Subject: Phase I Environmental Site Assessment, Buena Vista Mobile Home Park
3980 El Camino Real, Palo Alto, California

Dear Ms. Lee:

This report presents the findings of a Phase I Environmental Site Assessment (ESA) completed by Rincon Consultants, Inc. (Rincon) for the Buena Vista Mobile Home Park property located at 3980 El Camino Real in Palo Alto, California. The Phase I ESA was performed in accordance with our proposal dated March 23, 2023 and contract dated December 29, 2021.

The accompanying report presents our findings and provides an opinion regarding the presence of recognized environmental conditions in connection with the subject property. Our work program for this project, as referenced in our contract, is intended to meet the guidelines outlined in the American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process* (ASTM Standard E1527-21). Our scope of services, pursuant to ASTM practice, did not include any inquiries with respect to asbestos-containing building materials unrelated to releases into the environment; biological agents; cultural and historic resources; ecological resources; endangered species; health and safety; indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment; industrial hygiene; lead-based paint unrelated to releases into the environment; lead in drinking water; mold or microbial growth conditions; polychlorinated biphenyl-containing building materials (e.g., interior fluorescent light ballasts, paint, and caulk); naturally-occurring radon; regulatory compliance; substances not defined as hazardous substances (including some substances sometimes generally referred to as emerging contaminants) unless or until such substances are classified as a Comprehensive Environmental Response, Compensation, and Liability Act hazardous substance; and wetlands.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,
Rincon Consultants, Inc.

Executive Summary

This report presents the findings of a Phase I Environmental Site Assessment (ESA) for the Buena Vista Mobile Home Park property located at 3980 El Camino Real in Palo Alto, California (subject property). The Phase I ESA was performed for Santa Clara County Housing Authority by Rincon Consultants, Inc. (Rincon). Santa Clara County Housing Authority has requested this assessment and will use the information for the purpose of redeveloping the subject property. The subject property is currently developed as a mobile home park. It is our understanding that the proposed future use includes redevelopment of a portion of the property for multi-family residential uses.

The research that was completed as part of this Phase I ESA is listed below:

Task	Completed	Date Reviewed	REC Identified?
User-Provided – Title Report	Yes	04/14/2023	No
User-Provided – Lien Search Report	Requested	Not Applicable (N/A)	N/A
Historical Research – Aerial Photographs	Yes	04/14/2023	No
Historical – Topographic Maps	Yes	04/14/2023	No
Historical – Fire Insurance Maps	Yes	04/14/2023	No
Historical – City Directories	Yes	04/14/2023	No
Physical Setting	Yes	04/14/2023	No
Agency Database Report	Yes	04/13/2023	No
Agency File Reviews	Yes	04/13/2023	No
Interviews – User Questionnaire	Yes	04/24/2023	No
Interviews – Owner Questionnaire	Yes	04/24/2023	No
Interviews – Other	Yes	01/31/2023	No
Site Reconnaissance	Yes	02/05/2023	No
Vapor Migration Research	Yes	02/05/2023	No

Based on the findings of this Phase I ESA, it is our opinion that there are environmental conditions in connection with the subject property as follows.

Recognized Environmental Conditions (RECs)	1. Petroleum release at the northern nearby property, 170 ft north of subject property
Notable Findings	1. Presence of a separate dissolved petroleum hydrocarbon plume at 3897 El Camino Real from an unidentified offsite source 2. Potential asbestos-containing materials (ACM) and lead-based paint (LBP) at the subject property

To evaluate potential impacts associated with the REC and Notable Finding identified above, we recommend a subsurface investigation at the subject property due to the proposed redevelopment for continued residential use. We recommend a targeted subsurface investigation at the subject property to evaluate potential risks to the health and safety of construction workers and current and future residents.

In addition, although not considered a REC, based on the age of the onsite structures (constructed as early as the 1940s), we recommend that an ACM and LBP survey be conducted.

1 Introduction

This report presents the findings of a Phase I Environmental Site Assessment (ESA) conducted for the Buena Vista Mobile Home Park property located at 3980 El Camino Real in Palo Alto, California (subject property; Figure 1). The Phase I ESA was performed by Rincon Consultants, Inc. (Rincon) for Santa Clara County Housing Authority in general conformance with American Society for Testing and Materials (ASTM) E1527-21, our proposal dated March 23, 2023, and our contract dated December 29, 2021. The following sections present our findings and provide our opinion as to the presence of recognized environmental conditions (RECs) on the subject property.

1.1 Purpose and Definitions

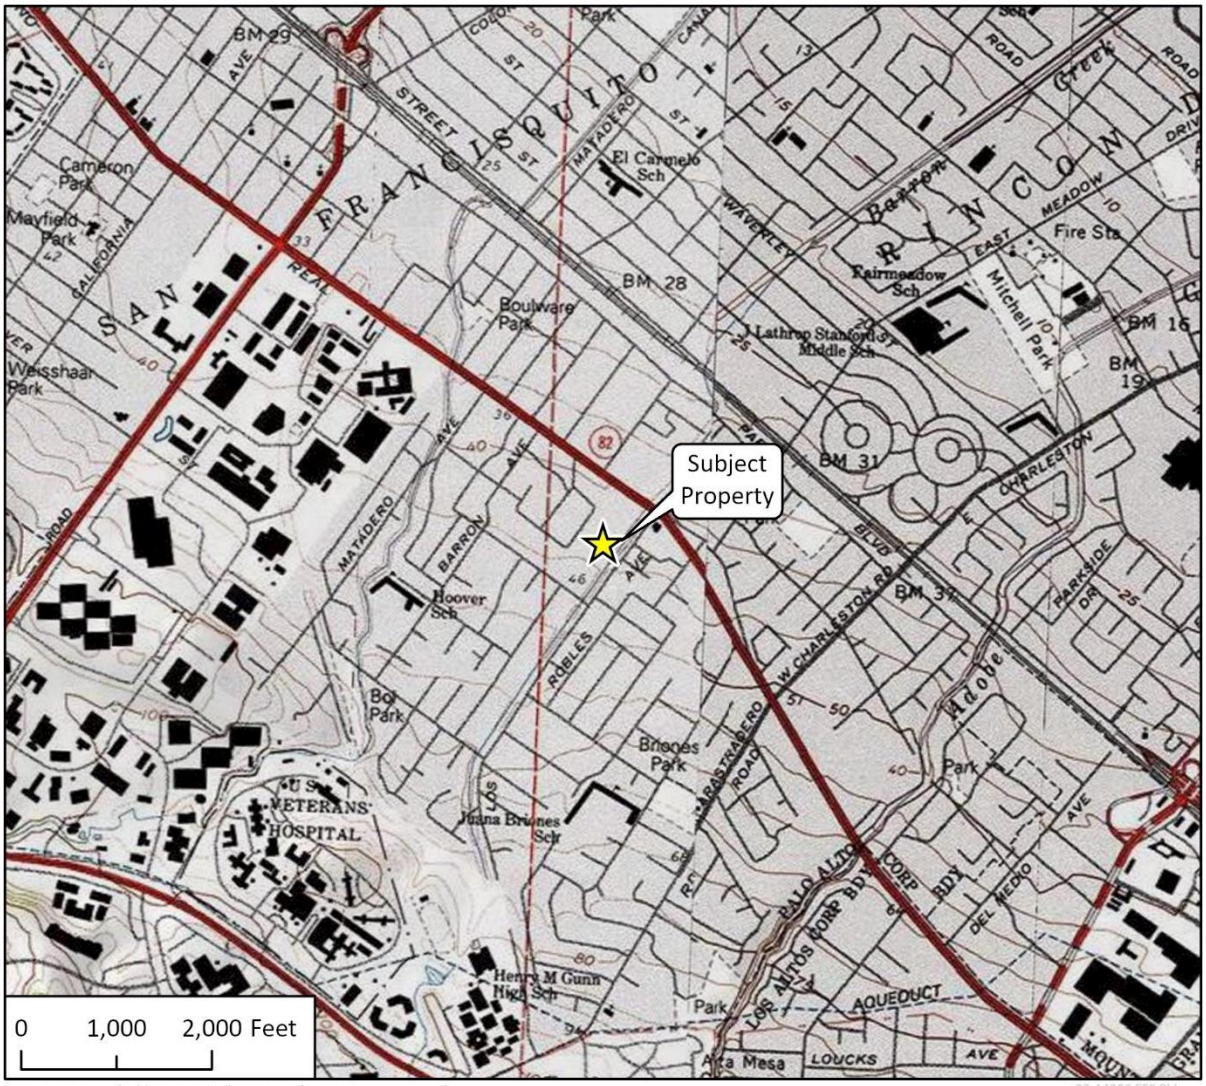
Santa Clara County Housing Authority has requested this assessment and will use the information for the purpose of redeveloping the subject property. The purpose of this Phase I ESA was to determine if there are RECs on the subject property, taking into account commonly and reasonably ascertainable information, and to qualify for Landowner Liability Protections under the Brownfields Amendments to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

Recognized Environmental Condition (REC)

A REC is defined pursuant to ASTM E1527-21 as,

> "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment;
>
> (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or
>
> (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."

As stated in ASTM E1527-21,



> "**likely** is that which is neither certain nor proved, but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given therein."

Controlled REC

A Controlled REC is defined pursuant to ASTM E1527-21 as,

> "recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

The topographic representation depicted in this map may not portray all of the features currently found in the vicinity today and/or features depicted in this map may have changed since the original topographic map was assembled.

23-14396 EES PhI
PhlFig 1 Vicinity Map

Historical REC

A Historical REC is defined pursuant to ASTM E1527-21 as,

> "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition."

De minimis

A *de minimis* condition is defined pursuant to ASTM E1527-21 as,

> "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition."

Property Use Limitation

A Property Use Limitation (PUL) is defined pursuant to ASTM E1527-21 as,

> "a limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous substances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria."

Significant Data Gap

A Significant Data Gap is defined pursuant to ASTM E1527-21 as,

> "a data gap that affects the ability of the environmental professional to identify a recognized environmental condition."

Notable Finding

Although not defined by ASTM E1527-21, Rincon utilizes the term *Notable Finding* for potential environmental concerns present at or possibly present at a property that do not specifically fit one of the above ASTM-defined situations, yet may impact current or future use of the subject property.

1.2 Scope of Services

The scope of services conducted during this study is outlined below:

- Performed a reconnaissance of the subject property to identify obvious indicators of the existence of hazardous materials.
- Observed adjacent or nearby properties from public thoroughfares in an attempt to see if such properties are likely to use, store, generate, or dispose of hazardous materials.

- Obtained and reviewed an environmental records database search to obtain information about the potential for hazardous materials to exist at the subject property or at properties located in the vicinity of the subject property.
- Reviewed files for the subject property and immediately adjacent properties as identified in the database report, as applicable.
- Reviewed the current United States Geological Survey (USGS) topographic map to obtain information about the subject property and regional topography and uses of the subject property and surrounding sites.
- Reviewed additional pertinent record sources (e.g., California Geologic Energy Management Division [CalGEM] records, online databases of hazardous substance release sites), as necessary, to identify the presence of RECs at the subject property.
- Reviewed the California State Water Resources Control Board (SWRCB) Statewide Per- and Polyfluoroalkyl Substances (PFAS) Investigation online Public Map Viewer regarding current PFAS orders issued to facilities located in the vicinity of the subject property.
- Reviewed reasonably ascertainable historical resources (e.g., aerial photographs, topographic maps, fire insurance maps, city directories) to assess the historical land use of the subject property and adjacent properties.
- Provided a user interview questionnaire to a representative of Santa Clara County Housing Authority, the user of the Phase I ESA.
- Provided a property owner interview questionnaire to the property owner or a designated subject property representative identified to Rincon by Santa Clara County Housing Authority.
- Conducted interviews with other property representatives (e.g., key site manager, occupants), as applicable.
- Reviewed available Santa Clara County Housing Authority-provided information (e.g., previous environmental reports, title documentation).
- Requested Title Search Information Reports and environmental lien search information from the user of the report.

1.3 Significant Assumptions, Limitations, Deviations, Exceptions, Special Terms, and Conditions

This work is intended to adhere to good commercial, customary, and generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No guarantee or warranties, expressed or implied, are provided. The findings and opinions conveyed in this report are based on findings derived from a site reconnaissance, review of an environmental database report, specified regulatory records and historical sources, and comments made by interviewees. This report is not intended as a comprehensive site characterization and should not be construed as such. Standard data sources relied upon during the completion of Phase I ESAs may vary with regard to accuracy and completeness. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary research.

Rincon has not found evidence that hazardous materials or petroleum products exist at the subject property at levels likely to warrant mitigation. Rincon does not under any circumstances warrant or guarantee that not finding evidence of hazardous materials or petroleum products means that hazardous materials or petroleum products do not exist on the subject property. Additional research, including surface or subsurface sampling and analysis, can reduce Santa Clara County Housing Authority's risks, but no techniques commonly employed can eliminate these risks altogether.

In addition, pursuant to ASTM E1527-21 practice, our scope of services did not include any inquiries with respect to asbestos-containing building materials unrelated to releases into the environment; biological agents; cultural and historic resources; ecological resources; endangered species; health and safety; indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment; industrial hygiene; lead-based paint unrelated to releases into the environment; lead in drinking water; mold or microbial growth conditions; polychlorinated biphenyl (PCB)-containing building materials (e.g., interior fluorescent light ballasts, paint, and caulk); naturally-occurring radon; regulatory compliance; substances not defined as hazardous substances (including some substances sometimes generally referred to as emerging contaminants) unless or until such substances are classified as a CERCLA hazardous substance; and wetlands.

1.4 ASTM Deviations

No deviations from ASTM E1527-21 practice were encountered during the completion of this Phase I ESA. An environmental lien search was not completed as part of this assessment; however, one was requested from the user.

1.5 User Reliance

Santa Clara County Housing Authority has requested this assessment and will use the information for the purpose of a due diligence and entitlement submission for the subject property. This Phase I ESA was prepared for use solely and exclusively by Santa Clara County Housing Authority, its employees, affiliates, consultants and partners. No other use or disclosure is intended or authorized by Rincon. Also, this report is issued with the understanding that it is to be used only in its entirety. It is intended for use only by Santa Clara County Housing Authority and no other person or entity may rely upon the report without the express written consent of Rincon.

1.6 Site Description

Subject Property

The subject property is located west and southwest of El Camino Real and northwest of Los Robles Avenue in Palo Alto, California (Figure 2). Additional information regarding the subject property is listed in Table 1.

Figure 2 Subject Property

Imagery provided by Microsoft Bing and its licensors © 2023.

23-14396 EES
PhlFig 2 Subject Property Map

Table 1 Subject Property Characteristics

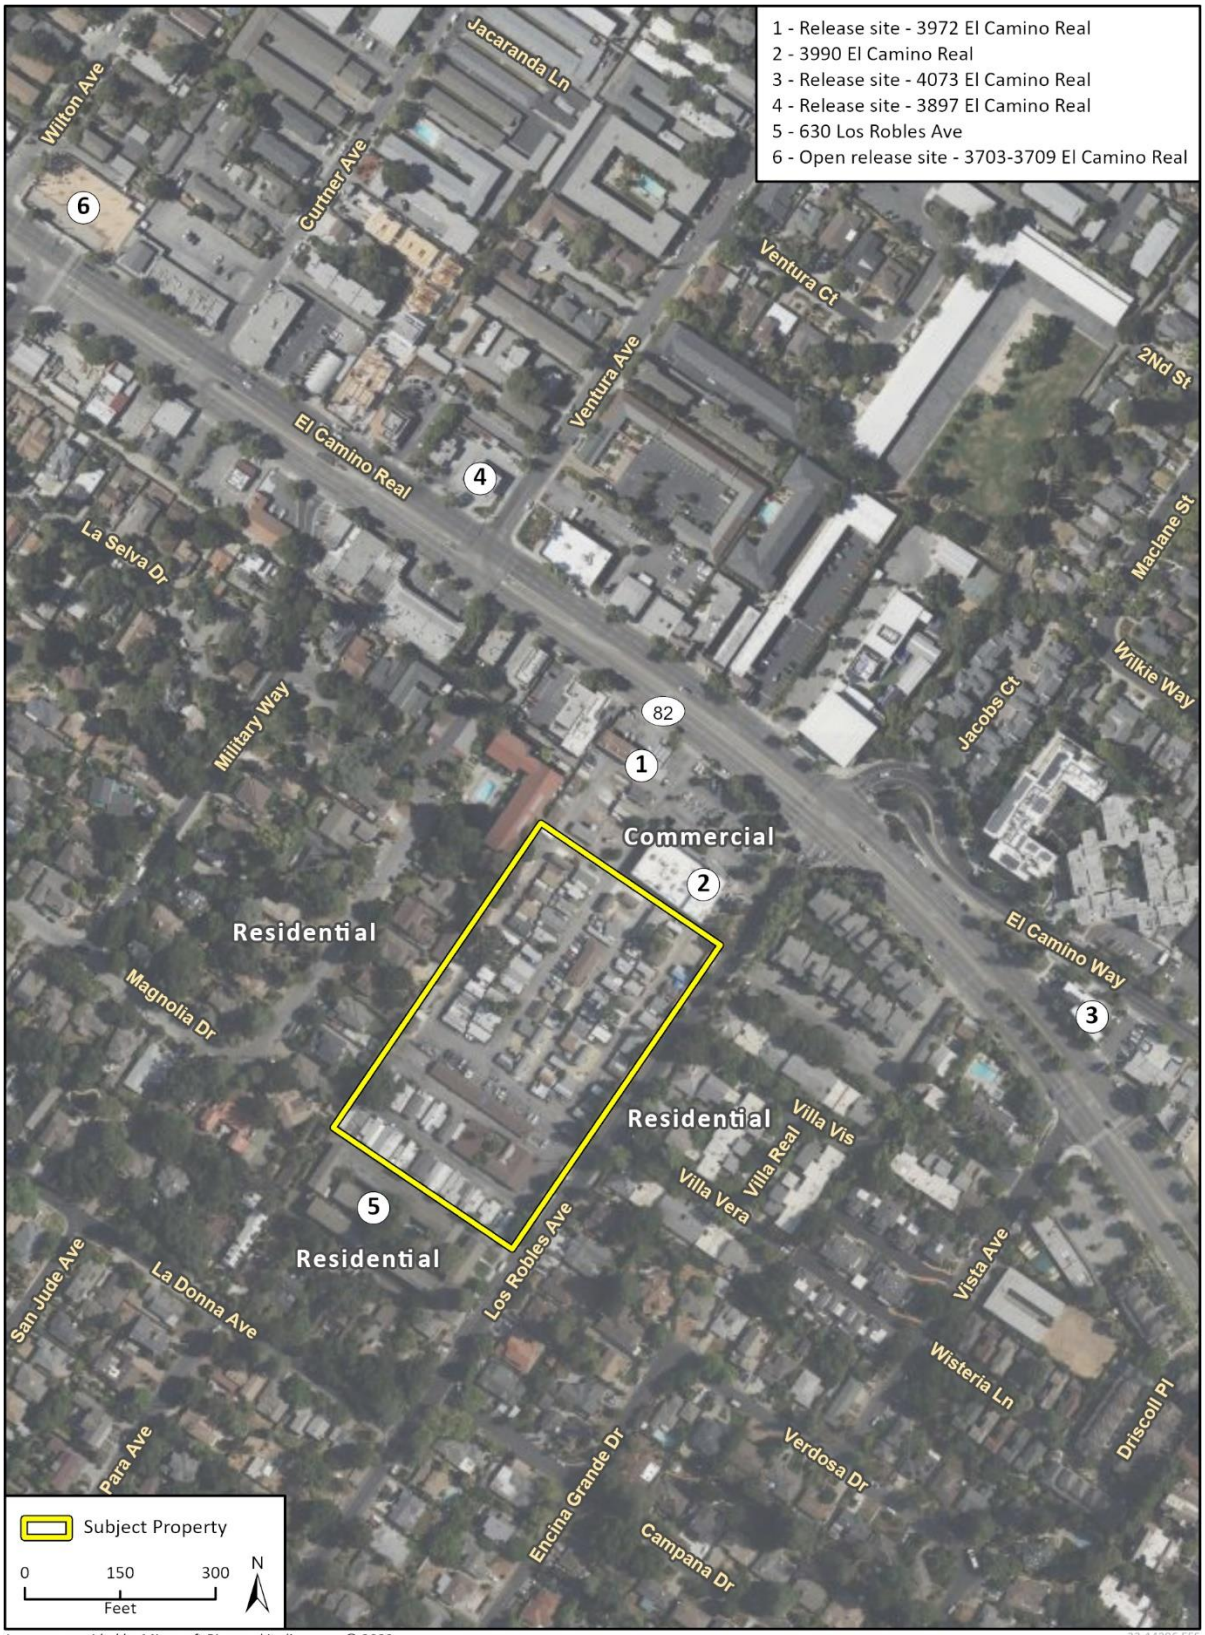
Property Characteristic	Description
Subject Property Address(es)	3980 El Camino Real, Palo Alto, California
Historical Subject Property Address(es)	None
Assessor's Parcel Number(s)	137-11-103i
Acreage	4.5
No. of Buildings/Year of Construction	Multiple mobile homes, multi-unit structures, maintenance building, variable construction dates since the 1940's
Subterranean Features	None
Current Subject Property Use	Mobile Home Park
Current Owner of Subject Property	Poco Way HDC, Inc., A California Nonprofit Benefit Corporation
Current Tenant(s) of Subject Property	Multiple residents

Descriptions of Roads and Other Improvements on the Subject Property

During the site reconnaissance, mobile homes, a maintenance building, paved driveways, and access roads were observed on the subject property. The perimeter of the subject property is surrounded by wooden and chain-link fence. Access to the subject property is available from driveways on EL Camino Real and Los Robles Street.

The following utility providers service the subject property/area:

- Electrical Service – City of Palo Alto
- Natural Gas Service – City of Palo Alto
- Water Service – City of Palo Alto
- Sewer Service – City of Palo Alto
- Solid Waste Service – Green Waste of Palo Alto



General Vicinity Characteristics

The area surrounding the subject property is comprised of residential and commercial land uses. The current adjacent land uses are described in Table 2 and depicted on Figure 3.

Table 2 Current Uses of Adjacent Properties

Area	Use
Northern Properties	Multi-family residence (apartment building)
Northeastern Properties	Parking area surrounded by chain-link fence (appears to have formerly been part of the mobile home park) followed by a Valero gas station and auto repair facility at 3972 El Camino Real, commercial building occupied by a spa, fast food restaurant, coffee shop, and tutoring business at 3990 El Camino Real
Southeastern, Eastern, and Southern Properties	Los Robles Avenue followed by residences
Southwestern and Western Properties	Residences

Figure 3 Adjacent Land Use

23-14396 EES
PhlFig 3 Adj Land Use Map

2 User-Provided Information and Responsibilities

2.1 Review Land Title Records and Judicial Records for Environmental Liens and Activity and Use Limitations

Rincon requested title search information reports from the user of the report. Pursuant to ASTM E1527-21,

> "the title search information reports shall identify environmental covenants, environmental easements, land use covenant and agreements, declaration of environmental land use restrictions, environmental land use controls, environmental use controls, environmental liens, or any other recorded instrument that restricts, affects, or encumbers the title to the subject property due to restrictions or encumbrances associated with the presence of hazardous substances or petroleum products. Title search information reports shall review land title records for documents recorded between 1980 and the present. If judicial records are not reviewed, the title search information report shall include a statement providing that the law or custom in the jurisdiction at issue does not require a search for judicial records in order to identify environmental liens".
>
> As stated in ASTM E1527-21 it is the "user's responsibility to search for environmental liens and activity and land use limitations (AULs)". This is in "addition to the environmental professional's search of institutional control and engineering control registries described in" ASTM E1527-21 Section 8.2.

Title Search Information

A copy of the title search information records provided by the user is included in Appendix A. Based on our review of the title search information records, the title is vested in Poco Way HDC, Inc., A California Nonprofit Benefit Corporation. The title lists several easements for: underground water pipelines, construction and maintenance of a public highway, a covered storm drain, and right of way for public utility.

Lien Search Information

As of the date of this report, lien search information has not been provided for our review.

2.2 User Questionnaire

As described in ASTM E1527-21 Section 6, a User Questionnaire as provided by ASTM E1527-21 Appendix X3 was provided to Santa Clara County Housing Authority (SCCHA). The purpose of the User Questionnaire is for the user of the Phase I ESA to provide actual knowledge pertaining to the subject property to help identify RECs. Kris Adhikari, Senior Construction Manager with SCCHA,

completed the User Questionnaire on April 20, 2023. A copy of the completed questionnaire is included as Appendix A.

Based on our review of the completed questionnaire, the user indicated the following:

- The Phase I ESA is required/being performed as part of a due diligence and entitlement submission
- A construction redevelopment transaction is planned for the subject property.
- The purchase price paid for the subject property reasonably reflected the fair market value of the property.

Based on our review of the completed questionnaire, the user reviewed the following sources of information and is unaware of information regarding the following:

- Recorded land title records (or judicial records, where appropriate) that identify any environmental liens filed or recorded against the subject property
- Recorded land title records (or judicial records, where appropriate) that identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the subject property under federal, tribal, state, or local law
- Title Report that identifies information pertaining to environmental cleanup liens or AULs for the subject property

Based on our review of the completed questionnaire, the user is unaware of information regarding the following:

- Reduction in value for the subject property relative to any known environmental issues
- Commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases
- Obvious indicators that point to the presence or likely presence of releases at the subject property
- Pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the subject property
- Pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property
- Notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products

Based on our review of the completed questionnaire, the user identified information pertaining to the subject property that may help identify RECs in connection with the subject property. This information is summarized below:

- As the reported property owner, the user states they have specialized knowledge or experience related to the subject property
- The subject property has been in operation as a mobile home park for 70 or more years.

2.3 Previous Environmental Reports

The following document regarding the subject property was provided for our review:

- *Phase I ESA Report, Buena Vista Mobile Home Park, 3980 El Camino Real, Palo Alto, California*, EFI Global, February 2017.

The Phase I ESA report did not identify RECs in connection with the subject property, and EFI Global did not recommend additional investigation at the time of the report. However, EFI Global stated the following:

> …the former release at this site is not expected to represent a significant environmental concern for the subject property at this time. However, as the gas station continues to operate, UST systems tend to degrade over time. Thus, if the subject property undergoes redevelopment activities in the future, particularly in the northernmost portions, additional assessment may be warranted at that time.

Although not considered an REC, based on the age of the onsite structures, EFI Global recommended that ACM and LBP surveys be conducted "should the on-site structures be demolished or significantly renovated."

3 Physical Setting Resources and Government Records

3.1 Physical Setting Resources

Topography

The current USGS topographic map (Palo Alto Quadrangle 2018) indicates that the subject property is situated at an elevation of approximately 45 feet above mean sea level with topography gently sloping down to the north/northeast. The adjacent topography consists of land gently sloping to the north/northeast. A copy of the 2015 USGS topographic map is included in Appendix B (ERIS 2022, page 2).

Geology and Hydrogeology

According to the California Geological Survey (California Department of Conservation 2015), the subject property is underlain by Quaternary deposits composed of older alluvium lake, playa, and terrace deposits. According to the United States Department of Agriculture (USDA) Soil Conservation Service (SCS) data, provided as part of the Environmental Data Resources (EDR) GeoCheck summary report (Appendix B), the subject property is underlain by clay loam.

During the preparation of this Phase I ESA, we reviewed the California SWRCB's online GeoTracker database to determine groundwater flow direction in the vicinity of the subject property. File reviews conducted for the subject property and/or surrounding release sites indicate that groundwater is typically encountered at depths between 8 feet below ground surface (ft bgs) and 30 ft bgs, and generally flows to the northeast. The information obtained regarding groundwater in the vicinity of the subject property is listed below:

Source Address, Distance, and Direction from Subject Property	Groundwater Depth (ft bgs)	Groundwater Flow Direction	Source
Former Chevron #9-3173, 3972 El Camino Real, 170 ft northeast	15-26	Northeast (downgradient)	GeoTracker (County of Santa Clara, February 2006)
Beacon #3463, 4073 El Camino Real, 630 ft east	8-25	Northwest (cross-gradient)	GeoTracker (County of Santa Clara, November 2004)
Co-Opt Service Station, 3897 El Camino Real, 540 ft north/northwest	12-30	Northeast to northwest (downgradient)	GeoTracker (County of Santa Clara, September 2007)

3.2 Government Record Sources and Agency Records Review

Rincon outsourced with a regulatory database search contractor, Environmental Data Resources (EDR), to obtain records of sites that generate, store, treat, or dispose of hazardous materials and sites for which a hazardous material release incident has occurred. The regulatory database search was conducted for the subject property and included data from surrounding sites within specified radii of the subject property. A copy of the database report, which specifies the ASTM E1527-21

search distance for each public list, is included as Appendix B. As shown on the April 5, 2023 database report, federal, state, and county lists were reviewed as part of the research effort. Please refer to Appendix B for a complete listing of sites reported by EDR and a description of the databases reviewed.

The Map Findings Summary, included in the database report, provides a summary of the databases searched, the number of reported facilities within the search radii, and whether the facility is located onsite or adjacent to the subject property.

As a follow-up to the database search, Rincon reviewed regulatory information for the subject property and nearby listings that were interpreted to have the potential to impact the subject property, based on one or more of the factors listed below:

- Reported distance of the facility from the subject property;
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes;
- Reported case type (e.g., soil only, failed underground storage tank [UST] test only);
- Reported substance released (e.g., chlorinated solvents, gasoline, metals);
- Reported regulatory agency status (e.g., case closed, "no further action"); and,
- Location of the facility with respect to the reported groundwater flow direction (discussed in Section 3.1 of this report).

Facilities/properties that were interpreted by Rincon to be of potential environmental concern to the subject property, based on one or more of the factors listed above, are summarized below. In accordance with ASTM E1527-21, contamination migration pathways in soil, groundwater, and soil vapor were considered in our analysis of offsite properties of potential environmental concern.

The following sections include a summary of our review of the database report and the regulatory information obtained from online sources (e.g., SWRCB GeoTracker database, Department of Toxic Substances Control [DTSC] EnviroStor database, local fire department) and/or files requested from the applicable regulatory agency.

3.2.1 Subject Property – 3980 El Camino Real, Palo Alto, CA

Database Summary

The subject property was listed in the Hazardous Waste Tracking System (HWTS) database. This listing indicates that hazardous materials have been handled and stored onsite; however, no releases have been reported.

Agency Records

The subject property was not listed on the online databases searched at GeoTracker or EnviroStor. Records for the subject property (3980 El Camino Real) were requested via email from the County of Santa Clara Environmental Health Department on April 7, 2023; however, no files were found for the subject property address.

3.2.2 Adjacent Properties

The following adjacent properties were listed in the database search.

Northern Adjacent Property – Chevron #9-3173/Jim Davis Automotive/Jim Davis Texaco – 3972 El Camino Real

Database Summary

The northern adjacent property at 3972 El Camino Real was listed in 13 release and non-release databases and was identified as the following in the database report:

- Chevron #9-3173
- Jim Davis Automotive
- Jim Davis Texaco
- "93173"

Agency Records

The northern adjacent property was listed in two release databases; agency records were reviewed online at GeoTracker and are summarized below:

Databases:	CA HIST CORTESE, CA LUST, CA HIST UST, CA SWEEPS UST, CA CERS HAZ WASTE, CA CERS TANKS, CA Cortese, CA CUPA Listings, CA CERS, RCRA NonGen/NLR, CA UST, EDR Hist Auto, CA FID UST
Agency Lead:	Santa Clara County Department of Environmental Health
Listing/Case Status:	Closed, 02/17/2006
Soil Impacts/COCs:	Yes/total petroleum hydrocarbons (TPH) as gasoline (TPHg), benzene, toluene, ethylbenzene, and xylene (BTEX), oil & grease, methyl-tert-butyl ether (MtBE),
Soil Vapor Impacts/COCs:	Yes/MtBE
Groundwater Impacts/COCs:	Yes/TPHg, BTEX, MtBE
Groundwater Depth/Flow Direction:	15 ft bgs to 26 ft bgs/northeast (downgradient from subject property)
Site Distance from Subject Property:	Northern/northeastern adjacent
Release Distance from Subject Property:	Approx. 170 feet northeast
Potential Impacts to Soil, Soil Vapor, and/or Groundwater at Subject Property:	**Yes – See Table 6**
Notes: According to the case closure summary, residual petroleum hydrocarbon-impacted soil and groundwater remain at the site; site management requirements included notification of the Santa Clara Valley Water District prior to any changes in land use (site was an active gasoline station at that time). Residual concentrations of TPHg, BTEX, and MtBE in soil and groundwater were below San Francisco Bay Regional Water Quality Control Board (SFB RWQCB) Environmental Screening Levels (ESLs) for direct exposure and for vapor intrusion.	

Southern Adjacent Property – Oak Manor Townhouses, 630 Los Robles Avenue

Database Summary

The southern adjacent property was listed in the following non-release databases:

- Oak Manor Townhouses: CA HAZNET, CA HWTS, FINDS, ECHO
- Villalobos, Erika: CA HAZNET, ECHO, RCRA NonGen/NLR
- Garden Court Apartments: ECHO, FINDS, RCRA NonGen/NLR
- 1X PAHC Apartments, Inc: CA HAZNET, CA HWTS

These listings indicate that asbestos-containing waste was removed from onsite structures; however, no hazardous materials releases have been reported.

Agency Records

The southern adjacent property was not listed on the online databases searched.

3.2.3 Nearby Release Sites within 1/3 Mile

Database Summary

The database search identified seven closed release sites within 1/3 mile of the subject property. Regulatory agency files reviewed for the nearby release site are discussed below.

Agency Records

Agency records for the seven nearby release sites were reviewed online at GeoTracker, and are summarized in Table 3 below:

Table 3 Summary of Nearby Release Sites within 1/3 mile of Subject Property

Site Name/Address	Location Relative to Subject Property	Regulatory Databases	Summary	Potential Impact to Subject Property
Palo Alto Chevron/Co-Opt Service Station/Leonardi Property c/o Brunsi/Regal Station #428/Khani & Son Inc., 3897 El Camino Real	500 ft North (N)	CA LUST, CA HIST LUST, CA UST, CA HIST UST, CA FID UST, CA CUPA Listings, CA Cortese, CA HIST Cortese, CA CERS,CA CERS HAZ WASTE,CA SWEEPS UST, CA CERS TANKS. RCRA NonGen/NLR, CA EMI, CA HAZNET, CA HWTS, EDR Hist Auto	Case closed 09/12/2007. Release of gasoline to soil and groundwater discovered during UST removal in 1991. Impacted soil was removed and a soil vapor/groundwater treatment system operated between 1997 and 2004. Residual concentrations of TPHg, BTEX, MtBE were present in soil and groundwater at the time of case closure near the former USTs. **A separate dissolved hydrocarbon plume is thought to originate from an offsite source**, based on the documented groundwater flow direction (varies from northeast to northwest), and the location of wells where elevated levels of TPHg and benzene were detected (southern edge of the site at the intersection of El Camino Real and Ventura Avenue). **The suspected offsite source has not been identified.** Site management requirements (zoning restrictions) are in place at the site to limit risks to human health and the environment.	Potential
Beacon Station #463/Beacon #3463/Dens Beacon Service, 4073 El Camino Real	520 ft East (E)	CA LUST, CA HIST UST, CA HIST LUST, CA SWEEPS UST, CA FID UST, CA Cortese, CA CERS, EDR Hist Auto	Case closed 11/15/2004. Release of gasoline to soil and groundwater discovered during UST removal in 1992. Impacted soil was removed and a soil vapor/groundwater treatment system operated between 1995 and 1997. Residual concentrations of TPHg, BTEX, and MtBE remaining in soil and groundwater triggered site management requirements that include additional assessment be completed if grading, excavation, or installation of water wells is planned at the site.	Unlikely
Palo Alto Housing Wilton Court Development/Wilton ECR, L.P. c/o Alta Housing Corporation, 3703-3709 El Camino Real	1,100 ft Northwest (NW)	CA CPS-SLIC, RCRA NonGen/NLR	Open case as of 12/17/2019. The site was historically used as a gasoline station and automotive repair facility. In addition, there are reported offsite volatile organic compounds (VOCs) and petroleum hydrocarbons releases in the immediate site vicinity. The site has been redeveloped with a multi-family residential building. Soil vapor sampling in 2022 indicated that TPHg and BTEX were detected at concentrations below applicable SFB RWQCB ESLs.	Unlikely
3666 El Camino Real	1,175 ft NW	CA LUST, CA Cortese, CA CERS,	Open case as of 11/14/2018. Releases of TPHg and TPH as diesel (TPHd) to soil and groundwater discovered after a Phase I ESA in 2017 and previous Phase II ESA in 2012. Impacts resulted from historical operations as a gasoline station and automotive repair facility from the mid-1930s until the early 1970s. Tetrachoroethene (PCE) was also detected above applicable SFB RWQCB ESLs in	Unlikely

Site Name/Address	Location Relative to Subject Property	Regulatory Databases	Summary	Potential Impact to Subject Property
			soil gas at the site. No further assessment has been completed at the site since 2020.	
Shell Service Station, 3601 El Camino Real	1,470 ft (NW)	CA LUST, CA HIST LUST, CA SWEEPS UST, CA Cortese, CA CERS	Case closed 07/29/2016. Release of petroleum hydrocarbons to soil and groundwater discovered during UST removal in 1985. Groundwater extraction, soil vapor extraction (SVE), air sparging, and enhanced bioremediation occurred at the site between 1989 and 2004. Residual levels of TPHg, BTEX, and MtBE in soil and groundwater triggered site management requirements that include additional assessment be completed if grading, excavation, or installation of water wells is planned at the site.	Unlikely
Combes Auto Repair, 3585 El Camino Real	1,660 ft NW	CA LUST, CA FID UST, CA HIST LUST, CA SWEEPS UST, CA HIST UST, CA Cortese, CA HIST Cortese, CA CERS	Case closed 08/31/2016. Release of petroleum hydrocarbons to soil and groundwater from former gasoline station/automobile service operations; USTs removed in 1986. SVE and dual-phase extraction operated at the site intermittently between 2002 and 2015. Residual concentrations of TPHg, TPH as diesel (TPHd), BTEX, MtBE, PCE, and TBA in soil, soil vapor and groundwater at the site triggered site management requirements that include additional assessment be completed if grading, excavation, or installation of water wells is planned at the site.	Unlikely
John's Automotive, 3508 El Camino Real	1,690 ft NW	CA LUST, CA HIST LUST, CA Cortese, CA HIST Cortese,	Case closed 07/23/1997. Release of petroleum hydrocarbons to soil and groundwater discovered during UST removal in 1987. Impacted soil was excavated to 20 ft bgs and low levels of TPHg was detected in a confirmation soil sample collected from 20 ft bgs. Groundwater was not evaluated, and the case was closed.	Unlikely

3.2.4 National Priorities List (NPL) Site – Hewlett-Packard – 620-640 Page Mill Road

The EDR database report identified one NPL (Superfund) site located 0.6 mile west of the subject property. Based on Rincon's review of information for this site on GeoTracker, this listing is not expected to impact the subject property.

3.2.5 Orphan Listings

The EDR database report identified three orphan or unmapped site listings, which were unable to be plotted due to insufficient address information. Based on Rincon's review of the limited address information or site descriptions for the orphan listings, none of the listings are expected to impact the subject property.

3.3 Review of State of California Geologic Energy Management Division (CalGEM) Records

A review of the CalGEM Online Mapping System indicates that no oil wells are located on the subject property or adjacent properties, or within 0.25 mile of the subject property (CalGEM 2023).

3.4 Review of National Pipeline Mapping System Records

A review of the National Pipeline Mapping System (NPMS) online Public Map Viewer indicates that no natural gas transmission pipelines or hazardous liquid pipelines are located on the subject property or adjacent properties. Additionally, no pipeline-related accidents or incidents are mapped within 0.25 mile of the subject property (United States Department of Transportation 2023).

3.5 Review of California Statewide PFAS Investigation

Beginning in 2019, the SWRCB sent assessment requirements to property owners of sites that may be potential sources of PFAS. These sites currently include select airports, chrome plating facilities, Department of Defense (DoD) sites, landfills, publicly owned treatment works facilities, and bulk fuel storage terminals and refineries. According to the SWRCB, "PFAS are a large group of human-made substances that do not occur naturally in the environment and are resistant to heat, water, and oil" (SWRCB 2023).

Our April 14, 2023 review of the California Statewide PFAS Investigation online Public Map Viewer indicates that there are no current airport, chrome plating, DoD, landfill, or publicly owned treatment works facilities with PFAS orders listed as located within 0.5 mile of the subject property (SWRCB 2023). Based on our review of the SWRCB's March 12, 2021 Bulk Fuel Terminal/Refinery Investigative Order, the subject property is not listed on the Bulk Fuel Storage Terminals and Refineries List (Attachment 1 of the Order). In addition, none of the Bulk Fuel Storage Terminals or Refineries on the list are located within 0.5 mile of the subject property (SWRCB 2021).

Our April 14, 2023 review of the California Statewide Drinking Water System Quarterly Testing Results online Public Map Viewer indicates that perfluorooctanoic acid (PFOA) and

perfluorooctanesulfonic acid (PFOS) were not detected (ND) above the laboratory reporting limit of 3 nanograms per liter (ng/L) in two nearby Los Altos drinking water wells located 1.4 miles and 1.5 miles south/southeast of the subject property and tested quarterly as part of a PFAS investigative order (SWRCB 2023).

4 Historical Records

The historical records review completed for this Phase I ESA includes aerial photographs, topographic maps, fire insurance maps, city directories, and building permits as detailed in the following sections. Copies of the historical resources reviewed are included in Appendix C. Table 4 provides a summary of the historical use information available for the subject property and adjacent properties.

4.1 Methodology

Review of Aerial Photographs

Aerial photographs from Environmental Risk Information Services' (ERIS's) aerial photograph collection that were included in the Phase I ESA for the northern adjacent property (Section 2.3), were reviewed. In addition, a current aerial photograph from Google Earth was reviewed. The aerial photographs were reviewed on April 14, 2023.

Review of Historical Topographic Maps

Historical topographic maps from ERIS's map collection were reviewed (included in the previous Phase I ESA for the northern adjacent property). The historical topographic maps were reviewed on April 14, 2023.

Review of City Directory Listings

EDR was contracted to provide copies of city directory listings for the subject property. The city directory listings were reviewed on April 14, 2023.

Review of Fire Insurance Maps

EDR was contracted to provide copies of fire insurance maps (i.e., Sanborns) for the subject property. The fire insurance maps were reviewed on April 14, 2023.

Review of City of Palo Alto Building Permit Records

Building permit records for the subject property were reviewed on the City of Palo Alto Planning and Development Department website on April 14, 2023. The database contained a current building permit for deconstruction of multi-family building submitted by POCO Way HDC, Inc.

Other Historical Sources

Based on the sufficiency of historical information obtained for the purposes of this report, no additional historical sources were reviewed.

4.2 Summary of Subject Property and Adjacent Historical Uses

Table 4 Historical Use of the Subject Property and Adjoining Properties

Year	Source	Subject Property Use	Adjoining Property Use
1897 Topographic Map (TM) and 1899 TM	TM	Undeveloped land.	North (N), south (S), east (E), and west (W): Undeveloped land, roads farther to the N, S, and E.
1939 Aerial Photograph (AP)	AP	Undeveloped, vegetated land in the northern and central portion, a structure in the southern portion surrounded by vegetated land.	N/northwest (NW): Vegetated land and a medium sized structure. E: A road in the general configuration of Los Robles Avenue. S, W: Vegetated land.
1946 City Directory (CD), 1948 AP, 1948 TM, 1953 TM, 1954 AP, 1950 CD, 1955 CD, 1956 AP	AP, TM, CD	Northern and central portion developed with numerous small buildings that appear to be mobile homes, a larger central building, and access roads/driveways. An elongated structure is in the southern/central area, southwestern portion appears vegetated, southeastern portion includes small structures and vegetated land. Identified as Weiler Sepherin tourist camp in 1946 CD, and as Buena Vista Motel in 1955 CD	N: Small structures that appear to be mobile homes **followed by possible gasoline station structures (L-shaped building). 3972 EL Camino Real identified as a gas station**. NW: Medium sized building surrounded by vegetated land. E: A road followed by a parcel with small structures or vehicles, commercial and residential structures. S, W: Residential development.

*__Bold__ listings indicate land uses with the potential to impact the subject property

4.3 Gaps in Historical Sources

Several gaps of greater than 5 years were identified in the historical records reviewed, from 1899 to 1939, 1939 to 1946, and 1982 and 1991. These gaps are considered insignificant because the subject property and adjacent land use appears to be similar prior to and following the gaps.

5 Interviews

Rincon performed interviews regarding the subject property and surrounding areas. The purpose of the interviews was to discuss current and historical conditions and to obtain information indicating the presence of RECs in connection with the subject property.

5.1 Interview Summary

Interview with Owner

An interview questionnaire was provided to the property owner, Santa Clara County Housing Authority, prior to the site reconnaissance. Kris Adhikari, Project Manager, completed the Owner Questionnaire on April 20, 2023. A copy of the completed questionnaire is included in Appendix A. The following information is based on our review of the completed questionnaire.

The property owner indicated the following:

- The subject property is currently used for residential purposes.
- The subject property was formerly used for residential purposes.
- The structures on the subject property were built between the 1950' through the 2020's.
- Poco Way HDC, Inc. obtained ownership of the subject property in 2017.
- The former owner of the subject property was Joe Jisser.

The property owner also presented the following information regarding hazardous material and petroleum hydrocarbon storage and waste generation at the subject property.

- Small, household quantities of hazardous materials and petroleum products are stored and used on the subject property (less than 5-gallon containers, or 50 gallons in aggregate).
- No hazardous waste is generated at the subject property.

The property owner indicated that they are unaware of the presence of industrial drums, storage tanks (above or below ground), fill dirt, pits, ponds, lagoons, sumps, clarifiers, solvent degreasers, stained soil, vent pipes, fill pipes, or access ways, stained surfaces, private wells, non-public water systems, transformers, capacitors, or hydraulic equipment, records indicating the presence of polychlorinated biphenyls, or records indicating the presence of pesticides or herbicides at the subject property.

The property owner indicated that they are not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property. In addition, they are not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the subject property.

Interviews with Site Manager/Occupants

No residential occupants were interviewed as part of this research effort. However, Anton Mason, Property Manager for the Buena Vista Mobile Home Park, was interviewed during the site reconnaissance on April 17, 2023. Mr. Mason indicated that small quantities of cleaning supplies,

paints, gasoline, and repair materials are present on the subject property and small quantities of hazardous waste associated with these materials is generated onsite.

According to Mr. Mason, a geotechnical subsurface investigation was reportedly completed at the subject property. Documentation related to this investigation was requested from Santa Clara County Housing Authority. However, as of the date of this report, we have not obtained this documentation.

Interviews with Local Government Officials

Rincon contacted the Santa Clara County Department of Environmental Health via email for records pertaining to the subject property (3980 El Camino Real). No records for the subject property address were found.

Interviews with Others

Rincon did not attempt to interview neighboring property owners or others as part of this Phase I ESA.

6 Site Reconnaissance

Rincon performed a reconnaissance of the subject property on April 17, 2023 accompanied by Anton Mason of Buena Vista Mobile Home Park. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of RECs in connection with the subject property.

6.1 Methodology and Limiting Conditions

The site reconnaissance was conducted by:

1. Observing the subject property from public thoroughfares,
2. Observing the adjacent properties from public thoroughfares,
3. Walking the subject property,
4. Observing the interior of the onsite structures,
5. Observing the exterior of the structures,
6. Backtracking to correlate exterior features with interior features, as necessary, and
7. Observing the subject property from driveways, paved roads, and sidewalks.

6.2 General Subject Property Information

Current Use of Subject Property and Adjacent Properties

The subject property is currently in use as a mobile home park. Adjacent properties include residences and commercial properties to the north, including the active gas station at 3972 El Camino Real.

Past Use of Subject Property and Adjacent Properties

Based on our site reconnaissance, past uses at the subject property and adjacent properties are not readily apparent.

Current or Past Uses in the Surrounding Areas

The subject property is surrounded by residential and commercial land uses as detailed in Section 1.6 of this report. Past uses of the surrounding area are not readily apparent based on the site reconnaissance.

Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

Geologic, hydrogeologic, hydrologic, and topographic information are as previously stated in Section 3.1 of this report.

General Description of Structures

During the site reconnaissance, mobile homes, a maintenance building, paved driveways, and access roads were observed on the subject property. A chain-link fence surrounded and area in the south-

central portion of the subject property at the location of a former multi-unit structure. The perimeter of the subject property is surrounded by wooden and chain-link fence. Access to the subject property is available from driveways on El Camino Real and Los Robles Street.

Roads

Paved driveways and access roads are located throughout the subject property to allow access to each of the mobile homes.

Potable Water Supply

The City of Palo Alto currently supplies potable water to the subject property.

Sewage Disposal System

The subject property is connected to the City of Palo Alto sewer system.

Stormwater Runoff

Surface water runoff was not apparent at the subject property.

6.3 Interior and Exterior Observations

Table 5 provides details regarding the interior and/or exterior observations noted during the site reconnaissance. Photographs 1 through 12 are shown below.

Table 5 Interior and/or Exterior Observations

Item	Observed	Photograph Number	Description
Hazardous Substances and Petroleum Products in Connection with Identified Uses	Yes	1, 2, 3, 4	Maintenance building in southern portion of subject property – Paint containers, cleaning chemicals, 5-gallon container of used oil, flammables storage cabinet with 2 containers of gasoline (approx. 5 gallons), aerosol containers, and approx. 30 cans of spray paint.
Aboveground or Underground Storage Tanks	No	Not Applicable (N/A)	None observed
Odors	No	N/A	None noted
Pools of Liquid	No	N/A	None observed
Drums	Yes	5	Three – 55-gallon drums of soil cuttings from a recent geotechnical investigation Rincon did not observe indications of releases from the drums on the subject property.

Item	Observed	Photograph Number	Description
Hazardous Substances and Petroleum Products Containers Not in Connection with Identified Uses	Yes	N/A	Residential pipeline natural gas leak, currently under repair, from below grade lines in the western portion of the subject property. Note that the gas line was repaired on April 19, 2023, two days after the site reconnaissance was completed, according to an email from the SCCHA dated May 3, 2023.
Unidentified Substance Containers	No	N/A	None observed
Indications of Polychlorinated Biphenyls (PCBs)	No	N/A	None observed, no transformers were observed on the subject property
Heating/Cooling Systems	Yes	6	A/C units observed on individual mobile homes. Natural gas is supplied to each mobile home via subsurface gas lines.
Stains or Corrosion	Yes	5	Minor staining on the floor of the maintenance building
Drains, Clarifiers, and Sumps	No	N/A	None observed
Degreasers/Parts Washers	No	N/A	None observed
Pits, Ponds, and Lagoons	No	N/A	None observed
Stained Soil or Stained Pavement	No	N/A	None observed
Stressed Vegetation	No	N/A	None observed
Solid Waste/Debris	No	N/A	None observed
Wastewater	No	N/A	None observed
Wells	No	N/A	None observed
Septic Systems/Effluent Disposal Systems	No	N/A	None observed
Soil Piles	No	N/A	None observed
Fill Material	No	N/A	None observed

Photographs 1-4

Photograph 1. Flammables storage in maintenance building in southern portion of subject property

Photograph 2. Paint storage in maintenance building

Photograph 3. Used oil container in maintenance building

Photograph 4. Cleaning chemicals in maintenance building

Photographs 5-8

Photograph 5. Drums of soil cuttings in the maintenance building from a geotechnical site investigation at the subject property

Photograph 6. Southern row of mobile homes, facing east.

Photograph 7. Fenced area is location of former multi-unit building in central/southern portion of subject property, facing east

Photograph 8. Eastern middle row of mobile homes, boring location visible on the roadway, facing south

Photographs 9-12

Photograph 9. Northern adjacent commercial property, facing south

Photograph 10. Gas station located north of the subject property at 3972 El Camino Real, facing north

Photograph 11. Driveway access to subject property at Los Robles Avenue followed by residences, facing east

Photograph 12. Northern adjacent parcels, facing west.

7 Potential Vapor Migration

The database report and other resources were reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor originating from the nearby sites to migrate beneath the subject property. Based on the ASTM E2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the following minimum search distances were initially used to determine if contaminated soil vapors from a nearby known or suspect contaminated site have the potential to be migrating beneath the subject property:

- 1/10 mile (528 feet) for petroleum hydrocarbons
- 1/3 mile (1,760 feet) for other contaminants of concern (COCs)

Groundwater depth and flow direction is also utilized to determine risk of vapor migration. Groundwater in the vicinity of the subject property is reportedly present at depths between 8 ft bgs and 30 ft bgs and flow direction varies from northeast to northwest (Section 3.1).

Online agency resources are reviewed to determine the extent of the contaminated soil or groundwater plume at known or suspect contaminated sites as specified below:

- Onsite or adjacent to the subject property,
- Within 100 feet, or
- Within the above referenced distances from the subject property and upgradient or crossgradient to the subject property.

Sections 7.1 and 7.2 list contaminated soil, soil vapor, and/or groundwater plumes of petroleum hydrocarbons (528 feet from the subject property) and other COCs (1,760 feet from the subject property). Per ASTM E2600-15, vapors associated with impacted soil or groundwater present within these distances have the potential to migrate beneath the subject property.

7.1 Petroleum Hydrocarbons

Known or Suspect Hydrocarbon Release Site within 528 feet	**Distance (feet) and Direction to Plume Edge/Suspect Release Area**	**Vapor Intrusion Concern Within 30 Feet**
Known – 3972 El Camino Real	170 ft N/NE	No
Known, unknown source, un-delineated dissolved hydrocarbon plume – 3897 El Camino Real	Unknown, north 500 feet or less	Possibly
Known – 3897 El Camino Real	500 ft N	No
Known – 4070 El Camino Real	520 ft E	No

7.2 Other COCs

Known or Suspect COC Release Site within 1,760 feet	Distance (feet) and Direction to Plume Edge/Suspect Release Area	Vapor Intrusion Concern Within 100 Feet
Known, unknown source, un-delineated dissolved hydrocarbon plume – 3897 El Camino Real	Unknown, north 500 feet or less	Possibly

7.3 Vapor Intrusion Summary

Based on our review of the database report (Section 3.2), there are nine known sites impacted with other COCs within 1,760 feet of the subject property. However, with the exception of one unknown release, based on the distance of these sites (greater than 170 feet) they are unlikely to pose a vapor intrusion risk to the subject property.

Although the release case at 3897 El Camino Real is 500 feet away and seems unlikely to affect the subject property based on distance, the subsurface investigations at this property have identified a separate dissolved petroleum hydrocarbon plume that is believed to have originated from an offsite source. The source of this release is unknown and has not been investigated nor delineated and is considered a vapor intrusion risk.

8 Evaluation

Rincon has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 for the Buena Vista Mobile Home Park property, located at 3980 El Camino Real in Palo Alto, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. This assessment has revealed RECs in connection with the subject property, as detailed in Table 6.

8.1 Significant Data Gaps

No significant data gaps were identified during the preparation of this report.

Table 6 Findings, Opinions, Conclusions, and Recommendations

No.	Finding	Opinion	Conclusion	Recommendations
1	Petroleum release at the northern nearby property, 170 ft N of subject property	According to the case closure summary, residual petroleum hydrocarbon-impacted soil and groundwater remain at the site; site management requirements included notification of the Santa Clara Valley Water District prior to any changes in land use (site was and is an active gasoline station). Residual concentrations of TPHg, BTEX, and MtBE in soil and groundwater were below SFB RWQCB ESLs for direct exposure and for vapor intrusion. Although the case was closed in 2006, Rincon has not identified soil vapor data associated with the cleanup; therefore, the potential health risks posed by residual impacts cannot be assessed with confidence at this time. Additionally, the site has continued to operate as a gasoline service station, and subsequent releases may have occurred in the intervening 17 years due to the natural aging and degradation of its infrastructure. Therefore, this is considered a.REC.	REC	Subsurface Investigation to evaluate potential risks to the health and safety of construction workers and current and future residents
2	Presence of a separate unknown dissolved hydrocarbon plume at 3897 El Camino Real	Although the release case at 3897 El Camino Real is 500 feet away and seems unlikely to affect the subject property based on distance, the subsurface investigations at this site have identified a separate dissolved petroleum hydrocarbon plume that is believed to have originated from an offsite source. The source of this release is unknown and has not been investigated nor delineated and is considered a notable finding. A subsurface investigation is recommended at the subject property to determine if this unknown, likely offsite source has affected the subject property.	Notable Finding	Subsurface Investigation to evaluate potential risks to the health and safety of construction workers and current and future residents
3	Potential asbestos-containing materials (ACM) and lead-based paint (LBP) at the subject property	Based on the age of the onsite structure(s) (constructed as early as the 1940s), ACM and LBP may be present in building materials at the subject property.	Notable Finding	ACM and LBP Survey

10 Signatures of Environmental Professionals

The qualified environmental professionals that are responsible for preparing the report include Ryan Thacher, Julie Lynne Welch, and Lauren Vigliotti. Their qualifications are summarized in the following section.

"We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Signature	5/11/2023 Date
Ryan Thacher, PhD, PE Name	Director of Site Assessment and Remediation Title
Signature	5/11/2023 Date
Julie Lynne Welch Name	Director of Due Diligence Title
Signature	5/11/2023 Date
Lauren Vigliotti Name	Environmental Scientist Title

11 Qualifications of Environmental Consultants

The environmental consultants responsible for conducting this Phase I ESA and preparing the report include Ryan Thacher, Julie Lynne Welch, Lauren Vigliotti, and Michaela Kim. Their qualifications are summarized below.

Environmental Professional Qualifications	X2.1.1 (2) (i) - Professional Engineer or Professional Geologist License or Registration, and 3 years of full-time relevant experience	X2.1.1 (2) (ii) - Licensed or certified by the Federal Government, State, Tribe, or U.S. Territory to perform environmental inquiries	X2.1.1 (2) (iii) – Baccalaureate or Higher Degree from and accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience	X2.1.1 (2) (iii) – Equivalent of 10 years of full-time relevant experience
Ryan Thacher	PE		PhD Environmental Engineering	12 years
Julie Lynne Welch			BS Environmental Engineering	26 years
Lauren Vigliotti			MS Geological Sciences	9 years
Michaela Kim			MS Geology	2 years

Dr. Ryan Thacher, PE, is a Director of Site Assessment and Remediation with Rincon Consultants. He holds a Bachelor of Science degree in Chemical Engineering from the University of California, Santa Barbara and a Doctorate degree in Environmental Engineering from the University of Southern California. He has 12 years of experience conducting research related to chemical contaminant fate and transport in soil and groundwater and developing and implementing site assessments and remediation for contaminated sites in California, including the preparation of Phase I and Phase II Environmental Site Assessments. Dr. Thacher is a Professional Engineer (#87757) with the State of California.

Julie Lynne Welch serves as the Director of Rincon's Due Diligence team, which involves the execution of hundreds of Phase I and II ESAs annually. Ms. Welch has 26 years of professional experience in the field of environmental science and assessment, during which time she has managed and contributed to a variety of successful land use, water and energy planning, and residential, commercial, industrial, and infrastructure projects.

She holds a Bachelor of Science degree in environmental engineering from Rensselaer Polytechnic Institute, Troy, New York, a Hazardous Materials Management Certificate from the University of California, Santa Barbara Extension program, and a Business Management Certificate from the University of California, San Diego Extension program.

Ms. Welch was also a member of the ASTM Committee E50 on Environmental Assessment, Risk Management and Corrective Action (2021) and routinely attends webinars and conferences regarding ASTM E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

Lauren Vigliotti is an Environmental Scientist with Rincon Consultants. Ms. Vigliotti holds a B.S. degree in Earth Sciences with a minor in Chemistry from Boston University and a M.S. degree in Geological Sciences from Brown University. Ms. Vigliotti assists with Phase I and Phase II

Environmental Site Assessments (ESAs) as part of the Environmental and Earth Systems Group. Ms. Vigliotti has nine years of professional environmental consulting experience, including coordination and execution of field investigations, data evaluation, and report preparation. She has implemented and overseen field activities such as collection of soil and groundwater samples, advancement of soil borings including soil classification, groundwater monitoring well installation, and test pit excavations. She is proficient in the completion of Phase I ESAs according to ASTM standards at commercial, industrial, and redevelopment properties, as well as Caltrans Initial Site Assessments (ISAs) and aerially deposited lead surveys.

Michaela Kim is an Environmental Scientist in Rincon's Earth and Environmental Systems group has over 2 years of experience in environmental remediation and industrial hygiene. Ms. Kim holds B.A. and M.S degrees in Geology. Ms. Kim has experience with environmental site assessments, XRF soil screening, personal and area air monitoring and sampling, and pre-demolition asbestos surveys.

County of Santa Clara Public Records

Record request #23-1433 has been closed. The closure reason supplied was:

Good afternoon,

Thank you for your recent record request received on 09/05/23 for the following address in Palo Alto:

3980 El Camino Real Palo Alto

Unfortunately, we have no records for this location. However, additional electronic documents may be found on the following websites:

- Local Oversight Program (LOP)
- GEOTracker (GT)
- Spill Reports Website – California Office of Emergency Services (Cal OES):

Please be advised that in some cities, other participating agencies may be responsible for maintaining the type of files you requested. This link may be of assistance in determining who will have the documents you are looking for in the future:

- UNIDOCS – Who regulates what in Santa Clara County

RE: PUBLIC RECORDS REQUEST of September 05, 2023, Reference # W005421-090523

Dear Luke,

I am writing in response to your requests for documents under the California Public Records Act (Govt. Code § 7920.000 et seq.) received by the City on 9/5/2023.

Your request mentioned: I am requesting any and all environmental, hazardous, AST, UST, etc records for 3980 El Camino Real Palo Alto, California. Thank you

-----

The City has reviewed its files and has determined there are no responsive documents to your request.

If you have any questions or need additional information, please feel free to contact me by responding to this message.

Sincerely,

Shannon Ford
Administrative Associate
Fire Department

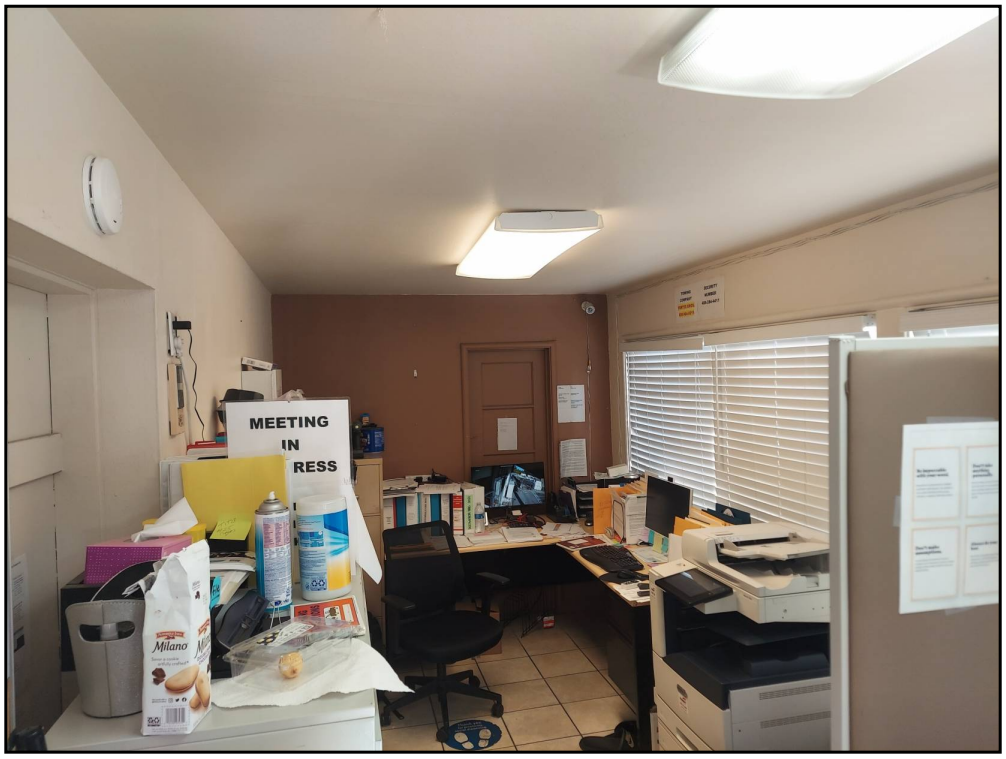
Appendix F -



Site Photographs

1: View of the Site sign.

2: View of the exterior of the office building.

3: View of the interior of the office building.

4: View of the exterior of the maintenance shop building.

5: View of the interior of the maintenance shop building.

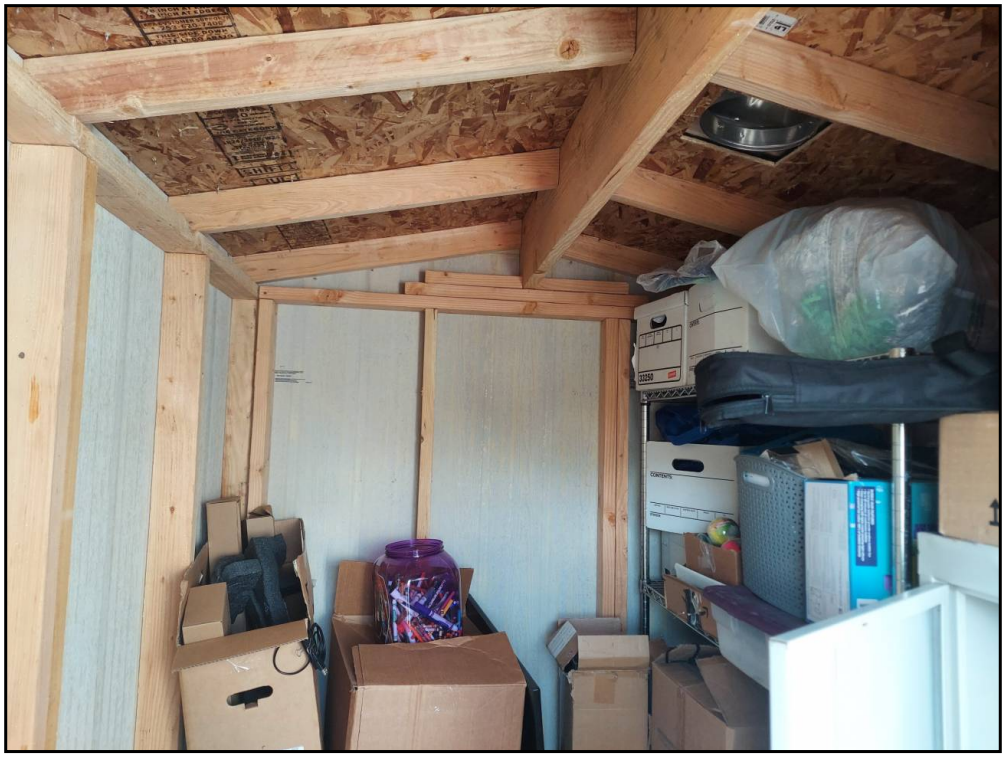
6: View of the interior of the maintenance shop building.

7: View of several containers of paints and primers.

8: View of several containers of gasoline, diesel, and oils.

9: View of the janitorial closet.

10: View of several containers of lubricants, glues, insecticides, herbicides, and paints.



11: View of the exterior of the bathroom/laundry building.

12: View of the interior of the bathroom/laundry building.

13: View of the interior of the bathroom/laundry building.

14: View of a storage shed.

15: View of the demolished former Buena Vista Motel building.

16: View of a typical bathroom.

17: View of the dumpster area on the Site.

18: View of the Site facing north.

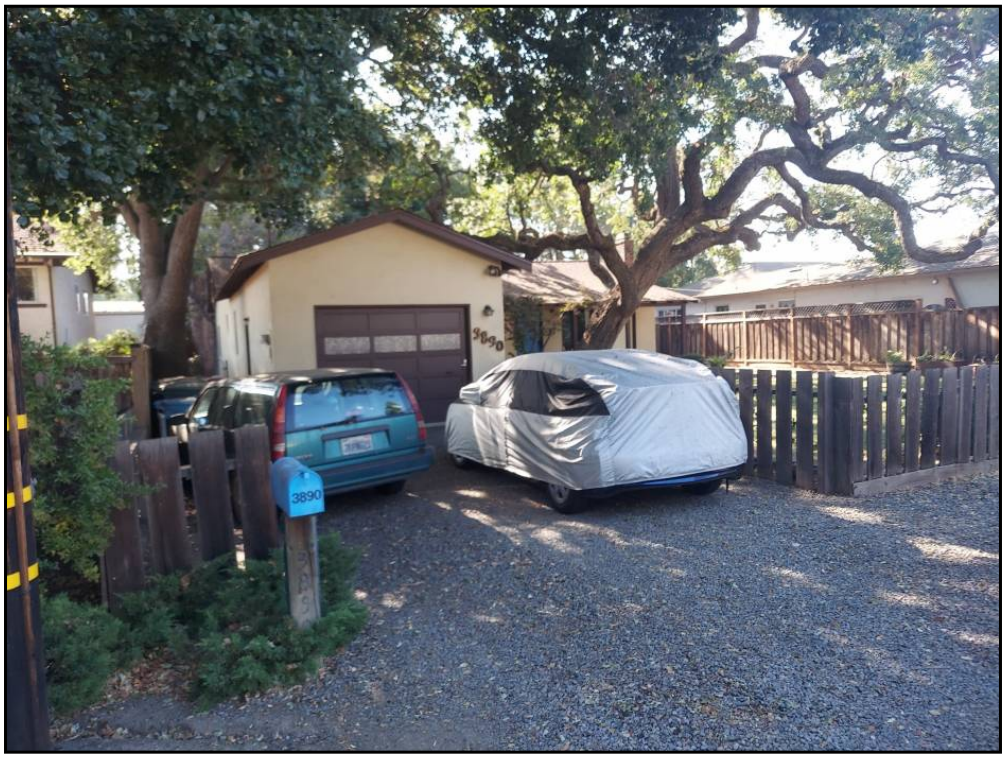
19: View of the Site facing south.

20: View of a storm water inlet on the Site.

21: View of the vacant lot to the north of the Site.

22: View of the commercial building (3990 El Camino Real) to the north of the Site.

23: View of the Valero service station (3972 El Camino Real) to the north of the site.



24: View of the residential development to the east of the Site.

25: View of the Oak Manor Townhouses (630 Los Robles Avenue) to the southwest of the Site.

26: View of the apartment building (3898 Magnolia Drive) to the northwest of the Site.

27: View of the residential development to the northwest of the Site.

28: View down Los Robles Avenue, facing southwest.

29: View down Los Robles Avenue, facing northeast.

Appendix G -

Vapor Encroachment Screening Matrix

Phase I ESA Vapor Encroachment Conditions (VEC) matrix includes a (1) Search Radius Test, (2) Chemicals of Concern Test (COC), and (3) a Critical Distance Test [1].

(1) Search Radius Test: Are there any known or suspect contaminated properties in the primary area of concern within the corresponding search radii (including the site)?

☐ Yes ☒ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(2) Chemicals of Concern Test: Are COC likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?

☐ Yes ☒ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(3) Critical Distance Test*: A plume test to determine whether or not COC in the contaminated plume(s) may be within the critical distance.

☐ Yes ☒ No — (3a) Is information related to the contaminated(s) plume available (i.e. isoconcentration maps, site drawings, etc.)?
(3b) If ***No***, then a VEC cannot be ruled out; check ***Yes*** in #4 below indicating it is likely a VEC exists. If ***Yes***, then:

☐ Yes ☒ No — (3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

☐ Yes ☒ No — (3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

*If the distance from the nearest edge of a contaminated plume to the nearest existing or planned structure on the site is less than 100 feet for non-petroleum hydrocarbon COC, or less than 30 feet for dissolved petroleum hydrocarbons, then it is presumed that a VEC *currently* exists beneath the site. If the distance from the nearest edge of the contaminated plume is greater than or equal to 100 feet for non-petroleum hydrocarbons, or 30 feet for dissolved petroleum hydrocarbon chemicals of concern, then it is presumed unlikely that a VEC *currently* exists beneath the site.

(4) Is it likely that a VEC *currently* exists beneath the site?

☐ Yes ☒ No — If ***No***, then the VEC screening is complete and no further investigation is recommended at this time. If ***Yes***, Ninyo & Moore recommends performing additional assessment, such as a Tier 2 VEC assessment according to ASTM E 2600-10.

[1] Based on guidance presented in the ASTM E 2600-10 Standard.
