaction of the applicable regulatory authority, without subjecting the *property* to any required controls."

Other Definitions

De Minimis	A ***de minimis*** condition is defined as a "condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not *RECs* or *CRECs*."
Environment	ASTM notes the ***environment*** shall have the same meaning as the definition of environment in CERCLA 42" in CERCLA 42 U.S.C. § 9601(8)." CERCLA indicates a release into the environment as any release into navigable waters, any other surface waters, groundwater, drinking water supply, land surface or subsurface strata, or ambient air.
Material Threat	A ***material threat*** is defined as "a physically observable or *obvious* threat which is reasonably likely to lead to a release that, in the opinion of the *EP*, is threatening and might result in impact to public health or the environment."
Migrate/ Migration	***Migrate/Migration*** is defined as "the movement of *hazardous substances* or *petroleum products* in any form, including, solid and liquid at the surface or subsurface, and vapor in the subsurface."
Release	ASTM notes "a *release* of any *hazardous substances* or *petroleum product* shall have the same meaning as definition of "release" in CERCLA 42 U.S.C. § 9601(22)." CERCLA indicates a ***release*** as "any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substances, or pollutant or contaminant), but excludes (A) any release which results in exposure to person solely within a workplace, (B) emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station engine, (C) release of source, byproduct, or special nuclear material from a nuclear incident, and (D) the normal application of fertilizer."

1.3 Scope of Work

The methodology used in the completion of this report is specified under the Scope of Work set forth by Holman Embarcadero Real Estate, LLC and according to the provisions of the ASTM Standard Practice E 1527-13 and United States Environmental Protection Agency's [US EPA's] All Appropriate Inquire [AII] requirements at 40 CFR Part 312).

1.4 Significant Assumptions

Any assumptions made about apparent shallow groundwater flow are based on area topography as depicted on the topographic map described in Section 4.3 of this report, surface features observed during the site reconnaissance and information from groundwater monitoring at the site in the past and at nearby sites. Within the scope of this investigation, no subsurface data was obtained to determine the actual groundwater flow direction or hydraulic gradient beneath the subject property. Local factors, such as underground structures, seasonal fluctuations, soil and bedrock geology, water supply wells, utility lines, and other features may influence the actual direction of groundwater flow at and near the subject property. Site-specific groundwater flow can only be ascertained through the installation of at least three groundwater wells into the given transmissive zone being evaluated.

1.5 Special Terms and Conditions, Limitations, and Exceptions

Special Terms and Conditions, Limitations, and Exceptions are presented in Appendix H.

1.6 User Reliance

This report is provided for the sole use of Holman Embarcadero Real Estate, LLC and Mercedes Benz Financial Services USA, LLC. Use of this report by any third parties will be at the party's sole risk, and EI disclaims any liability for any such use or reliance by third parties.

1.7 Shelf Life of Phase I Environmental Site Assessment

An environmental site assessment meeting or exceeding the practice and completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction is presumed to be valid. The shelf life of a Phase I is one year with updates required after 180 days. The updates include 1) interviews with owners, operators, and occupants; 2) searches for recorded environmental lien cleanups; 3) reviews of Federal, state, and local government records; 4) visual inspections of the property and of adjoining properties; and 5) the declaration by the *EP* responsible for the assessment or update.

2.0 User Provided Information

2.1 User Questionnaire

The "All Appropriate Inquires" Final Rule (40 CFR Part 312) requires that these tasks be performed by or on behalf of a party seeking to quality for Landowner Liability Protection (LLP) to CERCLA liability. These tasks must also be completed by or on behalf of EPA Brownfield Assessment and Characterization grantees. While such information is not required to be provided to the environmental professional (EP), the EP shall request that the user provide the result of these tasks as such information can assist the EP in identifying RECs. If the user does not communication the information to the EP, the EP will consider the significance of the absence of such information pursuant to data gaps.

The User Questionnaire was completed by the party ordering this report. A copy of the form is provided in **Appendix G.**

Completed By	Sven Wood-General Manager
Review of Title and Judicial Records for Environmental Liens and Activity and Use Limitations	N/A
Specialized Knowledge or Experience of the User	Yes
Actual Knowledge of the User	Yes
Reason for Significantly Lower Purchase Price	N/A
Commonly known or Reasonably Ascertainable Information	N/A
Degree of Obviousness	N/A
Reason for Performing Phase I	Preparation for Purchase

3.0 Records Review

Information that has not been obtained for the purposes of this assessment within reasonable time and cost constraints is noted within as not *reasonably ascertainable.* Additionally, information that is simply not available is noted as not readily available.

3.1 Physical Setting Source(s)

Source	United States Geological Survey (USGS) 7.5 Minute Series (Topographic) map of Mountain View, CA (1997) (see Appendix A)
Elevation	5 feet above mean sea level
Topography	Relatively flat with regional topographic relief in the easterly direction, toward Mayfield Slough, which is located 0.7 mile southeast.

3.2 Historical Use Information

3.2.1 Standard Historical Resources

The following standard historical sources were researched during EI's 2016 assessment and were revisited for completion of this assessment:

Record	Date/s	Source/Comments	Included
Aerial Photographs	2015	Santa Clara County GIS	Appendix A
	2012, 2010, 2009, 2006, 2005, 1991, 1982, 1974, 1968, 1958, 1956, 1948, 1943, and 1939	EDR	Appendix D
Fire Insurance Maps	N/A	Not available according to EDR	Appendix D (no coverage letter)
Recorded Land Title Records	N/A	N/A	----
USGS Topographic Map(s)	1997	USGS	Appendix A
Local City Directories	2013, 2008, 2006, 2001, 2000, 1996, 1985, 1982, 1980, 1978, 1975, 1974, 1970, 1968, 1966, 1965, 1964, 1963, 1962, 1960, and 1957	EDR	Appendix D
Building Department Records	N/A	Not *reasonably ascertainable* or readily available	----
Zoning/Land Use Records	N/A	Not *reasonably ascertainable* or readily available	----

3.2.2 Current and Past Uses of the Subject Property

The following uses/occupants of the subject property were identified from the historical review, interviews, and/or other information obtained within the scope of this investigation:

Use of Subject Property	Year From	Year To
commercial (automobile dealership-Carlsen Audi-a.k.a. Carlsen Porsche Audi, Inc., Carlsen Motors, and Audi Palo Alto)	1970	present
vacant land	prior to 1939	1970

3.2.3 Current and Past Uses of Adjoining Properties

The following uses/occupants of the adjoining properties were identified to the extent that the information was revealed in the course of researching the subject property itself:

Use of Property (north of subject property, beyond Embarcadero Road)	Year From	Year To
commercial (commercial offices, currently Jones Day Law Firm)	early 1990s	present
vacant land	prior to 1939	early 1990s

Use of Property (north of subject property, beyond Embarcadero Road)	Year From	Year To
municipal (natural gas pipeline station)	early 1970s	present
vacant land	prior to 1939	early 1970s

Use of Property (northwest of subject property, beyond Embarcadero Road)	Year From	Year To
commercial (commercial offices, currently Merrill Corporation)	late 1970s	present
commercial (retail florist)	1957	late 1970s
vacant land	prior to 1939	1957

Use of Property (east of subject property)	Year From	Year To
commercial (automobile sales/servicing, currently Anderson Honda)	late 1960s	present
vacant land	prior to 1939	late 1960s

Use of Property (southeast of subject property)	Year From	Year To
commercial (leased office park units)	early 1980s	present
vacant land	prior to 1939	early 1980s

Use of Property (south of subject property)	Year From	Year To
vacant land	prior to 1939	present

Use of Property (southwest of subject property)	Year From	Year To
commercial (leased office park units)	early 1970s	present
vacant land	prior to 1939	early 1970s

Use of Property (west of subject property)	Year From	Year To
commercial (vacant, overflow automobile parking, which is owned by the subject property owner)	mid-2010s	present
commercial (various restaurant tenants)	1960s	mid-2010s
vacant land	prior to 1939	1960s

3.2.4 Current and Past Uses in the Surrounding Area

The subject property is located in a predominantly commercial area of Palo Alto, California.

3.3 Data Failure

ASTM E 1527-13 defines a data failure as a failure to achieve the historical research objectives of AAI even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Specifically, the historical research objectives include identifying all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier.

Data failures were not encountered within the scope of this investigation.

3.4 Standard Federal, State, and Tribal Environmental Record Sources

A Regulatory Database Report for the site vicinity was obtained and is included in Appendix E. The database listings were reviewed based on minimum search distances as defined in ASTM E 1527-13. Criteria for being listed on each database and definitions of the databases, along with specific facility information, are available within the database provided in Appendix E. Note that any adjusted database radii were adjusted at EI's discretion or as per client special scope requirements with the exception of the Federal NPL or the Federal RCRA TSD List. Adjustment of these lists at a smaller radius is not allowed under the Standard Practice. The databases searched and the search distances are as follows:

Databases	*ASTM Search Radius*	*EI Adjusted Search Radius*
Federal NPL	1 mile	
Federal Delisted NPL	0.5 mile	
Federal CERCLIS	0.5 mile	
Federal NFRAP	0.5 mile	
Federal RCRA CORRACTS	1 mile	
Federal RCRA non-CORRACTS TSD	0.5 mile	1 mile
Federal RCRA Generator	Site or adjoining	0.12 mile
Federal IC/EC	Site	0.05 mile
Federal ERNS	Site	0.05 mile
State/Tribal-Equivalent NPL	1 mile	
State/Tribal-Equivalent CERCLIS	0.5 mile	
State/Tribal Spills	Site	

Databases	*ASTM Search Radius*	*EI Adjusted Search Radius*
State/Tribal SWL	0.5 mile	
State/Tribal LUST	0.5 mile	
State/Tribal UST	Site or adjoining	1 mile
State/Tribal IC/EC	Site	0.12 mile
State/Tribal VCP	0.5 mile	0.05 mile
State/Tribal Brownfield	0.5 mile	0.05 mile
State/Tribal-Equivalent NPL	1 mile	

EI reviewed all of the listings within the database report. Based on distance from the subject property, regulatory status, and/or topography, none of the listings are environmentally significant for purposes of this assessment or worthy of special note other than those discussed herein:

Facility Name	Audi Palo Alto
Address	1730 Embarcadero Road
Databases	HAZNET, CUPA Listings, LUST, CA FID UST, FINDS, and SWEEPS UST
Distance-Direction	N/A-subject property
Comments	**Hazardous Materials**: The subject property is noted on the HAZNET List, which catalogues businesses maintaining hazardous waste disposal or transfer manifests, indicating the use, storage, generation and/or transfer of waste materials considered hazardous. No compliance information was reported for the subject facility. **Petroleum Products**: The subject property in noted on several listings that indicate former use of USTs, and registers four USTs (containing diesel, gasoline, and waste oil) that were removed from the site in 1996. The removal resulted in the discovery of a release and the subject property was subject to further investigation and ultimate cleanup. A No Further Action (NFA) status was granted to the incident in 1998. Further details of the LUST incident are present below. The confirmed release and subsequent NFA determination is indicative of an *historical recognized environmental condition* in connection with the subject property.

Facility Name	Stanford Honda (a.k.a. Stanford Auto Plaza, Carl R. Carlsen Inc., Anderson Honda Isuzu)
Address	1766 Embarcadero Road
Databases	HAZNET, CUPA Listings, SLIC, LUST, UST, , CA FID UST, SWEEPS UST, RCRA Non-Gen/NLR, and AST
Distance-Direction	Eastern adjoining property

Comments	**Hazardous Materials**: The adjoining property to the southeast, an automobile dealership and repair facility similar to that of the subject property, is noted on hazardous material tracking databases. No reports of violations or non-compliances with respect to registered hazardous wastes are indicated in the database. **Petroleum Products**: This adjoining property is noted on the LUST and UST Lists and is discussed further below.

Facility Name	Matthews Carlsen Bodywork
Address	2480 Faber Place
Databases	CUPA Listings and HAZNET
Distance-Direction	Eastern adjoining property
Comments	**Hazardous Materials**: The adjoining property to the southeast is an automotive repair facility with no reported violations or non-compliances and therefore, is of minimal environmental concern to the subject property at this time.

Facility Name	Centrillion Biosciences [Former Collagen Inc. (a.k.a. Angiotech Biomaterials Corp)]
Address	2500 Faber Place
Databases	HAZNET, CUPA, RCRA Non-Gen/NLR, HIST Gen, CA FID UST, SWEEPS UST, and LUST
Distance-Direction	Southeastern adjoining property
Comments	**Hazardous Materials**: The adjoining property to the southeast is noted on hazardous material tracking databases. No reports of violations or non-compliances with respect to registered hazardous wastes are indicated in the database. **Petroleum Products**: This adjoining property is noted on the LUST and UST Lists and is discussed further below.

3.5 Regulatory Agency File and Records Review

3.5.1 Regulatory Agency File Review

As per the Standard Practice, if the subject or any of the adjoining properties is identified on one or more of the standard environmental record sources referenced in Section 3.4, pertinent regulatory files and/or records associated with the listing shall be reviewed. However, the *EP* might determine that such a review is not warranted.

As previously noted, the subject property is noted on several standard environmental record sources, including the UST and LUST Lists, as well as historical variations of those regulatory databases. A

review of the regulatory files available online as of April 5, 2018 at the State of California's GEOTRACKER (geotracker.waterboards.ca.gov) indicates the following:

Subject Property

Audi Palo Alto

According to the information obtained from GEOTRACKER, an unauthorized release form was submitted October 24, 1996 after the removal of four USTs from the property. A Tank Removal report dated December 1996 indicated the removal of a 550-gallon kerosene UST, a 1,000-gallon waste oil UST, a 1,000-gallon diesel UST, and a 10,000-gallon gasoline UST. Approximately 40 tons of contaminated soil was excavated, removed, and transported offsite to a recycling facility. Further investigation as to the impact on shallow groundwater was required. A Site Characterization Report prepared by HK2, Inc. in 1998 indicated groundwater depth was approximately 4 feet bgs and the gradient was in the southeasterly direction. The report indicated detectable levels of benzene, toluene, ethylbenzene, and xylene (BTEX) in both soil and groundwater in the area of the former USTs, at the south central portion of the subject property. Notwithstanding laboratory confirmation of elevated levels of BTEX in shallow groundwater, a No Further Action letter was issued to the site by the Leaking Underground Storage Tank Oversight Program on January 30, 1998, which indicated the completion of site investigation and remedial action for the former USTs at the subject property. The NFA status granted with residual groundwater contaminants in place at the site is indicative of a *historical recognized environmental condition*.

Adjoining Properties

Stanford Honda (a.k.a. Stanford Auto Plaza, Carl R. Carlsen Inc., Anderson Honda Isuzu)

According to the information obtained via GEOTRACKER, the adjoining facility to the east has two reported LUST incidents, each with a NFA status. As such, the incidents do not pose a significant concern to the subject property. However, investigation is ongoing as to the extent of soil and groundwater impact from the historical use of in-ground automotive lifts that were removed in 1994. A February 2010 Fact Sheet for the Proposed Cleanup Plan indicates groundwater contamination from the in-ground lifts extended offsite to the east (i.e., away from the subject property). Given the easterly/southeasterly groundwater flow direction seen in reports corresponding to environmental investigations at the subject property, as well at this adjoining property, as well as the State of California's oversight of this release, the off-site contamination at this adjoining facility is of minimal environmental concern at this time.

Collagen, Inc. (a.k.a. Angiotech Biomaterials Corp)

This adjoining pharmaceutical company to the southeast formerly used a UST for acetone storage and trichloroethene and reported a minor release during a removal in 1987. The incident received a NFA status in 1994 and based on this determination, as well as published shallow groundwater gradients in the subject area; this off-site release is not considered a significant environmental concern to the subject property.

3.5.2 Review of Files/Records from Alternate Sources

Other than the files outlined in Section 3.5.1, files for the subject or adjoining properties were not reviewed, including files from alternate sources.

3.6 Additional Federal, State, Tribal, and Local Environmental Record Sources

The following state and/or local agency representatives/agencies were contacted and asked to complete an open records search for any information that may be on file regarding permits, Notices of Violation (NOVs), environmental reports, or environmental conditions for the subject property at the time of request:

- Mr. Andre Alexander of the Department of Toxic Substances Control (DTSC) returned a letter by electronic mail indicating files were not located for the subject property in 2016.

- The Palo Alto Fire Department did not respond to the request by the time this report was submitted. If information indicative of a *recognized environmental condition* in connection with the subject property is received, the client will be notified.

- The Santa Clara County Assessor's office did not respond to the request by the time this report was submitted. If information indicative of a *recognized environmental condition* in connection with the subject property is received, the client will be notified.

- Ms. Molly Pritz, Hazardous Materials Specialist II at the Santa Clara County Department of Environmental Health, Hazardous Materials Compliance Division, was contacted by telephone on April 5, 2018 for records relating to the permitting or inspections of the in-ground oil/water separator. Ms. Pritz did not respond by the time this report was submitted.

- County of Santa Clara, Consumer and Environmental Protection Agency Department of Environmental Health-WOOC Administration provided local agency inspection records from as early as 1992 through the most recent inspection in February 2017. EI reviewed these records and they are summarized below. Copies of these documents are provided in Appendix F.

Based upon the local inspection records, the site was inspected for compliance with state and local environmental regulations for onsite activities and waste handling and disposal requirements. In general the records from 1992 through 2010 reflect the operation of the site by previous owners or operators. In addition the soil sampling performed in February 2014 found no detectable impact in areas that had the potential to have been impacted by previous operations at the site. Violations during the 2010 inspection were for mishandling of absorbent pads used to absorb oil and fuel, lack of documentation for employee training in environmental compliance, not having accumulation start dates on waste containers, not documenting daily inspection of hazardous waste containers such as the waste oil and used anti-freeze tanks and not handling fluorescent light tubes properly during disposal. The agency records indicate these violations were corrected.

Inspections records were not provided for the period 2010 until the February 2017 inspections. The 2017 inspection noted non-compliance for using an inactive EPA ID number to ship waste, not labeling rolling carts used to drain oil, anti-freeze, and fuel from vehicles, not having a drum lid tight enough, apparently not enough receipts for waste disposal during 2015 and 2016, no receipt for clarifier sludge since 2015, dripping of oil to asphalt from a car part, holding anti-freeze for more than 90 days, incomplete employee hazardous waste training, daily tank inspections not logged, needing to perform periodic reassessment of the double walled waste tanks and shipment records of

waste aerosol cans could not be located. The follow up documentation from the agency cited corrective actions taken to resolve the issues.

During our site walk on April 3, 2018, we noted that the corrective actions for the discrepancies noted from 2016 were still in place. Waste containers were labeled with the accumulation dates and were labeled for each waste stream, waste drums were placed on secondary containment pallets, containers were covered except where in use, we noted dedicated containers containing aerosol cans, dedicated recycling containers for green waste, trash, scrap metal and cardboard. During the interview of the shop manager, he was well aware of the general accumulation rate and schedule for disposal for each waste stream and the vendor that performs the service. In our experience these type of discrepancies previously noted are within the range of what is often encountered at such facilities and are not likely to lead to impact to the property. EI assesses these conditions as a *De Minimis* Condition especially since the trend at the facility management appears to be toward greater sensitivity to compliance.

3.7 Prior Environmental Reports

The following was reviewed in 2016 and again in 2018 and is included in Appendix K:

Source	Client provided via electronic mail
Report Title	*Phase I Environmental Site Assessment for Boardwalk Auto Group of Carlsen Audi, 1730 Embarcadero Road, Palo Alto, CA*
Date	January 2014
Preparer	Phase One Inc., Laguna Hills, California
Conclusions	"Recognized Environmental Conditions According to reviewed historical resources and current site inspection, the site has been utilized for a car dealership with vehicle repair/servicing for at least 40± years. In their operations, automotive-related hazardous materials (oils, solvents, anti-freeze, etc.) have been utilized for this period of time. There is an interior washroom area for of washing vehicles located on the southwestern corner of the servicing building. In the wash room is a sump/clarifier unit that is utilized to collect wash water from the vehicle washing operations. During the site reconnaissance, the clarifier unit/sump was not visible. Wash water was settled over the unit preventing a visual inspection. The integrity of the sump/oil trap's walls, base, and associated piping could not be observed, and the unit has been plugged up in the past. Due to the age of this unit, the subsurface may have been impacted by possible seepage/leakages from this unit with automotive related chemicals of concern. In addition, several areas of asphalt surfaces have been impacted with spillage/leakage of oils and other automotive fluids. Staining was observed on the asphalt areas on the covered west side of the building next to the aboveground new oil tank. The drain grate cover had oil staining and the asphalt areas below and next to the compressors had significant staining, and some of the surface areas had cracks. Staining was also observed on the asphalt area below the plastic aboveground tank containing waste anti-freeze in the hazardous materials storage area on the southern s ide of the building. It is unknown, if the subsurface has been impacted with these spills or releases in these areas.

	De Minimis Conditions Although the site was used for agricultural purposes in the past, the subsequent commercial development of the site minimizes the probability of occupants to come in contact with possible residual agricultural chemicals in the soil or groundwater. Given the pre-1981 construction date of the subject structure(s), during the site reconnaissance, materials were identified that are suspected of containing asbestos. At the time of the inspection, all of the materials appeared to be intact and undisturbed (that is, they appeared to be in a non-friable condition) and, thus, do not pose an immediate environmental concern. Still, these materials may become hazardous if they in fact contain asbestos and are subsequently damaged or disturbed, as, for example, in the course of remodeling. Asbestos-containing materials are considered to be hazardous materials, and their eventual disposal and hand ling are subject to federal and state regulatory guidelines. Given the pre-1979 construction date of the subject structure, the past use of lead-based paints and leaded piping and/or subject fixtures is the suspected. Deteriorating paint may pose a significant health hazard if ingested or inhaled, particularly for children. Due to the nature of the site use, the possibility of children being affected is low. Lead-containing paint is considered hazardous waste, and the eventual disposal of lead-containing paint may be subject to regulatory restrictions. Lead-containing water is considered hazardous to health at certain levels. The adjacent site has been identified in the environmental records search document. It has been reported as having an environmental condition that has led to the contamination of the area groundwater. The groundwater pollution extends to the east of this site. Controlled Recognized Environmental Conditions There were formerly four underground storage tanks located on the subject site. They were removed in 1996. Thirty-nine tons of soil was removed, and 1,200 gallons of groundwater was disposed of during the remediation activities. Some residual soil contamination was left in place in the southern tank pit area. Upon closure, soil and ground water contamination remained on site (groundwater contamination appeared to be localized in the area adjacent to the former tank pit; contamination and were); however, the residual soil and groundwater were below levels which required cleaning and were below levels of regulatory concern." *The report also recommended the following as it pertains to the identified REC above:* "Contact PHASE ONE INC. or another consultant to sample the subsurface in the location of the sump and stained areas to determine if there has been any impact, to the subsurface soils. Remove and properly dispose of any soils which may have been impacted. Soils and other materials contaminated with hazardous

	materials are considered hazardous waste and must be disposed of in accordance with federal, state, and local regulations."
Comments	The aforementioned "Controlled Recognized Environmental Condition" is more accurately described as, by the Standard definition, a *historical recognized environmental condition*, in that no engineering controls were required by the State of California as a result of the NFA determination.

Source	Client provided via electronic mail
Report Title	*Limited Phase II Environmental Site Assessment for Kuni Automotive Group of Carlsen Audi, 1730 Embarcadero Road, Palo Alto, CA*
Date	February 2014
Preparer	Phase One Inc., Laguna Hills, California
Conclusions	"The principal findings of PHASE ONE INC.'s Limited Phase II ESA for all the areas sampled are as follows: • No levels of TPH (USEPA Method 8015M Carbon Chain and/or Oil-Range) were detected that are a concern or exceed their respective reporting limits and/or any identified action levels. • No levels of VOCs (USEPA Method 8260B) were detected that are a concern or exceed their respective reporting limits and/or any identified action levels. Based on the soil sample results presented in this report, PHASE ONE INC. does not find evidence of contamination. Therefore, the current and previous uses appear to not have impacted the site in the areas sampled and further investigation is not recommended. Based on field observations from the boring installed at 10' bgs, the entire site has soil that consists of very tight clays from the bottom of the backfill materials to 10' bgs. Because of this, it is highly unlikely that any materials leaked to the subsurface would transport neither to the groundwater nor far from the source. This would limit the environmental exposure from any subsurface leak and/or spill."
Comments	The Phase II investigation consisted of two soil borings in the washroom clarifier/sump are, two at the Hazardous Waste Storage areas at the south side of the subject building, and two borings in the new oil AST and compressor area along the west side of the subject building; samples depths varying from one to ten feet bgs were taken from each of the three designated areas. No groundwater samples were collected for laboratory analysis.

4.0 Site Reconnaissance

Inspector	Mr. John Royal
Title	EI Senior Environmental Scientist
Date of Site Inspection	April 3, 2018
Weather on Day of Inspection	clear and cool
Site Plan	Included in Appendix A
Site Photographs	Included in Appendix B
Methodology	Mr. Royal used a systematic approach to view the subject property buildings and the exteriors of the buildings. A grid pattern was used to inspect remaining areas of the property. Observations of the surrounding properties were made from the public vantage point.
Limiting Conditions	None

4.1 Subject Property Description

4.1.1 Location and Legal Description

Current Occupant/s	Audi Palo Alto
Past Occupant/s	Carlsen Audi (a.k.a. Carlsen Porsche Audi, Inc., Carlsen Motors, and Audi Palo Alto)
Site Address	1730 Embarcadero Road Palo Alto, Santa Clara County, California
Site Location	Southeast of Geng Road and Embarcadero Road intersection
Site Vicinity	primarily commercial
Additional Addresses	N/A
Legal Description	Parcel ID # 008-03-006
Current Owner	Undisclosed
Past Owner/s	Not reported

Property information is provided in Appendix C.

4.1.2 Descriptions of Subject Property Structures and Improvements

The subject property consists of the following:

# of Buildings	Two: an existing sales and repair facility and one showroom building
Construction Type	concrete block on concrete slab foundation
Approximate Size	21,000 square feet
Construction Dates	circa 1970
Other Improvements	The majority of the 2.2-acre site is asphalt paved with pervious landscaping for stormwater control in the northern and northeastern portions.

Utilities include the following:

Electricity	PG&E
Natural Gas	PG&E
Potable Water	City of Palo Alto
Sewage Disposal	City of Palo Alto
Emergency Power/Back up	None

4.1.3 Current Use of Adjoining Properties

The subject property is adjoined as follows:

Direction	Occupant/Use	Concerns
North	Beyond Embarcadero Road: Jones Day law firm and natural gas pipeline station	No
Northwest	Beyond Embarcadero Road: Merrill Corporation/commercial offices	No
East	Anderson Honda/automobile sales and service	Minimal
South	unoccupied/vacant land	No
Southeast	various leased office tenants/commercial office space	No
Southwest	various leased office tenants/commercial office space3	No
West	vacant restaurant/overflow automobile parking	No

The historical use of these properties was discussed in Section 3.2.3.

4.2 Interior and Exterior Observations

Observed or Otherwise Discovered		Comments
Hazardous Substances and Petroleum Products in Connection with Identified Uses	Yes	See Below
Underground Storage Tanks (USTs)	No	N/A
Aboveground Storage Tanks (ASTs)	Yes	See Below
Odors	No	N/A
Pools of Liquid	No	N/A
Drums	Yes	See Below
Hazardous Substances and Petroleum Product Containers (Not Necessarily in Connection with Identified Uses)	No	N/A
Unidentified Substance Containers	No	N/A
Polychlorinated Biphenyls (PCBs)	No	N/A
Heating/Cooling	Yes	See Below
Stains or Corrosion	Yes	See Below
Drains or Sumps	Yes	See Below
Pits, Ponds, or Lagoons	No	N/A
Stained Soil or Pavement	No	N/A
Stressed Vegetation	No	N/A
Solid Waste	No	N/A
Wastewater	No	N/A

	Observed or Otherwise Discovered	Comments
Wells	No	N/A
Septic Systems	No	N/A
Other (previous use of in-ground automotive lifts)	Yes	See Below

Hazardous Substances in Connection with Identified Uses
EI observed the typical variant and volumes of hazardous substances and petroleum products typical to that used in automotive servicing. EI observed waste accumulation start dates on each waste drum and AST that indicated the last waste removal occurred on January 31, March 1, March 16, and March 17, 2018. The services manager indicated that containers of most waste streams are generally removed by a vendor on a monthly basis.

Aboveground Storage Tanks (ASTs)
Several ASTs were identified throughout the subject property and are categorized in the following table. The age of the tanks was not reported.

Tank ID	Estimated Capacity	Contents	Location	Status
New Oil	480 gallons	Motor Oil	Covered Storage Area	double walled, in-use
Waste Oil	500 gallons	Used oil	south of subject building	double walled, in use
Waste Antifreeze	200 gallons	Used anti-freeze	south of subject building	single wall-in-use

Drums
Several 55-gallon drums (and containers of smaller capacities) were observed throughout the subject property and are used for the storage of new and spent automotive fluids. No obvious signs of releases or over spillage were observed during the site reconnaissance and the drums appeared to be in use as intended and labeled at the time of the site visit.

Heating and Cooling
The subject building is primarily heated and cooled by commercial-grade, packaged roof systems atop each of the subject buildings. Maintenance areas are heated via overhead furnaces fired by natural gas. No other indications of fuel sources for heating the subject buildings were observed or reported.

Stains or Corrosion
Minor areas of staining on floors and pavement were noted in the covered material storage area west of the subject building as well as near the ASTs and drums where present. The automobile service area has a coated floor and only a few "work in progress" related drips were noted. The area of the two stage sump in the car wash bay in the southwest corner of the services building exhibited darken concrete typical of wash areas although no oil or oil sheen was noted. Further the concrete surface was rough; a sign of weathering or wear from regular use over a long service life. The areas observed were relatively minor and localized and indicate a *de minimis* condition.

Drains or Sumps
An in-ground oil/water separator is installed in the auto detail are of the facility. According to site personnel, the in-ground system is permitted with the City of Palo Alto and annually inspected. The waste particulates and oily residues are periodically cleaned out by an off-site waste disposal contractor. EI opened the covers and inspected the liquid and checked for sediment. The standing water was free of oil or oily residue and had approximately 4 to 6 inches of sediment in each chamber. The service manager indicated the sump had not been cleaned out in the six months of his tenure and indicated the clean out would be scheduled as soon as possible.

Other (former in-ground automotive lifts)
During the previous site walk though in 2016 there were indications of approximately one dozen (one at each work station) former in-ground automotive lifts in the automotive service area: currently, automobiles are lifted with above-ground systems. The floor was sealed with an epoxy type coating in December 2017 and at the time of our April 3, 2018 walk through, only six areas had an obvious bump or other indication of a patched area where a lift would be expected to have been located. One area appear to have had a dynometer pit or alignment equipment based upon the pattern noted through the patch and coating. The former lifts were likely installed at the time of construction (circa 1970) and no information as to the methods of closing the lifts, or indication that the lift pits were emptied of all fluid-containing equipment, was made available. A material threat of a release from the lifts exists, and is thereby considered a *recognized environmental condition* in connection with the subject property.

4.3 Non-Scope Considerations

Non-scope considerations, include but are not limited to, the following: asbestos-containing building materials, biological agents, cultural and historical resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environmental, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, and wetlands.

Inclusion of these non-scope considerations is outside the Standard Practice and was not requested by the client.

5.0 Interviews

5.1 Interviews with Past and Present Owners and Occupants and Others

	Name, Company, and Title	Years Affiliated with the Site	Comments
Owner	Sven Wood General Manager	6 months	Mr. Wood competed the User Questionnaire.
Key Site Manager	Mr. Alfred Shahgholian, Audi Palo Alto, Service Manager	6 months	Mr. Shahgholian answered EI inquiries on waste management, and environmental compliance.
Occupants	"	"	"
Past Owners, Operators, or Occupants	N/A	N/A	N/A
Neighboring or Nearby Property Owners or Occupants*	N/A	N/A	N/A
State and/or local government officials	Other than interviews noted in Section 3.6, additional government officials were not interviewed.		

* According to ASTM E 1527-13, if the subject property is abandoned and there is evidence of potential unauthorized uses of the *abandoned property* or evidence of uncontrolled access to the *abandoned property*, interviews with one or more *owners* or *occupants* of neighboring or nearby properties shall be conducted.

6.0 Evaluation

6.1 Scope of Services

This Phase I Environmental Site Assessment includes four components as outlined in ASTM E 1527-13, Section 7.2, including 1) records review, 2) site reconnaissance, 3) interviews, and 4) report (including evaluation).

6.2 Data Gaps

ASTM E 1527-13 defines a data gap as a lack of or an inability to obtain information required by this practice despite *good faith* efforts by the *environmental professional* to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance, interviews, data failure, or lack of a User Questionnaire.

Data gaps were not encountered within the scope of this investigation.

6.3 Findings and Opinions

Within the scope of this investigation, evidence of one *recognized environmental condition,* one *historical environmental recognized environmental condition,* a *de minimis* condition, and significant environmental concerns were discovered as follows:

- The subject property has operated as an automotive dealership with repair services since approximately 1970. Past and current occupants were noted on several regulatory database lists, including those that track hazardous waste generation and the underground storage of petroleum products. A former occupant of the property, Carlsen Porsche Audi, Inc., registered four USTs (containing diesel, gasoline, and waste oil) that were removed from the site in 1996. A review of the associated regulatory files indicates the removal resulted in the discovery of a release and an Unauthorized Release Form was submitted on October 24, 1996 to the State Water Resources Control Board. A Tank Removal report dated December 1996 indicated the removal of a 550-gallon kerosene UST, a 1,000-gallon waste oil UST, a 1,000-gallon diesel UST, and a 10,000-gallon gasoline UST. Approximately 40 tons of contaminated soil was excavated, removed and transported offsite to a recycling facility. Further investigation as to the impact on shallow groundwater was required. A Site Characterization Report prepared by HK2, Inc. in 1998 indicated groundwater depth was approximately 5 feet bgs and the shallow groundwater flow direction was calculated to be in the southeasterly direction. The report indicated detectable levels of benzene, toluene, ethylbenzene, and xylene (BTEX) in both soil and groundwater in the area of the former USTs, located in the south central portion of the subject property. Notwithstanding laboratory confirmation of elevated levels of BTEX in shallow groundwater, a No Further Action (NFA) letter was issued to the site by the Leaking Underground Storage Tank Oversight Program on January 30, 1998. The NFA status granted with residual groundwater contaminants in place at the site is indicative of an *historical recognized environmental condition* in connection with the subject property.

- As part of normal operations at the site until approximately 2008 (as reported in a previous Phase I report provided for our review), the service areas of the subject building were equipped with in-

ground automotive hydraulic lifts and are reasonably assumed to have been installed at the time of construction of the subject building (circa 1970). No information was made available as to the methods of the closing of the lifts, or confirmation that the lift pits were emptied of all fluid-containing equipment. A material threat of a release from the lifts exists, and is thereby considered a *recognized environmental condition* in connection with the subject property.

- Areas of staining on floors and pavement were noted in the automobile service area, the covered material storage area west of the subject building and car wash bay. These areas of staining were minor and localized and indicate a *de minimis* condition.

Additionally, items of significant environmental concern are as follows:

- A Phase I and subsequent Phase II investigation was conducted at the subject property in 2014 and 2015, respectively, and addressed several issues highlighted in this report, including but not limited to, a covered hazardous material storage area with signs of pavement staining, areas dedicated to used oil and waste anti-freeze storage south of the subject building, and the in-ground oil/water separator in the detail shop area. The results of the Phase II soil investigation noted no impact to shallow soils in these areas of the subject property. These areas of concern identified in the previous Phase I and II investigation exists today and as site operations do not appear to have changed since these prior investigations, a significant impact from these storage areas and the in-ground oil/water separator is not expected.

- The adjoining facility to the east, known as Stanford Honda (a.k.a. Anderson Honda), has two reported LUST incidents, each with a NFA status. As such, the incidents do not pose a significant concern to the subject property. However, investigation is ongoing as to the extent of soil and groundwater impact from the historical use of in-ground automotive lifts that were removed in 1994. A February 2010 Fact Sheet for the Proposed Cleanup Plan indicates groundwater contamination from the in-ground lifts extended offsite to the east (i.e., away from the subject property). Given the easterly/southeasterly groundwater flow direction seen in reports corresponding to environmental investigations at the subject property, as well at this adjoining property, as well as the State of California's oversight of this release, the off-site contamination at this adjoining facility is of minimal environmental concern at this time. However, it is noteworthy that this adjoining automotive repair facility utilized automotive lifts similar to those described to have been formerly in use at the subject facility, and during relatively the same era. A groundwater impact from the use of automotive lifts at the adjoining property reinforces the material threat of a release from similar operations at the subject property.

6.4 Conclusions

EI has performed a Phase I Environmental Site Assessment in conformance with the scope of limitations of ASTM Standard Practice E 1527-13 an United States Environmental Protection Agency's [US EPA's] All Appropriate Inquire [AII] requirements at 40 CFR Part 312) of 1730 Embarcadero Road in Palo Alto, Santa Clara County, California, the *property.* Any exceptions to, or deletions from, this practice are described in Section 1.0 or Appendix H of this report. This assessment has revealed evidence of *recognized environmental conditions* in connection with the subject property as follows:

- Past use of in-ground automotive lifts are considered to pose a material threat of a release to the subject property; and
- Former USTs at the subject property resulted in a petroleum release to soil and groundwater at the site. However, the granted NFA regulatory status with residual soil and groundwater contaminants in place at the site is indicative of an *historical recognized environmental condition.*

6.5 Additional Services

The clients' requested scope of services requires EI to include recommendations.

Based on the findings of this assessment, additional environmental studies are recommended and should include a comprehensive soil and groundwater assessment at the areas of former in-ground automotive lifts at the subject property.

6.6 Limiting Conditions, Deletions, and Deviations

Limiting conditions that would indicate a data gap(s) were not encountered within the scope of this assessment. Additionally, this assessment was not subjected to deletions or deviations from the ASTM Standard Practice, including client-imposed constraints.

6.7 References

Other than the standard historical resources referenced in Section 3.2.1, persons interviewed as noted in Section 5.1, the ASTM E 1527-13 Standard Practice for Environmental Site Assessments, regulatory files available online at the State of California's GEOTRACKER (geotracker.waterboards.ca.gov), and two prior assessments as noted in Section 3.7, additional references were not reviewed.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Inquiry # 4535718.3

Contact: Chrissie Dawson

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EI Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results
Certification # 34AD-4EC4-8B3F

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

EI Group (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Rev: 12/11/2017
ID/Status: CAD981688823

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Status Date: 05/30/2013
Global Id: T10000002964
Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 05S2W31J03s
Latitude: 37.4522824107127
Longitude: -122.120300531387
Case Type: Cleanup Program Site
Case Worker: GOR
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Arsenic, Lead, Waste Oil / Motor / Hydraulic / Lubricating
Site History: The site is bounded by Geng Road to the east, a parking lot to the north, a baseball field to the west and a commercial building complex to the south. Site was previously used as a maintenance area for refuse and recyclable collection vehicles and collection bins. Lease terminated in 2009 and facility closure was performed. During closure process, diesel AST, waste oil UST and oil/water separator were removed. Soil samples reported elevated concentrations of arsenic, lead, molybdenum, zinc and petroleum hydrocarbons (C10-C36). THERE IS A SITE MANAGEMENT PLAN THAT MUST BE FOLLOWED FOR THIS SITE. CONTAMINATION WAS LEFT IN PLACE UNTIL SUCH TIME AS THE SITE IS REDEVELOPED TO A MORE SENSITIVE LAND USE, SUCH AS PARK LAND.

Local Case Number: 05S2W32E01f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Aviation, Waste Oil / Motor / Hydraulic / Lubricating
Site History: 1988 In August, 3 underground storage tanks (USTs) were removed from the site. The USTs had been used to store gasoline and then waste oil. 2 soil samples (MA1 and MA2) were collected from the sidewall of the excavations at 4 feet below the ground surface (ft bgs). These samples were reported to have maximum concentrations of 990 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg), 4,300 ppm TPH as Oil (TPHo), 5,700 ppm Total Oil and Grease (TOG), 400 ppm Stoddard Solvent (does not match chromatographic pattern), 0.9 ppm Benzene, 3.4 ppm Toluene, 1.7 ppm Ethylbenzene, 11 ppm Xylenes, and 0.035 ppm Acetone. The third tank (2,000-gallon) was not removed right away due to elevated flammable vapors. The tank was not removed until February 1989. Floating product was noted to be present on the groundwater in the excavation. The excavation was pumped out and stored in a tank onsite. Groundwater was encountered during tank removal at 5 ft bgs. A grab groundwater sample was collected and reported to contain 380,000 parts per billion (ppb) TPHg, 260,000 ppb TPHd, 410,000 ppb TPHo, 520,000 ppb TOG, 350 ppb Benzene, 240 ppb Toluene, 230 ppb Ethylbenzene, and 440 ppb Xylenes. 10 soil borings (B1 through B10) were advanced to 3.5 ft bgs. Soil samples were screened using a Photo-ionization detector (PID). It was not reported that soil samples collected during this investigation were submitted for laboratory analysis. 8 soil borings (B11 through B18) were advanced to 5-7 ft bgs. Grab groundwater samples were collected from borings B11 through B14; groundwater was not encountered in the other borings. The samples were noted to have a petroleum hydrocarbon odor and sheen. It was not reported that soil or groundwater samples collected during this investigation were submitted for laboratory analysis. 3 monitoring wells (MW1 through MW3) were installed to

13.5-13.75 ft bgs. Grab groundwater samples were collected from these new wells and reported to contain maximum concentrations of 630 ppb TPHg, 270 ppb TPHd, 4,200 ppb TOG, 13 ppb Benzene, 18 ppb Toluene, 2 ppb Ethylbenzene, and 7 ppb Xylenes. 1989 In February, the third tank was removed. 1990 In January, 3 soil borings (SB1 through SB3) were advanced to 3 ft bgs. 3 soil samples were collected and reported to contain maximum concentrations of 590 ppm TPHg, 61 ppm TPH as Mineral Spirits (TPHms), 9.6 ppm Benzene, 0.9 ppm Ethylbenzene, 3.5 ppm Xylenes, and 6.8 ppm Lead. 15 CPT borings were advanced to 12 ft bgs for the collection of groundwater samples. The site is underlain by Bay Mud, which has very low permeability. Sufficient groundwater for sampling was only present in borings CPT1, CPT4, CPT5, CPT11, CPT14 and CPT15. Grab groundwater samples were reported to contain maximum concentrations of 1,700 ppb TPHg, 1,400 ppb TOG, 270 ppb TPHms, 110 ppb TPHd, 8 ppb Ethylbenzene, and 0.039 ppb Lead. Benzene was not reported to be present in any of the samples analyzed. Also around this time, depth to water readings were taken in the monitoring wells at different times relative to the preceding low tides and it was concluded that the effect of tidal fluctuations on groundwater elevations and flow direction at the site is negligible. In July, 4 monitoring wells (MW4 through MW7) were installed on and offsite to 14.5 ft bgs. It was not reported that soil samples were submitted for laboratory analysis. The new wells were incorporated into the groundwater monitoring program. In November, 3 monitoring wells (MW8 through MW10) were installed offsite to 14.5 ft bgs. It was not reported that soil samples were submitted for laboratory analysis. The new wells were incorporated into the groundwater monitoring program. 1991 In October, 2 monitoring wells (MW11 and MW12) were installed adjacent to the former UST excavation. MW12 was installed as a deeper well to approximately 35 ft bgs. The initial sampling of well MW12 reported low concentrations of Benzene, Toluene, and Xylenes. The well was resampled 5 days later and was not reported to have concentrations of these constituents present above the laboratory reporting limits. In November, slug tests were conducted on wells MW2 and MW3. Based on the testing, the hydraulic conductivity for the shallow saturated zone was indicative of clay-silt mixtures. 1992 In July, groundwater samples collected from wells were also analyzed for Volatile Organic Compounds (VOCs) by EPA Method No. 8240 and were reported to contain maximum concentrations of 3 ppb Carbon Disulfide, 2 ppb Benzene, and 20 ppb Chlorobenzene. This analysis was only conducted during this sampling event until November 2011. Groundwater monitoring continued through March 1994. All work ceased after that time. 2000 In May, groundwater monitoring was conducted. Monitoring wells MW6 through MW10 could not be located. These wells are located within the adjacent golf course.

Prior to this time, groundwater flow had been reported to be towards the east. Without data from the missing wells, groundwater was reported to flow to the south. In October, Wells MW7 and MW8 were located through extensive research and searching. The wells were located within irrigation boxes and the box encasing MW7 was found to be flooded with artesian like surface water flowing toward the riparian corridor located east of the well. In November, well MW8 was opened for sampling. Artesian groundwater flow was noted in this well. Historical fluid level data reported similar conditions in this well. Attempts were made to pump the water from the irrigation box surrounding well MW7, but were unsuccessful. 2011 In November, the locatable wells were re-developed prior to sampling. Wells MW6, MW7, MW9 and MW10 could not be located. Attempts were made using a metal detector and hand digging. Groundwater analysis included fuel oxygenates and VOCs by EPA Method No. 8260B. 2012 In March, the status of the missing monitoring wells was changed to abandoned by the Santa Clara Valley Water District. In April, the final groundwater monitoring event was conducted and reported maximum concentrations of 1,200 TPHd, 2,100 ppb TOG, 6.2 ppb Methyl tert Butyl Ether (MtBE), and 6.5 ppb Chlorobenzene. Benzene was not reported to be present above the laboratory reporting limits.

ID/Status: T10000004214

SLIC:
Region: STATE
Facility Status: Completed - Case Closed
Status Date: 04/03/2015
Global Id: T10000004214
Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 05S2W31P02s
Latitude: 37.4480492453022
Longitude: -122.126383781433
Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: Dry cleaners have operated on this site from at least 1965 to late 2011. The last dry cleaner did not perform dry cleaning onsite from aroun 1998. The site has been vacant since January 2012. Redevelopment plans have been filed with the City for commercial development onsite. Phase II investigations have found soil and groundwater impacted with PCE at the site. Excavated PCE impacted soil above the groundwater. 2013 - 3 groundwater monitoring wells were installed.

Database Descriptions

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-CESQG - RCRA - Conditionally Exempt Small Quantity Generators.

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROL - Sites with Institutional Controls.

Database Descriptions

ERNS: ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

State/Tribal NPL: RESPONSE Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. RESPONSE - State Response Sites

State/Tribal CERCLIS: ENVIROSTOR The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. ENVIROSTOR - EnviroStor Database

State/Tribal SWL: SWF/LF (SWIS) Active, Closed and Inactive Landfills. SWF/LF records typically contain an inve ntory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF (SWIS) - Solid Waste Information System

State/Tribal LTANKS: SONOMA CO. LUST LUST SANTA CLARA - LOP Listing. VENTURA CO. LUST - Listing of Underground Tank Cleanup Sites. LUST REG 1 - Active Toxic Site Investigation. LUST REG 6V - Leaking Underground Storage Tank Case Listing. ORANGE CO. LUST - List of Underground Storage Tank Cleanups. RIVERSIDE CO. LUST - Listing of Underground Tank Cleanup Sites. LUST REG 2 - Fuel Leak List. LUST REG 4 - Underground Storage Tank Leak List. LUST REG 5 - Leaking Underground Storage Tank Database. LUST REG 7 - Leaking Underground Storage Tank Case Listing. SLIC REG 4 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 5 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 6V - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 6L - SLIC Sites. SLIC REG 7 - SLIC List. SLIC REG 8 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 9 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. Sacramento Co. CS - Toxic Site Clean-Up List.

State/Tribal Tanks: UST Active UST facilities gathered from the local regulatory agencies UST - Active UST Facilities AST - Aboveground Petroleum Storage Tank Facilities. INDIAN UST R6 - Underground Storage Tanks on Indian Land. INDIAN UST R5 - Underground Storage Tanks on Indian Land. INDIAN UST R4 - Underground Storage Tanks on Indian Land. INDIAN UST R9 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R10 - Underground Storage Tanks on Indian Land. INDIAN UST R1 - Underground Storage Tanks on Indian Land.

Database Descriptions

State/Tribal VCP: VCP Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. VCP - Voluntary Cleanup Program Properties

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

Other SWF: LOS ANGELES CO. LF VENTURA CO. LF - Inventory of Illegal Abandoned and Inactive Sites. WMUDS/SWAT - Waste Management Unit Database. CA LA LF - City of Los Angeles Landfills. SAN DIEGO CO. LF - Solid Waste Facilities. San Diego County Solid Waste Facilities. SAN DIEGO CO. LF - Solid Waste Facilities

Other Haz Sites: SCH This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose. SCH - School Property Evaluation Program SAN DIEGO CO. HMMD - Hazardous Materials Management Division Database. US CDL - Clandestine Drug Labs.

Other Tanks: SWEEPS UST Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list. SWEEPS UST - SWEEPS UST Listing ALAMEDA CO. UST - Underground Tanks. KERN CO. UST - Underground Storage Tank Sites & Tank Listing. MARIN CO. UST - Underground Storage Tank Sites. NAPA CO. UST - Closed and Operating Underground Storage Tank Sites. ORANGE CO. UST - List of Underground Storage Tank Facilities. RIVERSIDE CO. UST - Underground Storage Tank Tank List. SAN FRANCISCO CO. UST - Underground Storage Tank Information. SOLANO CO. UST - Underground Storage Tanks. SUTTER CO. UST - Underground Storage Tanks. VENTURA CO. UST - Underground Tank Closed Sites List. YOLO CO. UST - Underground Storage Tank Comprehensive Facility Report. EL SEGUNDO UST - City of El Segundo Underground Storage Tank. LONG BEACH UST - City of Long Beach Underground Storage Tank. TORRANCE UST - City of Torrance Underground Storage Tank. UST MENDOCINO - Mendocino County UST Database. UST SAN JOAQUIN - San Joaquin Co. UST. CA FID UST - Facility Inventory Database.

Local Land Records: DEED Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners. DEED - Deed Restriction Listing

Spills: HMIRS Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT. HMIRS - Hazardous Materials Information Reporting System CHMIRS - California Hazardous Material Incident Report System. Orange Co. Industrial Site - List of Industrial Site Cleanups. SPILLS 90 - SPILLS90 data from FirstSearch.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

EMERGENCY RESPONSE ACTION PLAN

Audi Palo Alto

Overview

The quantity and type of hazardous materials handled at the facility and the nature of our operations present a relatively low risk of a dangerous incident involving exposure to hazardous materials. Further, we rely upon community provided emergency services for primary emergency response should such an incident occur. Nevertheless, there are certain emergency response activities that facility personnel may undertake. This is especially true in the event of a spill or other unplanned release of a hazardous material. Should, for example, a bulk oil storage tank fail, a significant release could occur and a prompt facility response may be required to prevent an environmentally damaging incident.

The facility can also respond in a very limited way to a fire. It is emphasized, however that the local fire department should be immediately called for anything except the most minor incident.

Questions on any element of this plan should be directed to Lawrence Strong who is the Emergency Response Coordinator.

©KPA, LLC

1. Emergency Equipment:

Audi Palo Alto relies primarily upon community provided services for emergency response. Consequently, the variety and availability of on-site emergency equipment is limited. Response equipment typically present at the facility includes:

a. Spill Absorption Material: The facility usually has on hand a supply of absorbent material (grease-sweep) in the service areas. This material can be used to dam off the flow of a hazardous material. After any release is contained, this material can also be spread over the released liquid until it has been placed in sufficient volume to absorb it. The contaminated absorbent material should then be collected and placed in a drum or other containment for proper disposal.

b. Personal Protective Equipment: This equipment is limited to the following:

Equipment	Location
Safety Glasses	Service
Gloves	Service

This equipment is available for use when routinely handling hazardous materials common to this facility. It can also be used under emergency conditions.

c. Hazardous Waste Hauler: Under certain conditions, hazardous waste haulers can be of great service during a release or threatened release of a hazardous material. For example, a hauler can empty a tank that appears to be failing. If a spill is contained, such a service may be able to pump up a substantial portion of the released liquid. Haulers who can be contacted include:

Waste Type	Waste Hauler
AES	(707) 693-6000

Note: In the event the above haulers cannot be contacted, additional haulers can normally be located by searching online. Possible search terms include: "Waste Oil Hauler" and "Industrial Waste Disposal"

2. Spill Containment and Clean Up:

a. Shut off/eliminate all sources of ignition.

b. Attempt to prevent any additional release (if possible). An example would be closing a leaking valve or turning off a pump that is causing a release.

c. Contain the spill by diking around it using sand, earth or other absorbent material. Ensure special attention to preventing spilled material from reaching a sewer or storm drain inlet.

d. Absorb spilled material using sand, earth or other absorbent. Floor cleaning/sweeping materials are appropriate and are normally available.

Note: It may be possible to pump up a significant portion of contained liquid.

e. Avoid skin contact and breathing vapors. Wear appropriate protective clothing and equipment. This equipment can include chemical resistant gloves, eye protection and supplied air respirators.

©KPA, LLC

f. Ventilate the area with local exhaust systems or by opening available doors and windows.

Note: Avoid use of compressed air to speed evaporation of spilled liquid. This practice increases airborne concentrations and increases the possibility of injuries such as eye damage.

g. Dispose of contaminated absorbent in accordance with applicable regulations. This will normally involve disposal of the material as a hazardous waste. If the material is a corrosive, place contaminated absorbent material in polyethylene or polyethylene-lined container for disposal.

Note: If the material released is a corrosive (i.e., battery acid), it may be possible to neutralize it after it has been contained. For information on how to neutralize it, facility management should call the emergency numbers provided on the product Material Safety Data Sheet.

3. First Aid Procedures:

First aid information for an individual chemical is available on its Material Safety Data Sheet. It may also be appropriate to consult a physician. General first aid responses include:

a. Eye Contact: Flush with large amounts of water for at least 15 minutes. Occasionally lift upper and lower lids. Consult a physician.

b. Skin Contact: Remove contaminated clothing and immediately flush contaminated areas with large amounts of water.

c. Inhalation: If overcome or affected by vapors, remove from exposure and call a physician immediately.

d. Ingestion: Call emergency medical aid immediately. Consult the MSDS to determine if vomiting should be induced or if individual should be provided other first aid measures.

4. Evacuation:

Supervisors have the authority to direct an evacuation of the facility. Refer to Part 3 of this Action Plan.

5. Reporting:

a. Obligation to Report: Depending upon the volume involved, the facility may be required to report a release or threatened release of a hazardous material. No report is required for small, non-harmful releases such as a quart of drain oil on the shop floor.

b. Reporting Authority: Any employee who detects a release or threatened release of a hazardous material (other than an incidental spill) should immediately notify his or her supervisor, who shall then be responsible for assessing and beginning a response to the hazard posed. If the release/threatened release involves a significant volume of hazardous material, the supervisor should promptly notify one of the following, who shall have reporting authority:

Reporting Authority

Service Manager

Parts Manager

General Manager

©KPA, LLC

If none of these parties can be notified, the supervisor has the authority to make the report.

c. Reporting Procedure: If uncertain as to whether a report is required, the responsible individual should first query one of the below listed agencies. If it is determined that a report is required, it should be made to the following:

Agency	Contact Information
OES	1-800-852-7550
911 Emergency Response	911
Santa Clara County Environmental Health	(408) 918-3400
Palo Alto City Fire Department	(650) 329-2184

The report should be made as soon as possible so long as it does not impede immediate control of the release or interfere with emergency medical measures and should include the following about the release or threatened release:

- The exact location
- The name of the person that made the report
- The type and quantity of hazardous material(s) involved
- The potential hazard(s) presented (if known)
- Appropriate emergency response agencies and facility managers should also be notified.

d. Written Record: A written record of all verbal notifications should be prepared by the reporting individual and provided to the owner. This report may be handwritten and should include the following:

- Date and time of call
- Person making call
- Agencies notified
- Individuals contacted
- Summary of conversation(s)

©KPA, LLC

Fire or Explosion Response Plan

Audi Palo Alto

1. Fire Prevention: The best means of managing a fire/explosion hazard at the facility is to prevent such an event. In that regard, facility management has prepared a Fire Prevention Plan that is included as Exhibit (a) to this Response Plan.

2. Reporting: Any fire or explosion should be reported immediately to the local fire department or by dialing 911.

3. Fire Fighting Activities:

a. Fire Department: The facility will rely primarily upon the local fire department for response to a fire or explosion at the facility. The facility is not equipped, nor are personnel trained to respond to anything except the smallest fire. A fire in a trashcan or in a pile of rags could be an example of a small fire.

b. Facility Fire Fighting Activities:

i. Fire Fighting Equipment: Facility equipment is limited to small, hand-held extinguishers. Properly used, these extinguishers can put out a small fire or control it until the fire department arrives. **Portable fire extinguishers are not designed to fight large or spreading fires.**

These extinguishers carry notations that indicate which class of fire they can be used to fight. These notations consist of a series of numbers and letters (ex: 2A, 20BC) and are further explained as follows:

- **"A":** Effective against wood, paper and rubbish. Many fire extinguishers have a triangle surrounding the A. The triangle is the international symbol for an A type fire. The numbers in front of the A, in our example the number 2, means that the extinguisher has been rated as being capable of putting out an A type fire two square feet in area.

- **"B":** Effective against flammable and combustible liquids. The square that often surrounds the B is the international symbol for a liquid fire. The number in front of the B, in our example the number 20, is a relative term and means only that the extinguisher can handle a B fire 20 times larger than an extinguisher rated 1B.

- **"C":** Effective against electrical fires. The circle that may be around the letter is the international symbol for an electrical fire. There is no number rating system for the C designation on a fire extinguisher.

  Note: A 2A, 20BC extinguisher may therefore be used on any fire that might be anticipated at the facility. Of note, most of the portable fire extinguishers present at this facility are rated as "ABC" units. Further, a "BC" extinguisher may be effective on a Class A fire.

ii. Precautions: Before any effort is made to fight a fire, the individual(s) involved should make sure of the following:

- Everyone has left or is leaving the building.
- The fire department has been notified.
- The fire is confined to a small area and is not spreading beyond the immediate area.
- The individual using the extinguisher has an unobstructed escape route to which the fire will not spread.
- The individual using the extinguisher is trained in its proper use.

iii. Use of a Portable Fire Extinguisher: There are general guidelines that apply to the use of portable fire extinguishers. In general, an individual using an extinguisher should stand six to eight feet away

©KPA, LLC

from the fire and follow the four-step PASS procedure. If the fire does not go out immediately, the individual should leave the area at once. The PASS procedure is as follows:

- **Pull Pin:** This unlocks the operating lever on the extinguisher and allows discharge of the extinguisher. Some extinguishers may have other devices that prevent inadvertent operation.
- **Aim Low:** Point the extinguisher nozzle (or hose) at the base of the fire.
- **Squeeze:** Squeeze the lever below the handle. This discharges the extinguishing agent. Releasing the lever will stop the discharge. Some extinguishers have a button that can be pressed for release of the extinguishing agent.
- **Sweep From Side to Side:** Moving carefully toward the fire, keep the extinguisher aimed at the base of the fire and sweep back and forth across the fire until the flames appear to be out. Watch the fire area. If the fire reignites, repeat the process.

4. First Aid Procedures:

a. Smoke Inhalation: Remove the individual to fresh air immediately. Call a physician immediately. Report the situation to representatives of the Fire Department or other emergency response organizations on the scene.

b. Eye Irritation: Flush with large amounts of water for 15 minutes or until irritation subsides. Consult a physician.

c. Skin Contact (dermal): Remove contaminated clothing and wash skin thoroughly with soap and water. If material is a caustic, flush thoroughly with large amounts of fresh water.

d. Ingestion: Call emergency medical aid immediately. Consult the appropriate Material Safety Data Sheet (MSDS) to determine if vomiting should be induced or if individual should be provided other first aid measures.

e. Burns: Remove the individual from the heat source and call a physician immediately. Report the situation to representatives of the Fire Department or other emergency response organizations on the scene.

5. Evacuation: Supervisors have the authority to direct an evacuation of the facility. Refer to Part 3 of this Action Plan.

©KPA, LLC

Fire Prevention Plan
Audi Palo Alto

1. **Potential Fire Hazards:** Facility management stores a number of products that are potential fire hazards. These products generally fall into one of the following categories:

    a. Flammable liquids: May include gasoline, solvents and some paint related products.

    b. Flammable gases: May include acetylene, hydrogen or propane.

    c. Combustible liquids: May include diesel fuel, lubricating oils and some solvents.

2. **Proper Handling and Storage Procedures:** Flammable materials are to be used only in well-ventilated areas. This will prevent a buildup of vapors to a level that could pose a health or fire/explosion hazard. Containers of flammable and combustible materials should be closed when not in use. They should also not be stored near a heat or ignition source. Smoking is not permitted when working with flammable liquids. Compressed gases are to be securely stowed at all times and, when not in use, valves are to be closed.

3. **Responsibilities:**

    a. Supervisors are responsible for the overall safety of the work areas under their respective control.

    b. Individual employees are responsible for keeping their work areas free of excessive debris and unwarranted accumulations of flammable and combustible materials.

    c. Facility management is responsible for ensuring available on-site fire fighting and fire suppression equipment is properly maintained and available for immediate use.

    d. Supervisors are responsible for ensuring that significant spills of flammable and combustible liquids are contained and cleaned up according to facility guidelines.

4. **Training**: Supervisors shall ensure that subordinate employees receive appropriate training on this Plan and on how to respond in the event of a fire emergency. In particular, this training shall include:

    a. Fire/Explosion Response

    b. Facility Evacuation Procedures

©KPA, LLC

Evacuation Procedures
Audi Palo Alto

Under certain circumstances, most likely a fire, it may be necessary to evacuate the facility.

In the event a supervisor concludes that evacuation is required to protect the health and safety of subordinates, that supervisor has the authority to evacuate those serving under his direction. The supervisor shall, however, ensure that other appropriate personnel at the facility are notified of the decision to evacuate.

The key to a successful evacuation is accountability. Supervisors must be able to quickly account for assigned personnel and to report any who may be missing. With that in mind, evacuation procedures shall be as follows:

1. Order to evacuate is given by Supervisor.

2. If time allows, the following activities should be performed:

a. Shut off all power to the facility or area being evacuated.
b. Close all doors, windows, vents, etc.
c. Call 911 for emergency response support (fire dept., etc.).

3. All employees shall promptly evacuate the facility by using the exit point most convenient to each. The primary evacuation assembly point shall be Audi sign in front of dealership on Embarcadero Road.. Should assembly at that point prove impossible, the secondary evacuation assembly point shall be West rear corner of new car parking lot. .

4. Notify adjacent businesses of the incident that necessitated the evacuation.

Following the evacuation, supervisors shall account for their personnel. In the event someone is determined to be missing, that fact shall be immediately reported to the senior facility manager present and to the responding emergency response organization (fire department, etc.).

Notes: (1) No one should reenter the facility in an effort to locate a missing individual. That is the task of the Fire Department or other emergency response organization. Individuals with these organizations are properly trained and equipped to undertake such a task.

(2) Personnel shall not leave the evacuation assembly point without the specific approval of their supervisor.

Supervisors shall render all possible assistance to fire department personnel and other emergency responders. This shall include providing information on the general location and nature of hazardous materials located in the facility.

©KPA, LLC

First Aid Response: This facility does not maintain a trained first aid responder. It is our policy that first aid response be provided by the local emergency medical response organization, which can be contacted by calling 911.

Flood: With regard to hazardous materials, the primary concern in a flood is the loss or displacement of these materials by floodwater. For example, water can run into an unsecured underground oil storage tank and, since water is heavier than oil, it will displace the oil. If floodwaters rise high enough, above ground tanks and drums could be similarly affected.

When flooding is threatened, it is therefore important to ensure that all hazardous material containers are tightly closed or otherwise fastened shut. Further, steps should be taken to tie down or otherwise secure drums, etc. that might float free during a flood.

In addition, utilities to the facility should be shut off.

Any flooding that would result from broken pipes should be incidental and would normally be controlled by shutting off water service to the building. Should assistance be required, authorities should be notified by calling 911.

Earthquake: Individual safety in the event of an earthquake is beyond the scope of this Hazardous Materials Emergency Response Action Plan. The following, however, is noted:

a. **Facility Evacuation:** Part 4 of this Action Plan provides details on facility evacuation procedures.

b. **Spill clean up:** When the facility is determined to be safe to enter, commence clean up activities as outlined in Part 1 of this plan.

c. **Additional requirements**: CCR TILE 19, SECION 2731 (e) Identification of areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake related ground motion.

INSPECTION:

1. Compressed gases
2. Hazardous Material Tanks
3. Parts Shelves
4. Water heaters
5. Pressure vessels - Compressors

ISOLATION: Compressed gases that are incompatible will be segregated to prevent comingling hazards. Chemicals of a hazard category that are incompatible will be segregated as necessary.

©KPA, LLC

Tornado Response Plan

Audi Palo Alto

The threat of a tornado is real. Every year many tornadoes ravage the countryside and communities of the state. While avoiding property damage during a tornado is certainly difficult, there are several steps that can be taken to enhance personal safety. Some general guidelines for personal safety include:

1. Seek Shelter: Try to get inside. If you cannot get inside, crouch for protection beside a strong structure or lie flat in a ditch or low-lying area and cover your head and neck with your arms or a piece of clothing. Beware of water runoff.

If inside, a good place to be during a tornado is in the basement of a building. If a basement is not available, try to move to a protected interior room on the lowest floor of the building, as far as possible from exterior walls and windows. Try to avoid large-span roof areas. Service shops may be an example. Try to use a piece of clothing or your arms to shield your head and neck.

2. Driving: A tornado can literally pick a car or truck up off the ground and throw it several hundred feet. If an individual in a vehicle finds himself immediately threatened by a tornado, he should normally stop, exit the vehicle and seek shelter immediately in a nearby building. In some instances, the best option may be to get out of the car and lie flat in a ditch or other low-lying area. This can offer some protection against flying debris and reduce the chance of being carried away by the tornado. Shield your head and neck and beware of water runoff.

3. Accountability: Tornadoes come and go in a matter of minutes, or even seconds. They typically displace not only objects, but people too. As soon as danger passes, it is important to account for everyone at the facility. It is easiest to account for everyone by assembling at the evacuation assembly area (see Part 3 of this plan). Once at the assembly area, don't leave until told to do so by your supervisor or other responsible facility manager.

4. Hazardous Materials: There is little that can be done to prevent the spilling or other release of these materials if a tornado hits the facility. However, as soon as the storm passes, every effort should be made to contain any release. Proper authorities may also have to be notified. Additional details on spill response activities are included in Section 1 of this action plan.

5. Beware of Hazards: Some steps to take following a tornado include:

- Stay away from downed power lines. Report them immediately to the utility company.
- Stay away from damaged buildings until cleared by a qualified inspector.
- Evacuate if gas or other dangerous fumes are detected. Notify appropriate authorities.
- Avoid the use of candles (in many instances more people die from candle-related fires after a disaster than from the disaster itself.

©KPA, LLC

EMPLOYEE TRAINING CERTIFICATION

I hereby acknowledge that I have received information on facility emergency response procedures so that I can be better prepared for certain facility emergencies, including a release or threatened release of a hazardous material. Specifically, I received information on the at least following:

- Spill/Release Response Plan (chemical handlers only)
- Fire/Explosion Response Plan, including use of hand held fire extinguishers
- Evacuation Procedures
- Response plan for first aid and flood
- Tornado Response Plan

I understand that I should contact my supervisor should I have any questions or concerns about the information presented.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204484
Facility Name: CARLSEN MOTOR CARS INC
Site Address: 1730 EMBARCADERO RD
PALO ALTO, CA 94303

Inspection Date: 5/3/2010

HW Generator Type: <1,000 KG/MO.
Consent to Inspect Granted By: LAWRENCE STRONG, SERIVCE MANAGER
Programs Inspected: HAZARDOUS WASTE GENERATOR;

Pictures Taken: NO
Samples Taken: NO

Summary of Violations & Notice to Comply

Program: PR0313331 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION** Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records. ***Absorptive pads are noted as being used to clean spills to floor, but no pad container was noted. PLEASE EXPLAIN WHY PADS OR OTHER ABSORPTIVE MATERIALS WITH OIL ARE NOT BEING HANDLED AS HAZARDOUS WASTES.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/is/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]	All Petroleum will Haul away
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed approximately 8 absorptive pads from the garbage dumpster. Three of the pads were still wet and smelled strongly of gasoline. Pads were removed from the dumpster during the inspection. CONTAMINATED PADS (ESPECIALLY THOSE CONTAMINATED WITH GASOLINE) MUST BE HANDLED AS HAZARDOUS WASTE. PROVIDE DOCUMENTATION OF PROPER HANDLING OF THESE PADS.*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a)]	All Petroleum Called To Have Removed Bins Done 55 Gallon Drum
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***Observed 6 rolling carts for the daily collection of oil which were labeled, but who's labels are illegible or not completed. Also observed used oil and used antifreeze collection tanks with labels affixed to them which were faded and illegible/incomplete. Also, 15 gallon drum holding parts wash waste is missing an accumulation start date.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	Done Labeled
G220	M	**TRAINING: SQG** Personnel are not adequately trained on managing hazardous waste. ***Training last provided to most staff in 3/2009. PROVIDED TRAINING FLYER FOR FREE COUNTY TRAINING CLASS*** Provide training to ensure that all personnel are thoroughly familiar with proper waste handling and emergency response procedures relevant to their responsibilities during normal facility operations and emergencies. [CFR 262.34(d)(5)(iii)]	OK Will Schedule

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204464
Facility Name: CARLSEN MOTOR CARS INC
Site Address: 1730 EMBARCADERO RD
PALO ALTO, CA 94303

Inspection Date: 5/3/2010

VC	Class	Violation	Corrective Actions Taken
G231	M	**TANK INSPECTIONS: SQG** Facility could not demonstrate that hazardous waste tanks are being inspected as required. ***Waste oil and antifreeze tanks are not being inspected daily to ensure that tanks will not overflow and that monitoring equipment is functional (oil tank float gauge).*** Inspect at least daily any discharge control systems, data gathered from monitoring equipment, and for uncovered tanks, the level of the waste in the tank. Inspect at least weekly the tank construction materials, and the area immediately surrounding the tank, including any discharge confinement structures. [CFR 265.201(c)]	log updated Done
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS** Facility failed to properly mark a container of drained used oil/fuel filters. ***Observed two drums filters dated 2/10 and 4/10, but receipts show pick ups of filters on 3/25 and 4/23/2010. NEED TO ENSURE THAT FILTER DRUMS ARE MARKED WITH DATE FIRST FILTER PLACED IN IT.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	Corrected Done
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed light tubes being stored along side of building not in a rigid container, and unmarked. PLACE BULBS IN RIGID CONTAINER TO PREVENT BREAKAGE AND MARK AS UNIVERSAL WASTE.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	Done

Comments: ***Overall shop is very clean- no liquids noted on floors in shop area.***
-two drums for collection of used oil filters, one dated 2/10, second dated 4/10. both currently in use. Suggest not beginning second drum until first drum is full. Noted that approximately 1/3 of filters in drums were non-metal cased filters (cartridge type).
-55 gallon drum for wash sump sludge. Per Lawrence Strong, handling as non-hazardous waste.
-Noted overflow of wash water from detail area to storm drain.
-Facility does not have container for collection of absorptive pads.
-All aerosol cans noted in trash were empty of both contents and propellants.
-Oil rollers pumped to oil tank daily. Antifreeze collected in shallow pans and poured to antifreeze tank daily.
- Facility has posted emergency information d evacuation routes as well as IIPP and emergency plan.
-Reviewed training records and plan, receipts for 2009 and 2010.
-Reviewed disposal receipts for 2009, 2010. Missing a few months from printer . Now using system where receipts are scanned for maintenance. Suggest allowing inspector just to view them online next inspection rather than re-printing all receipts.
-Facility appears to be an episodic LQG. Exceeded 270 gallons used in January and Sept. 2009

Information Request:
Provide an explanation of how the following items are handled:
1. Mop and "zamboni" water contaminated with oil or antifreeze.
2. Waste gasoline removed form gas tanks during maintenance

Unless otherwise noted by the inspector, correct all minor violations no later than 06/02/2010.
Correct all Class I and Class II violations immediately.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Summary of Violations & Notice to Comply

Program: PR0313331 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION** Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records. ***Absorptive pads are noted as being used to clean spills to floor, but no pad container was noted. PLEASE EXPLAIN WHY PADS OR OTHER ABSORPTIVE MATERIALS WITH OIL ARE NOT BEING HANDLED AS HAZARDOUS WASTES.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/ls/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]	
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed approximately 8 absorptive pads from the garbage dumpster. Three of the pads were still wet and smelled strongly of gasoline. Pads were removed from the dumpster during the inspection. CONTAMINATED PADS (ESPECIALLY THOSE CONTAMINATED WITH GASOLINE) MUST BE HANDLED AS HAZARDOUS WASTE. PROVIDE DOCUMENTATION OF PROPER HANDLING OF THESE PADS.*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a)]	
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***Observed 6 rolling carts for the daily collection of oil which were labeled, but who's labels are illegible or not completed. Also observed used oil and used antifreeze collection tanks with labels affixed to them which were faded and illegible/incomplete. Also, 15 gallon drum holding parts wash waste is missing an accumulation start date.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	
G220	M	**TRAINING: SQG** Personnel are not adequately trained on managing hazardous waste. ***Training last provided to most staff in 3/2009. PROVIDED TRAINING FLYER FOR FREE COUNTY TRAINING CLASS*** Provide training to ensure that all personnel are thoroughly familiar with proper waste handling and emergency response procedures relevant to their responsibilities during normal facility operations and emergencies. [CFR 262.34(d)(5)(iii)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204464
Facility Name: CARLSEN MOTOR CARS INC
Site Address: 1730 EMBARCADERO RD
PALO ALTO, CA 94303

Inspection Date: 5/3/2010

VC	Class	Violation	Corrective Actions Taken
G231	M	**TANK INSPECTIONS: SQG** Facility could not demonstrate that hazardous waste tanks are being inspected as required. ***Waste oil and antifreeze tanks are not being inspected daily to ensure that tanks will not overflow and that monitoring equipment is functional (oil tank float gauge).*** Inspect at least daily any discharge control systems, data gathered from monitoring equipment, and for uncovered tanks, the level of the waste in the tank. Inspect at least weekly the tank construction materials, and the area immediately surrounding the tank, including any discharge confinement structures. [CFR 265.201(c)]	
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS** Facility failed to properly mark a container of drained used oil/fuel filters. ***Observed two drums filters dated 2/10 and 4/10, but receipts show pick ups of filters on 3/25 and 4/23/2010. NEED TO ENSURE THAT FILTER DRUMS ARE MARKED WITH DATE FIRST FILTER PLACED IN IT.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3); HSC 25250.22]	
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed light tubes being stored along side of building not in a rigid container, and unmarked. PLACE BULBS IN RIGID CONTAINER TO PREVENT BREAKAGE AND MARK AS UNIVERSAL WASTE.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	

Comments: ***Overall shop is very clean- no liquids noted on floors in shop area.***
-two drums for collection of used oil filters, one dated 2/10, second dated 4/10. both currently in use. Suggest not beginning second drum until first drum is full. Noted that approximately 1/3 of filters in drums were non-metal cased filters (cartridge type).
-55 gallon drum for wash sump sludge. Per Lawrence Strong, handling as non-hazardous waste.
-Noted overflow of wash water from detail area to storm drain.
-Facility does not have container for collection of absorptive pads.
-All aerosol cans noted in trash were empty of both contents and propellants.
-Oil rollers pumped to oil tank daily. Antifreeze collected in shallow pans and poured to antifreeze tank daily.
- Facility has posted emergency information d evacuation routes as well as IIPP and emergency plan.
-Reviewed training records and plan, receipts for 2009 and 2010.
-Reviewed disposal receipts for 2009, 2010. Missing a few months from printer . Now using system where receipts are scanned for maintenance. Suggest allowing inspector just to view them online next inspection rather than re-printing all receipts.
-Facility appears to be an episodic LQG. Exceeded 270 gallons used in January and Sept. 2009

Information Request:
Provide an explanation of how the following items are handled:
1. Mop and "zamboni" water contaminated with oil or antifreeze.
2. Waste gasoline removed form gas tanks during maintenance

Unless otherwise noted by the inspector, correct all minor violations no later than 06/02/2010.
Correct all Class I and Class II violations immediately.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- ***Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.***
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

HAZARDOUS WASTE TANK SYSTEM WRITTEN ASSESSMENT TEMPORARY EXEMPTION APPLICATION

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 22 California Code of Regulations (CCR), Section 66265.192(j)

California hazardous waste regulations require that a hazardous waste tank system operated by large quantity generator or onsite hazardous waste treatment facility have a written assessment certified by professional engineer (PE) prior to being placed in service. The owner/operator of an aboveground tank system that is either RCRA-exempt or holds non-RCRA hazardous waste may apply to the local Certified Unified Program Agency (CUPA) for an extension of up to 36 months to the deadline for submittal of the written assessment. This form must be used to apply for such an extension. You should first review the Unidocs document titled "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." That document and CUPA/local HazMat agency jurisdiction and contact information are available at **www.unidocs.org**. Complete a separate form for each tank system. If the local CUPA and Fire Marshal authority are not the same agency, you must first obtain sign-off from the Fire Marshal or his/her authorized representative in Section 7, below, then forward the application to the CUPA.

1. Facility Name (Tank Site): Carlsen Audi EPA ID No.: CAD982346303
   Address: 1730 Embarcadero Road City: Palo Alto Zip: 94303
2. What is the tank volume in gallons? 500
3. What type of waste does this tank hold? ☒ Used oil; ☐ Used Antifreeze; ☐ Other *(Specify)*: _____
4. Does this tank system have secondary containment capable of containing 100% of the contents of the tank and ancillary piping volume? ☒ Yes; ☐ No.
5. Is this tank system exposed to precipitation? ☐ Yes; ☒ No. If "Yes," does the secondary containment system have sufficient capacity, in addition to that required above, to contain infiltration from a 25-year, 24-hour rainfall event? ☐ Yes; ☐ No N/A
   permit is 21 not effect secondary containment
6. Is the tank system secondary containment provided with a leak detection system designed and operated so that it will detect either the failure of the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours? ☐ Yes; ☒ No.
7. **FIRE MARSHAL APPROVAL: Our agency has approved the design and installation of this tank system.**

THOMAS L. NEWLAND		7/11/08
Fire Marshal or Representative's Name (Print)	Fire Marshal or Representative's Signature	Date

APPLICANT CERTIFICATION: I have read the Unidocs "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." I certify that the tank system for which this exemption is being requested is an aboveground tank (i.e., 90% or more of the total system volume is above-grade) and the tank system is either RCRA-exempt or the waste it holds is a non-RCRA hazardous waste. I have attached a drawing of the layout of the tank facility (e.g., Hazardous Materials Business Plan Site Plan/Storage Map) with the location of this tank and any associated piping runs (other than vent lines and vertical fill tubes) clearly identified. I declare that the above information is correct to the best of my knowledge. I agree to comply with all applicable state laws and regulations relating to the operation and management of this tank system. I represent the: ☒ Tank Owner; ☐ Tank Operator

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), *a false statement that compliance has been achieved is a misdemeanor.***
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations; or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

Comments: (see marked violations on page 1)

1- Provide cover/lid on waste oil storage tank. Clean area thoroughly & maintain in clean condition. Make necessary modifications to temporary oil containers to allow for proper draining to oil tank.

2- Provide spill kits for all areas of potential need including waste oil storage tank. The spill kit should include materials & equipment necessary to prevent any spill from entering the storm drain.

3. Maintain documentation of hazardous waste training for all required employees.

CERTIFIED MAIL P 347 433 764

Charles Burton, President
Carlsen Motor Cars, Inc.
1730 Embarcadero Rd.
Palo Alto, CA 94303

NOTICE OF VIOLATION AT: Carlsen Motor Cars, Inc.
1730 Embarcadero Rd., Palo Alto EPA#CAD982346363

Dear Mr. Burton:

On August 11, 1992 the Health Department - Office of Toxics Enforcement conducted an inspection at the above mentioned facility. As a result of that inspection, violations of the hazardous waste statutes (Health & Safety Code) and/or regulations (Title 22 California Code of Regulations) were found.

Upon receipt of this letter, Carlsen Motor Cars, Inc. must correct all deficiencies noted on the official inspection form by the dates stipulated. Tom Mountain, acting as a representative for this facility, signed the original form acknowledging receipt of a copy.

This office may conduct a reinspection of this facility to verify compliance. The issuance of this Notice of Violations does not preclude this department or any other agency having legal jurisdiction from taking administrative, civil, or criminal action as a result of the violations noted on the official inspection form.

If you have any questions regarding this notice, please contact Robert Holston at (408) 299-6930.

Sincerely,

Robert Holston

WASTE INVENTORY FORM

Please complete the following information:

Identify all waste streams generated by your facility. For each waste stream, identify the California Waste Code, annual quantities produced and current method of disposal for all waste manifested off site (ie., recycle (01), incineration (07), etc.) See the attached table for reference in selecting proper numerical codes for waste streams and disposal methods.

Waste Stream	CA Waste Code	Annual Quantity Generated		Current Disposal Method
(example) Paint waste	461	300 gal		01
Solvents		60	300	01
canola oil	251	4960	41366	01
ethylene glycol	342	550	4587	01
			46,253	
			21,024 kg	
				487 ÷ 2000 = 2.4T of Non-oil waste

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G041	M	**MANIFEST PROPERLY COMPLETED [3010008]** Facility failed to properly complete a Uniform Hazardous Waste Manifest in accordance with manifest instructions. ***2015 Manifests 006598804FLE (2/23), 010417408JJK (7/16), 014179668JJK (9/29) and 2016 manifest 015105311JJK (5/12) used EPA ID number CAL000404516. While active, this EPA ID number should not be used if CAL000395177 (used for majority of shipments) is to be used- as is reported on CERS.*** Submit a manifest correction letter to: DTSC, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806, Attn: Manifest Corrections. Instructions on how to submit a manifest correction letter are available upon request. [CCR 66262.23]	
G052	M	**CONSOLIDATED MANIFESTING: RECEIPT RETENTION [3010]** Facility failed to keep a consolidated manifest receipt for at least 3 years from the date of shipment. ***REceipts for pick up of oil, antifreeze, oily solids were intermittent throughout 2016. (example only one recpt between 3/25/15 and 10/12/15 for oil)*** ***Could not locate receipts for the removal of clarifier sludge since 2015.*** Obtain copies of all missing receipts noted above from your hazardous waste hauler. [HSC 25160.2(b)(3)]	
G110	M	**MAINTENANCE AND OPERATION OF FACILITY [3030030]** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***Noted skid plate leaning against the side of the building from which oil was running to the asphalt.*** ***55 gallon drum on side of building was noted holding approximately 15 gallons and a number of absorbent pads.*** Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases. [CCR 66265.31, CFR 265.31]	
G300	II	**ACCUMULATION TIME [3030012]** Facility accumulated hazardous waste on-site for longer than the allowed time limit. ***antifreeze accumulation intervals exceeded 90 days (7/16/15 to 6/15/16 to 1/25/17)*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 90 days. [CCR 66262.34(a)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204464 **Inspection Date:** 02/14/2017
Facility Name: AUDI PALO ALTO
Site Address: 1730 EMBARCADERO RD, PALO ALTO, CA 94303

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G321	M	**RECORDS: HAZARDOUS WASTE TRAINING [3020002]** Hazardous waste training records are incomplete or are not being kept as required. ***Last noted training documentation was 5/2015. Plan noting all the elements below is not present. Have incorporated brief plan in CERS with emergency plan, but as a episodic LQG, a complete plan should be present.*** Maintain training records that include: 1) the name and job title of each person in a position that has hazardous waste management responsibility; 2) a written job description that includes the duties, skills, education, or other qualifications required for each position described above; 3) a description of the type and amount of introductory and continuing training that will be given for each position; and 4) documentation that this training was completed by facility personnel. Keep current employee training records until facility closure. Keep records on former employee for at least 3 years from the date the employee last worked at the facility. [CCR 66265.16(e)]	
G343	M	**TANK INSPECTIONS [3030029]** Facility could not demonstrate that hazardous waste tanks are being inspected daily as required. ***Daily tank inspections are not being logged. Logs available in KPA box, but not in use.*** Perform and document hazardous waste tank inspections daily. Inspections must cover: 1) overfill/spill control equipment; 2) aboveground portions of the tank system; 3) data gathered from monitoring and leak detection equipment; 4) construction materials and the area immediately surrounding the tank system; and 5) the level of waste in the tank, for uncovered tanks. [CCR 66265.195]	
G344	II	**TANK SYSTEM ASSESSMENT: PERIODIC RE-ASSESSMENT [3010032]** Facility's tank assessment does not address all of the required element of a "new tank facility" which handles RCRA hazardous waste. ***Last noted tank assessment was conducted in 2008 (exemption application). Exemption applications are valid for 3 years. Either follow the provided corrective action text below or complete, have the fire department sign, and return the provided tank assessment exemption application.*** Make arrangements to have the tank system assessed by an appropriate Professional Engineer (PE) who is knowledgeable of hazardous waste tank system requirements. Ensure that the assessment is conducted to meet the requirements of 66265.192(k). Provide a specific date by which the assessment is expected to be completed. Upon completion of the assessment, submit a copy of the final report to HMCD. [CCR 66265.191(a), 66265.192(h)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204464
Facility Name: AUDI PALO ALTO
Site Address: 1730 EMBARCADERO RD, PALO ALTO, CA 94303
Inspection Date: 02/14/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G448	M	**RECORDS: UNIVERSAL WASTE [3030046]** Facility failed to keep adequate records of the shipment or receipt of Universal Waste for at least 3 years. ***Records of shipment of universal waste aerosol cans could not be located.*** Keep a record of Universal Waste shipments sent off-site or received on-site for at least 3 years from the shipment/receipt date. The record may take the form of a log, invoice, manifest, bill of lading or other shipping document. It must contain the name and address of the originating facility, name and address of the destination facility, quantity (weight or unit count) and type of waste sent, and date of shipment/receipt. [CCR 66273.39]	

Comments: Facility is automotive dealership with affiliated service and maintenance activities.
EPA ID CAL000395177 per CERS (inactive on date of inspection) and CAL000404516 (active). both issued to Kuni Redwood Motors LLC.
Mop water is poured to wash area clarifier. Clarifier is serviced on regular basis.
Filters are segregated (cased v. uncased). Noted fuel filters with metal casing in the drum with metal cased filters as is allowed by HSC 25144.
Batteries exchanged 1-for-1. Receipts available at parts.
Rags serviced by G&K.
Absorbent pads noted available for spill control. Fire extinguishers and eyewash in good condition.
According to Mr. Brown, vehicles are drained of oil from the top of the engine using pump evacuators. These evacuators are then poured to rolling oil collection carts which are then drained via vac pump to the 500 gallon double walled used oil tank.
--Same procedure used for antifreeze and gasoline/diesel contaminated.
Receipts and manifests now stored in KPA box.
Training documentation for techs for HW program noted 5/2015.
Contingency plan posted to CERS as HMBP emergency plan. All components of plan are present.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 03/16/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

CA UST Inspector #8016994, Exp. 08/26/2018

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Summary of Violations & Notice to Comply

Program: PR0313331 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G002	M	**INACTIVE EPA ID NUMBER [3010002]** Facility failed to maintain an active EPA ID number. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number ***Primarily used EPA ID CAL000395177 is inactive as of time of inspection.*** Reactivate your EPA ID number by submitting DTSC FORM 1358 to DTSC. [HSC 25201.16(c)]	DTSC Form 1358 was submitted on 5/12/17. See form attached.
G020	M	**MARKING OF HAZARDOUS WASTE [3030007]** Facility failed to properly mark a hazardous waste tank and/or container. ***Rolling carts and evacuators used for the interim (daily and less) storage of oil, antifreeze and gas/diesel fuels are not marked. Example label provided.*** ***55 gallon stell drum holding oily materials from clarifier unmarked.*** ***Also, noted receipts demonstrating pick up of oils on dates which were not marked on the used oil tank label. Ensure that label is updated each time was is removed from it.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	All rolling carts and fluid evacuators have been properly labeled. Oily water from clarifier has proper hazardous waste label. Accumulation start date of used oil is being properly tracked on label. Photos are attached.
G023	M	**CONTAINER OPEN [3030017]** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***55 gallon container holding oily wastes from clarifier had lid on drum, but ring not tight enough to prevent release if orientation changed.*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	The ring has been tightened and will stay that way. Photo attached.

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC § §25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

APPENDIX G
USER QUESTIONNAIRE

User Questionnaire	
Subject Property Address	1730 Embarcadero Road, Palo Alto, California 94303
USER Name and Title	SVEN WOOD, GENERAL MANAGER
User Company	Audi Palo Alto
Company Address	1730 Embarcadero Rd, Palo Alto, CA 94303
City, State, Zip	

Question	***Yes***	***No***	***Please Explain***
Are you aware of any prior environmental work performed at the property (if yes, please provide a copy to EI).	☐	☒	
1. Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under Federal, tribal, state, or local law?	☐	☒	
2. Are you aware of any *Activity and Use Limitations (AULs)*, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?	☐	☒	
3. ASTM E 1527-13, Section 6.2, suggests that the User engage a title professional to undertake a review of recorded land title records and lien records for *environmental liens* or *AULs* currently recorded against the property. EI recommends that the User or the User's customer secure a title review that addresses these requirements and avoid duplication of efforts. Will this be provided to EI? ***Failure to provide this information might result in the Phase I report denoting this lack of information as environmentally significant.*** If you would like EI to secure this information for you, please call our office as soon as possible.	☐	☒	
4. Do you have any *specialized knowledge* or experience material to environmental conditions at the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property such that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐	☒	
5a. Does the purchase price being paid for this property reasonably reflect the *fair market value* of the subject property? 5b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination if known or believed to be present at the subject property?	a. ☒ b. ☐	a. ☐ b. ☐	
6. Are you aware of *commonly known or reasonably ascertainable* information about the subject property that would help to identify conditions indicative of releases or threatened releases of contaminants? For example: a. Do you know the past uses of the subject property? b. Do you know of specific chemicals that are present or once were present at the subject property? c. Do you know of spills or other chemical releases that have taken place at the subject property? d. Do you know of any environmental cleanups that have taken place at the subject property?	a. ☒ b. ☒ c. ☐ d. ☐	a. ☐ b. ☐ c. ☒ d. ☒	
7. Based on your knowledge and experience related to the subject property, are there any *obvious indicators* that point to the presence or likely presence of contamination at the subject property?	☐	☒	

Question	*Please Explain*
8. According to AAI, the User must tell the environmental professional why Phase I Environmental Site Assessment is being performed or, if the User does not identify the purpose of the Phase I, the environmental professional will presume that the purpose is to qualify for the LLP to CERCLA liability.	***State reason for Phase I:*** Preparation for purchase

APPENDIX H
SPECIAL TERMS AND CONDITIONS, LIMITATIONS, AND EXCEPTIONS

The following Special Terms and Conditions, Limitations, and Exceptions apply to the completion of this Phase I Environmental Site Assessment:

- *Not Exhaustive – All appropriate inquiry* does not mean an exhaustive assessment of a clean *property*. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an *environmental site assessment* and the reduction of uncertainty about unknown conditions resulting from additional information.
- Invasive investigation of any kind has not been performed. Observation under floors, above ceilings, behind walls, within surface or subsurface soils, within confined spaces, or within any surface or groundwaters has not been performed.
- No subsurface investigation of groundwater gradients has been performed. While discussion of apparent topographic gradient may be included in this report, this apparent surface gradient may not necessarily correspond with actual groundwater gradients on, or in the vicinity of, the subject property. Site specific groundwater gradients may only be determined through subsurface potentiometric investigation.
- No sampling or analysis of air, soil or water was performed to determine their constituents.
- The investigation for underground storage tanks (USTs) consisted of a visual inspection of the site, interviews with site representatives, and a regulatory records review. No techniques were employed to detect the presence of buried tanks.
- The consultant and its representatives shall not be responsible for determining the validity or truthfulness of answers received during interviews or of information and records obtained from government agencies. If records are not reasonably ascertainable, or if the client requests that the report be finalized prior to receiving all responses to information requests, any information relevant to recognized environmental conditions on the subject property subsequently received will be forwarded to the client.
- Conclusions in this report are based upon visual observations made at the site and information received prior to the date of this report. Since site conditions may change significantly over a short period of time and additional data may become available, data reported and conclusions drawn in this report are limited to current conditions and may not be relied upon on a significantly later date.
- EI makes no warranties, express or implied, regarding any statements, conclusions, data or other information contained in referenced reports that are not prepared by EI. It is understood that EI does not independently verify the information contained therein.
- This document does not address requirements of any State or local laws or of any Federal laws, including the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), other than the *all appropriate inquiry* standard.
- This investigation is not an environmental compliance audit. While some observations and discussion in this report address conditions, which may be regulated, the regulatory compliance of those conditions is outside the scope of this investigation.
- This document does not address issues raised in other transactions such as purchases of business entities, their assets, or any other interest therein, that may involve environmental liabilities pertaining to properties previously owned or operated or other off-site environmental liabilities.
- E 1527 excludes certain hazards due to their exclusion from Superfund. Therefore, this report does not include investigation for asbestos, radionuclides such as radon or for lead in drinking water and lead-based paint, unless otherwise specified by the client.
- This document may include slight deviations in the exact format specified in E 1527 in order to account for site specific conditions and to improve the readability and usefulness of the report.
- If performed within the scope of E 1527, the chain-of-title review is completed for the sole purpose of characterizing past site usage. The consultant is not a professional title company and makes no guarantee, warranty, or other representation, expressed or implied, that the resulting listing represents a comprehensive delineation of past site ownership or tenancy for title conveyance purposes.
- No environmental site assessment can wholly eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with a property. Similarly, no *environmental professional* can be expected to visually observe every detail within a property or every record concerning a property. Therefore, the completion of this investigation in conjunction with E 1527 and the professional judgment of the contributors to this report is intended to reduce, but not eliminate, uncertainty regarding the potential for *recognized environmental conditions* in connection with the subject property.
- Nothing in this report constitutes a legal opinion or legal advice. Consultation with independent legal counsel is recommended for information regarding specific individual or organizational liability.

APPENDIX I
STANDARD AGREEMENT FOR SERVICES

Standard Agreement for Services

AGREEMENT FOR SERVICES

THIS AGREEMENT, made and entered into this _____ day of _____, 2018, by and between HOLMAN ENTERPRISES (the "Client"), a NEW JERSEY corporation at 4001 Leadenhall Road, P.O. Box 5004, Mt. Laurel, NJ 08054 and THE EI GROUP, INC., dba EI, INC., a North Carolina corporation with its Corporate Headquarters at 2101 Gateway Centre Boulevard, Suite 200, Morrisville, North Carolina 27560 (the "Consultant").

WITNESSETH:

WHEREAS, the Consultant is engaged in the business of performing consulting services relating to environment, health and safety matters; and

WHEREAS, the Client desires to contract with the Consultant to perform such services for Client (the "Project") as may be requested by the Client from time to time through a written Request for Proposal (the "RFP") submitted by Client to Consultant for a location designated in the RFP by Client (the "Project Site");

NOW, THEREFORE, in consideration of the mutual covenants and promises contained herein, the parties hereto agree as follows:

1. Professional Services to be Provided. The Consultant will provide professional services for the Project as described in a written proposal prepared by the Consultant.

2. Right of Entry and Right to Proceed. In order for the Consultant to perform its services hereunder, the Client grants a right of entry from time to time to the Consultant, its agents, staff, consultants and contractors, for the purpose of performing acts, studies and research including, without limitation in connection with the agreed services. The Client represents that it possesses all necessary permits and licenses required for the performance and continuation of these activities at the Site.

3. Billing and Payment. Unless otherwise indicated in the Proposal, the Consultant's billings will be based on accrued time, test costs and expenses. [A fifteen percent handling charge will be applied to all subcontract services including, but not limited to: laboratory analyses; remediation services associated with solid waste, petroleum contaminated soils and hazardous waste (excavation, transportation, and disposal); removal of underground storage tanks; truck-mounted soil borings and groundwater monitoring well installation] The Client agrees to pay invoices upon receipt. Should payment not be received within thirty (30) days, the amount due shall bear a service charge of one and one-half percent per month or 18 percent per year plus the cost of collection, including reasonable attorneys' fees, if collected by law or through an attorney. If one and one-half percent per month exceeds the maximum rate allowed by law, the charge will automatically be reduced to the maximum rate legally allowed. If the Client has any objections to any invoice or part thereof submitted by the Consultant, he shall so advise the Consultant in writing within fourteen (14) days of receipt of such notice. If the Project is terminated in whole or in part, then the Consultant shall be paid for services performed prior to delivery of written notice of such termination, in addition to the Consultant's reimbursable expenses and any shutdown costs incurred. Shutdown costs may, at the discretion of the Consultant, include completion of analyses and records necessary to complete the Consultant's files.

4. Standard of Care and Warranty. Professional services provided by the Consultant will be performed, findings obtained and recommendations prepared in accordance with generally accepted environment, health and safety consulting principles and practices.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES. NO OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IS MADE OR INTENDED BY THIS AGREEMENT, BY FURNISHING AN ORAL REPORT OF THE FINDINGS MADE OR BY ANY REPRESENTATIONS MADE REGARDING THE SERVICES TO BE PROVIDED PURSUANT TO THIS AGREEMENT. IN NO EVENT SHALL THE CONSULTANT BE LIABLE FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL LOSSES OR DAMAGES. THE TOTAL LIABILITY OF CONSULTANT ON ANY CLAIM, WHETHER IN CONTRACT, TORT (INCLUDING NEGLIGENCE, WHETHER SOLE OR CONCURRENT), OR OTHERWISE ARISING OUT OF, CONNECTED WITH OR RESULTING FROM THE SERVICES PROVIDED PURSUANT TO THIS AGREEMENT SHALL NOT EXCEED $1,000,000.00.

5. Insurance and Liability. The Consultant maintains worker's compensation and employer's liability insurance for the Consultant's employees if required by law. In addition, the Consultant will maintain comprehensive general liability and automobile liability insurance with limits of $1,000,000.00. The Consultant will not be liable or responsible for any loss, damage or liability beyond the amounts, limits, coverage or conditions of such insurance specified above.

6. Hazardous Substances and Constituents. By virtue of entering into this Agreement, or of providing services hereunder, the Consultant does not assume control of, or responsibility for, the Project Site or the person in charge of the Project Site or undertake responsibility for reporting to any federal, state or local public agencies, any conditions at the Project Site that may present a potential danger to the public, health, safety or environment except where required of the Consultant by law. The Client agrees to notify the appropriate federal, state or local public agencies as required by law, of any information that may be necessary to prevent any danger to health, safety or the environment.

7. Force Majeure. Should completion of any portion of the services be delayed for causes beyond the control of, or without the fault or negligence of the Consultant, including a force majeure, the time for performance shall be extended for a period equal to the period of delay and the parties shall mutually agree on the terms and conditions upon which the services may be continued. Force majeure includes, but is not restricted to, acts of God or a public enemy, acts of the Government of the United States, the several states, or any foreign country or any of them acting in their sovereign capacity, acts of the Client's contractors or agents, fires, floods, epidemics, riots, quarantine restrictions, strikes, civil insurrections, freight embargoes and unusually severe weather.

8. Documents. The Client will furnish or cause to be furnished to the Consultant such reports, data, studies, plans, specifications, documents and other information deemed necessary by the Consultant for proper performance of the Consultant's services. The Consultant may rely upon the documents so provided in performing the services required under this Agreement; provided, however, that the Consultant assumes no responsibility or liability for their accuracy. The documents so provided will remain the property of the Client. All documents, including, but not limited to, drawings, specifications, reports, boring logs, field notes, laboratory test data, calculations and estimates, prepared by the Consultant pursuant to this Agreement, shall be the Client's sole property and electronic versions are to be provided upon request.. The Client agrees that all documents of any nature furnished to the Client or the Client's agents or designees, if not paid for, will be returned upon demand and will not be used by the Client for any purpose whatsoever. The Client further agrees that under no circumstances shall any documents produced by the Consultant pursuant to this Agreement be used at any location or for any project not expressly provided for in this Agreement without the Consultant's prior written permission. If the Client uses all or any portion of the Consultant's work on another

project without the Consultant's permission, the Client shall, to the maximum extent permitted by law, save the Consultant harmless from any and all claims arising from such unauthorized reuse.

9. Field Representative. The presence of the Consultant's field personnel will be for the purpose of providing observation and field testing of specific aspects of the Project. Should a contractor retained by the Client be involved in the Project, the Consultant's responsibility does not include the supervision or direction of the actual work of the Client's contractor, his employees or agents. The Client's contractor should be so advised. The Client's contractor should also be informed that neither the presence of the Consultant's field representative nor the observation and testing by the Consultant shall excuse Client's contractor in any way for defects discovered in contractor's work. It is agreed that the Consultant will not be responsible for job or site safety on the Project Site and that the Consultant does not have the right to stop the work of the Client's contractor.

10. Severability. In the even that any provision herein shall be deemed invalid or unenforceable, the other provisions hereof shall remain in full force and effect, and binding upon the parties hereto.

11. Survival. All obligations arising prior to the termination of this Agreement and all provisions of this Agreement allocating responsibility or liability between the Client and the Consultant shall survive the completion of the services and the termination of this Agreement.

12. Governing Law. This Agreement shall be governed in all respects by the laws of the State of North Carolina.

13. Entire Agreement. This Agreement and the Client's Vendor Agreement represents the entire understanding and agreement between the parties hereto relating to the services and supercedes any and all prior agreements whether written or oral that may exist between the parties regarding same. This Agreement shall not be assigned by either the Consultant or the Client without the other's permission.

No amendment or modification to this Agreement or any waiver of any provisions hereof shall be effective unless in writing and signed by both parties.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representative.

APPENDIX J
QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

John W. Royal

Senior Environmental Scientist

Professional Summary

Mr. Royal has extensive experience in the characterization, delineation, and mitigation of sites with impacted soil and groundwater. His responsibilities include developing and implementing soil and groundwater investigations; data evaluation and reporting; the design, installation, operation, and evaluation of groundwater and soil remediation systems with air discharge, sewer discharge and surface water NPDES discharge permits. Mr. Royal also conducts Phase I and II Site Assessments and litigation support investigations. Mr. Royal has experience in a wide variety of environmental projects, including asbestos and lead paint management. He has completed numerous asbestos surveys, and has managed projects involving asbestos and lead paint management and asbestos and lead paint abatement contractor oversight. Mr. Royal has also consulted on air emissions and air quality issues.

Mr. Royal's Project Experience Includes:

- Project Manager for large property management client with numerous former gas station sites in Southern California that are in various stages of remediation;
- Project Field Coordinator on a very large redevelopment project for a major retailer;
- Project Field Coordinator on the remedial excavation of a former incinerator and burn dump burial pit in Dublin California;
- Project Field Coordinator on the remedial excavation of a former car rental facility for a "Big 3" auto maker at the San Francisco International Airport during the recent renovation;
- Project manager for several sites in San Diego County with NPDES discharge permits;
- Project Manager on a remediation project involving lead dust present on the surface of an industrial facility under storm water discharge sampling requirements;

Education & Training

B.S. Geology, San Diego State University, San Diego, California
Extended Studies - Hydrogeology; Subsurface Contamination and Contaminate Transport; Vapor Phase Dynamics of Organic Pollutants, San Diego State University, San Diego, California
Principles of Toxicology, University of California, San Diego
Principles of Environmental Law, University of California, San Diego
Erosion and Sediment Control Training, City of San Diego
Mold Workshop, Building Industry Association of San Diego

Licenses & Registrations

Registered Geologist, California

Professional Affiliations

San Diego Association of Geologists
San Diego Environmental Professionals
United States Marine Corps Reserve

- Project Manager on projects involving assessment of vapor and groundwater migration risk evaluation at former UST sites;
- Project Field Coordinator on a major oil bulk storage/distribution center; and
- Staff Scientist on a litigation support investigation for a major oil client and client's outside counsel.

Kerri Boddy

Senior Environmental Scientist

Professional Summary

Ms. Boddy has developed a strong base of knowledge in the field of environmental issues which relate to real estate through her education and through experience with various positions in consulting organizations since 1989. Her experience includes positions with The EI Group, Inc., ESA1, Environmental Site Assessments, Inc., ATEC Associates, and Analytical Management, Inc.

Ms. Boddy has performed over a thousand Phase I Environmental Site Assessments throughout the country for properties ranging from isolated commercial sites, multiple locations for restaurant chains, large industrial facilities, industrial centers, gasoline stations, bulk fuel terminals, and dry cleaners. She has managed the completion of thousands more due diligence assessments of all types of property.

She also has performed a wide range of Phase II soil and groundwater investigations as well as remediation activities such as underground storage tank removals and is experienced in all phases of asbestos and lead surveys, management, and consulting services.

Ms. Boddy holds a B.S. in Geology from the State University of New York at Stony Brook, an M.B.A. from the University of Louisville, and holds certifications for Licensed Asbestos Building Inspector, Licensed Asbestos Management Planner, Certified Asbestos Supervisor, Licensed Lead Inspector and Risk Assessor, and Lead Safety for Renovation, Repair, and Painting (RRP). Ms. Boddy also has received training in OSHA 1910.120 40-Hour Health and Safety Training for Hazardous Waste Site Investigation, Radiation Awareness and the XRF Spectrum Analyzer, McCrone Research Institute Microscopical Identification of Asbestos, Analytical Management, Inc. Microscopical Identification of Asbestos, and Green Building Basics and LEED course through U.S. Green Building Council.

Education & Training

M.B.A., University of Louisville
B.S., Geology, State University of New York at Stony Brook
Geology Field Work in Quebec, Canada – Boston University

Licenses & Registrations

Certified Asbestos Building Inspector
Certified Asbestos Management Planner
Certified Asbestos Supervisor
Certified Lead Inspector and Risk Assessor
OSHA 40 HAZWOPER
Lead Safety for Renovation, Repair, and Painting (RRP)

Professional Affiliations

American Industrial Hygiene Association (AIHA)
Environmental Bankers Association
Federal Safety and Health Council (Southeastern Division)

Ms. Boddy's primary role at EI involves management of environmental policies and procedures for Synovus, QA/QC of due diligence reports, training, logistics, and operations management. Ms. Boddy's primary training role includes teaching Asbestos Supervisor, Worker, Building Inspector, Management Planner initial and refresher classes.

RE: Phase I Environmental Site Assessment Report
Subject Site Location: 1730 Embarcadero Road, Palo Alto, California 94303
***PHASE ONE* INC.** Project No. 7555

Dear Mr. Ambrose:

Enclosed with this letter are copies of the Phase I Environmental Site Assessment Report completed by ***PHASE ONE* INC.** for the site referenced above. As you will note in the report, our conclusions regarding the environmental condition of the site are summarized both in Section 1.0, ***Executive Summary***, and Section 6.0, ***Conclusions and Recommendations***.

Please don't hesitate to contact us should you have any questions regarding the environmental assessment, or if we can be of additional assistance. We look forward to working with you again in the future.

Sincerely,

Eric Kieselbach
President

SECTION 1.0

EXECUTIVE SUMMARY: FINDINGS AND CONCLUSIONS

1.1 FINDINGS

This report presents the results of the Phase I Environmental Site Assessment conducted by ***PHASE ONE* INC.** at 1730 Embarcadero Road, Palo Alto, California 94303 (see Figure 1, ***Site Location Map***). The Phase I assessment was undertaken at the request of Ken Ambrose, Boardwalk Auto Group, in accordance with ***PHASE ONE* INC.**'s ***Standard Terms and Conditions***, as outlined in ***PHASE ONE* INC.**'s ***Letter of Intent/Authorization*** for Project **Nº** 7555. The findings and conclusions of this investigation are based upon a review of historic site-use activities, contact with and records from governmental regulatory agencies, regulatory database searches, as well as a site reconnaissance and interviews with the client, site personnel, and possibly others who may have knowledge of various aspects of the subject site.

At the time of this assessment, the site consisted of approximately 2.283 acres of developed land with a 21,104 sq. ft. building occupied by Carlsen Audi car dealership. The front (northern) portion of the building has the car showroom, and offices; the southern portion of the building has the parts department, vehicle service/shop area, car wash room, a smaller servicing room, and exterior detail area. The surface area surrounding the buildings is paved with asphalt. There is a large car sales lot on the southern portion of the property. Information gathered in the course of this assessment indicates that the subject site is currently owned by Charles Burton.

The principal findings of ***PHASE ONE* INC.**'s Phase I Environmental Site Assessment for this site are as follows:

The subject site is currently affected by

- One recognized environmental condition(s) (REC); and
- Four *de minimis* conditions, no historical recognized environmental conditions (HREC), and one controlled recognized environmental condition (CREC).
- The potential for soil or groundwater contamination of the subject property from either on or off-site sources appears to be high. (See Condition #6)
- Given the findings and conclusions of ***PHASE ONE* INC.**'s Phase I Environmental Site Assessment, further investigation is recommended at this time.
- ***PHASE ONE* INC.** has performed this Phase I Environmental Site Assessment of the subject site in conformance with the scope and limitations of the Environmental Protection Agency, Standards and Practices for All Appropriate Inquiries, 40 CFR Part 312 and the standard practice set forth in the American Society for Testing and Materials (ASTM) Designation: E1527-13, "Standard Practice for Environmental Site Assessments: Phase I

Copyright © 2014 ***PHASE ONE* INC.** All rights reserved

[10.1.24] [Co.86 Phase I Environmental 2014-01-27 (1730 Embarcadero Rd, Palo Alto, CA).pdf] [Page 6 of 463]

Environmental Site Assessment Process." Any exceptions to, or deletions from, these practices are described in Section 1.4 of this report.

- This assessment has revealed no evidence of recognized environmental conditions in connection with the property except for those listed in Section 1.2.

1.2 CONCLUSIONS SUMMARY

Based on the findings of this Phase I Environmental Site Assessment, ***PHASE ONE*** **INC.** has identified the following recognized environmental condition(s):

RECOGNIZED ENVIRONMENTAL CONDITION(S)

Condition #	Location	Description of Condition
1	Vehicle Washroom/ West Side of Building/Southern Side of Building	According to reviewed historical resources and current site inspection, the site has been utilized for a car dealership with vehicle repair/servicing for at least 40± years. In their operations, automotive-related hazardous materials (oils, solvents, anti-freeze, etc.) have been utilized for this period of time. There is an interior washroom area for washing vehicles located on the southwestern corner of the servicing building. In the wash room is a sump/clarifier unit that is utilized to collect wash water from the vehicle washing operations. During the site reconnaissance, the clarifier unit/sump was not visible. Wash water was settled over the unit preventing a visual inspection. The integrity of the sump/oil trap's walls, base, and associated piping could not be observed, and the unit has been plugged up in the past. Due to the age of this unit, the subsurface may have been impacted by possible seepage/leakages from this unit with automotive related chemicals of concern. In addition, several areas of asphalt surfaces have been impacted with spillage/leakage of oils and other automotive fluids. Staining was observed on the asphalt areas on the covered west side of the building next to the aboveground new oil tank. The drain grate cover had oil staining and the asphalt areas below and next to the compressors had significant staining, and some of the surface areas had cracks. Staining was also observed on the asphalt area below the plastic aboveground tank containing waste anti-freeze in the hazardous materials storage area on the southern side of the building. It is unknown, if the subsurface has been impacted with these spills or releases in these areas.

Note: Descriptions of conditions are given again in further detail in Section 6.0, ***Conclusions and Recommendations***, along with recommendations as to how to address the conditions and the estimated costs of completing any recommended next-step action. ***PHASE ONE*** **INC.** classifies a recognized environmental condition, per the ASTM Standard E 1527-13 definition, as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to release to the environment; under conditions indicate of a release to the environment or under conditions that pose a material threat of future release. *De minimis* conditions are not recognized environmental conditions.

Based on the findings of this Phase I Environmental Site Assessment, ***PHASE ONE*** **INC.** has identified the following *de minimis* condition, historical recognized environmental conditions, and/or controlled recognized environmental conditions:

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

DE MINIMIS, OR HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITION(S)

Condition #	Location	Description of Condition	Condition
2	Subject Site	Although the site was used for agricultural purposes in the past, the subsequent commercial development of the site minimizes the probability of occupants to come in contact with possible residual agricultural chemicals in the soil or groundwater.	*De minimis*
3	Subject Structure	Given the pre-1981 construction date of the subject structure(s), during the site reconnaissance, materials were identified that are suspected of containing asbestos. At the time of the inspection, all of the materials appeared to be intact and undisturbed (that is, they appeared to be in a non-friable condition) and, thus, do not pose an immediate environmental concern. Still, these materials may become hazardous if they in fact contain asbestos and are subsequently damaged or disturbed, as, for example, in the course of remodeling. Asbestos-containing materials are considered to be hazardous materials, and their eventual disposal and handling are subject to federal and state regulatory guidelines.	*De minimis*
4	Subject Structure	Given the pre-1979 construction date of the subject structure, the past use of lead-based paints and leaded piping and/or fixtures is suspected. Deteriorating paint may pose a significant health hazard if ingested or inhaled, particularly for children. Due to the nature of the site use, the possibility of children being affected is low. Lead-containing paint is considered hazardous waste, and the eventual disposal of lead-containing paint may be subject to regulatory restrictions. Lead-containing water is considered hazardous to health at certain levels.	*De minimis*
5	East Adjacent Site 1766 Embarcadero Road	This adjacent site has been identified in the environmental records search document. It has been reported as having an environmental condition that has led to the contamination of the area groundwater. The groundwater pollution extends to the east of this site.	*De minimis*
6	West Side of Service Building/ Central Southern Portion of Car Sales Lot	There were formerly four underground storage tanks located on the subject site. They were removed in 1996. Thirty-nine tons of soil was removed, and 1,200 gallons of groundwater was disposed of during the remediation activities. Some residual soil contamination was left in place in the southern tank pit area. Upon closure, soil and groundwater contamination remained on site (groundwater contamination appeared to be localized in the area adjacent to the former tank pit); however, the residual soil and groundwater contamination were below levels which required cleaning and were below levels of regulatory concern.	CREC

Note: Descriptions of conditions are given again in further detail in Section 6.0, *Conclusions and Recommendations*, along with recommendations as to how to address the conditions. ***PHASE ONE* INC.** classifies an environmental condition as a *de minimis* (potential or possible) condition when it appears to pose no immediate threat to the subject site and/or requires no immediate action given the current knowledge of site conditions. This condition with time, groundwater movement, demolition or other disturbances, or sometimes with the acquisition of further information, may come to pose a long-term, immediate or chronic environmental risk; and/or this condition may appear to have a negligible monetary/physical impact on the subject property, and therefore, does not require additional investigation at this time. ***PHASE ONE* INC.** classifies a historical recognized environmental condition (HREC) as an issue which was considered a recognized environmental condition in the past, but is no longer considered a recognized environmental condition as a result of prior investigation and/or mitigation. An HREC is limited to include only past releases that have been addressed to unrestricted residential use. ***PHASE ONE* INC.** classifies a Controlled Recognized Environmental Condition (CREC) as a condition where previous releases at the site underwent risk-based closure, but contaminants have been allowed to remain in place under certain restrictions or conditions.

1.3 SITE FACTS

Current Owner(s): Charles Burton

Current Use: Automotive Dealer/Repair

Total # of Existing Buildings: 1

Total Sq. Ft. of Building: 21,104

Date Oldest Building was Built: 1970

Total # of Units: 1

Total # of Units Visually Inspected: All

Specific Units Inspected: All

The subject site obtains its potable water from municipal sources.

The subject site disposes of its sewage through use of the local municipal sewage system.

The subject building is heated and/or cooled by a heating and air-conditioning system. The heating and air-conditioning system obtains its fuel from electricity.

Site Contact: Ron Burton, General Manager, Carlsen

Field Assessor: Andrew Pham

Report Writer: Nadine Kieselbach

Parcel #:008-03-066

Address(es) Provided by Client: 1730 Embarcadero Road

Additional/Previous Address(es): None identified

Total Acreage of Land: 2.283

Date of Site Reconnaissance: January 3, 2014

Total # of Wells (water, oil, gas, other) identified onsite: None

Areas/Units that were inaccessible to the ***PHASE ONE*** **INC.** field assessor: None

Were enough (units/offices/buildings/acres) inspected to ensure that the inspection was homogenous? Yes

bulbae@carlsenauto.com

CONFIDENTIAL

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

Did the field assessor notice any unusual odors on or from the subject site or adjoining sites during the site reconnaissance? No

1.4 EXCEPTIONS AND/OR DELETIONS TO ASTM E 1527

There are exceptions to ASTM E 1527. The exceptions are as follows:

At the oldest research interval in this report (1948), the subject property use was undeveloped land. It is likely that the first developed use of the property is the car dealership. Therefore, it is our opinion that this data gap (1940 – 1946) does not appear to materially affect the conclusions of this report

babate@holmanautogroup.com
Project Atlantic/12:02:2014 13:52
CONFIDENTIAL

SECTION 2.0

INTRODUCTION

2.1 PURPOSE OF A PHASE I ESA

The purpose of this Phase I Environmental Site Assessment is to assess (1) the likelihood of contamination of the subject site as a result of either past or present land-use practices; and (2) the potential for future environmental contamination which may occur as a result of current conditions or operations and maintenance activities at either the subject site or properties adjoining the subject site, thereby identifying real or potential environmental or economic impact to the subject site. In this way, the client may satisfy a requirement to qualify for the innocent landowner defense to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability by completing "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial and customary practice." To meet these objectives, ***PHASE ONE*** **INC.** attempted to complete the tasks outlined in this section except as noted in Section 1.4.

2.2 SCOPE OF WORK

The Scope of Work that has been followed for this assessment is identified in Section 1.1, Page 1-1.

2.2.1 Site Description

Site photographs were taken during the site reconnaissance. The photographs and their summary descriptions can be found in **Appendix A.**

PHASE ONE **INC.** reviewed pertinent, reasonably ascertainable information on the soil types and groundwater conditions in the vicinity of the subject site. For the purposes of this assessment, the depth from the ground surface and the direction (or gradient) of the groundwater flow are of particular significance. Such findings are used by ***PHASE ONE*** **INC.** report writers, in conjunction with additional information about environmental conditions on nearby sites, to assess the risk that is faced by the subject site from off-site sources of contamination.

It should be noted that ***PHASE ONE*** **INC.**'s geological and hydrological research does not include investigation of seismological concerns (i.e., fault lines) that may affect the area of the subject site. Although the existence of faults in an area may be of concern to property owners and residents in that area, it is not considered to be an environmental concern, and so is not usually a component of a Phase I Environmental Site Assessment. (However, in the event that it is required, ***PHASE ONE*** **INC.** can assist the client in completing a seismological investigation.)

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

2.2.2 Site Reconnaissance

A ***PHASE ONE*** **INC.** field assessor conducted a visual reconnaissance of the subject property to identify observable signs of environmental impairments, including on-site operations and maintenance activities which may lead to possible environmental impairment. As a part of the site reconnaissance, ***PHASE ONE*** **INC.** visually inspected the site for obvious indications of:

- Existing and previously existing storage tanks (aboveground and underground)
- Hazardous substances storage and handling
- Clarifiers, sumps, trenches, and industrial discharge sources
- Equipment which may contain polychlorinated biphenyls (PCB) (fluorescent light ballasts are not inspected)
- Indications of spillage of hazardous substances, and the general condition of concrete, asphalt, soil, and other surfaces
- Indications of stressed vegetation as a result of on-site contamination

During the site reconnaissance, ***PHASE ONE*** **INC.** field assessors may make note of basic compliance issues which, may be environmental in nature, however are not issues directly associated with the potential for site contamination (i.e., the specific objective of our assessment). However, as a service to our clients, and because these compliance issues may contribute to our overall understanding of site operations, ***PHASE ONE*** **INC.** may comment on the site's basic compliance status. The review of the site's compliance status is not intended to be complete or comprehensive and may or may not include all items identified during the site reconnaissance.

Again, the compliance review is not intended as a comprehensive compliance audit. Rather, the compliance review is only intended to aid ***PHASE ONE*** **INC.** in determining the likelihood that the subject site may have been impacted by releases of hazardous substances.

When the storage or use of hazardous substances are encountered on a site, the ***PHASE ONE*** **INC.** field assessor will look for or inquire about the on-site presence of Material Safety Data Sheets (MSDSs). MSDSs are prepared by the manufacturers of hazardous substances (pursuant to OSHA's Hazard Communication Standard), and they detail the components, dangers, and proper handling procedures for the hazardous substance for which they have been prepared. The presence or absence of MSDSs for on-site hazardous substances will be noted in 3.5, ***Hazardous Substances Storage and Handling***. However, some sites may use or store hundreds of various chemical compounds. In such cases, it is practically impossible for the field assessor to match-up each substance with its corresponding MSDS. Still, the field assessor will inquire about MSDSs and copies of representative MSDSs that were made available will be included in Appendix G.

PHASE ONE **INC.** may have (based on contract) inspected and reviewed information for the subject site regarding the presence of specific hazardous substances which are relatively common sources of environmental concern. The substances in question include:

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

[10.1.24] [Co.86 Phase I Environmental 2014-01-27 (1730 Embarcadero Rd, Palo Alto, CA).pdf] [Page 12 of 463]

- Common building materials that may contain or are suspected of containing asbestos
- Radon (at elevated levels)
- Lead-contaminated drinking water
- Lead-based paints

Based on ASTM E1527, federal, state, and other regulatory agency guidelines, the following presumptions were in force if and when ***PHASE ONE*** **INC.** inspected the subject site for specific hazardous substances:

- Structures built after 1980 are considered asbestos-free.
- Structures built after 1979 are considered lead-free (with respect to both water and painted surfaces).
- Fluorescent light ballasts will be considered PCB-free and will not be noted in the report regardless of their date of manufacture, unless ***PHASE ONE*** **INC.** is instructed to do otherwise in writing by the client.

PHASE ONE **INC.** also inspected the properties that adjoin the subject site. In general, this inspection included a "drive-by" survey to note the operations which may pose an imminent or potential environmental threat to the subject site.

2.2.3 Review of Historical Information

For this assessment, ***PHASE ONE*** **INC.** may have reviewed reasonably ascertainable historical aerial photographs and United States Geologic Survey (U.S.G.S.) topographic maps of the subject site and vicinity. This review consisted of examining the reasonably ascertainable available photographs and topographic maps for evidence of activities on or development of the subject site and adjoining sites that may show an environmental condition or concern which may currently affect the subject site. The specific aerial photographs and U.S.G.S. maps that were reviewed for this assessment are identified and their environmentally relevant features are described in Section 4.1.

PHASE ONE **INC.** may have also reviewed any reasonably ascertainable Historic Maps of the subject site and vicinity. Such maps have been prepared by fire insurance companies in order to determine the potential risk of fire damage to buildings in metropolitan areas. These maps have been produced since the mid-1850s and, for some areas, they are still produced today. For the purposes of a Phase I Environmental Site Assessment, these maps may contain helpful information on the ages and past uses of buildings, as well as information about on the storage of hazardous and flammable substances. However, because it was only worthwhile for fire insurance companies to map metropolitan areas, the scope of coverage of these maps is somewhat limited. If Historic Maps

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

[10.1.24] [Co.86 Phase I Environmental 2014-01-27 (1730 Embarcadero Rd, Palo Alto, CA).pdf] [Page 13 of 463]

have provided coverage of the subject site, and if the specific maps were reasonably ascertainable, then the specific maps that were reviewed for this assessment are identified, and their environmentally relevant features described, in Section 4.2.

One of the least known yet most complete and comprehensive historical sources are historical city or street directories. These texts may have been reviewed by ***PHASE ONE* INC.** to the extent that they have provided coverage of the subject site and were reasonably ascertainable. ***PHASE ONE* INC.** reviews historical city or street directories (also known as criss cross or reverse indexed directories) for information on the past occupants of and activities on the subject site and adjoining sites. These directories were prepared by companies that catered to the needs of salespeople by providing the names of the occupants at a given address (that is, unlike a traditional telephone book, the entries of a reverse directory are arranged by address, not by name). However, like Historical Maps, the scope of coverage of these directories is limited to mostly metropolitan areas. If they were reasonably ascertainable, they were reviewed and Section 4.3 contains listings of the current or past occupants of the subject site that were found by researching historical city or street directories.

***PHASE ONE* INC.** has contacted various state, county, and municipal agencies having current or past jurisdiction over the subject site, in an attempt to review reasonably ascertainable records that contain specific information about environmental conditions on the subject site that these agencies may have on file, or to establish that no environmentally relevant records are on file for the subject site. The client should be aware that most regulatory agencies file their records by address or corporate name (as opposed to parcel number or site name). If no specific address has been assigned to a site, then, typically, no environmental records related to the site will be forthcoming from the state, county, or municipal regulatory agencies.

The findings of this records search are reported in Section 4.4, ***Agency Contacts***. The addresses, phone numbers, names of the persons contacted within the various agencies are listed on the Regulatory Contacts Sheet, which is included in Appendix B. Copies of any records obtained from regulatory agencies can be found in Appendix C. In some instances, ***PHASE ONE* INC.** may not yet have received a reply from one or more of the agencies that were contacted. (Some agencies will take six weeks or longer to reply to a verbal or written request.) In the event of such delays in response, rather than delaying the issuance of the report, ***PHASE ONE* INC.** has indicated in the report that a response to the request for records is pending, and a copy of the regulatory request form has been included in Appendix B. Any pertinent information that is subsequently received from the pending agency will be addressed and forwarded to the client in the form of an addendum to this report.

***PHASE ONE* INC.** has also reviewed a vendor-supplied, computer-generated federal, state, and regional one-mile regulatory database search in an effort to determine whether the subject site is listed on an agency environmental database and to identify possible regulatory-listed sites of concern within a one-mile radius of the subject site. In general, these documents list known or suspected hazardous-waste generators, release sites, landfills, unauthorized disposal sites, sites with registered underground storage tanks, and sites currently under investigation for known or suspected environmental violations or releases. In conjunction with the findings on the geological and hydrological conditions, information obtained from the database search can be used to assess the environmental risk faced by the subject site from past or present off-site sources of contamination. Additionally, the database search may provide information about on-site sources of contamination.

Copyright © 2014 ***PHASE ONE* INC.** All rights reserved

The regulatory database review can be found in Section 4.5; a copy of the complete database search document and a detailed description of the databases that were searched are included in Appendix D.

When requested, ***PHASE ONE*** **INC.** will compile and review a chain-of-title abstract for the subject property. The chain-of-title abstract can help the client and ***PHASE ONE*** **INC.** to better understand the history of the use of the subject site. The chain-of-title abstract is typically compiled from documents obtained from the County Recorder's Office or Tax Assessor's Office. The chain-of-title abstract review, if completed for this report, can be found in Section 4.6. The County Assessor also may be contacted to determine whether the subject site has been assigned addresses in the past which are different from its current address. It is the client's responsibility to supply ***PHASE ONE*** **INC.** with any records of environmental liens or other such documents.

On occasion, the client, the client's representatives, or on-site personnel will make available environmental documents pertaining to the subject site. These documents may be prior Phase I Reports, environmental site remediation reports, foundation soil reports, or occupancy records, among others. If these are made available prior to the issuance of the report, ***PHASE ONE*** **INC.** will review the conclusions of these documents, which may help to confirm or disprove any tentative findings that ***PHASE ONE*** **INC.** has developed independently. If the client has supplied environmental documents for review as part of this assessment, the findings are included in Section 4.7.

After the above information from existing historical records, regulatory agencies, interviews, and other additional environmental documents has been reviewed and evaluated, ***PHASE ONE*** **INC.** presents the site uses for the subject property as well as adjoining site uses in a chronological table. This historic site use summary assists the client, as well as the field assessors and reviewers to have a perspective of the historical uses of the subject site. The ***Historical Site Use*** is presented in Section 4.8.

2.2.4 Interviews

PHASE ONE **INC.** attempts to interview various individuals who may have knowledge of various aspects of the subject site. Typically, the interviewees might include:

- Current and previous owners
- Site and operations managers
- Tenants
- Local regulatory personnel

The interviews are summarized in Section 5.0 and interview notes are included in Appendix F.

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

2.2.5 Conclusions and Recommendations

Section 6.0, ***Conclusions and Recommendations***, provides detailed descriptions of the recognized environmental conditions and the *de minimis* conditon, historical recognized environmental conditions, or controlled recognized environmental conditions that, in the professional opinion of ***PHASE ONE*** **INC.**, currently affect the subject site. Section 6.0 also recommends or suggests the next-step actions that may be required to begin addressing the conditions.

The essential information on a condition at a given location is contained in the "Description of Condition" and the "Action Suggested" boxes of the table for that location. The section numbers refer to those sections in the report that describe the research tasks and findings behind the conclusions. This reporting method allows the reader to quickly go to those sections that are pertinent to the condition.

2.3 INTERPRETATION OF THE REPORT

Following the completion of the tasks outlined above, ***PHASE ONE*** **INC.** prepared this report to present our findings and conclusions clearly and consistently. In an attempt to aid the reader and bring organization to pieces of seemingly unrelated information, ***PHASE ONE*** **INC.** has developed a report format that is both innovative and concise. Each piece of information is described in the context of the research or assessment task under which it was found. Typically, an environmental condition will incorporate a number of specific findings. So, in Section 6.0, ***Conclusions and Recommendations***, the various particular findings are grouped together and collectively presented with the description of the environmental condition that is corroborated by those findings.

babatec@comcast.net
Project Atlantic
CONFIDENTIAL

SECTION 3.0

SITE DESCRIPTION AND RECONNAISSANCE

The subject site is surrounded by an area of predominantly commercial properties. On the date of the site reconnaissance the subject site consisted of a car dealership, Carlsen Audi. The following subsections describe the physical characteristics of the subject site and are a compilation of the observations made during the visual site inspection.

3.1 SITE PHOTOGRAPHS

A ***PHASE ONE*** **INC.** field assessor completed a reconnaissance of the subject site, at which time a number of photographs were taken to document the current condition and use of the site. Please see Figure 2, ***Site Plan***, for photograph locations. The photographs with their descriptions can be found in **Appendix A.**

3.2 GEOLOGIC AND HYDROGEOLOGIC CONDITIONS

According to United States Geological Survey (U.S.G.S.) STATSGO data, the most common native soil type in the vicinity of the subject site is Reyes. It is not known whether imported fill materials were used during the grading or development of the site; therefore, it is unknown if fill materials is a concern for the subject site. The elevation of the subject site appears to be 22 feet above mean sea level.

Groundwater in the site vicinity is reported by the Santa Clara Valley Water District's Case Closure Summary Leaking Underground Fuel Storage Tank Program for Carlsen Motors at 1730 Embarcadero Road, Palo Alto, California, dated January 28, 1998 to occur at a depth of approximately 4 to 5 feet below ground surface and flow towards the northeast. It should be noted that the flow direction and depth of groundwater may be influenced by rainfall, tidal activity (shore properties), and local groundwater pumping operations. It should also be noted that shallower, unreported, perched groundwater zones may occur in the immediate site vicinity.

During the site reconnaissance and the review of historical maps and photographs, the following was determined to exist or not to exist on the subject site:

- No waterways
- No wetlands
- No pits
- No lagoons
- No ponds

Project Romano to.com 2014-02-11 16 13:0 CONFIDENTIAL

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

In-addition, the following was determined to exist or not to exist immediately adjacent to the subject site:

- One former waterway to the south.
- No wetlands
- No pits
- No lagoons
- No ponds

According to the ERS RecCheck report the flood panel was not available. Storm water discharge across the site appears to flow multidirectionally. The storm water runoff appears to discharge to storm drains. The direction and destination of storm water discharge does not appear to be a source of environmental concern to the subject site.

3.3 EXISTING STORAGE TANKS

Based upon the site reconnaissance, historical and regulatory research three aboveground and no underground storage tanks are currently operated at the site. The following table summarizes the information regarding the existing tanks.

EXISTING STORAGE TANKS (GENERAL INFORMATION)

ID #	Above/ Underground	Location and Photo #	Why or Why Not a Concern?	Condition
1	Above	Covered Area West Side of Building (OP09, OP10)	The new oil is utilized in the vehicle servicing operations. Oil staining was observed beneath the tank on the asphalt area, and on the metal grate of the storm drain near the tank.	REC
2	Above	Southern Side of Building (OP07)	Waste oil from the servicing of vehicles is stored in this tank; no staining was observed on the surface area beneath the tank.	None
3	Above	Southern Side of building (OP07)	Waste antifreeze from the servicing of vehicles is stored in this tank; staining was observed on the exterior of the container and on the asphalt area below the tank.	REC

EXISTING STORAGE TANKS (SPECIFICATIONS)

ID #	Tank Construction	Tank Monitoring	Status	Approx. Size (Gal.)	Contents	Approx. Age of Tank
1	Steel	Visual	Above	480	New Oil	Unknown

Copyright © 2014 *PHASE ONE* **INC.** All rights reserved

ID #	Tank Construction	Tank Monitoring	Status	Approx. Size (Gal.)	Contents	Approx. Age of Tank
2	Steel	Visual	Above	~500	Waste Oil	Unknown
3	Plastic	Visual	Above	~100	Waste Antifreeze	Unknown

Note:If it was able to be determined, the location of each storage tank is marked on Figure 2, ***Site Plan***, by the tank ID number assigned above.

3.4 PREVIOUSLY EXISTING STORAGE TANKS

Based upon the site reconnaissance, historical and/or regulatory research four previously existing (not known to currently exist) aboveground or underground storage tanks were formerly operated at the subject site. The following table summarizes the information regarding the previously existing tank or tanks.

PREVIOUSLY EXISTING STORAGE TANKS (GENERAL INFORMATION)

ID #	Above/ Underground	Location and Photo #	Why or Why Not a Concern?	Condition
1	Underground	Southern Portion of Car Sales Lot (OP12)	This tank was removed in 1996; closure was issued in 1998. Closure was issued with remaining residual petroleum hydrocarbon soil contamination and localized groundwater contamination in the area of the former tank pit location.	CREC
2	Underground	Southern Portion of Car Sales Lot (OP12)	This tank was removed in 1996; closure was issued in 1998. Closure was issued with remaining residual petroleum hydrocarbon soil contamination and localized groundwater contamination in the area of the former tank pit location.	CREC
3	Underground	Near Southwest Corner Building; (No Photograph)	This tank was removed in 1996, and closure was issued in 1998.	CREC
4	Underground	Near Southwest Corner Building; (No Photograph)	This tank was removed in 1996, and closure was issued in 1998.	CREC

PREVIOUSLY EXISTING STORAGE TANKS (SPECIFICATIONS)

ID #	Tank Construction	Tank Monitoring	Status	Approx. Size (Gal.)	Contents	Age of Tank
1	Single Walled Fiberglass	Unknown	Inactive	10,000	Unleaded Gasoline	Removed 1996
2	Unknown	Unknown	Inactive	1,000	Diesel	Removed 1996
3	Unknown	Unknown	Inactive	1,000	Waste Oil	Removed 1996
4	Unknown	Unknown	Inactive	500	Kerosene	Removed 1996

3.5 HAZARDOUS SUBSTANCE STORAGE AND HANDLING

Hazardous or potentially hazardous substances in containers that are greater than 20 gallons in size are currently stored and handled on the subject site. Observations of such substances and activities that were made during the site reconnaissance are described in the following table, except for the items identified in *Section 3.3, Existing Storage Tanks.* Compliance issues may also be addressed in a limited manner.

babate@holmesgroup.com
Project Atlantic/12:0[illegible]016

Project Atlantic/4/2:02:2014
CONFIDENTIAL

Copyright © 2014 *PHASE ONE* **INC.** All rights reserved

ID #	Type of Substance	Location and Photo #	Qty.	Documentation Available?†	Description of Use and Storage Practices	Condition
4	Sump Water	Southwest corner of building (OP11)	55 gallon drum	Yes	A 55-gallon drum labeled sump water was observed stored near the western wall of the building. No staining was observed on the ground area beneath the drum. No secondary containment was provided. The drum should be stored under cover and with secondary containment. (According to General Manager, Ron Burton, this drum contains sump waste soil and absorbent material used in shop.)	None

Note:† If yes, then copies of the MSDSs and/or Hazardous Manifests are provided if reasonably available in Appendix G.

3.6 SPECIFIC HAZARDOUS SUBSTANCES RECONNAISSANCE

3.6.1 Summary of Specific Hazardous Substances Reconnaissance (Beyond ASTM Scope)

In addition to a general inspection of the subject site for evidence of the presence of hazardous substances or environmental concerns, the field assessor also conducted a reconnaissance for a set of specific hazardous substances that are not addressed in the scope of the ASTM Standard. The results of this specific reconnaissance are given in the following table(s). If a specific suspected hazardous substance was sampled or otherwise tested, this will be indicated in the table, and the results of the laboratory analysis or other tests will be given in Section 3.6.2.

SPECIFIC HAZARDOUS SUBSTANCES (BEYOND ASTM SCOPE)

ID #	Substance	Sampled?	Description	Condition
1	Asbestos	No	Given the pre-1981 construction date of the subject structure, during the site reconnaissance, some building materials are suspected of containing asbestos.	*De minimis*

Copyright © 2014 *PHASE ONE* INC. All rights reserved

ID #	Substance	Sampled?	Description	Condition
2	Radon	No	The subject property is located in an area that is considered to have a low occurrence of radon. However, the occurrence of radon is site-specific; only testing can determine the actual radon level at the site.	None
3	Lead Paint	No	Based on the date of construction pre-1979, the use of lead based paints is suspected.	*De minimis*
4	Lead Water	No	Based on the date of construction pre-1979, there is the potential for the presence of lead in the plumbing fixtures and/or pipes on-site	*De minimis*

Note: If the table indicates that a given substance has been sampled, then a related table can be found in Section 3.6.2, which will give the results of the laboratory analysis of the sample or samples.

3.6.2 Details of Specific Hazardous Substances Sampling/Observations

No sampling or testing of suspected hazardous substances was performed or authorized for this assessment.

3.7 POLYCHLORINATED BIPHENYLS (PCBS)

The ***PHASE ONE*** **INC.** site reconnaissance does not include checking on-site fluorescent light fixtures for potential PCB content. Although fluorescent light ballasts may contain PCBs, the amount contained is considered to be so inconsequential that the ASTM (*Standard Practice*, E 1527) has stated: "Fluorescent light ballast likely to contain PCBs does not need to be noted." in a Phase I Environmental Site Assessment Report.

No known or suspected PCB-containing equipment or materials were observed on-site during the site reconnaissance.

3.8 CLARIFIERS, SUMPS, TRENCHES, AND INDUSTRIAL DISCHARGE SOURCES

The site reconnaissance, historical and/or regulatory research conducted for this assessment indicates that the following were operated at the subject site:

- One sump/clarifier
- No trenches
- No industrial floor drains
- No industrial discharge sources

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

The following table summarizes the information that was gathered regarding the above item(s).

CLARIFIERS, SUMPS, TRENCHES, INDUSTRIAL FLOOR DRAINS, AND INDUSTRIAL DISCHARGE SOURCES

ID #	I/O	Location and Photo #	Type	Description Of Processes Involved	Status	Condition
1	I	Interior Car Wash Area SWC of Building (IP12)	Sump/Clarifier (aka oil/water separator)	This unit is used to collect the residuals from the car wash fluids prior to their release to the city sewer system. At the time of the inspection, wash water was settled (slow drainage) over the sump area. The surface area of the clarifier was not visible.	Active	REC

Note:The location of each clarifier, sump, trench, industrial floor drain, or industrial discharge source location is marked on Figure 2, ***Site Plan***, by the ID number given above.
I/O = Inside/Outside

3.9 SURFACE CONDITIONS

During the site reconnaissance, areas of staining or other unusual surface conditions were observed on-site. These observations are detailed in the following table.

SURFACE CONDITIONS

ID #	I/O	Approx. Size (ft^2)	Approx. Depth	Suspected Substance	Description and Photo #	Condition
1	O	1	Surface	Antifreeze/ Oil	Staining was observed on the asphalt area beneath the ~100 gallon waste antifreeze plastic tank on the southern side of the building. The staining did not appear to be recent. (OP07)	REC
2	O	Various	Surface	Oil	Staining was observed on the asphalt areas beneath the above ground storage tank with new oil, on the exterior of the storm drain grate, and the asphalt areas beneath the air compressors in the covered area on the west side of the building. The asphalt area near the air compressors had cracks. (OP09, OP10. OP13)	REC

Note:I/O = Inside/Outside

Copyright © 2014 *PHASE ONE* **INC.** All rights reserved

3.10 STRESSED VEGETATION

No disfigured, discolored, dying, or otherwise stressed vegetation was observed on-site during the site reconnaissance.

3.11 PRIOR OR CURRENT AGRICULTURAL LAND USE

On the basis of a review of aerial photographs, U.S.G.S. topographic maps, site observations, regulatory research, and/or interviews, ***PHASE ONE*** **INC.** has concluded that the site was used for agricultural purposes. This information is detailed in the following table.

PRIOR OR CURRENT AGRICULTURAL LAND USE

ID #	Approx. Date Range	Description	Condition
1	1956	The subject site and surrounding areas are used for agriculture in the aerial photograph for 1956.	*De minimis*

3.12 OTHER ENVIRONMENTAL CONDITIONS

During the site reconnaissance, further evidence of environmental conditions that were not already noted in this section, or that were not yet fully discussed in this section, were observed on the subject site. These observations are described in the following table.

OTHER ENVIRONMENTAL CONDITIONS

ID #	Location and Photo #	Description	Condition
1	Inside Service area (IP06, IP07)	According to General Manager Ron Burton, there were approximately 14 former in-ground hydraulic lifts located in the main service area. The lifts were installed when the building was constructed in approximately 1969. The lifts utilized vegetable based hydraulic fluids for their operation and were removed periodically from the early 1990s to 2008.	None
1	Inside Smaller Shop Area Former Dyno Room (detail), Southeast portion Building (IP10, IP11)	A blue car hoist (in ground lift) was observed in the area. The hoist appeared to be in good condition and no leaks or stains were observed. According to the site contact, General Manager Ron Burton, this hoist utilizes vegetable based hydraulic oil in its operations.	None

3.13 VISUAL OBSERVATIONS, ADJOINING SITES

During the site reconnaissance, the ***PHASE ONE*** **INC.** field assessor also visually inspected and documented the use of those properties which immediately adjoin the subject property. The observations of the adjoining properties were made by the ***PHASE ONE*** **INC.** field assessor on the date of the site reconnaissance.

VISUAL OBSERVATIONS, ADJOINING SITES

Description		Condition
Northerly View:		None
Address:	1731 Embarcadero Road, 2100 Geng Road, 1755 Embarcadero Road	
Company Name:	N/A, City of Palo Alto, Jones Day	
Apparent Current Use of Property:	Multi-tenant offices, City of Palo Alto Utilities, Law firm	
Visual Concerns:	None	
Easterly View:		None
Address:	1766 Embarcadero Road	
Company Name:	Anderson Honda	
Apparent Current Use of Property:	Auto Dealership	
Visual Concerns:	None	
Southerly View:		None
Address:	N/A, 2500 Faber Place	
Company Name:	Unknown	
Apparent Current Use of Property:	Research and development	
Visual Concerns:	None	
Westerly View:		None
Address:	1700 Embarcadero Road, 2483 East Bay Shore Road	
Company Name:	Ming's Restaurant, Unknown	
Apparent Current Use of Property:	Restaurant/Bar, Multi-tenant offices	
Visual Concerns:	None

SECTION 4.0

REVIEW OF HISTORICAL INFORMATION AND REGULATORY AGENCY RECORDS

4.1 HISTORICAL AERIAL PHOTOGRAPH AND U.S.G.S. TOPOGRAPHIC MAP REVIEW

***PHASE ONE* INC.** reviewed readily available and reasonably ascertainable aerial photographs and U.S.G.S. topographic maps of the area of the subject site. (A copy of a U.S.G.S. map, if available, has been included as Figure 1.) These aerial photographs and maps may have been obtained from ***PHASE ONE* INC.**'s library and/or another source (all sources identified in Appendix B). Each aerial photograph was reviewed for the subject property and, where applicable, adjacent property use. In addition, each photograph was reviewed to identify the presence of areas of dumping, staining, buildings, and/or aboveground storage tanks.

Aerial photographs for the years of 1948, 1956, 1968, 1980, 1988, 1993, 2003, 2007, 2013 and U.S.G.S. topographic maps for the years of 1962, 1975 were reviewed and a *de minimis* environmental condition was identified in the following aerial photographs discussed in the table below:

HISTORICAL AERIAL PHOTOGRAPH

Collection Reference #	Date of Document	Description of Condition	Condition
ERS	1948	The subject site and surrounding areas are vacant, undeveloped land. There is a waterway in the area that originates from the bay east of the site; the waterway traverses near the southern boundary of the subject site. . There is farming to the northwest of the subject site. Embarcadero Road is present.	None
ERS	1956	No significant changes from the 1948 aerial other than the subject site and surrounding areas are used for agriculture.	*De minimis*
ERS	1968	The subject site and areas to the north, south and southwest adjacent sites are vacant undeveloped land. The present-day buildings are visible on the east and west adjacent sites.	None
ERS	1980	The subject site and areas to the east, west and southwest are in their present-day configurations. There is vacant undeveloped land to the north across Embarcadero Road and south of the subject site. The current building to the northwest of the subject site is present.	None
ERS	1988, 1993, 2003, 2007, 2013	The subject site and adjacent sites are in their present-day configurations.	None

Copyright © 2014 *PHASE ONE* INC. All rights reserved

4.2 HISTORICAL MAP REVIEW

PHASE ONE **INC.** contacted the source(s) identified in Appendix B in an effort to review readily available historical and fire insurance maps with coverage of the subject site and vicinity that might be included in their collections. However, a search of the reasonably ascertainable historical and fire insurance maps found that none provided coverage of the area of the subject site.

4.3 HISTORICAL CITY OR STREET DIRECTORY REVIEW

PHASE ONE **INC.** reviewed readily available historical city or street directories with coverage of the subject site and vicinity. These historical city or street directories were obtained from ***PHASE ONE*** **INC.**'s in-house library and/or the source identified in Appendix B.

Historical directories for the years of 1928, 1932, 1935, 1957, 1960, 1963, 1965, 1968, 1970, 1973, 1975, 1977, 1982, 1992, 1997, 2002 were reviewed and no recognized environmental conditions, *de minimis* conditions, historical, or controlled recognized environmental conditions were identified in the directories listed on the following table.

HISTORICAL CITY OR STREET DIRECTORY

Directory Name and Date	Description of Condition	Condition
1928, 1932, 1935, 1957, 1960, 1963, 1965, 1968	Address not listed	None
1970, 1973	Mozart Porsche Audi	None
1975, 1977, 1982	Carlsen Porsche Audi	None
1992	Carlsen Audi, Casrlsen Peugeot	None
1997	Carlsen Audi, Carlsen Volkswagen, Targa leasing	None
2002	Carlsen Audi, Carlsen Porsche, Carlsen Volkswagen, Perfection Auto Detailing, Targa leasing	None

4.4 AGENCY CONTACTS (RECORDS SEARCH)

4.4.1 Building Department Records

PHASE ONE **INC.** contacted the local Building agency for copies of readily available building permits, original plumbing and finish schedules, building plans, or other readily available, relevant documents pertaining to the subject site that may be on file with this agency (all sources are identified in Appendix B. Recent records were provided via e-mail; no environmental concerns were noted. The older records were not reasonably ascertainable.

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

4.4.2 Fire Department Records

PHASE ONE **INC.** submitted a request to the local Fire Department for the purpose of reviewing reasonably ascertainable records this agency has on file for the subject site pertaining to hazardous substances storage, underground storage tanks, and related environmental issues. The following table gives the results of this review. (Copies of the reviewed documents, when available, are included in Appendix C and the source is identified in Appendix B.)

SUMMARY OF FIRE DEPARTMENT RECORDS

Date of Document	Description	Condition
1994-1999	City of Palo Alto, Fire Department, Hazardous Materials Bureau: Annual permits for Hazardous Materials storage were provided for these years.	None
1996	Uniform Underground Storage Tank System Closure Application/Permit and supplemental documents for the removal of four underground storage tanks: one 10,000 gallon tank containing gasoline, one 1,000 gallon tank containing waste oil, one 1,000 gallon tank containing diesel, and one 500 gallon tank containing kerosene.	HREC
March 14, 1997	Correspondence from Fire Department to Mr. Charles A. Burton, Carlsen Motors, regarding "Aboveground Fuel Tank Application." Approval for application for 4,000 capacity tank. (Note: According to General Manager, Ron Burton, this tank was never installed. It was cost prohibitive.)	None
April 23, 2002	City of Palo Alto, Fire Prevention Bureau inspection: 1) Complete HMMP 2) Include in inventory all flammable liquid, waste antifreeze, waste oil, solvent parts washer and welding gases.	None
April 29, 2008	Document from the Palo Alto Fire Department Hazardous Materials Program regarding hazardous Materials Compliance Requirements. Several items needed to be updated; they were all completed on July 11, 2008. Two main items of concern: Item 2: Clean up and prevent any chemical spills on the ground-ie, shop floor, outdoor waste oil and waste anti-freeze tanks, outdoor air compressor actuator valve & dead hoist, floor around hoist, etc. and Item 9: Prevent soapy water from detail shop and or oils, chemical, etc. from entering storm drains.	REC
February 1, 2013	City of Palo Alto, Department of Hazardous Materials Program Inspection; no violations observed.	None

4.4.3 Health or Environmental Agency Records

PHASE ONE **INC.** submitted a request to the local Health Department and/or Environmental agency for the purpose of reviewing reasonably ascertainable environmental records that may be on file with this agency for the subject site. The following table gives the results of this review. (Copies of the reviewed documents, when available, are included in Appendix C and the source is identified in Appendix B.)

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

SUMMARY OF HEALTH OR ENVIRONMENTAL AGENCY RECORDS

Date of Document	Description	Condition
May 5, 2010	County of Santa Clara, Department of Environmental Health Hazardous Materials Compliance Division (HMCD) Notice of Inspection notes corrective actions taken.	None
February 27, 2013	County of Santa Clara, Department of Environmental Health Hazardous Materials Compliance Division (HMCD) Notice of Inspection indicates no violations noted on 1/31/13 inspection. Inspection on 2/27/notes violations regarding labeling of waste, personnel are not adequately trained on managing hazardous waste, facility failed to obtain or keep on file a current and complete hazardous waste tank system assessment, and they failed to contain universal waste in a manner that prevents breakage and the release of universal waste or waste residue (repeat violation). These were all corrected on 3/4/13.	None
April 9, 2013	Hazardous Waste Tank System Written Assessment, Temporary Exemption Application for the used oil tank; request for exemption was granted.	None

4.4.4 Sanitation Agency Records

PHASE ONE **INC.** submitted a request to the Sanitation Agency for the purpose of reviewing reasonably ascertainable environmental records pertaining to industrial wastewater discharge permits, NPDES permits, and related documents that may be on file with this agency for past and present businesses at the subject site. The following table gives results of this review. (Copies of these records, if available, are included in Appendix C and the source is identified in Appendix B).

SUMMARY OF SANITATION AGENCY RECORDS

Date Range of Documents	Description	Condition
6/17/92	Inspection/Maintenance Log-Sump clogged, needs cleaning; on 6/18/92 sump was cleaned, sludge removed and disposed of as a hazardous waste.	REC
N/A	Required sampling on the second stage sump conducted on October 12, 2006, reported a levels of Copper of 3.36 mg/l, June 19, 2007, 2.52, June 19, 2007; and 3.2 mg/l April 17, 2008 3.2 mg/l; exceeding the maxim level of 2.0.	REC
2012	A letter accompanies an industrial waste discharge permit (Permit No. 2006) is on file for Carlsen Audi (May 2012). The monthly usage at this facility is 37 CCF a month. It is noted that they have an oil water separator in the carwash department. The letter provides the requirements for the industrial waste permit. Permit expires in 2017. Sampling for lead and copper is required on a bi-annual basis.	None

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

4.4.5 Water Quality Agency Records

PHASE ONE **INC.** submitted a request to the Water Quality Agency for the purpose of determining if past and present businesses at the subject site are listed on regulatory lists (such as leaking underground tank lists, site cleanup lists, etc.). The following table summarizes the results of our review. (Copies of the reviewed records, if available, are included in Appendix C and the source is identified in Appendix B.)

SUMMARY OF GEOTRACKER RECORDS

Date of Document	Description	Condition
January 28, 1998	Geotracker, the California State Water Resources Board's website, provided the following Correspondence from James S. Crowley, PE, Leaking Underground Storage Tank Oversight Program for Fuel Leak Site Case Closure-Carlsen Motors, Case No. 14-349. This letter transmits the case closure summary, and confirms the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed. It indicates that the following conditions exist at the site: Residual soil and groundwater contamination remain; however, they are below levels which require cleaning and are below levels of regulatory concern.	Controlled REC

babate@comcast.net
Project Atlantic 1/17/2016 13:57
CONFIDENTIAL

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

Date of Document	Description	Condition
January 28, 2013	Santa Clara Valley Water District Case Closure Summary, Leaking Underground Fuel Storage Program This closure summary is for the removal of 4 underground storage tanks: One 550 gallon kerosene tank, one 1,000 gallon waste oil tank, one 10,000 gallon gasoline tank, and one 1,000 gallon gasoline/diesel tank. Release and Site Characterization information, closure, and additional comments are provided on the form. Also provided are the soil and water sampling results upon closure. In 1998: Sampling of the monitoring wells in January showed levels of dissolved petroleum hydrocarbon contamination at a maximum level 2,000 ppb TPHG, 67 ppb Benzene, and 99 ppb MTBE; no TPHD was detected. Total dissolved solids were measured at levels of between 7 million to 47 million ppb. The Santa Clara Water District concluded that: Based upon the results of initial source removal, interim remedial actions, and groundwater monitoring, residual petroleum hydrocarbon contamination in soil currently exists at the site. Groundwater contamination is also present and the extent of dissolved contamination appears to be localized in the area adjacent to the former tank pit. The groundwater beneath the site contains Total Dissolved Solids (TDS) ranging from 4,000 mg/l to 47,000 mg/l. The groundwater beneath this site does not meet drinking water standards for TDS; California drinking water standard for TDS is 500 mg/l. This site does not meet the definition of a source of drinking water, as per State Water Resources Control Board Resolution No. 88-63, being that TDS exceeds 3,000 mg/l. One active production well is reported within ¼ mile of this site; the use is for a pond. Based upon the residual concentration of petroleum hydrocarbons in groundwater, Santa Clara Valley Water District staff concluded that a continuing threat to groundwater, human health, and the environment from residual petroleum hydrocarbons does not exist at this site and that Regional Water Quality Control Board's objectives have not been compromised. The investigation was performed in accordance with state and local guidelines; Santa Clara Valley Water District staff recommends closure for this case. Attached are figures showing former tank locations, monitoring well locations, and boring locations. Sampling results and other documents are provided.	Controlled REC
January 30, 1998	Santa Clara Valley Case Closure Letter for Fuel Leak Site - Carlsen Motors, 1730 Embarcadero Road, Palo Alto, CA; Case No. 14-349. No further action related to the underground tank release required. Residual soil and groundwater contamination remain at the site, however they are below levels which require cleaning and are below levels of regulatory concern.	Controlled REC

4.4.6 Oil and Gas Agency Records or Maps

***PHASE ONE* INC.** submitted a request to the local Oil and Gas Agency for copies of readily available oil and gas related records pertaining to environmental issues on the subject site. However, ***PHASE ONE* INC.** was informed that no records for the subject site are on file with this agency (all sources are identified in Appendix B).

4.4.7 Other Pertinent Records/File Reviews

There are no additional regulatory agencies known to ***PHASE ONE* INC.** that are likely to have further relevant environmental information pertaining to the subject site. No agency file reviews were conducted for the subject site or the adjacent sites for this investigation.

4.5 REVIEW OF ENVIRONMENTAL RECORDS SEARCH

The ***PHASE ONE* INC.** review of the computer-generated, environmental records search document (the complete environmental records search document is included in Appendix D) found the subject site is a regulatory-listed site. The environmental records search occurrence summary table below identifies the number of sites listed in each database included in the record search document (the complete environmental records search document is included in Appendix D). No sites of environmental concern to the subject site were identified as a concern except for this listed with a condition below.

Note: Map Location #s match the Map ID numbers of the sites used in the document located in Appendix D. Listings of unmapped sites were reviewed to identify the subject site or any sites that are obviously adjacent to the subject property. Other unmapped sites are listed only in Appendix D.

4.6 CHAIN-OF-TITLE ABSTRACT AND/OR REVIEW

At the request of the client, a chain-of-title abstract was not requested or completed for this project.

4.7 ADDITIONAL ENVIRONMENTAL DOCUMENTS

In the course of this assessment, ***PHASE ONE*** **INC.** was not provided with any additional documents for review regarding the environmental condition of the subject site by the client or the client's representatives.

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

4.8 HISTORICAL SITE USE

The chronological historical site use summary is based on reviewed aerial photographs, maps, regulatory agency files, interviews, and additional environmental documents. The historical site use summary for the subject site and the adjoin sites is presented in the following table. The rows of this table are organized in chronological order, according to the date range of a specific site use.

HISTORICAL SITE USE

Date Range	Subject Site	Adjoining Sites
1948 – 1969	Vacant land Agriculture in 1956	Undeveloped land Agriculture
1970 – 2013	Car dealership	Car dealership, Commercial properties

4.9 IDENTIFICATION OF HISTORICAL DATA GAPS

During the course of this assessment, ***PHASE ONE*** **INC.** identified the following data gaps within the reviewed historic documents regarding the recognized environmental condition of the subject site.

SUMMARY OF HISTORICAL DATA GAPS

Date span of Data Gap	Documents Reviewed	Data Gap Discussions	Condition
1940-1947	Aerials Historical Directories	At the oldest research interval in this report (1948), the subject property use was undeveloped land. It is likely that the first developed use of the property is the car dealership. Therefore, it is our opinion that this data gap (1940-1947) does not appear to materially affect the conclusions of this report	None

4.10 REVIEW OF TITLE AND/OR JUDICIAL RECORDS FOR ENVIRONMENTAL LIENS OR ACTIVITY AND LAND USE LIMITATIONS (E.G., ENGINEERING AND INSTITUTIONAL CONTROLS)

The client provided ***PHASE ONE*** **INC.** with documents regarding title and/or judicial records for environmental liens or activity and land use limitations for the subject site. ***PHASE ONE*** **INC.** relies upon the author/and corresponding companies' expertise. ***PHASE ONE*** **INC.** does not verify in any way the completeness or correctness of the documents. ***PHASE ONE*** **INC.** relies upon the documents provided. The discussion of these materials is described in the following table. (Copies of the records, if available, are included in Appendix G.)

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

REVIEW OF TITLE AND/OR JUDICIAL RECORDS FOR ENVIRONMENTAL LIENS OR ACTIVITY AND LAND USE LIMITATIONS (E.G., ENGINEERING AND INSTITUTIONAL CONTROLS) SUMMARY

Date of Document	Type of Document	Company	Description (If a concern, why?)	Condition
December 3, 2013	Preliminary Title Report	Fidelity National Title Company	No environmental liens, records of environmental activity and/or environmental land use limitations were identified.	None

SECTION 5.0

INTERVIEWS

5.1 INTERVIEWS WITH OWNER, PROPERTY MANAGER, USER, AND OTHERS

As part of the Phase I Assessment, ***PHASE ONE*** **INC.** attempts to interview various individuals who may have knowledge of different aspects of the subject site as it pertains to environmental conditions. The comments of the interviewees are noted by the ***PHASE ONE*** **INC.** interviewer on Interview Note Forms, which are included in Appendix F. The following table summarizes the relevant portions of these notes.

SUMMARY OF INTERVIEWS

ID #	Date of Interview	Name of Interviewee	Title	Relevant Discussions	Condition
1	December 18, 2013	Charles Burton	Carrera PRB Co. General Partner Owner	Mr. Burton indicated that Carrera PRB Co. has owned the property for 13 years. The site is currently used for auto sales and repairs. There are storm water drains in the parking lot. Auto repair fluids, used auto oil are on site. Disposal permits, hazardous materials management/business plans, MSDS, hazardous waste generator notices or reports, and safety/spill preparedness/prevention plans are on file for the subject site. There is a sump/clarifier on site. Mr., Burton is not aware of any activity or land use limitations, engineering or institutional controls, environmental liens, or other restrictions that have been placed on the property relating to hazardous materials or petroleum products. He does not have any specialized knowledge of the subject property and surrounding areas material to recognized environmental conditions in connection with the subject property.	None

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

ID #	Date of Interview	Name of Interviewee	Title	Relevant Discussions	Condition
2	December 26, 2013	Ken Ambrose	User	According to Mr. Ambrose, the purpose of the Phase I ESA is for property sale. The proposed use of the site is an auto dealership. Mr. Ambrose is not aware of any activity or land use limitations, engineering or institutional controls, environmental liens, or other restrictions that have been placed on the property relating to hazardous materials or petroleum products. He has no specialized knowledge of the subject property and surrounding areas material to recognized environmental conditions in connection with the subject property.	None
3	January 10, 2014	Ron Burton	Carlsen Audi General Manager	Mr. Burton has been associated with the subject site since 1991, and prior to 1991 he worked part time at the facility. According to Mr. Burton, the original in ground hydraulic lifts (approximately 14 lifts) that were installed in the service area when the building was constructed (~1969) utilized vegetable based hydraulic fluids in their operations. From approximately 1990 through 2008, the original lifts were removed; there area fourteen capped areas in the vehicle servicing area that were the former locations of the lifts. In the car wash room there are no floor drains, only the sump/clarifier unit. The unit is sampled either monthly or quarterly for metals. Once or twice a year the metal count level will exceed the allowable levels. The manifest from Fremont Environmental, dated June 6, 2013, for a 55-gallon drum of contaminated soil, is actually for the used absorbent for leakage from vehicles in the service area. The lift (hoist) in the former dynamometer room is at least 10 years old.	REC

Copyright © 2014 *PHASE ONE* **INC.** All rights reserved

ID #	Date of Interview	Name of Interviewee	Title	Relevant Discussions	Condition
4	January 23, 2014	Ron Burton	Carlsen Audi General Manager	Mr. Burton provided a photograph of the sump without water. It is included in Appendix A, photographs. In addition, he indicated that the sludge in the sump is cleaned out by the staff on site, and not required to be cleaned out by an outside vendor. The city collects water samples to ensure water quality. (No interview in Appendix G.)	None

5.2 PURCHASE PRICE VERSUS FAIR MARKET VALUE INTERVIEW

PHASE ONE **INC.** uses data supplied by the client to determine if a difference between the purchase price of the property and the fair maket value of the property is due to the effect of any releases or threatened releases of hazardous substances or petroleum products. On December 26, 2013, ***PHASE ONE*** **INC.** contacted Ken Ambrose, Boardwalk Auto Group for the purpose of ascertaining any difference between the purchase price and fair market value of the property. According to Mr. Ambrose, the purchase price and/or fair market value are not being disclosed as part of this investigation. Therefore, a determination on the effect of any releases or threatened releases of hazardous substances on the purchase price of the property was not performed.

SECTION 6.0

CONCLUSIONS AND RECOMMENDATIONS

6.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

This section contains full descriptions of any recognized environmental conditions (REC) that have been identified as a result of the ***PHASE ONE*** **INC.** Phase I Environmental Site Assessment for the subject site. ***PHASE ONE*** **INC.** classifies a condition as a REC (as opposed to a *de minimis* condition) when it is one that involves a condition for which, in the opinion of ***PHASE ONE*** **INC.**, further investigation and/or remediation is recommended. In addition to the descriptions of condition, this section also contains a statement of the recommended next-step actions for any conditions that are described in the following tables.

Each identified condition receives its own table, and that table will collect together the particular findings from the body of the report that have been used to support ***PHASE ONE*** **INC.**'s conclusion as to the presence of a recognized environmental condition. For the benefit of the reader, the tables also contain the section numbers of the findings cited in support of the condition.

CONFIDENTIAL

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

CONDITION # 1	IDENTIFIED CONDITION APPEARS TO BE A RECOGNIZED ENVIRONMENTAL CONDITION
LOCATION: Vehicle Washroom/West Side of Building/Southern Side of Building	

SECTION #	COMMENTS
3.3	Observation of staining on asphalt area beneath new oil storage tank and compressors, and staining on asphalt area beneath anti-freeze storage tank (no secondary containment) on the southern side of the building.
3.8	Observation of clarifier/sump in car wash area with standing pooled water/poor drainage.
3.9	Observation of staining on asphalt area below anti-freeze tank on southern side of building, asphalt areas beneath the aboveground storage tank, beneath and near the air compressors, and drain grate in the covered area on the west side of the building.
4.4.2	City of Palo Alto Fire Department identifying spills outside outdoor waste soil and waste anti-freeze tanks, and staining in area of air compressors.
4.4	Sanitation records indicating sump clogged in 1992; and levels of sampling for copper exceeded maximum level of copper in 2006, 2007, and 2008. Industrial waste permit with requirements, including the cleanout of the oil/water separator on a quarterly basis.

DESCRIPTION OF CONDITION: According to reviewed historical resources and current site inspection, the site has been utilized for a car dealership with vehicle repair/servicing for at least 40± years. In their operations, automotive-related hazardous materials (oils, solvents, anti-freeze, etc.) have been utilized for this period of time. There is an interior washroom area for washing vehicles located on the southwestern corner of the servicing building. In the wash room is a sump/clarifier unit that is utilized to collect wash water from the vehicle washing operations. During the site reconnaissance, the clarifier unit/sump was not visible. Wash water was settled over the unit preventing a visual inspection. The integrity of the sump/oil trap's walls, base, and associated piping could not be observed, and the unit has been plugged up in the past. Due to the age of this unit, the subsurface may have been impacted by possible seepage/leakages from this unit with automotive related chemicals of concern. In addition, several areas of asphalt surfaces have been impacted with spillage/leakage of oils and other automotive fluids. Staining was observed on the asphalt areas on the covered west side of the building next to the aboveground new oil tank. The drain grate cover had oil staining and the asphalt areas below and next to the compressors had significant staining, and some of the surface areas had cracks. Staining was also observed on the asphalt area below the plastic aboveground tank containing waste anti-freeze in the hazardous materials storage area on the southern side of the building. It is unknown, if the subsurface has been impacted with these spills or releases in these areas.

ACTION SUGGESTED: Contact ***PHASE ONE*** **INC.** or another consultant to sample the subsurface in the location of the sump and stained areas to determine if there has been any impact, to the subsurface soils. Remove and properly dispose of any soils which may have been impacted. Soils and other materials contaminated with hazardous materials are considered hazardous waste and must be disposed of in accordance with federal, state, and local regulations.

TOTAL ESTIMATED COST TO COMPLETE
SUGGESTED NEXT STEP ACTION† $12,000-$16,000

†Note: The estimated cost to complete the next-step action is based on ***PHASE ONE*** **INC.**'s professional opinion as based on our experience with similar problems under similar circumstances. The estimated cost given above is only meant to give the client a *ballpark* estimate, not an exact dollar figure for the cost to complete the next-step action. This cost could easily vary by +/- 30% or greater. In many cases and when requested, ***PHASE ONE*** **INC.** can assist the client by providing a fixed cost quote.

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

6.2 *DE MINIMIS,* HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS. AND CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

This section contains descriptions of *de minimis,* historical RECs, or controlled RECs that have been identified in the ***PHASE ONE*** **INC.** Phase I Environmental Site Assessment for the subject site. ***PHASE ONE*** **INC.** classifies an issue as a *de minimis* condition (as opposed to a REC) when (1) it involves issues that appear to pose no immediate or imminent threat to the subject site, but which over time (with the occurrence of groundwater movement, demolition, disturbance, etc.) may come to pose an actual or present REC for the subject site and/or when (2) it involves areas that currently appear to have a negligible impact on the subject property and which do not, therefore, require additional investigation at this time, but of which ***PHASE ONE*** **INC.** feels the client should be made aware. ***PHASE ONE*** **INC.** classifies a historical recognized environmental condition (HREC) as an issue which was considered a REC in the past, but the release has been addressed to unrestricted residential use. but the release has been addressed to unrestricted residential use. ***PHASE ONE*** **INC.** classifies a controlled recognized environmental condition (CREC) as a condition where previous releases at the site underwent risk-based closure, but contaminants have been allowed to remain in place under certain restrictions or conditions.

Each identified condition receives its own table, and that table will collect together the particular findings from the body of the report that have been used to support ***PHASE ONE*** **INC.**'s conclusion as to the presence of that condition. For the benefit of the reader, the table also contains the section numbers of the findings cited in support of the condition.

CONDITION #2	**IDENTIFIED CONDITION APPEARS TO BE A *DE MINIMIS* CONDITION**
LOCATION: Subject Site	
SECTION #	**COMMENTS**
3.11	Identification of former agricultural use on the subject site.
4.1	Aerial photograph identifying former agricultural use on the subject site. (1956)
DESCRIPTION OF CONDITION: Although the site was used for agricultural purposes in the past, the subsequent commercial development of the site minimizes the probability of occupants to come in contact with possible residual agricultural chemicals in the soil or groundwater.	
ACTION SUGGESTED: No action is suggested, recommended and/or warranted at this time. However, if the property were to be redeveloped (especially for use by a sensitive receptor like residential, day care, medical, etc.); or if workers would come in contact with the soil during trenching, excavation, or similar activities; or if the groundwater beneath the site were to be used for domestic use or irrigation, then subsurface sampling would be recommended at that time to determine whether significant levels of agricultural chemicals exist at the site.	

Copyright © 2014 ***PHASE ONE*** **INC.** All rights reserved

CONDITION #3	IDENTIFIED CONDITION APPEARS TO BE A *DE MINIMIS* CONDITION
LOCATION: Subject Structure	

SECTION #	COMMENTS
3.6.1	Identification of the potential for asbestos-containing materials.

DESCRIPTION OF CONDITION: Given the pre-1981 construction date of the subject structure(s), during the site reconnaissance, materials were identified that are suspected of containing asbestos. At the time of the inspection, all of the materials appeared to be intact and undisturbed (that is, they appeared to be in a non-friable condition) and, thus, do not pose an immediate environmental concern. Still, these materials may become hazardous if they in fact contain asbestos and are subsequently damaged or disturbed, as, for example, in the course of remodeling. Asbestos-containing materials are considered to be hazardous materials, and their eventual disposal and handling are subject to federal and state regulatory guidelines.

ACTION SUGGESTED: Prior to disturbing any suspected asbestos-containing materials, such as during remodeling or demolition, contact **PHASE ONE *INC.***'s or another consultant for sampling and analysis of the suspect materials. If samples test positive, develop an Operations and Maintenance (O&M) Plan detailing the material-handling procedures to be implemented.

CONDITION #4	IDENTIFIED CONDITION APPEARS TO BE A *DE MINIMIS* CONDITION
LOCATION: Subject Structure	

SECTION #	COMMENTS
3.6.1	Identification of the potential for lead based paint and plumbing.

DESCRIPTION OF CONDITION: Given the pre-1979 construction date of the subject structure, the past use of lead-based paints and leaded piping and/or fixtures is suspected. Deteriorating paint may pose a significant health hazard if ingested or inhaled, particularly for children. Due to the nature of the site use, the possibility of children being affected is low. Lead-containing paint is considered hazardous waste, and the eventual disposal of lead-containing paint may be subject to regulatory restrictions. Lead-containing water is considered hazardous to health at certain levels.

ACTION SUGGESTED: Prior to remodeling, disturbing or demolishing of painted surfaces, precautionary steps are recommended to reduce exposure in accordance with the occupational health standards. To further investigate for the presence of lead, contact ***PHASE ONE* INC.** or another consultant to sample and analyze the suspect paint or plumbing.

Project Submitted 12.12.2014 CONFIDENTIAL

Copyright © 2014 ***PHASE ONE* INC.** All rights reserved

CONDITION #5	IDENTIFIED CONDITION APPEARS TO BE A *DE MINIMIS* CONDITION
LOCATION: East Adjacent Site/1766 Embarcadero Road	

SECTION #	COMMENTS
4.5	Listing of adjacent sites with environmental conditions. Open SLIC case.

DESCRIPTION OF CONDITION: This adjacent site has been identified in the environmental records search document. It has been reported as having an environmental condition that has led to the contamination of the area groundwater. The groundwater pollution extends to the east of this site.

ACTION SUGGESTED: Perform annual file review of the Regional Water Quality Control Board's documents to monitor the status of this site. The responsible party would be the owner of the adjacent property.

CONDITION #6	IDENTIFIED CONDITION APPEARS TO BE A CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITION
LOCATION: West Side of Service Building/Central Southern Portion of Car Sales Lot	

SECTION #	COMMENTS
3.4	Identification of four previous underground storage tanks located on the subject site.
4.4.2	City of Palo Alto, Fire Department records regarding former underground storage tanks.
4.4.3	Santa Clara Valley Water District closure letter and documents related to removal of four underground storage tanks, dated January 30, 1998.
4.4.5	Geotracker records regarding closure of underground storage tanks.
4.5	Environmental Records Search document listing the subject site with a closed LUST case.

DESCRIPTION OF CONDITION: There were formerly four underground storage tanks located on the subject site. They were removed in 1996. Thirty-nine tons of soil was removed, and 1,200 gallons of groundwater was disposed of during the remediation activities. Some residual soil contamination was left in place in the southern tank pit area. Upon closure, soil and groundwater contamination remained on site (groundwater contamination appeared to be localized in the area adjacent to the former tank pit); however, the residual soil and groundwater contamination were below levels which required cleaning and were below levels of regulatory concern.

ACTION SUGGESTED: No action is suggested, recommended and/or warranted at this time based on the information reviewed for the assessment. If any excavation is to take place in the area of the southern tank pit, precautionary measures should be implemented.

SECTION 7.0

LIMITATIONS

To achieve the study objectives stated in this report, we were required to base ***PHASE ONE*** **INC.**'s conclusions and recommendations on the best information available during the period the investigation was conducted and within the limits prescribed by ***PHASE ONE*** **INC.**'s client in the contract/authorization agreement and standard terms and conditions.

PHASE ONE **INC.**'s professional services were performed using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar fields. The findings were mainly based upon examination of historic records, maps, aerial photographs, and governmental agencies lists. The hazardous waste site lists represented in this report represent only a search of the specific government records as listed above. It should be noted that governmental agencies often do not list all sites with environmental contamination; the lists could be inaccurate and/or incomplete. Recommendations are based on the historic land use of the subject property, as well as features noted during the site walk and examined records. The absence of potential gross contamination sources, historic or present, does not necessarily imply that the subject property is free of any contamination. This report only represents a "due diligence" effort as to the integrity of the subject property. No warranty or guarantee, expressed or implied, is made as to the professional conclusions or recommendations contained in this report. The limitations contained within this report supersede all other contracts or scopes of work, implied or otherwise, except those stated or acknowledged herewith.

This report is not a legal opinion. It does not necessarily comply with requirements defined in any environmental law such as the "innocent landowner defense" or "due diligence inquiry." Only legal counsel retained by the client is competent to determine the legal implications of any information, conclusions, or recommendations in this report. The compliance status, discussed in Section 3.0, is not intended for use as a guide to compliance for the present owner. Its intended use is to identify environmental impairments to the subject property and is not to be used as a guide to the legal compliance to any regulations of any kind.

The findings, conclusions, recommendations, and professional opinions contained in this report have been prepared by the staff of ***PHASE ONE*** **INC.** , in accordance with generally accepted professional practices. All cost estimates in Section 6.0, are purely estimates only, and may not represent the actual costs. Without further investigative assessment, exact, actual costs cannot be fixed. The costs associated with ***PHASE ONE*** **INC.**'s recommendations are for budgetary purposes only.

This report does not address, in any way, septic systems, leach fields, septic tanks, or related health hazards.

All asbestos, lead, or any other sampling is sampled in a good faith effort by ***PHASE ONE*** **INC.** assessors. Sample results should not be construed as conclusive and binding in any way. All sampling conducted is only for the purposes of general screening and does not imply that all materials, locations, or hazardous materials have been identified nor was the sampling intended to identify every instance of the materials sampled. No interpretation of the sample results is made or implied. ***PHASE ONE*** **INC.** only relays the information supplied by the laboratory conducting the analysis.

unidocs.org

2 Inspection Observations/Correction Requirements

Location:
Secondary Containment:
__ Provide __ Permit required (submit plans)
__ Repair __ Maintain Clean & Dry ___ Monitoring ___Documentation
Other: see page

Location:
Separation of Incompatibles:
__ Remove incompatible material(s)
__ Provide separation by structure (wall/cabinet, etc) or by distance
Other: see page

Location:
Monitoring UST Other Both (circle one)
__ Provide visual / continuous monitoring (circle) __ Repair
__ Provide Maintenance Reports __ Provide written description/equipment information
Other: see page

Location:
Labeling, Placarding and Marking:
__ Label containers properly __ Provide signs for room or area
__ Provide Placards for room or building __ Label piping (contents & flow direction)
Other: see page

Location:
Hazardous Materials Storage:
__ Reduce Quantities below H Occupancy threshold
__ Properly dispose of hazardous materials/ hazardous waste
__ Submit Plans for upgrading Hazmat Storage Area
__ Provide MSDS for specified materials (see page ____)
Other: see page

Location:
Other:
__ Remove hazardous materials spillage, containers, debris.
__ Floors must be free from spillage __ Service fire extinguishers annually
__ Discontinue use of extension cords __ Upgrade wiring/permit required
__ Provide exit signs / emergency lighting __ Clear exit pathway/corridor
__ Secure all gas cylinders and dewars
__ Other: _____ see page___

Violations shall be corrected immediately and may be subject to enforcement action (PAMC 17.48). A dated and initialed copy of this report or a signed letter shall be returned to the Palo Alto Fire Department within ____ days confirming the items have been corrected. A re-inspection to verify compliance may be conducted within ____ days from the initial date of this inspection. All re-inspections after the first re-inspection shall be charged at the rate specified in the Municipal Fee Schedule.

INTRODUCTION

SEMCO has adopted the following Health & Safety Plan and procedures for the removal and/or closure of underground petroleum storage tanks and associated activities. The purpose of this plan is to provide health and safety guidelines to be adhered to while all work is in progress.

All personnel involved with the tank removal or associated activities will have an assigned responsibility. The outlined responsibilities will establish standards for personnel protective wear and safety procedures, and will provide for emergency actions which could arise during project operations.

babate@comcastauto.com
Project Atlantic 10.02.2016 13:52
CONFIDENTIAL

SCOPE OF WORK

1.0 Scope of Work:

The tanks will be purged of all remaining residues, and these residues will be stored on site in a 55 gallon approved drum until they are hauled away or pumped out for disposal by a certified hazardous materials hauler.

The tanks will be inerted with a minimum of 20 lbs of dry ice per 1,000 gallons of tank capacity. More ice will be added if necessary to displace the oxygen in the tank to a concentration level below the OSHA approved lower explosive limit. This will be achieved by using a Gastech 1314. When this level is obtained, the tank will be removed, and samples will be collected per the approved work plan.

1.1 Responsibilities of Other Agencies if Present:

a. The Environmental Health Department is responsible for approval and inspection of procedures, including tank removal, sample procurement and integrity of work plan.

b. The Fire Department is responsible for inspections relative to safe procedures and conditions of tank prior to removal.

baba@... Project Atlantic 2:02:2... CONFIDENTIAL

HAZARDS, SPECIAL PRECAUTIONS

2.0 Hazards, Special Precautions:

2.1 Special Precautions:

During the course of underground storage tank removal, workers could be exposed to petroleum hydrocarbon vapors, liquids, or other wastes. The following precautions will be observed by all individuals engaged in the tank removal activity.

2.1.1 Toxicity Considerations, Petroleum Substances:

All individuals should be aware of appropriate health precautions. When high concentrations of petroleum hydrocarbon vapors are inhaled, symptoms of intoxication may result. These symptoms range from simple dizziness to unconsciousness. Care will be exercised to minimize exposure to these substances when they are present. Avoid skin contact with petroleum substances whenever possible. Use soap and water to remove any petroleum product that contacts skin.

2.1.2 Flammability and Combustibility Consideration:

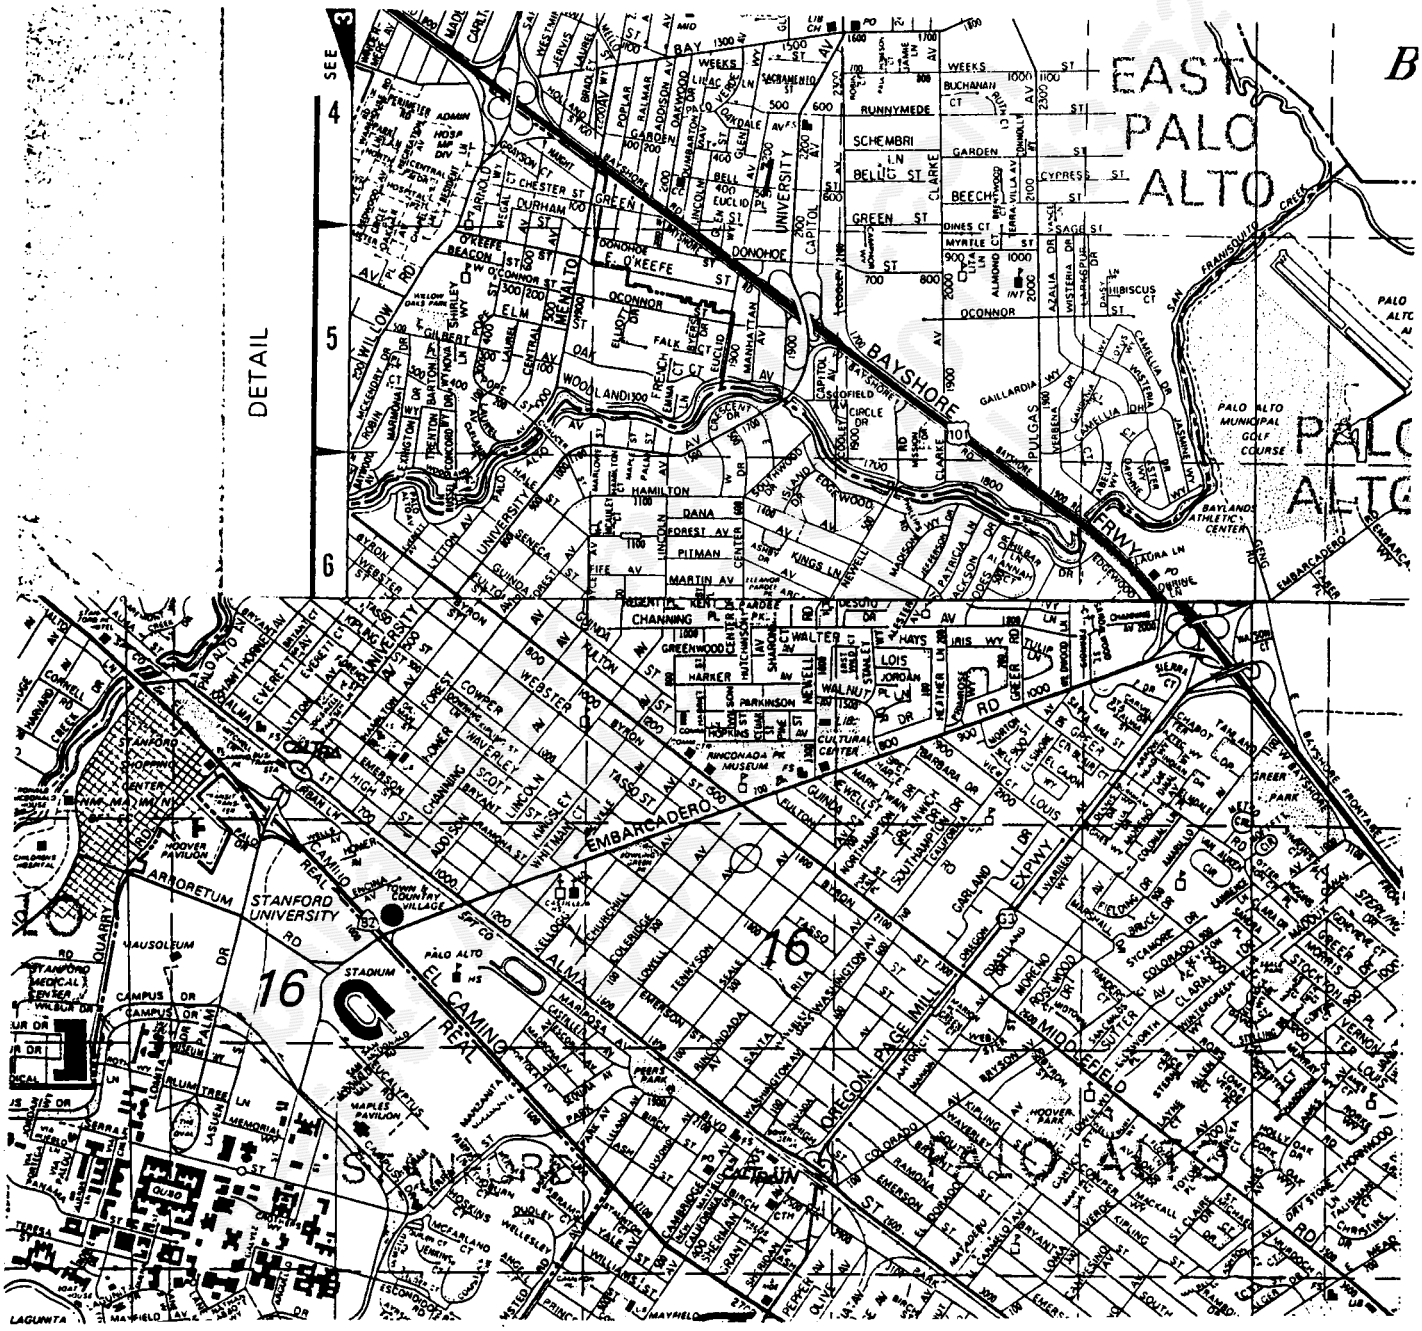

Flammable and combustible vapors are likely to be present in the work area. Precautions will be taken to eliminate all potential sources of ignition to prevent the discharge of static electricity during venting, and to prevent the accumulation of vapors.

2.1.3 Physical Considerations:

During the excavation of underground storage tanks, some physical hazards can be present in the form of large holes, exposed piping, debris piles, and excavation equipment. All workers will be aware of these hazards and take all necessary actions to eliminate accidents. The excavated area will be appropriately marked and barricaded at all times.

5.0 PERSONNEL

SEMCO Employees

5.1 Project Manager
- Manages field operations.
- Ensures the Work Plan is completed on schedule.
- Briefs the field teams on their specific assignments.
- Participates in the preparation of the Site Safety Plan.
- Serves as a liaison with public officials.

5.2 Site Safety Officer
- Implements and enforces the Site Safety Plan.
- Assures that all on-site personnel have received a copy of the Site Safety Plan, have read it and understand it.
- Conducts frequent inspections of site conditions, facilities, equipment, and activities to determine if the Site Safety Plan is adequate and being followed.
- Conducts daily "tailgate" meetings to explain the plan of work for the day and to mention potential hazards of the site.
- Ensures that protective clothing and equipment are properly stored and maintained.
- Knows emergency procedures, excavation route, and notifies local emergency services when necessary.
- Notifies the Health and Safety Manager of all accidents and injuries that occur on site.

5.3 On-Site Personnel
- Are required to document their full understanding of the Site Safety Plan before starting work by signing that they have read the Site Safety Plan and understand it.
- Complies with the Site Safety Plan.
- Notifies the Site Safety Officer of unsafe conditions.
- On-Site employees are held responsible to perform only those tasks for which they believe they are qualified and in their opinion are safe.

CONTINGENCY PLAN

8.0 Contingency Plan:

If an injury occurs, the following action will be taken:

- Medical attention for the injured person immediately.
- Notify the Site Safety Officer.
- Depending on the type and severity of the injury, SEMCO's occupational physician will be notified.
- The injured person's personnel office will be notified.
- An incident report will be prepared. The Site Safety Officer will be responsible for its preparation and submittal to the Health and Safety Director and corporate personnel office within 24 hours.
- The Site Safety Officer will assume charge during a medical emergency.
- EMERGENCY ROUTES--see Hospital Route Map, Page 10.

babate@hotmail.com

SAFETY EQUIPMENT

9.0 Safety Equipment

9.1 As a minimum, the following equipment will be on site:

LEL Meter - Gastech 1314
O/M Meter
OSHA - Approved First Aid Kit
40BC Fire Extinguisher
Half Face Respirator with Organic Vapor Cartridges

SAFETY TRAINING

10.0 Safety Training

SEMCO's field employees have received their certificates of training as required by OSHA-SARA agencies, with refresher courses as needed.

MEDICAL MONITORING

11.0 Medical Monitoring

SEMCO requires all Class I truck drivers to have a mandatory physical once a year. SEMCO supplies health insurance to all employees and administers random and mandatory drug and alcohol testing.

Subject: **NOTICE OF UNDERGROUND STORAGE TANK VIOLATION AT 1730 Embarcadero Road**

Dear Tom Mountain

This letter is to notify you that, in accordance with Section 25285 of the California Health & Safety Code, your Underground Storage Tank (UST) permit has been withheld due to violation(s) at the above listed facility. The violations of Title 23 of the California Code of Regulations (CCR) found when reviewing the records for this facility are marked with "X" below.

☑ State UST Permit Application Forms A, B & C out of date/not on file with the Fire Dept.
23 CCR 2711

☑ Hazardous Materials Business Plan out of date/not on file with the Fire Dept.
H&SC Sec. 25505

☑ Approved monitoring plan and response plan are not on file with the Fire Dept.
23 CCR 2711

☐ Results of annual tank/piping leak testing not on file with the Fire Dept.
23 CCR 2643(g)

☐ Annual certification of leak detection system not on file with the Fire Dept.
23 CCR 2630(d)

☑ Certification of Financial Responsibility incomplete/not on file with Fire Dept.
23 CCR 2711(a)(12)

☑ See attached list of additional violations.

Please be aware that continued non-compliance will result in ineligibility for cleanup compensation

P.O. Box 10250
Palo Alto, CA 94303
415.329.2184
415.327.6951

under the State Cleanup Fund and may limit insurance coverage from a third party insurer, should a release occur.

As such conditions are contrary to law, you are hereby required to correct these violations immediately upon receipt of this notice. Please send documentation demonstrating compliance with the above requirements within 30 days of the date of this letter. Failure to comply with the foregoing order before that time may render you liable to the penalties provided by law for such violation.

Your permit will be sent to you once these violations have been corrected. Please contact me at (415) 329-2184 if you would like additional information.

Sincerely,

Gordon Simpkinson
Hazardous Materials Specialist

Mr Tom Mountain, Service Manager
Carlson Porche, Audi
1730 Embarcadero Road, Palo Alto, Ca.
94303

Dear Mr. Mountain,

A review of California State monitoring procedures CCR Title 23, Division 3, Chapter 16, has revealed some additional requirements for your facility in addition to those noted during the inspection of 3/15/95

2648. Ground Water Monitoring Requirements

... In areas where a single underground storage tank is located, a minimum of two ground water monitoring wells are to be installed, one at each end of the tank.

... In areas where two tanks are located together, a minimum of three monitoring wells are to be installed, equally spaced from one another.

... Ground water monitoring may be used as the sole release detection method, only where the ground water has no present "beneficial use".

Both the Santa Clara Valley Water District and the Regional Water Quality Control Board have determined that your property lies within an "Area of Beneficial Use" as defined by State law. Therefore, in order to satisfy this "Beneficial Use" stipulation, your tanks will need to be outfitted with a second method of monitoring and have this secondary monitoring method incorporated into the respective monitoring plans for each tank.

Using the above codes and restrictions, the following alternatives are presented for your consideration:

1. Provide a minimum of two groundwater monitoring wells per tank, or three wells per tank site, plus provide a second method of monitoring, such as yearly tightness testing.

2. Change your method of monitoring to an approved quantitative release detection method, such as: automatic tank gauging, (for any tank), and/or manual tank gauging, (for tanks of 2,000 gallons or less)

3. Remove the tanks from the ground within 90 days.

If you choose options 1 or 2, please be aware that your three steel tanks will still need to be removed from the ground by December 22, 1998. Additionally, your 10,000 gallon fiberglass tank will be required to be upgraded with an overfill prevention device, striker plates (or tube mounted bottom protectors), and corrosion protection (for the piping) by December 22, 1998.

If you choose to remove your tanks, you will not be required to have them tightness tested.

Please obtain an approved permit from the Fire Department for any work to be performed on your tank or monitoring systems, prior to starting the job.

Please be aware that the upgrade requirements noted in this letter are to be complied with <u>in addition to</u> the required corrections listed during the UST inspection of 3/15/95

For more information on acceptable monitoring alternatives or any other questions, please feel free to call this office at (415) 329-2324.

Sincerely,

RDB

Robert D Brouchoud
Hazardous Materials Inspector,
Palo Alto Fire department

Subject: UNDERGROUND STORAGE TANK UPGRADE/REPLACE DEADLINE
1730 Embarcadero Road

Dear Mr. Mountain:

This letter is to notify you that one or more of your Underground Storage Tank(s) (USTs) is/are subject to the upgrade/replacement requirements of Section 25292 of the California Health & Safety Code. Under these requirements, any existing single walled tank/piping system must be either upgraded or removed by not later than December 22, 1998. All USTs containing hazardous materials other than motor vehicle fuel or any hazardous waste cannot be upgraded and must be removed.

The City of Palo Alto urges you to consider having this work performed as soon as possible for the following reasons:

1) As the deadline approaches, high demand will increase prices and limit availability of equipment and contractors.

2) There are financial assistance programs which may decrease in availability as the deadline approaches.

Please be aware that all upgrade and removal work requires a permit from the Palo Alto Fire Department. The Fire Department has several publications available which can help you decide on which option is best for your facility.

Please contact Bob Brouchoud or myself at (415) 329-2184 if you would like additional information.

Sincerely,

Gordon Simpkinson
Hazardous Materials Specialist

CERTIFICATION OF FINANCIAL RESPONSIBILITY

FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in Section 2807, Chapter 18, Div. 3, Title 23, CCR:

☐ 500,000 dollars per occurrence
or
☐ 1 million dollars per occurrence

AND

☐ 1 million dollars annual aggregate
or
☐ 2 million dollars annual aggregate

B. _____ *hereby certifies that it is in compliance with the requirements of Section 2807,*
(Name of Tank Owner or Operator)
Article 3, Chapter 18, Division 3, Title 23, California Code of Regulations.
The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C. Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Comp.

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance with all conditions for participation in the Fund.

D. Facility Name	Facility Address
Facility Name	Facility Address

EPA ID No.: CAD009466392 Phone No.: 510-235-1393

9. Destination of Tanks and Piping: Erickson, Inc.

10. Tank System:

	Size (gallons)	Substance(s) Previously Contained
Tank 1	10,000	gasoline
Tank 2		
Tank 3		
Tank 4		
Tank 5		
Tank 6		

If the owner/operator does not have a current Hazardous Materials Business Plan/HMMP which includes these tanks on file with the local agency, provide an 8-1/2" x 11" plot plan of the tanks to be closed. Indicate the nearest cross street to the facility, buildings immediately adjacent to the tanks, location(s) of tanks to be closed, and location of nearby utilities.

This Underground Tank Closure Permit expires 6 months from the date of closure plan approval. If tanks have not been closed within 6 months, a new closure permit application and appropriate fees may be required.

Facility closure inspections must be scheduled at least 48 hours in advance. Call the appropriate local agency to make necessary arrangements.

I certify that I have read the tank closure guidelines and declare that the above information is correct to the best of my knowledge. The owner of the tank(s) described above is aware of the pending closure. I agree to comply with all applicable city and county ordinances and state laws relating to hazardous materials/wastes, and hereby authorize representatives of local agencies to enter upon the within mentioned property for inspection purposes.

tank # = 19033 loaded on flat bed truck, photos taken

An adjacent groundwater monitoring well had water at 6½ ft.

Samples taken at interface = 10K-G-INTERFACE-EAST and 10K-G INTERFACE-WEST

both samples ~~the~~ taken at 6½ ft.

all samples will be taken to North State Environmental for analysis

Please provide a copy of the soil report to the Fire Dept for our records and review.

- No smell was noted on any sample

K. Broeckel

Palo Alto, California 94303
(415) 856-6300

SUPPLEMENTAL INFORMATION

1. We have two under ground tanks that are currently in use. One of which is a 10,000 gal. fiberglass gasoline tank and the second is a 1,000 gal. waste oil tank. Location of the tanks are shown on the general site plan.

2. As of 4/11/86, D-D Management Consultants of San Jose placed three (3) wells which are shown on the general site plan. These wells are currently being monitored monthly.

March 14, 1997

Charles A. Burton
Carlsen Motor Cars
1730 Embarcadero Road
Palo Alto, CA 94303

Subject: Aboveground Fuel Tank Application

Dear Mr. Burton:

I have received your letter dated February 14, 1997. In your letter, you described the reasons why a 4,000 gallon capacity tank is needed at your facility. After discussion with Hazardous Materials Specialist Gordon Simpkinson, I am approving your request, provided that the following additional safeguards are provided.

1. The tank shall have a four hour fire resistance rating.

2. An automatic shutoff device shall be provided which activates at 90% tank capacity.

3. A listed emergency breakaway device shall be provided for the dispenser hose.

4. A clear space of at least 5 feet shall be maintained around all sides of the tank. The clear space shall not be used for parking or any type of storage.

Other requirements may also be placed on the installation should new information come to light during the permit application review. This approval applies strictly to the requirements under section 15.04.244 of the Palo Alto Municipal Code (Section 7902.2.2.1 of the 1994 Uniform Fire Code) and does not constitute a waiver of any other requirements under the Palo Alto Municipal Code or any other applicable law, statute or regulation.

Once planning approval has been obtained, you will need to provide a permit application, along with detailed plans, to the Hazardous Materials Bureau. A permit fee of $335.00 shall be provided, payable to the City of Palo Alto.

Should you have any further questions regarding this matter, please contact Gordon Simpkinson at 329-2135.

Sincerely yours,

Nick Marinaro
Fire Marshal

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204484
Facility Name: CARLSEN MOTOR CARS INC
Site Address: 1730 EMBARCADERO RD
PALO ALTO, CA 94303

Inspection Date: 5/3/2010

HW Generator Type: <1,000 KG/MO.
Consent to Inspect Granted By: LAWRENCE STRONG, SERIVCE MANAGER
Programs Inspected: HAZARDOUS WASTE GENERATOR;

Pictures Taken: NO
Samples Taken: NO

Summary of Violations & Notice to Comply

Program: PR0313331 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION** Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records. ***Absorptive pads are noted as being used to clean spills to floor, but no pad container was noted. PLEASE EXPLAIN WHY PADS OR OTHER ABSORPTIVE MATERIALS WITH OIL ARE NOT BEING HANDLED AS HAZARDOUS WASTES.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/ls/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]	All Petroleum will Haul away
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed approximately 8 absorptive pads from the garbage dumpster. Three of the pads were still wet and smelled strongly of gasoline. Pads were removed from the dumpster during the inspection. CONTAMINATED PADS (ESPECIALLY THOSE CONTAMINATED WITH GASOLINE) MUST BE HANDLED AS HAZARDOUS WASTE. PROVIDE DOCUMENTATION OF PROPER HANDLING OF THESE PADS.*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a)]	All Petroleum Called TO Bring Done 55 Gallon Drum
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***Observed 6 rolling carts for the daily collection of oil which were labeled, but who's labels are illegible or not completed. Also observed used oil and used antifreeze collection tanks with labels affixed to them which were faded and illegible/incomplete. Also, 15 gallon drum holding parts wash waste is missing an accumulation start date.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	Done Labeled
G220	M	**TRAINING: SQG** Personnel are not adequately trained on managing hazardous waste. ***Training last provided to most staff in 3/2009. PROVIDED TRAINING FLYER FOR FREE COUNTY TRAINING CLASS*** Provide training to ensure that all personnel are thoroughly familiar with proper waste handling and emergency response procedures relevant to their responsibilities during normal facility operations and emergencies. [CFR 262.34(d)(5)(iii)]	OK Will Schedule

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204464
Facility Name: CARLSEN MOTOR CARS INC
Site Address: 1730 EMBARCADERO RD
PALO ALTO, CA 94303

Inspection Date: 5/3/2010

VC	Class	Violation	Corrective Actions Taken
G231	M	**TANK INSPECTIONS: SQG** Facility could not demonstrate that hazardous waste tanks are being inspected as required. ***Waste oil and antifreeze tanks are not being inspected daily to ensure that tanks will not overflow and that monitoring equipment is functional (oil tank float gauge).*** Inspect at least daily any discharge control systems, data gathered from monitoring equipment, and for uncovered tanks, the level of the waste in the tank. Inspect at least weekly the tank construction materials, and the area immediately surrounding the tank, including any discharge confinement structures. [CFR 265.201(c)]	log updated Done
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS** Facility failed to properly mark a container of drained used oil/fuel filters. ***Observed two drums filters dated 2/10 and 4/10, but receipts show pick ups of filters on 3/25 and 4/23/2010. NEED TO ENSURE THAT FILTER DRUMS ARE MARKED WITH DATE FIRST FILTER PLACED IN IT.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	Corrected Done
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed light tubes being stored along side of building not in a rigid container, and unmarked. PLACE BULBS IN RIGID CONTAINER TO PREVENT BREAKAGE AND MARK AS UNIVERSAL WASTE.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	Done

Comments: Overall shop is very clean- no liquids noted on floors in shop area.
-two drums for collection of used oil filters, one dated 2/10, second dated 4/10. both currently in use. Suggest not beginning second drum until first drum is full. Noted that approximately 1/3 of filters in drums were non-metal cased filters (cartridge type).
-55 gallon drum for wash sump sludge. Per Lawrence Strong, handling as non-hazardous waste.
-Noted overflow of wash water from detail area to storm drain.
-Facility does not have container for collection of absorptive pads.
-All aerosol cans noted in trash were empty of both contents and propellants.
-Oil rollers pumped to oil tank daily. Antifreeze collected in shallow pans and poured to antifreeze tank daily.
- Facility has posted emergency information d evacuation routes as well as IIPP and emergency plan.
-Reviewed training records and plan, receipts for 2009 and 2010.
-Reviewed disposal receipts for 2009, 2010. Missing a few months from printer. Now using system where receipts are scanned for maintenance. Suggest allowing inspector just to view them online next inspection rather than re-printing all receipts.
-Facility appears to be an episodic LQG. Exceeded 270 gallons used in January and Sept. 2009

Information Request:
Provide an explanation of how the following items are handled:
1. Mop and "zamboni" water contaminated with oil or antifreeze.
2. Waste gasoline removed form gas tanks during maintenance

Unless otherwise noted by the inspector, correct all minor violations no later than 06/02/2010.
Correct all Class I and Class II violations immediately.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Summary of Violations & Notice to Comply

Program: PR0313331 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION** Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records. ***Absorptive pads are noted as being used to clean spills to floor, but no pad container was noted. PLEASE EXPLAIN WHY PADS OR OTHER ABSORPTIVE MATERIALS WITH OIL ARE NOT BEING HANDLED AS HAZARDOUS WASTES.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/ls/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]	
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed approximately 8 absorptive pads from the garbage dumpster. Three of the pads were still wet and smelled strongly of gasoline. Pads were removed from the dumpster during the inspection. CONTAMINATED PADS (ESPECIALLY THOSE CONTAMINATED WITH GASOLINE) MUST BE HANDLED AS HAZARDOUS WASTE. PROVIDE DOCUMENTATION OF PROPER HANDLING OF THESE PADS.*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a)]	
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***Observed 6 rolling carts for the daily collection of oil which were labeled, but who's labels are illegible or not completed. Also observed used oil and used antifreeze collection tanks with labels affixed to them which were faded and illegible/incomplete. Also, 15 gallon drum holding parts wash waste is missing an accumulation start date.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	
G220	M	**TRAINING: SQG** Personnel are not adequately trained on managing hazardous waste. ***Training last provided to most staff in 3/2009. PROVIDED TRAINING FLYER FOR FREE COUNTY TRAINING CLASS*** Provide training to ensure that all personnel are thoroughly familiar with proper waste handling and emergency response procedures relevant to their responsibilities during normal facility operations and emergencies. [CFR 262.34(d)(5)(iii)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204464
Facility Name: CARLSEN MOTOR CARS INC
Site Address: 1730 EMBARCADERO RD
PALO ALTO, CA 94303

Inspection Date: 5/3/2010

VC	Class	Violation	Corrective Actions Taken
G231	M	**TANK INSPECTIONS: SQG** Facility could not demonstrate that hazardous waste tanks are being inspected as required. ***Waste oil and antifreeze tanks are not being inspected daily to ensure that tanks will not overflow and that monitoring equipment is functional (oil tank float gauge).*** Inspect at least daily any discharge control systems, data gathered from monitoring equipment, and for uncovered tanks, the level of the waste in the tank. Inspect at least weekly the tank construction materials, and the area immediately surrounding the tank, including any discharge confinement structures. [CFR 265.201(c)]	
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS** Facility failed to properly mark a container of drained used oil/fuel filters. ***Observed two drums filters dated 2/10 and 4/10, but receipts show pick ups of filters on 3/25 and 4/23/2010. NEED TO ENSURE THAT FILTER DRUMS ARE MARKED WITH DATE FIRST FILTER PLACED IN IT.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed light tubes being stored along side of building not in a rigid container, and unmarked. PLACE BULBS IN RIGID CONTAINER TO PREVENT BREAKAGE AND MARK AS UNIVERSAL WASTE.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	

Comments: ***Overall shop is very clean- no liquids noted on floors in shop area.***
-two drums for collection of used oil filters, one dated 2/10, second dated 4/10. both currently in use. Suggest not beginning second drum until first drum is full. Noted that approximately 1/3 of filters in drums were non-metal cased filters (cartridge type).
-55 gallon drum for wash sump sludge. Per Lawrence Strong, handling as non-hazardous waste.
-Noted overflow of wash water from detail area to storm drain.
-Facility does not have container for collection of absorptive pads.
-All aerosol cans noted in trash were empty of both contents and propellants.
-Oil rollers pumped to oil tank daily. Antifreeze collected in shallow pans and poured to antifreeze tank daily.
- Facility has posted emergency information d evacuation routes as well as IIPP and emergency plan.
-Reviewed training records and plan, receipts for 2009 and 2010.
-Reviewed disposal receipts for 2009, 2010. Missing a few months from printer . Now using system where receipts are scanned for maintenance. Suggest allowing inspector just to view them online next inspection rather than re-printing all receipts.
-Facility appears to be an episodic LQG. Exceeded 270 gallons used in January and Sept. 2009

Information Request:
Provide an explanation of how the following items are handled:
1. Mop and "zamboni" water contaminated with oil or antifreeze.
2. Waste gasoline removed form gas tanks during maintenance

Unless otherwise noted by the inspector, correct all minor violations no later than 06/02/2010.
Correct all Class I and Class II violations immediately.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- ***Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.***
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

HAZARDOUS WASTE TANK SYSTEM WRITTEN ASSESSMENT TEMPORARY EXEMPTION APPLICATION

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 22 California Code of Regulations (CCR), Section 66265.192(j)

California hazardous waste regulations require that a hazardous waste tank system operated by large quantity generator or onsite hazardous waste treatment facility have a written assessment certified by professional engineer (PE) prior to being placed in service. The owner/operator of an aboveground tank system that is either RCRA-exempt or holds non-RCRA hazardous waste may apply to the local Certified Unified Program Agency (CUPA) for an extension of up to 36 months to the deadline for submittal of the written assessment. This form must be used to apply for such an extension. You should first review the Unidocs document titled "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." That document and CUPA/local HazMat agency jurisdiction and contact information are available at **www.unidocs.org**. Complete a separate form for each tank system. If the local CUPA and Fire Marshal authority are not the same agency, you must first obtain sign-off from the Fire Marshal or his/her authorized representative in Section 7, below, then forward the application to the CUPA.

1. Facility Name (Tank Site): Carlsen Audi EPA ID No.: CAD982346363
   Address: 1730 Embarcadero Road City: Palo Alto Zip: 94303
2. What is the tank volume in gallons? 500
3. What type of waste does this tank hold? ☒ Used oil; ☐ Used Antifreeze; ☐ Other *(Specify)*: _____
4. Does this tank system have secondary containment capable of containing 100% of the contents of the tank and ancillary piping volume? ☒ Yes; ☐ No.
5. Is this tank system exposed to precipitation? ☐ Yes; ☒ No. If "Yes," does the secondary containment system have sufficient capacity, in addition to that required above, to contain infiltration from a 25-year, 24-hour rainfall event? ☐ Yes; ☐ No N/A
   (Precipitation will not affect Secondary Containment)
6. Is the tank system secondary containment provided with a leak detection system designed and operated so that it will detect either the failure of the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours? ☐ Yes; ☒ No.
7. **FIRE MARSHAL APPROVAL: Our agency has approved the design and installation of this tank system.**

THOMAS L. NEWLAND — Fire Marshal or Representative's Name (Print)
[signature] — Fire Marshal or Representative's Signature
7/11/08 — Date

APPLICANT CERTIFICATION: I have read the Unidocs "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." I certify that the tank system for which this exemption is being requested is an aboveground tank (i.e., 90% or more of the total system volume is above-grade) and the tank system is either RCRA-exempt or the waste it holds is a non-RCRA hazardous waste. I have attached a drawing of the layout of the tank facility (e.g., Hazardous Materials Business Plan Site Plan/Storage Map) with the location of this tank and any associated piping runs (other than vent lines and vertical fill tubes) clearly identified. I declare that the above information is correct to the best of my knowledge. I agree to comply with all applicable state laws and regulations relating to the operation and management of this tank system. I represent the: ☒ Tank Owner; ☐ Tank Operator

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

DBA/NAME Carlsen Motor Cars

Comments: (see marked violations on page 1)

1- Provide cover/lid on waste oil storage tank. Clean area thoroughly & maintain in clean condition. Make necessary modifications to temporary oil containers to allow for proper draining to oil tank.

2- Provide spill kits for all areas of potential need including waste oil storage tank. The spill kit should include materials & equipment necessary to prevent any spill from entering the storm drain.

3. Maintain documentation of hazardous waste training for all required employees.

August 13, 1992 CERTIFIED MAIL P 347 433 764

Charles Burton, President
Carlsen Motor Cars, Inc.
1730 Embarcadero Rd.
Palo Alto, CA 94303

NOTICE OF VIOLATION AT: Carlsen Motor Cars, Inc.
1730 Embarcadero Rd., Palo Alto EPA#CAD982346363

Dear Mr. Burton:

On August 11, 1992 the Health Department - Office of Toxics Enforcement conducted an inspection at the above mentioned facility. As a result of that inspection, violations of the hazardous waste statutes (Health & Safety Code) and/or regulations (Title 22 California Code of Regulations) were found.

Upon receipt of this letter, Carlsen Motor Cars, Inc. must correct all deficiencies noted on the official inspection form by the dates stipulated. Tom Mountain, acting as a representative for this facility, signed the original form acknowledging receipt of a copy.

This office may conduct a reinspection of this facility to verify compliance. The issuance of this Notice of Violations does not preclude this department or any other agency having legal jurisdiction from taking administrative, civil, or criminal action as a result of the violations noted on the official inspection form.

If you have any questions regarding this notice, please contact Robert Holston at (408) 299-6930.

Sincerely,

Robert Holston

HAZARDOUS WASTE TANK SYSTEM WRITTEN ASSESSMENT TEMPORARY EXEMPTION APPLICATION

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 22 California Code of Regulations (CCR), Section 66265.192(j)

California hazardous waste regulations require that a hazardous waste tank system operated by large quantity generator or onsite hazardous waste treatment facility have a written assessment certified by professional engineer (PE) prior to being placed in service. The owner/operator of an aboveground tank system that is either RCRA-exempt or holds non-RCRA hazardous waste may apply to the local Certified Unified Program Agency (CUPA) for an extension of up to 36 months to the deadline for submittal of the written assessment. This form must be used to apply for such an extension. You should first review the Unidocs document titled "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." That document and CUPA/local HazMat agency jurisdiction and contact information are available at www.unidocs.org. Complete a separate form for each tank system. If the local CUPA and Fire Marshal authority are not the same agency, you must first obtain sign-off from the Fire Marshal or his/her authorized representative in Section 7, below, then forward the application to the CUPA.

1. Facility Name (Tank Site): Carlsen Audi EPA ID No.: CA9823462 63
   Address: 1730 Embarcadero Rd City: Palo Alto Zip: 94303
2. What is the tank volume in gallons? _____
3. What type of waste does this tank hold? ☒ Used oil; ☐ Used Antifreeze; ☐ Other *(Specify)*: _____
4. Does this tank system have secondary containment capable of containing 100% of the contents of the tank and ancillary piping volume? ☒ Yes; ☐ No.
5. Is this tank system exposed to precipitation? ☐ Yes; ☒ No. If "Yes," does the secondary containment system have sufficient capacity, in addition to that required above, to contain infiltration from a 25-year, 24-hour rainfall event? ☐ Yes; ☐ No.
6. Is the tank system secondary containment provided with a leak detection system designed and operated so that it will detect either the failure of the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours? ☐ Yes; ☒ No.
7. **FIRE MARSHAL APPROVAL: Our agency has approved the design and installation of this tank system.**

Fire Marshal or Representative's Name (Print)	Fire Marshal or Representative's Signature	Date
[illegible]	James Henrikson	4/5/13

APPLICANT CERTIFICATION: I have read the Unidocs "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." I certify that the tank system for which this exemption is being requested is an aboveground tank (i.e., 90% or more of the total system volume is above-grade) and the tank system is either RCRA-exempt or the waste it holds is a non-RCRA hazardous waste. I have attached a drawing of the layout of the tank facility (e.g., Hazardous Materials Business Plan Site Plan/Storage Map) with the location of this tank and any associated piping runs (other than vent lines and vertical fill tubes) clearly identified. I declare that the above information is correct to the best of my knowledge. I agree to comply with all applicable state laws and regulations relating to the operation and management of this tank system. I represent the: ☒ Tank Owner; ☒ Tank Operator

Summary of Violations & Notice to Comply

Program: PR0313331 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***Some rolling oil cart labels were faded or illegible. 55 gallon container of waste absorbent is not marked.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	
G320	M	**TRAINING** Personnel are not adequately trained on managing hazardous waste. ***Annual hazardous waste related training is past due.*** Provide a program of instruction that: 1) is directed by a person trained in hazardous waste management procedures; 2) teaches waste management procedures relevant to the position of each employee; and 3) ensures facility personnel are able to respond effectively to emergencies. Provide this training within 6 months of hire, and annually thereafter. [CCR 66265.16]	
G340	II	**TANK SYSTEM ASSESSMENT** Facility failed to obtain or keep on file a current and complete written hazardous waste tank system assessment. ***Used oil and antifreeze tanks have not had tank assessments conducted. Tanks were granted 3 year waiver in 2008. Either have tanks assessed according to the requirements of title 22, CCR, section 66265.192 or complete and have PA Fire Dept sign temporary exemption application (provided).*** Make arrangements to have the tank system assessed by an appropriate Professional Engineer (PE) who is knowledgeable of hazardous waste tank system requirements. Provide a specific date by which the assessment is expected to be completed. Upon completion of the assessment, submit a copy of the final report to HMCD. [CCR 66265.191(a), 66265.192(h)]	
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Universal waste tubes and lamps were noted being stored outside without being placed in a container that would prevent breakage. THIS IS A REPEAT VIOLATION - ALSO CITED IN THE 5/3/10 INSPECTION.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	

Comments: ***General shop is clean, no liquids or staining noted on floors of work areas.***
Waste oil and antifreeze stored in double walled tanks behind service building.
Filters and absorbent materials stored in drums behind service building.
Wash rack sludge is removed from wash pit approximately each month. Placed in to 55 gallon drum adjacent to wash rack and managed as HW.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0204464
Facility Name: CARLSEN MOTOR CARS INC
Site Address: 1730 EMBARCADERO RD
PALO ALTO, CA 94303

Inspection Date: 2/27/2013

Managed as satellite accumulation container.
Rags to Cintas, batteries to Interstate. Receipts showing pick up of cores and cloth both available.
Noted filters draining in shallow pans along walls of service area. Consolidated daily after draining to storage drums.

Reviewed consolidated manifests for disposal of oil, antifreeze, and filters for 2012 and 2013. Shipping papers indicate that facility has been a LQG for all of 2012 and 2013 (to date).
Reviewed manifests for removal of oily solids (sludge) and oily debris (pads and absorbent). Noted shipments in 2011 and 2012.
Contingency Plan contained within IIPP. Plan unchanged since review in 2010.
Training plan contained within IIPP. Plan unchanged since review in 2010.
Reviewed written tank daily inspection logs. Logs maintained for each operating day for 2011, 2012 and 2013 (to date).

PA Fire Hazmat inspection noted on 1/31/13 with no violations noted.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 03/29/2013, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. HAZARDOUS WASTE TANK SYSTEM WRITTEN ASSESSMENT TEMPORARY EXEMPTION APPLICATION

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 22 California Code of Regulations (CCR), Section 66265.192(j)

California hazardous waste regulations require that a hazardous waste tank system operated by large quantity generator or onsite hazardous waste treatment facility have a written assessment certified by professional engineer (PE) prior to being placed in service. The owner/operator of an aboveground tank system that is either RCRA-exempt or holds non-RCRA hazardous waste may apply to the local Certified Unified Program Agency (CUPA) for an extension of up to 36 months to the deadline for submittal of the written assessment. This form must be used to apply for such an extension. You should first review the Unidocs document titled "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." That document and CUPA/local HazMat agency jurisdiction and contact information are available at **www.unidocs.org**. Complete a separate form for each tank system. If the local CUPA and Fire Marshal authority are not the same agency, you must first obtain sign-off from the Fire Marshal or his/her authorized representative in Section 7, below, then forward the application to the CUPA.

1. Facility Name (Tank Site): Carlsen Audi EPA ID No.: CA9823462 63
   Address: 1730 Embarcadero Rd City: Palo Alto Zip: 94303
2. What is the tank volume in gallons? _____
3. What type of waste does this tank hold? ☒ Used oil; ☐ Used Antifreeze; ☐ Other *(Specify)*: _____
4. Does this tank system have secondary containment capable of containing 100% of the contents of the tank and ancillary piping volume? ☒ Yes; ☐ No.
5. Is this tank system exposed to precipitation? ☐ Yes; ☒ No. If "Yes," does the secondary containment system have sufficient capacity, in addition to that required above, to contain infiltration from a 25-year, 24-hour rainfall event? ☐ Yes; ☐ No.
6. Is the tank system secondary containment provided with a leak detection system designed and operated so that it will detect either the failure of the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours? ☐ Yes; ☒ No.
7. **FIRE MARSHAL APPROVAL: Our agency has approved the design and installation of this tank system.**

Fire Marshal or Representative's Name (Print)	Fire Marshal or Representative's Signature	Date
	James Henrikson	4/5/13

APPLICANT CERTIFICATION: I have read the Unidocs "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." I certify that the tank system for which this exemption is being requested is an aboveground tank (i.e., 90% or more of the total system volume is above-grade) and the tank system is either RCRA-exempt or the waste it holds is a non-RCRA hazardous waste. I have attached a drawing of the layout of the tank facility (e.g., Hazardous Materials Business Plan Site Plan/Storage Map) with the location of this tank and any associated piping runs (other than vent lines and vertical fill tubes) clearly identified. I declare that the above information is correct to the best of my knowledge. I agree to comply with all applicable state laws and regulations relating to the operation and management of this tank system. I represent the: ☐ Tank Owner; ☐ Tank Operator

Dear Mr. Strong:

Enclosed is the Vehicle Service Facility Discharge Permit #2006 for Carlsen Audi located at 1730 Embarcadero Road, Palo Alto. This permit is valid for five years and allows the discharge of vehicle wash water to the sanitary sewer. Please be advised that all wastewater must pass through the sampling location.

In addition, please be advised that if you plan to make any changes in your facility's plumbing, you must receive prior approval from the Building Department. The following list outlines specific requirements of your industrial waste permit.

- Report any violation with 24 hours of your knowledge;
- Visually inspect the oil/water separator on a montbly basis;
- Sample the oil/water separator in June and December for Copper and Lead;
- Clean the oil/water separator thoroughly on a quarterly basis;
- Keep a record of the sump inspection/cleaning activities on the attached log.

Please call me at (650) 329-2514 if you have any questions or comments regarding this permit.

Sincerely,

Margaret Zittle

VEHICLE SERVICE FACILITY DISCHARGE PERMIT

Discharger: **CARLSEN AUDI** Permit Number: **2006**
Facility Address: **1730 EMBARCADERO ROAD**
PALO ALTO, CA 94303

This Vehicle Service Discharge Permit is granted to the above facility to discharge treated vehicle service wastewater and domestic waste to the City of Palo Alto sewer collection system in compliance with the City of Palo Alto Sewer Use Ordinance Chapter 16.09, any applicable provisions of Federal or State law and regulations, and in accordance with all provisions set forth herein. In addition to the Specific Permit Conditions (Attachment 1), the discharger's attention is specifically directed to Attachment 2 (Standard Permit Conditions) of this permit, which refers to certain provisions of City of Palo Alto Municipal Code, Chapter 16.09. Violation of the conditions set forth herein may result in civil and criminal penalties as described in Chapter 16.09.255 and 16.09.270, but not limited to civil liability of $25,000 per day.

This permit is issued to **Carlsen Audi** in accordance with the application filed on **May 14, 2012** with the Palo Alto Regional Water Quality Control Plant (RWQCP) and in conformity with plans, specifications, and other data submitted in support of the above application. This permit is not transferable without submission of a new discharge permit application and written consent of the superintendent.

Original Issuance Date: **April 9, 1993**
Effective Date: **June 1, 2012**
Expiration Date: **May 1, 2017**

Ken Torke, Manager
Watershed Protection Program

Attachments:
1. Specific Permit Conditions
2. Standard Conditions
3. Sampling Location Diagram
4. Inspection/Maintenance Log Form

Attachment 1
SPECIFIC PERMIT CONDITIONS

Part A. Discharge Conditions

1. Discharge Rate

The discharge rate from this facility shall not exceed a total flow rate of 1,000 gallons per day. Any increase in either discharge rate from this facility requires the prior approval of the Palo Alto Regional Water Quality Control Plant (RWQCP).

Part B. Sampling Location

The designated sampling point is located at the last stage of the oil/water separator prior to discharge to the sanitary sewer. The designated sampling point is labeled Sampling Point "1" on the attached sampling point diagram (Attachment 3).

Part C. Effluent Limitations

During the term of this permit, the discharge from this facility shall not exceed the following effluent limitations at sampling point "1":

Applicable Effluent Limits*

PARAMETER	INSTANTANEOUS MAXIMUM	PARAMETER	INSTANTANEOUS MAXIMUM
Arsenic	0.10	Silver	0.25
Beryllium	0.75	Zinc	4.00
Cadmium	0.10	Fluoride	65.0
Chromium (total)	2.00	Formaldehyde	5.00
Copper	2.00	Oil & Grease	200.0
Cyanide	1.00	Phenols	1.00
Lead	0.50	TTO**	1.00
Mercury	0.01	pH	5.0-11.0
Nickel	0.50	Susp. Solids	3,000
Selenium	1.00		

*All limits are given in mg/L except for pH.
**TTO=Total Toxic Organics

Part D. Monitoring and Maintenance

1. Sampling Frequency

The facility operator shall conduct sampling according to the schedule provided in the following table:

PARAMETER	SAMPLING FREQUENCY
Copper	June and December
Lead	June and December

Revisions to the sampling frequency may be considered based on performance.

Part E. Treatment System

1. Treatment System

The facility operator shall operate and maintain the oil/water separator specified in the permit application.

2. Visual Inspection

The facility operator shall conduct a visual inspection of the oil/water separator a minimum of **once per month** to ensure that the system is operating properly and to determine if cleaning is necessary. A written log/record of the inspections shall be kept on the attached Inspection/Maintenance Log Form, Attachment #4. Inspection dates, observations, and any actions or cleaning required shall be logged.

3. Cleaning/Maintenance

The facility operator shall clean and maintain the oil/water separator a minimum of **once per quarter**, or more frequently if suggested by a visual inspection. A written log/record of the cleaning/maintenance events shall be kept on the attached Inspection/Maintenance Log Form, Attachment #4. Cleaning/maintenance dates, observations, and any further actions required shall be logged.

bahl... Project... Nam... 12:02:20... CONFIDENTIAL

Part F. Reporting

1. Noncompliance Reporting

If the results of any sampling analysis indicates that the discharge has exceeded the allowable limits, the facility operator must:

i. Verbally inform the RWQCP of the violation within **24 hours** of the dischargers knowledge of the violation.

ii. Submit a written report to the RWQCP, within **fifteen** working days of the discharger's knowledge of the noncompliance, explaining the following: the nature, volume, and duration of the violation; and mitigation measures taken to correct the noncompliance and prevent reoccurrence.

2. Spill Reporting

The facility operator shall immediately notify the RWQCP by phone, at 650-329-2598 (24 hour number), in the event of a spill and discharge to either the storm or sanitary sewer system. In addition, the facility operator shall submit a written report to the RWQCP, within **fifteen** days of the discharger's knowledge of the noncompliance, explaining the following: the nature, volume, and duration of the violation; and mitigation measures to correct the noncompliance and prevent reoccurrence.

SAMPLE CHAIN OF CUSTODY AND ANALYSIS REPORT

Regional Water Quality Control Plant
Operated by the City of Palo Alto
2501 Embarcadero Way, Palo Alto, CA 94303
Phone: 1-650-329-2598 Fax: 1-650-494-3531

Date: 12/19/2013

To: CARLSEN AUDI
1730 EMBARCADERO ROAD

PALO ALTO CA 94303
attention: *MR. LAWRENCE STRONG*

Sample ID: **20080139**
Permit No: **2006**
Sampling Location: **1**
Sampling Type: **GR**
Flow Rate (gpd) : **1000**

Location : **SECOND STAGE SUMP**

Activity	Date	Time	By	No Of Containers	pH	Remarks
PICKUP	4/17/2008	11:00 AM	MZ	1		
PRESERVED	4/17/2008	3:00 PM	MZ	1		
DELIVERED	4/22/2008	4:00 PM	MZ	1		

Parameter	Result	Detect Limit	Limits Local	Special	Fed Max	Fed 30D	Fed 4D
Cu	3.2	0.02	* 2				
Nl	0.049	0.01	0.5				
Pb	ND	0.05	0.5				
Zn	1.7	0.02	4				

Notes: *All values in mg/l except for pH, Specific Conductivity(uS/cm) and flow rate(g/d)*
"" denotes violation*
ND denotes "less than detection limit"
gpd = gallons per day
Flow Rate: (D)efault, (C)alculated.

GR = Grab Sample, CONT_pH = Continuous pH Sample,
DI = Discrete Sample, FP = Flow Proportional Sample,
CM nn = Composit Sample
(a sample is taken every nn minutes)

Comments:

1-MILE RADIUS STREET MAP W/OCCURRENCES

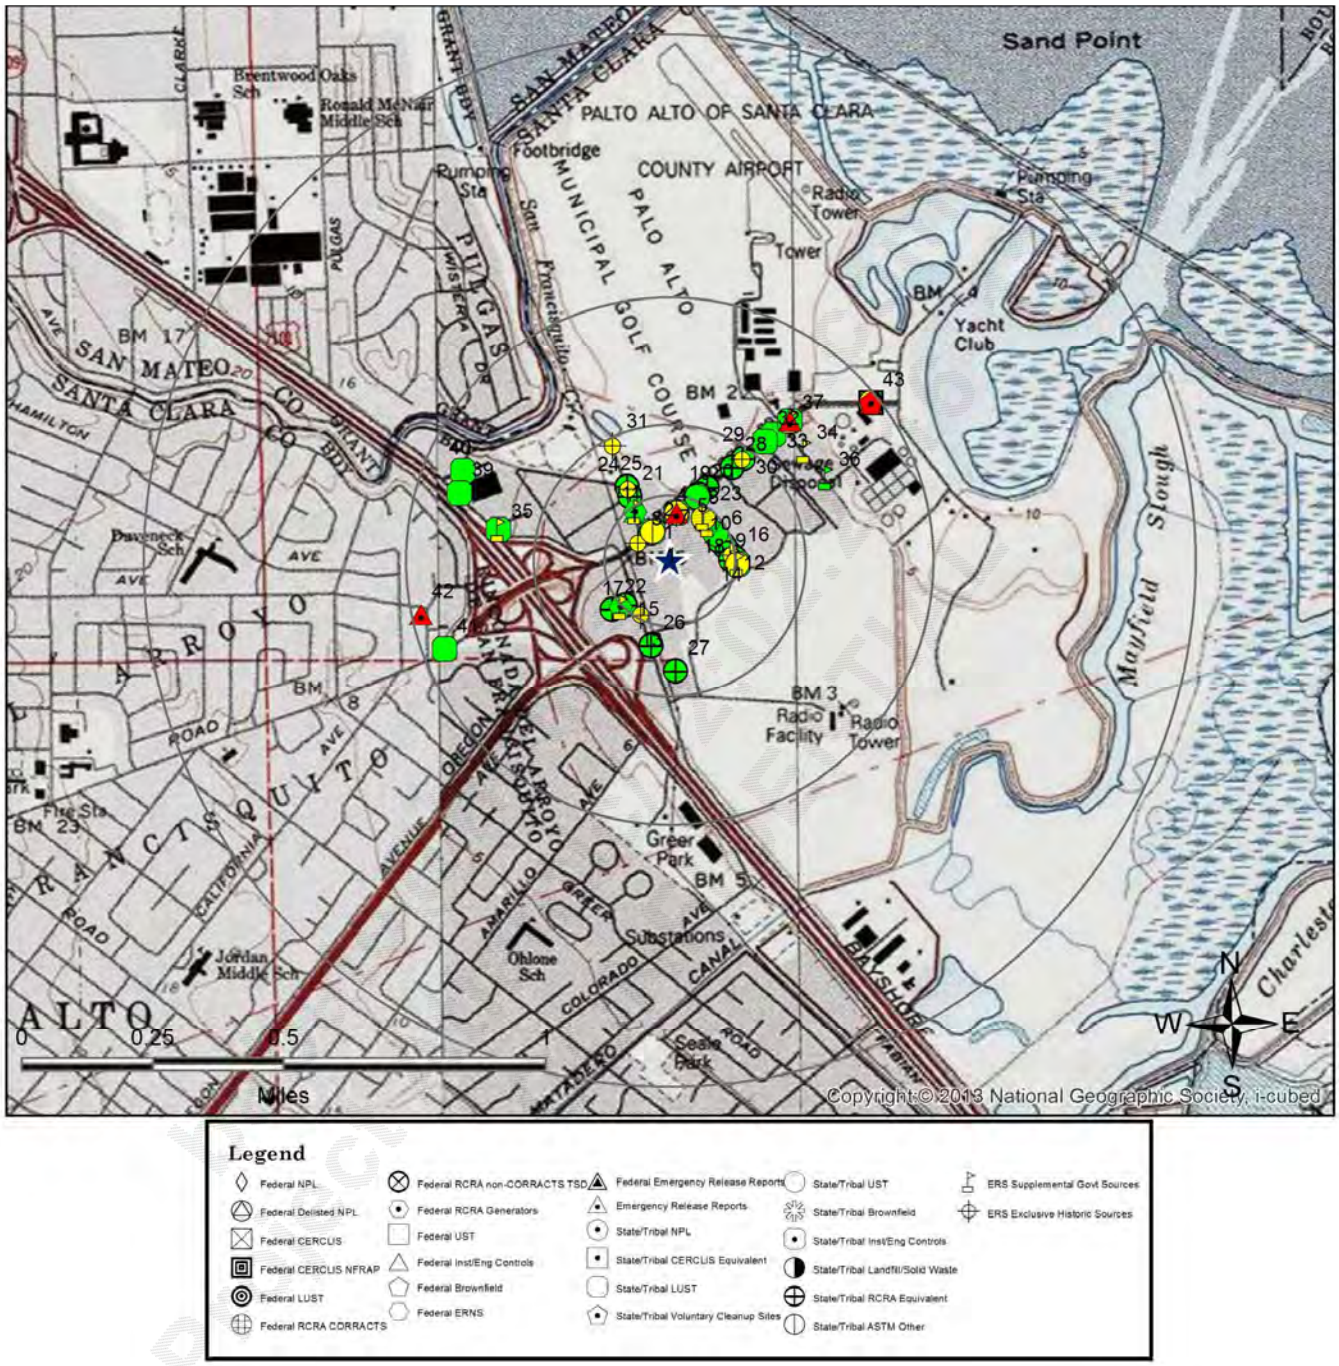

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the list should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore do not likely present an environmental risk.

CASE_TYPE: Cleanup Program Site
Status Date: 2013-05-30 00:00:00
LEAD_AGENCY: SANTA CLARA COUNTY LOP
CASEWORKER: LL
LOCAL_AGENCY: SANTA CLARA COUNTY LOP
LOC_CASE_NUMBER: 05S2W31J03s
FILE_LOCATION: Stored electronically as an E-file
POTENTIAL_CONTAMINANTS_OF_CONCERN: Arsenic, Lead, Waste Oil / Motor / Hydraulic / Lubricating
POTENTIAL_MEDIA_AFFECTED: Other Groundwater (uses other than drinking water), Soil
SITE_HISTORY: The site is bounded by Geng Road to the east, a parking lot to the north, a baseball field to the west and a commercial building complex to the south. Site was previously used as a maintenance area for refuse and recyclable collection vehicles and collection bins. Lease terminated in 2009 and facility closure was performed. During closure process, diesel AST, waste oil UST and oil/water separator were removed. Soil samples reported elevated concentrations of arsenic, lead, molybdenum, zinc and petroleum hydrocarbons (C10-C36). THERE IS A SITE MANAGEMENT PLAN THAT MUST BE FOLLOWED FOR THIS SITE. CONTAMINATION WAS LEFT IN PLACE UNTIL SUCH TIME AS THE SITE IS REDEVELOPED TO A MORE SENSITIVE LAND USE, SUCH AS PARK LAND.

LOC_CASE_NUMBER: 05S2W32E01f
FILE_LOCATION: Stored electronically as an E-file
POTENTIAL_CONTAMINANTS_OF_CONCERN: Aviation, Waste Oil / Motor / Hydraulic / Lubricating
POTENTIAL_MEDIA_AFFECTED: Other Groundwater (uses other than drinking water)
SITE_HISTORY: 1988 û In August, 3 underground storage tanks (USTs) were removed from the site. The USTs had been used to store gasoline and then waste oil. 2 soil samples (MA1 and MA2) were collected from the sidewall of the excavations at 4 feet below the ground surface (ft bgs). These samples were reported to have maximum concentrations of 990 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg), 4,300 ppm TPH as Oil (TPHo), 5,700 ppm Total Oil and Grease (TOG), 400 ppm Stoddard Solvent (does not match chromatographic pattern), 0.9 ppm Benzene, 3.4 ppm Toluene, 1.7 ppm Ethylbenzene, 11 ppm Xylenes, and 0.035 ppm Acetone. The third tank (2,000-gallon) was not removed right away due to elevated flammable vapors. The tank was not removed until February 1989. Floating product was noted to be present on the groundwater in the excavation. The excavation was pumped out and stored in a tank onsite. Groundwater was encountered during tank removal at 5 ft bgs. A grab groundwater sample was collected and reported to contain 380,000 parts per billion (ppb) TPHg, 260,000 ppb TPHd, 410,000 ppb TPHo, 520,000 ppb TOG, 350 ppb Benzene, 240 ppb Toluene, 230 ppb Ethylbenzene, and 440 ppb Xylenes. 10 soil borings (B1 through B10) were advanced to 3.5 ft bgs. Soil samples were screened using a Photo-ionization detector (PID). It was not reported that soil samples collected during this investigation were submitted for laboratory analysis. 8 soil borings (B11 through B18) were advanced to 5-7 ft bgs. Grab groundwater samples were collected from borings B11 through B14; groundwater was not encountered in the other borings. The samples were noted to have a petroleum hydrocarbon odor and sheen. It was not reported that soil or groundwater samples collected during this investigation were submitted for laboratory analysis. 3 monitoring wells (MW1 through MW3) were installed to 13.5-13.75 ft bgs. Grab groundwater samples were collected from these new wells and reported to contain maximum concentrations of 630 ppb TPHg, 270 ppb TPHd, 4,200 ppb TOG, 13 ppb Benzene, 18 ppb Toluene, 2 ppb Ethylbenzene, and 7 ppb Xylenes. 1989 û In February, the third tank was removed. 1990 û In January, 3 soil borings (SB1 through SB3) were advanced to 3 ft bgs. 3 soil samples were collected and reported to contain maximum concentrations of 590 ppm TPHg, 61 ppm TPH as Mineral Spirits (TPHms), 9.6 ppm Benzene, 0.9 ppm Ethylbenzene, 3.5 ppm Xylenes, and 6.8 ppm Lead. 15 CPT borings were advanced to 12 ft bgs for the collection of groundwater samples. The site is underlain by Bay Mud, which has very low permeability. Sufficient groundwater for sampling was only present in borings CPT1, CPT4, CPT5, CPT11, CPT14 and CPT15. Grab groundwater samples were reported to contain maximum concentrations of 1,700 ppb TPHg, 1,400 ppb TOG, 270 ppb TPHms, 110 ppb TPHd, 8 ppb Ethylbenzene, and 0.039 ppb Lead. Benzene was not reported to be present in any of the samples analyzed. Also around this time, depth to water readings were taken in the monitoring wells at different times relative to the preceding low tides and it was concluded that the effect of tidal fluctuations on groundwater elevations and flow direction at the site is negligible. In July, 4 monitoring wells (MW4 through MW7) were installed on and offsite to 14.5 ft bgs. It was not reported that soil samples were submitted for laboratory analysis. The new wells were incorporated into the groundwater monitoring program. In November, 3 monitoring wells (MW8 through MW10) were installed offsite to 14.5 ft bgs. It was not reported that soil samples were submitted for laboratory analysis. The new wells were incorporated into the groundwater monitoring program. 1991 û In October, 2 monitoring wells (MW11 and MW12) were installed adjacent to the former UST excavation. MW12 was installed as a deeper well to approximately 35 ft bgs. The initial sampling of well MW12 reported l

POTENTIAL_CONTAMINANTS_OF_CONCERN: Tetrachloroethylene (PCE)
POTENTIAL_MEDIA_AFFECTED: Other Groundwater (uses other than drinking water), Soil
SITE_HISTORY: Dry cleaners have operated on this site from at least 1965 to late 2011. The last dry cleaner did not perform dry cleaning onsite from aroun 1998. The site has been vacant since January 2012. Redevelopment plans have been filed with the City for commercial development onsite. Phase II investigations have found soil and groundwater impacted with PCE at the site. Excavated PCE impacted soil above the groundwater. 2013 - 3 groundwater monitoring wells were installed.

FUDS-US
Formerly Used Defense Sites

Description: The Department of Defense (DoD) is responsible for environmental restoration of properties that were formerly owned by, leased to or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense. Such properties are known as Formerly Used Defense Sites (FUDS). The Army is the executive agent for the program and the U.S. Army Corps of Engineers manages and directs the program's administration. The scope and magnitude of the FUDS program are significant, with more than 9,900 properties identified for potential inclusion in the program. Information about the origin and extent of contamination, land transfer issues, past and present property ownership, and program policies must be evaluated before DoD considers a property eligible for Defense Environment Restoration Account (DERA) funding under the FUDS program. Environmental cleanup procedures at FUDS are similar to those at active DoD installations.

Hist-Agriculture

Historic Sources US: Ranches/Farms, Livestock/Agriculture

Description: ERS has compiled proprietary lists of MILLIONS of records dating back to the 1800's that have shown up in historic resources and based on their classification, may have used hazardous materials or petroleum products. This listing includes sites such as: Ranches, Farms, Livestock, and/or Agriculture. This classification covers establishments primarily engaged in the production or feeding of beef cattle, except feedlots. Establishments also included are engaged in the production of cows' milk and other dairy products and in raising dairy heifer replacements. Such farms may process and bottle milk on the farm and sell at wholesale or retail. This category also includes establishments primarily engaged in the production of animal specialties, not elsewhere classified, such as pets, bees, worms, and laboratory animals. Furthermore, this industry includes establishments primarily engaged in the production of cash grains, not elsewhere classified. Primary cash grains in this classification include dry field and seed peas and beans, safflowers, sunflowers, and popcorn.

Hist-CA

Previously Listed California Sites

Description: ERS has compiled records that have been previously listed in other agency databases. When ERS updates an agency database, if there is a record that was in the older version but the record is not found in the newer version, it is put into this database. The site may have been completely removed, or there was a significant change in the record such as Name, ID, or Address. The information from the old listing is preserved in this database along with which database it was originally in, It is also possible that it was moved from one database to another such as a LUST Open site receiving closure and now being listed in the LUST Closed database.

Hist-Chemical Manufacturing

Historic Sources US: Manufacturing and Distribution of Chemicals, Gases, and/or Solids

Description: ERS has compiled proprietary lists of MILLIONS of records dating back to the 1800's that have shown up in historic resources and based on their classification, may have used hazardous materials or petroleum products. This listing includes sites such as: Manufacturing and Distribution of Chemicals, Gases, and/or Solids. This industry classification includes establishments engaged in manufacturing alkalies and chlorine. Examples of products include compressed or liquefied chlorine, sodium or potassium hydroxide, sodium bicarbonate, and soda ash (not produced at mines). Manufacturing of industrial gases (organic as well as inorganic) that may be sold in compressed, liquid, or solid form. Industrial gases include acetylene, argon, carbon dioxide, helium, hydrogen, neon, nitrogen, nitrous oxide, and oxygen. Also, manufacturing industrial inorganic chemicals not elsewhere classified. A few examples are alum, ammonium compounds (except for fertilizer), industrial bleaches (sodium or calcium hypochlorite), chemical catalysts, hydrazine, hydrochloric acid, hydrogen peroxide, inorganic sodium compounds, and sulfuric acid. Other chemicals, not elsewhere classified, such as, fatty acids, essential oils, gelatin (except vegetable), sizes, bluing, laundry sours, writing and stamp pad ink, industrial compounds, such as boiler and heat insulating compounds, metal, oil, and water treating compounds, waterproofing compounds, and chemical supplies for foundries. This category also includes manufacturing various resins and plastics for sale to other industries that create plastic sheets, rods, films, and other products. The category also includes synthetic rubber, soap and detergents, rayon and acetate fibers. Furthermore, this category includes industrial and household adhesives, glues, caulking compounds, sealants, and linoleum, tile, rubber cements from vegetable, hardwood and softwood distillation products, natural dyes, tanning materials, and related products

Hist-Cleaners
Historic Sources US: Laundry, Cleaners, and Dry Cleaning Services
Description: ERS has compiled proprietary lists of MILLIONS of records dating back to the 1800's that have shown up in historic resources and based on their classification, may have used hazardous materials or petroleum products. This listing includes sites, such as: Laundry, Cleaners, and Dry Cleaning Services. This category includes firms that primarily operate mechanical laundries powered with steam or other means, offer services, such as, dry cleaning or dyeing apparel, household fabrics, cleaning carpets and upholstered furniture, repair, alteration, and storage of clothes for individuals. Also, these establishments may provide laundered or dry-cleaned services to industrial, commercial, and government users. This category also includes establishments that primarily serve as agents for launderers and drycleaners. Furthermore, this category also includes businesses that primarily supply or rent to commercial establishments or household users the following laundered items: uniforms, gowns, and coats used by doctors, nurses, barbers, beauticians, and waitresses; table linens, bed linens, towels and toweling; and similar various items.

RCRA-COR-US

Resource Conservation and Recovery Act - Corrective Actions

Description: The primary goals of RCRA are to: Protect human health and the environment from the potential hazards of waste disposal. Conserve energy and natural resources. Reduce the amount of waste generated. Ensure that wastes are managed in an environmentally sound manner.

EPA estimates that between 50 and 70 percent of all TSDFs have some degree of environmental contamination requiring detailed investigation and perhaps cleanup. Under a program entitled Corrective Action, EPA has the statutory authority to require permitted and interim status TSDFs to clean up hazardous waste contamination. This database contains a listing of sites that have had corrective action.

DISCLAIMER, LIMITS AND LIABILITIES

All of the data presented in this report was garnered from public information maintained by governmental agencies. ***Environmental Record Search (ERS)*** cannot ensure that the data, which has been entered and maintained by others, is complete or accurate. Any, and all omissions, errors, negligence, accidentally or otherwise within the data received by ***ERS*** is assumed to be caused by others and ***ERS*** cannot and does not assume, take, or acknowledge any liability whatsoever for data. The extrapolation of the mapped locations is based solely on the accuracy of the data provided by others. Prior to relying completely on any mapped location within this report, its accuracy should be verified using other means such as further documentation or a field visit. ***ERS*** makes no representation, warranty or guaranty, express or implied regarding the accuracy of the data entered and maintained by others or the suitability of this report for a certain task.

The data presented in this report should only be interpreted by an experienced environmental professional that completely understands the potential inaccuracy of the data, the possible existence of contaminated occurrences that have not been listed, and the possibility that the governmental database misrepresents the actual status of an occurrence. Prior to relying completely on any of the data within this report, an environmental professional should verify the accuracy of the information presented.

It is important that the reader and/or end user of this information realize that the data gathered has not been verified for accuracy or completeness in any way by ***ERS***. As much as possible, the data is presented unchanged to represent the actual data produced by these agencies.

ERS does however stand behind its representation of the data, any manually plotted occurrences, and all other items directly under its control. This report does comply (as far as the data is reasonably ascertainable as outlined in both the following standards) with section 8.2.1 of ASTM 1527-05 – Standard Environmental Record Sources and EPA's 40 CFR Part 312, All Appropriate Inquiries. ***ERS*** does ensure that the data is accurately reproduced from the original source. ***ERS*** backs the reporting of the data with $2,000,000 of insurance.

The ***ERS*** logo, name, report design, presentation, maps, tables, etc., are the exclusive property of ***ERS*** and its parent company and affiliates. Except as provided below, information or images contained in this report may not be reproduced or distributed in whole or in part by any means without the prior written permission from ***ERS.*** United States and international copyright laws protect any and all reports produced by ***ERS***.

The person or entity that purchased this report may make up to five (5) copies of the entire report or any part of it for archival purposes or to include as part of another report. All copyright information must remain intact and not be modified in any way.

INTERVIEW NOTES And/Or
CONVERSATION RECORD

INTERVIEWEE: Ron Burton

DATE: January 10, 2013

PROJECT #: 7555

COMPANY/AGENCY: Carlsen Audi

TITLE: General Manager

INTERVIEWER: Nadine Kieselbach

PHONE #: 650 856-6300

NOTES: Mr. Burton has been associated with the subject site since 1991, and prior to 1991 he worked part time at the facility. According to Mr. Burton, the original in ground hydraulic lifts (14-16 lifts) that were installed in the service area when the building was constructed (~1969) utilized vegetable based hydraulic fluids in their operations. From approximately 1990 through 2008, the original lifts were removed; there area fourteen capped areas in the vehicle servicing area that were the former locations of the lifts. In the car wash room there are no floor drains, only the sump/clarifier unit. The unit is sampled either monthly or quarterly for metals. Once or twice a year the metal count level will exceed the allowable levels. The manifest from Fremont Environmental, dated June 6, 2013, for a 55-gallon drum of contaminated soil, is actually for the used absorbent for leakage from vehicles in the service area. The lift (hoist) in the former dynamometer room is at least 10 years old.

PRELIMINARY REPORT FORM

Prelim Number:

Issued By:

Fidelity National Title Company

FSBC-TO13000080

In response to the application for a policy of title insurance referenced herein, **Fidelity National Title Company** hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(ies) of title insurance to be issued hereunder will be policy(ies) of Fidelity National Title Insurance Company, a California corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

   The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

9. The requirement that there be filed in the office of the Secretary of State a certificate of limited partnership for Carrera PRB Company, a California limited partnership , in compliance with the provisions of the California Revised Limited Partnership Act, Section 15611 et. seq., Corporations Code and that a copy of said certificate certified by the Secretary of State be recorded in the office of the County Recorder of Santa Clara County.

   Vestee: Carrera PRB Company, a California limited partnership
   or
   Buyer:

10. Any rights of the parties in possession of a portion of, or all of, said land, which rights are not disclosed by the public record.

    This Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage. The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

11. Any easements not disclosed by those public records which impart constructive notice as to matters affecting title to real property and which are not visible and apparent from an inspection of the surface of said land.

12. This transaction requires high liability approval prior to close of escrow together with an inspection of the subject property.

    Please advise title department with an estimated date that your transaction will close so we can schedule the necessary approvals and inspections.

13. The Company will require that an Owner's Affidavit be completed by the party(s) named below before the issuance of any policy of title insurance.

    Party(ies): Carrera PRB Company, California limited partnership

    The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit.

END OF EXCEPTIONS

NOTES

1. Note: The current owner does NOT qualify for the $20.00 discount pursuant to the coordinated stipulated judgments entered in actions filed by both the Attorney General and private class action plaintiffs, for the herein described Land.

2. Note: The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land Commercial Property, known as 1730 Embarcadero Road, Palo Alto, California , to an Extended Coverage Loan Policy.

3. Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.
4. Note: The City of Palo Alto imposes a transfer tax of $3.30 per thousand, based on the full value of the property at the time a deed or other transfer is recorded. This is in addition to the $1.10 per thousand County transfer tax.

5. If a county recorder, title insurance company, escrow company, real estate broker, real estate agent or association provides a copy of a declaration, governing document or deed to any person, California law requires that the document provided shall include a statement regarding any unlawful restrictions. Said statement is to be in at least 14-point bold face type and may be stamped on the first page of any document provided or included as a cover page attached to the requested document. Should a party to this transaction request a copy of any document reported herein that fits this category, the statement is to be included in the manner described.

6. Any documents being executed in conjunction with this transaction must be signed in the presence of an authorized Company employee, an authorized employee of an agent, an authorized employee of the insured lender, or by using Bancserv or other approved third-party service. If the above requirements cannot be met, please call the company at the number provided in this report.

7. Your application for title insurance was placed by reference to only a street address or tax identification number. Based on our records, we believe that the legal description in this report covers the parcel(s) of Land that you requested. If the legal description is incorrect, the seller/borrower must notify the Company and/or the settlement company in order to prevent errors and to be certain that the correct parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

END OF NOTES

PRIVACY STATEMENT

Effective Date: May 1, 2008

Order No.: FSBC-TO13000080

Fidelity National Financial, Inc. and its subsidiaries ("FNF") respect the privacy and security of your non-public personal information ("Personal Information") and protecting your Personal Information is one of our top priorities. This Privacy Statement explains FNF's privacy practices, including how we use the Personal Information we receive from you and from other specified sources, and to whom it may be disclosed. FNF follows the privacy practices described in this Privacy Statement and, depending on the business performed, FNF companies may share information as described herein.

PERSONAL INFORMATION COLLECTED

We may collect Personal Information about you from the following sources:

- Information we receive from you on applications or other forms, such as your name, address, social security number, tax identification number, asset information, and income information;
- Information we receive from you through our Internet websites, such as your name, address, email address, Internet Protocol address, the website links you used to get to our websites, and your activity while using or reviewing our websites;
- Information about your transactions with or services performed by us, our affiliates, or others, such as information concerning your policy, premiums, payment history, information about your home or other real property, information from lenders and other third parties involved in such transaction, account balances, and credit card information; and
- Information we receive from consumer or other reporting agencies and publicly recorded documents.

DISCLOSURE OF PERSONAL INFORMATION

We may provide your Personal Information (excluding information we receive from consumer or other credit reporting agencies) to various individuals and companies, as permitted by law, without obtaining your prior authorization. Such laws do not allow consumers to restrict these disclosures. Disclosures may include, without limitation, the following:

- To insurance agents, brokers, representatives, support organizations, or others to provide you with services you have requested, and to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure in connection with an insurance transaction;
- To third-party contractors or service providers for the purpose of determining your eligibility for an insurance benefit or payment and/or providing you with services you have requested;
- To an insurance regulatory authority, or a law enforcement or other governmental authority, in a civil action, in connection with a subpoena or a governmental investigation;
- To companies that perform marketing services on our behalf or to other financial institutions with which we have joint marketing agreements and/or
- To lenders, lien holders, judgment creditors, or other parties claiming an encumbrance or an interest in title whose claim or interest must be determined, settled, paid or released prior to a title or escrow closing.

Effective Date: May 1, 2008
(continued)

We may also disclose your Personal Information to others when we believe, in good faith, that such disclosure is reasonably necessary to comply with the law or to protect the safety of our customers, employees, or property and/or to comply with a judicial proceeding, court order or legal process.

Disclosure to Affiliated Companies:
We are permitted by law to share your name, address and facts about your transaction with other FNF companies, such as insurance companies, agents, and other real estate service providers to provide you with services you have requested, for marketing or product development research, or to market products or services to you. We do not, however, disclose information we collect from consumer or credit reporting agencies with our affiliates or others without your consent, in conformity with applicable law, unless such disclosure is otherwise permitted by law.

Disclosure to Nonaffiliated Third Parties:
We do not disclose Personal Information about our customers or former customers to nonaffiliated third parties, except as outlined herein or as otherwise permitted by law.

CONFIDENTIALITY AND SECURITY OF PERSONAL INFORMATION

We restrict access to Personal Information about you to those employees who need to know that information to provide products or services to you. We maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard Personal Information.

ACCESS TO PERSONAL INFORMATION / REQUESTS FOR CORRECTION, AMENDMENT, OR DELETION OF PERSONAL INFORMATION

As required by applicable law, we will afford you the right to access your Personal Information, under certain circumstances to find out to whom your Personal Information has been disclosed, and request correction or deletion of your Personal Information. However, FNF's current policy is to maintain customers' Personal Information for no less than your state's required record retention requirements for the purpose of handling future coverage claims.

For your protection, all requests made under this section must be in writing and must include your notarized signature to establish your identity. Where permitted by law, we may charge a reasonable fee to cover the costs incurred in responding to such requests. Please send requests to:

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE POLICY - 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.

3. Defects, liens, encumbrances, adverse claims, or other matters:

   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;

   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;

   (c) resulting in no loss or damage to the insured claimant;

   (d) attaching or created subsequent to Date of Policy; or

   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.

4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.

5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.

6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.

2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.

3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.

4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.

6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$5,000.00

AMERICAN LAND TITLE ASSOCIATION
RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)

EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   - land use
   - improvements on the land
   - land division
   - environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at policy date.

   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   - a notice of exercising the right appears in the public records on the Policy Date
   - the taking happened prior to the Policy Date and is binding on you if you bought the land without knowledge of the taking
3. Title Risks:
   - that are created, allowed, or agreed to by you
   - that are known to you, but not to us, on the Policy Date-unless they appeared in the public records
   - that result in no loss to you
   - that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
   - to any land outside the area specifically described and referred to in Item 3 of Schedule A

   or
   - in streets, alleys, or waterways that touch your land

   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

USED OIL, USED ANTIFREEZE AND OILY WATER WASTE STREAMS ARE RECYCLED AT OUR SISTER COMPANY DEMENNO/KERDOON THE LARGEST RECYCLER OF USED OIL IN THE WESTERN UNITED STATES.

*I HEREBY CERTIFY THAT I HAVE NOT MIXED THIS WASTE WITH ANY OTHER WASTE, THAT THE TOTAL HALIDES ARE LESS THAN 1000 P.P.M.; AND THAT THE WASTE DOES NOT CONTAIN ANY P.C.B'S..

*I FURTHER AGREE TO ACCEPT THE ADDITIONAL CHARGES FOR LEGAL DISPOSAL IF THIS WASTE IS OVER 1000 P.P.M. TOTAL HALIDES OR CONTAINS ANY P.C.B'S.

This is to certify that the above named articles are properly classified, described, packaged, marked and labeled, and are in proper condition for transportation, according to the applicable regulations of the Department of Transportation.

GENERATOR WASTE CERTIFICATION
PLEASE CHECK THE APPROPRIATE BOX

This is to certify that the waste described above is properly classified, described, packaged, marked and labeled, and is in proper condition for transportation, according to applicable State and federal regulations. By signing below I also hereby certify that:

(Waste oil generator/customer MUST check ONE of the following three boxes)

☐ #1) I have not mixed any of the waste described above with any other hazardous waste, the total halide content is LESS than 1,000 ppm, and the waste does not contain any PCBs. I have complied with the requirements of the applicable California used oil management regulations to determine this is true. I agree to accept the additional charges for the disposal of this waste if the information I have provided about this waste is incorrect

☐ #2) I have not mixed any of the waste described above with any other hazardous waste, the total halide content is GREATER than 1,000 ppm, and the waste does not contain any PCBs. I have provided proper documentation to Asbury Environmental Services to rebut the presumption that this waste was mixed with other hazardous waste. I agree to accept the additional charges for the disposal of this waste if the information I have provided about this waste is incorrect

☐ #3) This waste is from a tank which collects waste oil from household "do-it-yourself" (DIY) and/or conditionally exempt small quantity generator (CESQG) sources. To the best of my knowledge, the only waste oil contained in my DIY/ CESQG collection tank is soley from DIY and/or CESQG sources. I have not mixed this waste oil with any other hazardous waste or waste oil from other sources. I agree to accept the additional charges for disposal of this waste if the information I have provided about this waste is incorrect

(All generators/customers MUST read the following text and check the associated box.)

☐ #4) If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human life and the environment; Or, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me that I can afford.

ERIC D. KIESELBACH
President and CEO

Education

B.S. Environmental Resource Sciences: University of California, Davis, 1986
Emphasis: Water Sciences, Environmental Toxicology, Soil Sciences

Hazardous Waste Certificate Program: University of California, Davis
Additional classes in: Risk Assessment, Hazmat, Advanced Hazmat, Environmental Regulations, SARA Compliance

Licenses

- California State Registered Assessor, REA #02881
- Building Inspector #1607
- Management Planner #1680
- Project Designer #1839
- Contract Supervisor #2276
- California General Contractor, Retired #372431

Special Qualifications

Mr. Kieselbach qualifies as an "Environmental Professional" in accordance with the US EPA's AAI (All Appropriate Inquires) 40 C.F.R. § 312.22. Mr. Kieselbach has performed numerous site investigation, assessment, and remediation of major commercial and industrial properties — in particular, large manufacturing plants requiring major remediation. Extensive knowledge of biotreatment of hydrocarbon-contaminated soils using engineered and endemic microbes. Designed, organized, and taught 40-hour SARA training program. Familiar with CFR 29, 40, and 49, SARA, CERCLA, TOSCA, RCRA, TITLE 22, Luft Manual. Significant general contractor experience, knowledgeable in all phases of commercial construction. Extensive experience in design, construction, and operation of all types and phases of remedial treatment systems.

Summary of Experience

1991 - Phase One, Inc., Tustin, California - Current

As President and Chief Executive Officer, Mr. Kieselbach oversees the entire environmental due diligence business conducted by Phase One, Inc., including orchestrating its rapid growth and success.

12 years - EDK Construction, Sacramento, California

Mr. Kieselbach owned, as general contractor, and operated this company which constructed numerous custom homes, commercial and apartment projects. He managed and oversaw multi-million dollar projects with profitable results.

3 years - U.S. Geological Survey, California

As a Hydrogeological Technician, Mr. Kieselbach performed soil and groundwater sampling, helped set up and design soil testing and soils laboratory, and helped write procedures and perform field tests using sophisticated electronic equipment.

5 years - Exceltech Inc., a full-service environmental company, Irvine, California

As an officer and Vice President, Mr. Kieselbach ran the Southern California operations for Exceltech Inc., which included the Geoscience, Engineering, Remediation, and ACT (Assessments, Compliance, and Training) Departments. He undertook major work for such companies as Shell Oil, Conoco, and Kaiser Aluminum. He was also corporate safety officer for four of the five years.

ERIC EXTON
Operations Manager

Education

Numerous college courses focusing on science, computers, and business including: biology, micro-biology, environmental biology, chemistry, statistics, anatomy and physiology, programming in BASIC, Programming in C, programming in Pascal, advanced data structures, database programming, accounting and business law.

Licenses and Certifications

- California State Registered Assessor, REA I #08334
- State of California, Department of Health Services, Lead Related Construction Certificate, Inspector/Assessor ID#17704
- Certification in Mold Inspection & Sampling
- Microsoft Certified Systems Engineer (MCSE) #44842
- Microsoft Certified Professional in Microsoft Windows, Windows NT, Networking, SQL Server Administration, and SQL Server Implementation

Special Qualifications

Mr. Exton qualifies as an "Environmental Professional" in accordance with the US EPA's AAI (All Appropriate Inquires) 40 C.F.R. § 312.22. Mr. Exton has extensive experience in managing and supervising technical and administrative staff as well as in managing remote offices. Mr. Exton has also managed large, multi-site projects that have encompassed sites in multiple states. He has been involved with Phase II projects, prepared site characterization plans, and has worked in unison with governmental agencies and clients to achieve closure for contaminated properties. He has overseen soil cleanups and the installation of ground monitoring wells. In addition, he is an expert in computer programming, networking, databases, and systems administration.

Summary of Experiences

1992 – Phase One, Inc., Tustin, California – Current

Mr. Exton has written, researched, or performed the fieldwork for thousands of Phase I Environmental Site Assessments for various types of properties including manufacturing facilities, automotive repair facilities, and agricultural properties. In addition, he is the company's expert in the Federal Communications Commission's (FCC) responsibilities under the National Environmental Policy Act (NEPA). He has consulted on hundreds of NEPA compliance projects for various telecommunications companies. He has also consulted on NEPA compliance for several Department of Housing and Urban Development's (HUD) redevelopment projects as well as CEQA projects. He has made determinations and received concurrence from the State Historical Preservation Officer (SHPO) of many states for hundreds of Section 106 compliance projects. Mr. Exton has also managed special projects including Native American consultation, endangered species mitigation, consultation with the US Fish and Wildlife Service, wetlands surveys, flood plain hydrology studies, and archaeological testing. His archaeological projects have included the discovery of human remains. Mr. Exton has also written the majority of custom software utilized by Phase One, Inc; this software has increased the company's productivity and has improved the quality of reports compiled.

1 year – Valmer, Inc., Palo Alto, California

Mr. Exton managed and supported the computers and network for Valmer, Inc., a computer software company. He also managed the technical support of the company's contact management software, wrote several utilities to import data from other contact management and database programs, and merged data into popular word processing and fax programs.

SELECTED DEFINITIONS

ASPIS - This database lists potentially hazardous waste sites identified by the Historical Abandoned site Survey Program.

CERCLIS - The Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) is commonly referred to as "Superfund". The United States Environmental Protection Agency maintains a database referred to as "CERCLIS", which is used by the EPA to track activities conducted under its Superfund Program.

Sites which come to EPA's attention that may have a potential for releasing hazardous substances into the environment are added to the CERCLIS inventory. EPA learns of these sites in various ways. Examples include notification by the owner, citizen complaints, state and local government identification, and as a result of other EPA investigations.

NPL - The United States Environmental Protection Agency (EPA) maintains a National Priorities List (NPL) under the Comprehensive Environmental Response and Liability Act of 1980 (CERCLA), 42 U.S.C. Section 9601 (1985). Sites which have previously been designated on the CERCLIS List are evaluated by the EPA and ranked according to potential risk to human health and the environmental. Those CERCLIS sites which present the greatest risk are added to the NPL, which qualifies them to receive remedial funding Through CERCLA.

RCRA - The following list has been compiled from a search of the RCRA data base list for generators (gen), transporters (trans), and treatment storage disposal facilities (TSDF) of hazardous materials. All generators of waste material are required by the Department of Health Services to have hazardous material removed from the site every sixty days. The list is generally representative of the type of businesses in the region surrounding the subject property.

REPORT SIGNATURE SHEET AND CERTIFICATION

The undersigned hereby certifies that:

The following people have prepared, written, and/or reviewed the Phase I Environmental Assessment Report. All the below parties have, in good faith, conducted their respective project responsibilities using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar fields.

All parties have acted in good faith and have no known relationship with the subject site, owners, buyers, or any other entity associated with the subject site. All respective project responsibilities have been conducted independently, and with no conflict of interest.

The statements of fact contained in this report are true and correct based on materials reviewed.

The reported analyses, opinions, and conclusions are personal, unbiased, professional, and limited only by the assumptions and qualifications stated herein. Compensation is not contingent upon an action or an event resulting from the analyses, opinions, or conclusions included in this report. Nor is it contingent upon the use of this report.

The investigation has been performed in accordance with all applicable legal requirements and in accordance with accepted practices prevailing in the environmental assessment and asbestos consulting industries. The personnel who performed the investigation are properly licensed and certified in accordance with the requirements of all federal, state, and local laws, rules, and regulations.

I/We declare that, to the best of our professional knowledge and belief, I/we meet the definition of Environmental Professional as defined in §312.10 of this part.

I/We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I/We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

We have no present or prospective interest in the subject property or the parties involved.

If necessary, expert testimony and other legal appearances will be provided for a reasonable fee to be arranged.

RE: ***PHASE ONE* INC. Project No. 7575**
Limited Phase II Environmental Site Assessment (ESA)
Subject Site Location: 1730 Embarcadero Road, Palo Alto, California 94303

Dear Mr. Hays:

Enclosed is the Limited Phase II ESA Report completed by ***PHASE ONE* INC.** for the site referenced above (See Figure 1, ***Site Location Map***). The Limited Phase II ESA was undertaken at your request, in accordance with ***PHASE ONE* INC.**'s ***Standard Terms and Conditions*** and as outlined in ***PHASE ONE* INC.**'s ***Letters of Intent/Authorization*** for Project **Nº**7575.

The findings and conclusions of this investigation are based upon the observations of ***PHASE ONE* INC.**'s field personnel and the soil sampling analytical results reported by the contracted analytical laboratory. Our conclusions regarding the investigation are summarized in the final section of this report, ***Section 5.0 Conclusions and Recommendations.***

Please do not hesitate to contact us should you have any questions regarding this report, or if we can be of additional assistance.

Sincerely,

Eric Kieselbach
President

1.0 BACKGROUND INFORMATION

This report presents the results of the Limited Phase II ESA conducted by ***PHASE ONE* INC.** at 1730 Embarcadero Road, Palo Alto, California, 94303 (See **Figure 1**, ***Site Location Map***). This Limited Phase II ESA was undertaken at the request of Tim Hays, Kuni Automotive Group, in accordance with ***PHASE ONE* INC.**'s ***Standard Terms and Conditions***, as outlined in ***PHASE ONE* INC.**'s ***Letter of Intent/Authorization*** for Project **Nº** 7575.

At the time of this assessment, the site specifics are as follows:

- **Address**: 1730 Embarcadero Road, Palo Alto, California 94303
- **Acres**: 2.283
- **Improvements:** Building with car showroom, offices, service area; asphalt paved car sales lot
- **Current Site Use:** Car dealership
- **Proposed Site Use**: Car dealership
- **Site Contact**: Lawrence Strong

The proposed field investigation, soil sample locations, and analyses were determined based on the conclusions and recommendations included in ***PHASE ONE* INC.**'s Phase I Environmental Site Assessment Report, Project No. 7555, dated January 27, 2014. The conclusions and recommendations of the Phase I ESA are as follows:

babate@holmanauto.com

ITEMS OF RECOGNIZED ENVIRONMENTAL CONDITION

Condition #	Location Description	Description of Recognized Environmental Condition	Level of Condition
1	Vehicle Washroom West Side of Building Southern Side of Building	DESCRIPTION OF CONDITION: According to reviewed historical resources and current site inspection, the site has been utilized for a car dealership with vehicle repair/servicing for at least 40± years. In their operations, automotive-related hazardous materials (oils, solvents, anti-freeze, etc.) have been utilized for this period of time. There is an interior washroom area for washing vehicles located on the southwestern corner of the servicing building. In the wash room is a sump/clarifier unit that is utilized to collect wash water from the vehicle washing operations. During the site reconnaissance, the clarifier unit/sump was not visible. Wash water was settled over the unit preventing a visual inspection. The integrity of the sump/oil trap's walls, base, and associated piping could not be observed, and the unit has been plugged up in the past. Due to the age of this unit, the subsurface may have been impacted by possible seepage/leakages from this unit with automotive related chemicals of concern. In addition, several areas of asphalt surfaces have been impacted with spillage/leakage of oils and other automotive fluids. Staining was observed on the asphalt areas on the covered west side of the building next to the aboveground new oil tank. The drain grate cover had oil staining and the asphalt areas below and next to the compressors had significant staining, and some of the surface areas had cracks. Staining was also observed on the asphalt area below the plastic aboveground tank containing waste anti-freeze in the hazardous materials storage area on the southern side of the building. It is unknown if the subsurface has been impacted with these spills or releases in these areas. ACTION SUGGESTED: Contact ***PHASE ONE*** **INC.** or another consultant to sample the subsurface in the location of the sump and stained areas to determine if there has been any impact to the subsurface soils. Remove and properly dispose of any soils which may have been impacted. Soils and other materials contaminated with hazardous materials are considered hazardous waste and must be disposed of in accordance with federal, state, and local regulations.	REC*

REC=Recognized Environmental Condition

2.0 PROPOSED FIELD INVESTIGATION

Copyright 2014 ***PHASE ONE*** **INC.** All Rights Reserved

Drill up to **six (6)** hand auger borings to a maximum depth of **6 (six)** feet below ground surface (bgs). Soil and groundwater samples will be collected. Sample collection, analysis, and boring depths are as follows:

Area	Washroom Clarifier/Sump (One boring each end)	Hazardous Waste Storage Area South Side of Building	New Oil AST Area and Compressor Area West Side of Building
# of Borings	2	2	2
Depth of Borings (feet)	4', 6'	4', 6'	4', 6'
Water Sample Depths (feet)	4' to 6'	4' to 6'	4' to 6'
# of Water Samples	2	2	2
Soil Sample Depths (feet)	1' and 4'	1' and 4'	1' and 4'
# of Soil Samples	4	4	4
Analysis	All soil and water samples for EPA 8015M TPH Oils and EPA 8260B for VOCs All water samples for EPA 7000 Series for CAM Metals	All soil and water samples for EPA 8015M TPH Oils and EPA 8260B for VOCs Highest water sample result for EPA 7000 Series for CAM Metals and SVOCs 8270C	All soil and water samples for EPA 8015M TPH Oils and EPA 8260B for VOCs; Highest water sample result for EPA 7000 Series for CAM Metals

TPH Total Petroleum Hydrocarbons
VOC Volatile Organic Compounds
SVOC Semi-Volatile Organic Compounds

Up to **eighteen (18)** soil and groundwater samples will be collected and may be analyzed in accordance with one of the following analysis: United States Environmental Protection Agency (EPA)-EPA 8015M TPH Oils, EPA 8260B for VOCs, and EPA 7000 Series for CAM Metals.

All borings/probes will be backfilled with cuttings, bentonite or as local jurisdictions require; holes in the surface will be repaved with concrete/asphalt.

3.0 ACTUAL FIELD INVESTIGATION

On February 11, 2014, ***PHASE ONE*** **INC.** completed **six (6)** hand-auger soil borings at the subject site. The soil borings were identified as **GP-1** through **GP-6**. The locations of the soil borings are shown on **Figure 2,** ***Site Plan***. Details of the actual soil borings are as follows:

BORING DETAILS

Boring ID#	Total Depth (FT)	Sample Depths (FT)	Analyses Run	Location Description (See Figure 2, *Site Plan*)
GP-1	9.5	1, 4, 7, 9.5	EPA 8015 (Diesel) EPA 8015M (Carbon Chain) EPA 8260B (VOCs & Oxygenates)	Car Washroom North end, adjacent to the Clarifier/Sump
GP-2	1	1	EPA 8015 (Diesel)	Car Washroom South end, adjacent to the Clarifier/Sump
GP-3	1	1	EPA 8015 (Diesel)	New Oil AST Area and Compressor

Copyright 2014 ***PHASE ONE*** **INC.** All Rights Reserved

Boring ID#	Total Depth (FT)	Sample Depths (FT)	Analyses Run	Location Description (See Figure 2, *Site Plan*)
				West Side of the Building (~10 feet south of the north wall and ~3 feet east of the west wall)
GP-4	1	0	None	New Oil AST Area and Compressor West Side of the Building (~15 feet south of the north wall and ~3 feet east of the west wall)
GP-5	10	1, 4, 10	EPA 8015 (Diesel) EPA 8015M (Carbon Chain) EPA 8260B (VOCs & Oxygenates)	Hazardous Waste Storage Area South Side of the Building (~14 feet south of the building just off of the SEC of storage shed)
GP-6	3	1, 3	EPA 8015 (Diesel) EPA 8260B (VOCs & Oxygenates)	Hazardous Waste Storage Area South Side of the Building (~5 feet south of the building, adjacent to the waste AST oil tank)
TOTAL SAMPLES		11		

For the investigated areas and the soil boring locations, see **Figure 2**, ***Site Plan***. All soil samples were collected following the sampling protocol included in **Appendix A, *Sampling Protocol*.**

The proposed Scope of Work detailed in Section 2.0 was not completed as outlined. The following are the deviations from the original Scope of Work:

- In Borings GP-1 and GP-5, the maximum depth of the borings was increased to 9.5 and 10 feet respectively instead of 6 feet below ground surface, as groundwater was not encountered at the 6 foot interval. Additional samples were collected.
- In Boring GP-2 auger refusal/obstruction was encountered just below the ground surface at the 1 foot interval. This obstruction appeared to be a large rock or pipe. A sample of boring materials was collected to verify field observations that did not reveal any potential contamination.
- In Boring GP-3 auger refusal/obstruction was encountered just below the ground surface at the 1 foot interval. The gravel backfill material (appeared to be from a sewer line nearby) was similar to GP-2 and field observations did not reveal any potential contamination. A sample was collected to confirm the field observations.
- In Boring GP-4, auger refusal/obstruction was encountered at 9-12 inches below ground; soil samples were not collected at this location. The gravel backfill material was similar to GP-3 and field observations did not reveal any potential contamination.
- In Boring GP-6, auger refusal/obstruction was encountered just below the 3 foot interval below ground surface. A sample of boring materials was collected to verify field observations that did not reveal any potential contamination.
- Several less soil samples were analyzed for VOCS instead of the proposed 12 soil samples and less soil samples were collected. This was due to auger refusal.
- No groundwater samples were collected; groundwater was not encountered at the maximum boring depth of 10 feet.

Copyright 2014 ***PHASE ONE*** **INC.** All Rights Reserved

4.0 FIELD INVESTIGATION RESULTS

4.1 Subsurface Conditions Encountered

The soils encountered at the subject site within the maximum explored depth of ten feet below ground surface (bgs) consisted of the following: 0-1.5' bgs fine to medium grained sand backfill materials, 1.5-6' bgs dark brown fine silty sand clay, 6-10' bgs gray very fine silty clay, tight and highly plastic. Groundwater was not encountered in any of the soil borings. The field personnel did not notice any unusual odors emanating from the soil samples. No other unusual conditions were noted during the field work. The Soil Boring Logs are on file at ***PHASE ONE* INC.**

4.2 Analytical Results

Copies of the final analytical reports are included in **Appendix C, *Analytical Laboratory Reports***. The principal findings of the analysis of the soil samples are presented in the table below. The table below titled "Summary of Analytical Results" comments on the results of the entire EPA analysis method. All the results of all the chemicals identified above Non-Detect (ND) are compared with their respective regulatory screening levels, (when applicable) such as the *United States Environmental Regional Screening Levels* (USEPA RSLs) or other applicable regulatory-designated levels.

SUMMARY OF ANALYTICAL RESULTS

Samples Collected February 11, 2014

5.0 CONCLUSIONS AND RECOMMENDATIONS

The principal findings of ***PHASE ONE*** **INC.**'s Limited Phase II ESA for all the areas sampled are as follows:

- No levels of TPH (USEPA Method 8015M Carbon Chain and/or Oil-Range) were detected that are a concern or exceed their respective reporting limits and/or any identified action levels.

- No levels of VOCs (USEPA Method 8260B) were detected that are a concern or exceed their respective reporting limits and/or any identified action levels.

Based on the soil sample results presented in this report, ***PHASE ONE*** **INC.** does not find evidence of contamination. Therefore, the current and previous uses appear to not have impacted the site in the areas sampled and further investigation is not recommended. Based on field observations from the boring installed at 10□ bgs, the entire site has soil that consists of very tight clays from the bottom of the backfill materials to 10□ bgs. Because of this, it is highly unlikely that any materials leaked to the subsurface would transport neither to the groundwater nor far from the source. This would limit the environmental exposure from any subsurface leak and/or spill.

PHASE ONE **INC.** attempted to assess the most likely potential sources of contamination; however, it is not possible or feasible to sample all the possible locations where impact from the previous land and/or site use may have occurred. Specific areas of impact may have escaped detection due to:

1) Unknown areas where releases or spills may have occurred,
2) Unknown areas of chemicals storage and handling,
3) Difficulty in accessing suspect locations, or
4) The limited extent of the assessments performed.

6.0 LIMITATIONS

To achieve the study objectives stated in this report, we were required to base ***PHASE ONE*** **INC.**'s conclusions and recommendations on the best information available during the period the investigation was conducted and within the limits prescribed by ***PHASE ONE*** **INC.**'s client in the contract/authorization agreement and standard terms and conditions.

PHASE ONE **INC.**'s professional services were performed using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar fields. The findings were mainly based upon examination of historic records, governmental agencies lists, and laboratory analytical reports. Recommendations are based on the historic land use of the subject property, as well as features noted during the site walk and Phase II assessment. The absence of potential gross contamination sources, historic or present, does not necessarily imply that the subject property is free of any contamination. This report only represents a "due diligence" effort as to the integrity of the subject property. No other warranty or guarantee, expressed or implied, is made as to the professional conclusions or recommendations contained in this report. The limitations contained within this report supersede all other contracts or scopes of work, implied or otherwise, except those stated or acknowledged herewith.

This report is not a legal opinion. It does not necessarily comply with requirements defined in any environmental law such as the "innocent landowner defense" or "due diligence inquiry." Only legal counsel retained by the client is competent to determine the legal implications of any information, conclusions, or recommendations in this report.

The findings, conclusions, recommendations, and professional opinions contained in this report have been prepared by the staff of ***PHASE ONE*** **INC.**, in accordance with generally accepted professional practices.

Sample results should not be construed as conclusive and binding in any way. All sampling conducted is only for the purposes of general screening and does not imply that all materials, locations, or hazardous materials have been identified nor was the sampling intended to identify every instance of the materials sampled. ***PHASE ONE*** **INC.** only relays the information supplied by the laboratory conducting the analysis.

7.0 REPORT SIGNATURE AND CERTIFICATION

The undersigned hereby certifies that:

The following people have prepared, written, and/or reviewed the report for Project #7575. All the below parties have, in good faith, conducted their respective project responsibilities using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar fields.

All parties have acted in good faith and have no known relationship with the subject site, owners, buyers, or any other entity associated with the subject site. All respective project responsibilities have been conducted independently, and with no conflict of interest.

The statements of fact contained in this report are true and correct based on materials reviewed to the best of our abilities.

The reported analyses, opinions, and conclusions are personal, unbiased, professional, and limited only by the assumptions and qualifications stated herein. Compensation is not contingent upon an action or an event resulting from the analyses, opinions, or conclusions included in this report nor is it contingent upon the use of this report.

The investigation has been performed in accordance with all applicable legal requirements and in accordance with accepted practices prevailing in the environmental assessment and environmental consulting industries. The personnel who performed the investigation (or are under the direct supervision of personnel) whom are properly licensed and certified in accordance with the requirements of all federal, state, and local laws, rules, and regulations.

We have no present or prospective interest in the subject property or the parties involved.

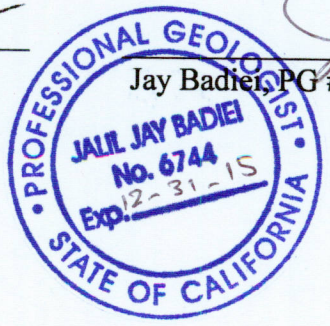

If necessary, expert testimony and other legal appearances will be provided at our current Standard Schedule of Rates.

SAMPLING PROTOCOL
1730 Embarcadero Road
Palo Alto, California 94303

INTRODUCTION

This protocol outlines the field procedures utilized for the collection of soil samples as part of ***PHASE ONE*** **INC.**'s project number 7575.

PRE-FIELD CONDITIONS AND ACTIVITIES

The following activities or procedures were observed as part of the sampling project:

1. Sampling intervals were approved by ***PHASE ONE*** **INC.** prior to field operations. An environmental professional observed the work, and collected samples at approved intervals.

FIELD PROCEDURES: SUBSURFACE SOIL SAMPLING – HAND AUGER

The following procedures were observed during soil sampling operations:

1. Soil samples were collected with a solid-barrel sampler. The sampler uses two three-inch long, by two-inch outer diameter size sample tubes.

2. The sampler was driven six inches at each sampling interval. The lower soil tube was chosen for analysis. The ends were covered with Teflon, and plastic end caps.

3. After the soil sample was obtained, the sampler was disassembled; scrubbed in a water bath with Liquinox®; rinsed in two separate water baths, the last of which contained double-distilled water; and re-assembled with a new sample tube.

SAMPLE COLLECTION AND LABORATORY PROTOCOL

After soil sample collection, protocol required that the following guidelines and sample tracking be followed to maintain sample integrity:

1. After retrieval, each soil sample container was sealed, labeled, and chilled. Clean ice chests were used to keep the soil samples at approximately four degrees Celsius until they were delivered to the state-certified analytical chemical laboratory.

2. The samples were delivered directly to the laboratory.

3. Sample control was maintained by a Chain-Of-Custody (COC) record, which accompanies the samples. The form documented the time, date, and person responsible during each step in the transportation process.

Copyright 2014 ***PHASE ONE*** **INC.** All Rights Reserved

SAMPLE CODING—SOIL SAMPLING

The coded sample numbering system does not reveal the client to the laboratory or other interested parties:

1. A non-water soluble marking pen is used to mark the labels, which are then applied to the sample tubes.

2. **Project Number:** The project number allows ***PHASE ONE*** **INC.** to access file and client information. Use of the project number maintains the client's confidentiality to subcontractors, while maintaining ***PHASE ONE*** **INC.**'s ability to identify necessary data:

   Example: ***PHASE ONE*** **INC.** Project Number: 7575
   Client Name: Kuni Automotive Group

   The soil sample tubes have the project number written on the label as follows:

   7575

3. **Sample Number:** ***PHASE ONE*** **INC.** numbers its soil samples in the following manner:

   T-XX-YY

   Where:
   - T Indicates type of sample symbol (see below)
   - X Indicates boring number
   - Y Indicates depth of sample in feet below ground surface (BGS)

   Types of sample symbols (T) include:

SYMBOL		TYPE OF SAMPLE
HA or B	=	Hand auger soil boring

For example, if a subsurface soil sample (T=HA) was collected from the first soil boring (X=**1**) at the three-foot sampling depth (Y=**3**), the soil sample would be logged as follows:

HA1-3

In review, the number indicates a soil sample from soil boring number one, from a depth of three feet BGS.

4. **Sample Date:** Due to holding time limits for most analyses, it is important to include the date the sample was collected.

   Sample Date: February 11, 2014
   Sample Labeled: 02/11/14

Copyright 2014 ***PHASE ONE*** **INC.** All Rights Reserved

5. The complete labeling of the soil sample tube includes:

Job Number with appropriate number (i.e. 7575)
Sample Number as described in point three.
Sample Date as labeled on the tube.

The sample identification information, as required by ***PHASE ONE*** **INC.** for the three-foot soil sample collected from boring SB-1 would be as follows:

7575
HA1-3
02/11/14

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications . The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

As regulatory limits change frequently, A & R Laboratories advises the recipient of this report to confirm such limits with the appropriate federal, state, or local authorities before acting in reliance on the regulatory limits provided.

For any feedback concerning our services, please contact Marilu Escher, Project Manager at 951.779.0310. You may also contact Ken Zheng, President at arlab@arlaboratories.com.
